Radius Care New Zealand

» Keeping the memories Forever.«
Radius Care

The Case Partner

Partner: Radius Care
Country: New Zealand
Industry: Healthcare
Employees: 1,500

Website: <http://radiuscare.co.nz/>

The challenge

- The residents have lots of physical memories such as photos, letters, and paintings.
- Such physical memories will be damaged or colour gets faded by exposing under the sun.
- There are risk of losing photos and letters over the period of long time in the facility.
- The residents would like to keep the memories in good condition forever.
- Each resident can save space by scanning precious memories which allow them to access / share their saved items at the touch of a button.

The solution

Fujitsu provided ScanSnap Series, iX500 and SV600. ScanSnap Series scan and digitized physical memories instantly by "One Push Operation" making ease for elder people to store their memories forever.

The Case Partner

Radius Care is a specialist health and aged care provider for elderly and disabled New Zealanders. It is a New Zealand owned and operated company that is committed to providing quality rest home and private hospital care for people who require help in their daily lives.

All of their health care assistants and nursing staff are highly qualified and committed to providing the very best in nursing care. Regular in-house training and on-going skills development ensures their staff are up with modern health care practices.

They take aged care in New Zealand very seriously and meet the highest standards of care to ensure all their residents are well looked after at all times.

Radius Care has 22 locations around New Zealand, employing over 1,500 staff and providing professional aged care for more than 1,700 residents.

- Residential care
- Hospital care
- Dementia care
- Respite care
- Palliative care

Radius Care is a New Zealand owned and operated company, established in 2003 to meet New Zealand's growing demand for an aged care and associated health care services. Since then, Radius has become one of the leading specialist health care providers in New Zealand, with more than 20 locations nationwide.

Early in 2010, chief executive and director Brien Cree led a management buyout of the company, which brought it back into New Zealand ownership from foreign investors. Brien's vision was to "bring some good old fashioned Kiwi values and standards" back into the aged care sector, and to make Radius Care the best aged care provider in the country.

The benefit

- Digitize their memories with one push of the scanner button
- Archive objects such as artworks and books via overhead scanner
- Maintains their memories forever
- Space saving for facility by digital archiving
- Able to easily search for the memories via text-searchable PDF
- Enables easy sharing with family via scan to cloud services

The challenge

The residents have lots of physical memories such as photos, letters, and paintings. They would like to digitize all these physical memories making sure to pass them on to their descendants.

Such physical memories will be damaged or colour gets faded by exposing under the sun. Also there are risk of losing photos and letters over the period of time spent in the centre. The resident would like to keep the memories in good condition forever.

Each resident would like to save space. Digitizing and storing memories in the PC or Cloud services, contributes to space saving in the facility.

The solution

Fujitsu provided ScanSnap iX500 which scans 25 pages of document in a minute, and SV600 which is overhead scanner enabling to scan and digitise objects that cannot be fed through the Automatic Document Feeder. ScanSnap Series scan and digitized physical memories instantly by "One Push Operation" for the resident making ease for them to store their memories forever.

ScanSnap Series comes bundled with user-friendly application, "ScanSnap Manager". It enables user to operate scanner with one push of button to digitize instantly. Also ScanSnap Manager has many useful function for keeping the memories via "Scan to cloud service", "Scan to mail", "Scan to Searchable PDF", "Scan to Word" etc.

Products and services

- Fujitsu ScanSnap SV600
- Fujitsu ScanSnap iX500
- ScanSnap Manager

The benefit

Most of the residents are not familiar with operation of scanners. Thanks to ScanSnap "One Push" operation, it helps elderly people feel more comfortable digitizing their memories. Now all residents can scan physical memories easily, anytime.

Some of the residents are now scanning all their memories into cloud services which enables them to share their memories with relatives and families who are living on the other side of the world.

ScanSnap Series is supporting their quality of life.
