Use in High-Safety Applications

This product has been designed and manufactured on the assumption that it will be used in office, personal, domestic, regular industrial, and general-purpose applications. It has not been designed and manufactured for use in applications (simply called "high-safety applications" from here on) that directly involve danger to life and health when a high degree of safety is required, for example, in the control of nuclear reactions at nuclear power facilities, automatic flight control of aircraft, air traffic control, operation control in mass-transport systems, medical equipment for sustaining life, and missile firing control in weapons systems, and when provisionally the safety in question is not ensured.

The user should use this product with adopting measures for ensuring safety in such high-safety applications. PFU Limited assumes no liability whatsoever for damages arising from use of this product by the user in high-safety applications, and for any claims or compensation for damages by the user or a third party.

1. Cautions Concerning Installation

For details about supported operating systems, refer to "System Requirements" in the Operator's Guide or Basic Operation Guide of your ScanSnap model.

Log on as a user with Administrator privileges first, then install.

2. Cautions Concerning Uninstallation

Quit the CardMinder application before uninstalling.

3. Other Cautions

- # For recognition of Chinese or Korean business cards, ScanSnap Manager must be installed.
- # The [Application] button on the toolbar does not appear right after installation. Add the button from [Customize Toolbar...].

4. Change from the previous version

Changes from V5.3L40 to V5.3L50, V5.3L51

- macOS Sierra is now supported.
- Modified the error when the back image of a card may not be scanned properly on macOS Sierra if a business card is scanned in Duplex Scan mode with the ScanSnap.

Changes from V5.3L30 to V5.3L40

- Disabling of the TLS 1.0 cryptographic protocols by Salesforce is supported.
To link with Salesforce CRM, OS X v10.9 or later is required. Unable to link with Salesforce CRM on OS X v10.8 or earlier because OS X v10.8 or earlier does not support TLS 1.1 cryptographic protocols.

Changes from V5.3L20 to V5.3L30

- The icon designs have been changed.

Changes from V5.3L10 to V5.3L20

- OS X El Capitan is now supported.

Changes from V5.2L30 to V5.3L10

- Modified the program so that PDF/JPEG files created with ScanSnap can be imported by:
 - Dragging and dropping to the Folder List view or Card Data List view in CardMinder
 - Using Export to Application in ScanSnap Organizer
- A new option has been added so that files can be saved to Photos.

Changes from V5.2L20 to V5.2L30

- OS X Yosemite is now supported.

Changes from V5.1L20 to V5.2L20

- Modified the program so that the card data dragged and dropped from the Card Data List can be saved by the file name of "Company_Full Name".
- Modified the program so the account information for Salesforce CRM linkage will be shared with the one configured for ScanSnap Organizer.
