Operator's Guide

Contents

Introduction	15
■ Manuals	16
■ About This Manual	17
Chapter 1 Overview	22
1.1 Scanner Features	23
■ Basic Uses for Scanned Data	23
■ Configure and Manage with Ease	24
■ Advanced Security Measures	26
1.2 Part Names and Functions	27
■ Front View	27
■ Rear View	28
■ Removable Parts	29
1.3 User Types and Operations	30
1.3.1 Operations with Administrator Right.....	31
1.3.2 Regular User Operations.....	35
1.4 Required Scanner Function Settings (Administrator)	36
1.5 System Requirements	41
1.5.1 Requirements for Admin Tool and User Editor.....	41
1.5.2 Requirements for Related Servers	43
1.5.3 Port Number List	48
Chapter 2 Basic Scanner Operations	50
2.1 Turning the Power On/Off	51
2.1.1 Turning the Power On	51
2.1.2 Turning the Power Off	52
2.2 Using the Scanner Buttons	53
■ Using the Power Button	53
■ Using the Scan Button	55
2.3 Using the Touch Panel	56

2.4	Using the On-Screen Keyboard	57
■	Showing/Hiding the On-Screen Keyboard	57
■	Using the On-Screen Keyboard	58
■	Keyboard Layout	58
Chapter 3	Software Installation	59
3.1	Setting Up Internet Explorer	60
■	Checking the Internet Explorer Cache Settings	60
■	Setting Trusted Sites for Internet Explorer	61
3.2	Showing the Software Download Window	62
3.3	Installing the Admin Tool	64
3.4	Uninstalling the Admin Tool	66
3.5	Installing the Central Admin Console and Central Admin Server	67
Chapter 4	Administrator Operations (Touch Panel and Admin Tool)	68
4.1	Windows	69
4.1.1	Administrator Windows via the Touch Panel	69
4.1.2	Administrator Windows via the Admin Tool	70
4.2	Administrator Login	72
4.2.1	Administrator Login: via the Touch Panel	72
■	When Automatic Login is Not Set	72
■	When Automatic Login is Set	73
4.2.2	Administrator Login: via the Admin Tool	74
4.3	Setting the System Settings	77
4.3.1	Configuring the Setting Mode	77
4.3.2	Setting the System Settings with the Installation Wizard	78
4.4	Configuring the System	80
4.4.1	Setting the Scanner Name	80
4.4.2	Setting the Language	82
4.4.3	Setting the Region/Timezone	83
4.4.4	Setting the Date/Time	84
4.4.5	Setting the Keyboard	85

4.4.6	Managing Certificates.....	86
■	Importing a Certificate File	86
■	Deleting a Certificate File	87
4.5	Setting the Scan Options	88
4.5.1	Setting the Multifeed Detection Method	88
4.5.2	Adjusting the Scan Starting Position (Offset/Magnification).....	90
4.5.3	Setting General Scanner Settings.....	91
4.6	Configuring the Login-Related Settings	92
4.6.1	Setting the Login Settings	92
4.6.2	Setting the Login Settings (Details).....	95
4.6.3	Setting the Standby Mode	97
4.6.4	Changing the Admin Password	99
4.6.5	Setting the LAN Manager Authentication Level.....	100
4.7	Configuring the Network Settings	101
4.7.1	Giving the Scanner an IP Address/DHCP	101
4.7.2	Setting the DNS Server	103
4.7.3	Setting the WINS Server	104
4.7.4	Setting the NTP Server	105
4.7.5	Setting the Proxy Server	106
4.7.6	Configuring the SNMP Settings.....	107
4.7.7	Configuring Network Advanced Settings	108
4.8	Checking the Network Status	109
4.8.1	Checking the Network Connection with a Ping Test	109
4.8.2	Checking the Network Operating Status	110
4.9	Configuring the Network Admin Settings	111
4.9.1	Setting the Admin Connection.....	111
4.9.2	Setting a Central Admin Server.....	112
4.9.3	Setting a Central Admin Server (Details)	114
4.10	Setting the Authentication Server	115
4.10.1	Setting the Login LDAP Server	115
■	LDAP Search Target	117
4.10.2	Setting the e-Mail LDAP Server	122
4.10.3	Setting the Schema	123
4.10.4	Setting the LDAP Search Parameters.....	124
4.11	Configuring the e-Mail-Related Settings	126
4.11.1	Setting the SMTP Server.....	126
4.11.2	Setting the SMTP Server (Extension)	127

4.11.3	Configuring Settings for Sending e-Mail.....	128
4.11.4	Setting a File Name Format for When Attaching Scanned Data to e-Mail.....	129
4.12	Setting the Fax Server	130
4.13	Setting Folders for Saving Scanned Data	131
4.13.1	Setting the Network Folders.....	131
■	Registering a Network Folder (Network Tree)	132
■	Registering a Network Folder (Network Path)	134
■	Renaming a Network Folder	135
■	Removing a Network Folder	135
■	Viewing the Network Folder Details	136
4.13.2	Setting the FTP Server Folders.....	137
■	Registering an FTP Server Folder	138
■	Changing the FTP Server Folder Settings	139
■	Removing an FTP Server Folder	139
■	Viewing the FTP Server Folder Details	140
4.13.3	Setting the SharePoint Folders	141
■	Registering a SharePoint Folder	141
■	Renaming a SharePoint Folder (Display Name)	143
■	Removing a SharePoint Folder	144
■	Viewing the SharePoint Folder Details	144
4.13.4	Setting a File Name Format for When Saving Scanned Data	145
4.14	Setting the Network Printers	147
■	Checking the Printer Drivers	150
■	Setting the Printer Properties (via the Print Server)	151
■	Checking the Printer Name or the IP Address for the Printer (for Direct Printing)	153
■	Checking the Driver Name for the Printer (for Direct Printing)	153
■	Registering a Network Printer (Network Tree) (via the Print Server)	154
■	Registering a Network Printer (Network Path)	156
■	Changing the Network Printer Settings	158
■	Removing a Network Printer	158
■	Viewing the Network Printer Details	159
4.15	Viewing the Scanner Details	160
4.15.1	Viewing the System Status.....	160
4.15.2	Viewing the Usage Status	161
■	Viewing the Status of Consumable Parts	161
■	Resetting the Usage Counter	161
4.15.3	Viewing the Status of Installed Options.....	162

4.15.4	Managing the User Log	163
■	Viewing the User Log Details	163
■	Downloading the User Logs in CSV Format	164
■	Clearing the User Logs	164
4.15.5	Managing the System Log.....	165
■	Viewing the System Log Details	165
■	Downloading the System Log in CSV Format	166
■	Clearing the System Log	166
4.16	Managing the User Data Store and System Settings	167
4.16.1	Maintaining the User Data Store	167
■	Backing up the User Data Store	169
■	Restoring the User Data Store	170
■	Clearing the User Data Store	170
4.16.2	Maintaining the System Settings.....	171
■	Downloading the System Settings in CSV Format	171
■	Backing up System Settings	172
■	Restoring the System Settings	173
■	Resetting to Factory Defaults	174
4.17	Maintaining the System	175
4.17.1	Updating the Scanner's System Software	175
4.17.2	Checking for New Updates.....	177
■	Checking for New Updates Manually	177
■	Checking for Updates at Scanner Startup	178
■	Requesting e-Mail Notification When a New Update is Available	178
4.17.3	Maintaining Add-in Modules.....	179
■	Installing an Add-in Module	179
■	Uninstalling an Add-in Module	180
■	Viewing the Add-in Status	180
■	Uploading an Add-in Settings File	181
■	Setting Whether to Show the Keyboard Icon When Running an Add-in ...	181
4.17.4	Setting the Information Output Level.....	182
4.17.5	Obtaining Technical Support.....	183
4.17.6	Setting the Destination for Alert Notifications	184
4.17.7	Getting a Screenshot on the Touch Panel	186
4.18	Setting a Job Sequence	188
4.18.1	Job Setting Quick User Guide	190
4.18.2	Setting a Job Sequence	192
■	Adding a Job Sequence	192
■	Cloning a Job Sequence	198

- Editing a Job Sequence 198
- Deleting a Job Sequence 199
- Filtering Job Sequences 199
- Filtering the LDAP List 200
- Splitting an Output File 201
- 4.18.3 Setting a Job Menu 202
 - Adding a Job Menu 202
 - Cloning a Job Menu 205
 - Editing a Job Menu 205
 - Deleting a Job Menu 206
 - Viewing the Detailed Settings for a Job Menu 206
- 4.18.4 Setting a Job Group 207
 - Adding a Job Group 207
 - Cloning a Job Group 210
 - Editing a Job Group 210
 - Deleting a Job Group 211
 - Viewing the Detailed Settings for a Job Group 211
 - Assigning Job Menus to Users Not Included in a Job Group 212
 - Filtering the LDAP List 213
- 4.19 Messages 214**
 - 4.19.1 Administrator Window Messages 215

Chapter 5 Regular User Operations 216

- 5.1 Loading Documents 217**
 - 5.1.1 How to Load Documents 217
 - 5.1.2 Loading Documents Using a Carrier Sheet 221
- 5.2 Using Touch Panel Windows: Regular User 224**
 - 5.2.1 [Main Menu] Window 224
 - 5.2.2 [Job Menu] Window 225
 - 5.2.3 Regular User Settings Overview 226
- 5.3 Logging in: Regular User Mode 227**
- 5.4 Sending the Scanned Data by e-Mail 230**
 - 5.4.1 Selecting an e-Mail Target from the e-Mail Address Book 233
 - 5.4.2 Adding an e-Mail Target to the e-Mail Address Book 237
 - 5.4.3 Editing an e-Mail Target in the e-Mail Address Book 241
 - 5.4.4 Deleting an e-Mail Target from the e-Mail Address Book 243
- 5.5 Sending the Scanned Data by Fax 244**
 - 5.5.1 Selecting a Fax Number from the Fax Number List 246

5.5.2	Adding a Contact to the Fax Number List	248
5.5.3	Editing the Fax Number List	250
5.5.4	Deleting a Contact from the Fax Number List	251
5.6	Printing the Scanned Data	252
5.6.1	Scaling.....	255
5.6.2	Positioning.....	259
5.6.3	Print Side.....	261
5.7	Saving the Scanned Data to a Network Folder	262
5.8	Saving the Scanned Data to a SharePoint Folder	265
5.9	Setting the Scan Options	271
5.9.1	Relational Changes among Scan Setting Items.....	272
■	Basic	272
■	Save	276
■	Image Correction	280
■	Page	281
■	Paper Feeding	282
■	Batch	282
5.9.2	Setting Image Mode	283
5.9.3	Setting Paper.....	284
5.9.4	Resolution	285
5.9.5	Configuring Settings for a Carrier Sheet	286
5.9.6	File Format	287
5.9.7	Setting a PDF Password	289
5.9.8	Searchable PDF	290
5.9.9	Setting a Keyword for the PDF	291
5.9.10	Compression	295
5.9.11	Thresholding.....	297
5.9.12	Controlling the image quality of scanned data (Control Image Tone)	298
5.9.13	Optimizing Scanned Data (Cleanup).....	299
■	In [Color] or [Grayscale] mode	299
■	In [Black & White] mode	300
5.9.14	Reducing Vertical Streaks	301
5.9.15	Removing Colors from Scanned Images (Dropout Color).....	302
5.9.16	Page Orientation	303
5.9.17	Filling the Edge of Scanned Image (Edge Correction)	305
5.9.18	Skipping Blank Pages from the Scanned Data	307
5.9.19	Detecting Multifeeds.....	308
5.9.20	Outputting Index Information	309
■	Index Information File Format	310

5.10	Enabling/Disabling the Scan Viewer	313
5.11	Editing the Scanned Data in the Scan Viewer	316
5.11.1	Switching the Page Order of the Scanned Data.....	317
5.11.2	Viewing the Scanned Data	318
	■ Changing the Display Size of Scanned Data	319
5.11.3	Editing Scanned Data on the Scan Viewer Details Window.....	319
	■ Rotating Scanned Data	319
	■ Deleting Scanned Data	320
5.11.4	Editing Scanned Data on the [Assisted Scan] Window	320
	■ Changing the Display Size of Scanned Data	322
	■ Resetting a Processed Image	322
	■ Undoing and Redoing a Process	322
	■ Rotating Scanned Data	322
	■ Changing the Image Mode of Scanned Data	322
5.11.5	Editing a Separator.....	323
5.11.6	Deleting a Separator	324
5.11.7	Scanning an Additional Page	324
5.11.8	Editing Marked Characters to Be Set as Keywords	325
5.12	Viewing the Send Status	326
5.12.1	Viewing Details on Send Operations That Were Completed (User Log)...	326
5.12.2	Viewing Details on Send Operations That Are In Progress.....	327
5.13	Maintenance	329
5.14	Processing a Job	331
5.14.1	Enabling/Disabling the Message Screen.....	333
5.14.2	Changing a File Name (for Save/e-Mail Attachment).....	335
5.14.3	Checking the Number of Sheets to Be Scanned.....	336
5.14.4	Splitting a File Using Patch Codes	339
5.15	Changing a User Password	341
Chapter 6	Scanner Care	342
6.1	Cleaning Supplies and Parts to Clean	343
	■ Cleaning Supplies	343
	■ Which Parts and When	344
6.2	Cleaning the Exterior of the Scanner	345
	■ Cleaning the Scanner Body	345
	■ Cleaning the Touch Panel	345
6.3	Cleaning Inside the Scanner	346

6.4	Cleaning a Carrier Sheet	352
6.5	Replacing Parts	353
6.5.1	Part Numbers and Replacement Cycle	353
6.5.2	Checking the Consumable Alert Status.....	354
6.5.3	Replacing the Roller Set.....	355
6.5.4	Purchasing a Carrier Sheet.....	362
6.6	Performing a Scan Test	363
■	Regular User	363
■	Administrator	365
6.7	Calibrating the Touch Panel	366
Chapter 7	Troubleshooting	367
7.1	Removing Jammed Documents	368
7.2	Network Connection Troubleshooting	371
7.2.1	Basic Network Operation Tests.....	371
■	Checking Basic Network Operation with a Ping Test	371
■	Checking the Network Operating Status	374
■	Checking the NTP Server Settings by Synchronizing the System Time ...	375
■	Checking the Mail Server by Sending a Test Mail	376
7.2.2	Other Network Connection Troubleshooting	377
■	Failure to Connect to a Server Using Its IP Address	377
■	Failure to Connect to a Server Using Its Host Name or FQDN	379
■	Failure to Add the Scanner as a Domain Member, or Failure to Login to a Domain	379
■	Failure to Add a Network Printer	380
■	Failure to Print on a Network Printer	381
■	Failure to Add a Network Folder	381
■	Failure to Save to a Network Folder	382
7.2.3	Failure to Access the Scanner Using Internet Explorer, the Admin Tool, the Central Admin Server, or the User Editor.....	383
7.3	Other Troubleshooting	386
■	Scanner Cannot Be Turned On	387
■	Scanner Does Not Start Up	387
■	I Want to Reset the Scanner to Factory Defaults	388
■	Data Cannot Be Scanned Properly	388
■	Scanned Data Is Inappropriate	391
■	Cannot Login	393
■	Operation Does Not Work	393

7.4	Points to Check before Contacting Your FUJITSU Scanner Dealer	395
7.4.1	General Details.....	395
7.4.2	Error Status	396
	■ Problem When Connecting to the Scanner via Computer	396
	■ Document Feed Trouble	396
	■ Sending an Original Document and Scanned Data	397
7.5	Checking the Scanner Labels	398
7.6	Pre-Maintenance Preparations	399
Appendix A Paper Specifications		400
A.1	Paper Size	401
A.2	Paper Quality	402
A.3	Maximum Document Loading Capacity	404
A.4	Area not to be Perforated or Affixed with Other Papers	405
A.5	Multifeed Detection Conditions	406
A.6	Conditions for Using a Carrier Sheet	407
A.6.1	Paper Size.....	407
A.6.2	Paper Quality.....	407
Appendix B Management Settings and Limits		408
B.1	e-Mail Address Setting Values	409
B.2	Limits for Setting Items	410
Appendix C Compatibility and Connectivity		412
C.1	Compatibility	413
C.1.1	Add-in Performance	413
C.1.2	Using System Settings in Other Scanners	414
C.1.3	Using User Data in Other Scanners	414
C.1.4	Sharing User Data.....	415
C.1.5	Sharing Job Settings	415
C.1.6	Distribution from the Central Admin Console Server.....	416
C.2	Connectivity	417
C.2.1	Connectivity with the Admin Tool	417
C.2.2	Connectivity with the User Editor (AddressBookEditor)	417
C.2.3	Connectivity with the Central Admin Server	418

C.2.4	Root Certification Authority List	418
C.2.5	SMTP Server Settings for Using Webmail	419
Appendix D	Scanner Specifications	420
D.1	Installation Specifications	421
D.2	Basic Scanner Specifications	422
D.3	Software Function List	423
D.4	Changing the Functions on the On-Screen Keyboard	425
D.4.1	Switching the Keyboard Layout.....	425

Introduction

Thank you for purchasing FUJITSU Image Scanner N7100 (hereinafter referred to as "the scanner").

This scanner is a network image scanner. This easy-to-operate scanner facilitates the optimal flow of office work for workgroups communicating via a network.

■ Manuals

Types of Manuals

The following manuals are prepared for the scanner. Read them as needed.

Manual	Description
N7100 Getting Started (paper)	Contains important information regarding safety. Also describes the procedure from installing the scanner to starting the scanner operation. Read this manual first. Referred to as "Getting Started" in this manual.
N7100 Operator's Guide (this manual)(PDF)	Contains information about the scanner overview, basic operations, daily cleaning, replacement of consumables, and troubleshooting. Referred to as "Operator's Guide" in this manual.
N7100 Help (HTML)	Provides information about items on the screens, and descriptions and actions to take for the messages. Read it as needed.
Scanner Central Admin User's Guide (PDF)	Provides information about overview, introduction procedure, operation procedure, and maintenance procedure for Scanner Central Admin. Read it as needed.

Accessing the Manuals

- The manuals can be accessed by downloading them from the scanner.
- When the [Help] button is available on the window or dialog box that is displayed during the operation, you can open Help by clicking it.

On the touch panel,  is displayed as a Help button.

■ About This Manual

Warning Indications Used in This Manual

The following indications are used in this manual to obviate any chance of accident or damage to you and people near you, and your property. Warning labels indicate the warning level and statements. The symbols indicating warning levels and their meanings are as follows:

This indication alerts operators to an operation that, if not strictly observed, may result in severe injury or death.

This indication alerts operators to an operation that, if not strictly observed, may result in safety hazards to personnel or damage to the product.

Symbols Used in This Manual

Besides warning indicators, the following symbols are also used in this manual:

<div style="border: 1px solid black; border-radius: 10px; padding: 5px; text-align: center; width: fit-content; margin: 0 auto;">Admin</div>	<p>This symbol is used to indicate information about administrator operations. Each operation method is indicated by the following symbols:</p> <ul style="list-style-type: none"> ● <div style="border: 1px solid black; border-radius: 10px; padding: 2px 5px; display: inline-block; margin-right: 5px;">Touch Panel</div> Administrator operating via the touch panel. ● <div style="border: 1px solid black; border-radius: 10px; padding: 2px 5px; display: inline-block; margin-right: 5px;">AdminTool</div> Administrator operating via the network interface using the Network Scanner Admin Tool. ● <div style="border: 1px solid black; border-radius: 10px; padding: 2px 5px; display: inline-block; margin-right: 5px;">Central Admin Console</div> Administrator operating via the network interface using the Scanner Central Admin Console.
<div style="border: 1px solid black; border-radius: 10px; padding: 5px; text-align: center; width: fit-content; margin: 0 auto;">User</div>	<p>This symbol is used to indicate information about regular user operations.</p>

Arrow Symbols in This Manual

Right-arrow symbols (→) are used to connect icons or menu options you should select in succession.

Example: Select the [Start] menu → [Computer].

Screen Examples in This Manual

Microsoft product screenshots are reprinted with permission from Microsoft Corporation. The screenshots used in this manual are of Windows 7/Windows Server 2012 R2. The actual windows and operations may differ depending on the operating system. If the actual screen differs from the screen examples in this manual, operate by following the actual displayed screen.

Screen examples in this manual are based on screens shown on the touch panel. Screens, setting items, and operations are different for the Admin Tool and Central Admin Console. For details about screens, refer to Help.

Screen examples and descriptions in this manual are based on screens and descriptions shown when the SharePoint Option is applied. If the SharePoint Option is not applied, screens, setting items, and operations are different.

Abbreviations Used in This Manual

The following abbreviations are used in this manual:

Abbreviation Used	Option
Windows	Windows [®] operating system
Windows Vista	Windows Vista [®] Home Basic operating system (32-bit/64-bit) Windows Vista [®] Home Premium operating system (32-bit/64-bit) Windows Vista [®] Business operating system (32-bit/64-bit) Windows Vista [®] Enterprise operating system (32-bit/64-bit) Windows Vista [®] Ultimate operating system (32-bit/64-bit)
Windows 7	Windows [®] 7 Starter operating system (32-bit) Windows [®] 7 Home Premium operating system (32-bit/64-bit) Windows [®] 7 Professional operating system (32-bit/64-bit) Windows [®] 7 Enterprise operating system (32-bit/64-bit) Windows [®] 7 Ultimate operating system (32-bit/64-bit)
Windows 8	Windows [®] 8 operating system (32-bit/64-bit) Windows [®] 8 Pro operating system (32-bit/64-bit) Windows [®] 8 Enterprise operating system (32-bit/64-bit)
Windows 8.1	Windows [®] 8.1 operating system (32-bit/64-bit) Windows [®] 8.1 Pro operating system (32-bit/64-bit) Windows [®] 8.1 Enterprise operating system (32-bit/64-bit)

Abbreviation Used	Option
Windows 10	Windows® 10 Home operating system (32-bit/64-bit) Windows® 10 Pro operating system (32-bit/64-bit) Windows® 10 Enterprise operating system (32-bit/64-bit) Windows® 10 Education operating system (32-bit/64-bit)
Windows Server 2003	Windows Server® 2003, Standard Edition Windows Server® 2003, Enterprise Edition Windows Server® 2003, Datacenter Edition Windows Server® 2003 R2, Standard Edition Windows Server® 2003 R2, Standard x64 Edition Windows Server® 2003 R2, Enterprise Edition Windows Server® 2003 R2, Enterprise x64 Edition Windows Server® 2003 R2, Datacenter Edition Windows Server® 2003 R2, Datacenter x64 Edition
Windows Server 2008	Windows Server® 2008 Standard (32-bit/64-bit) Windows Server® 2008 Enterprise (32-bit/64-bit) Windows Server® 2008 Datacenter (32-bit/64-bit)
Windows Server 2008 R2	Windows Server® 2008 R2 Standard (64-bit) Windows Server® 2008 R2 Enterprise (64-bit)
Windows Server 2012	Windows Server® 2012 Standard (64-bit)
Windows Server 2012 R2	Windows Server® 2012 R2 Standard (64-bit)
Windows Server 2016	Windows Server® 2016 Standard (64-bit)
Exchange	Microsoft® Exchange Server 2007 (supported by 64-bit operating systems only) Microsoft® Exchange Server 2010 (supported by 64-bit operating systems only) Microsoft® Exchange Server 2013 (supported by 64-bit operating systems only) Microsoft® Exchange Server 2016 (supported by 64-bit operating systems only)
.NET Framework	Microsoft® .NET Framework

Abbreviation Used	Option
SharePoint	Microsoft® Office SharePoint® Server 2007 Microsoft® SharePoint® Server 2010 (supported by 64-bit operating systems only)
Solaris 10	Solaris 10 operating system
Red Hat Enterprise Linux	Red Hat® Enterprise Linux® 4 Red Hat® Enterprise Linux® 5 Red Hat® Enterprise Linux® 6 Red Hat® Enterprise Linux® 7
SUSE Linux Enterprise Server	SUSE™ Linux Enterprise Server 10 SUSE™ Linux Enterprise Server 11
Internet Explorer	Microsoft® Internet Explorer® Windows® Internet Explorer®
IIS	Microsoft® Internet Information Services 6.0 Microsoft® Internet Information Services 7.0 Microsoft® Internet Information Services 7.5 Microsoft® Internet Information Services 8.0 Microsoft® Internet Information Services 8.5 Microsoft® Internet Information Services 10.0
SQL Server 2005 Express Edition	Microsoft® SQL Server® 2005 Express Edition
Adobe Acrobat	Adobe® Acrobat® Adobe® Acrobat® DC
Adobe Reader	Adobe® Reader® Adobe® Acrobat® Reader® DC
RightFax	RightFax Business Server (Version 9.3)
Kofax Communication Server	Kofax® Communication Server
WPF	Windows Presentation Foundation
MIB	Management Information Base
N7100	FUJITSU Image Scanner N7100
N1800	ScanSnap N1800
fi-6010N	FUJITSU Image Scanner iScanner fi-6010N

Abbreviation Used	Option
Scanner	N7100
Admin Tool	Network Scanner Admin Tool
User Editor	Network Scanner User Editor
Central Admin Console	Scanner Central Admin Console
Central Admin Server	Scanner Central Admin Server
SDK	Network Scanner Control SDK
Gmail	Gmail® Webmail Service
Yahoo! Mail	YAHOO!® Mail
AOL Mail	AOL® Mail
Windows Live Hotmail	Microsoft® Windows Live™ Hotmail®
Network Folder	A folder that is set to save scanned data in the file server or FTP server
SharePoint Folder	A folder that is set to save scanned data in SharePoint

Chapter 1

Overview

Admin User

- 1.1 Scanner Features 23
- 1.2 Part Names and Functions 27
- 1.3 User Types and Operations 30
- 1.4 Required Scanner Function Settings (Administrator) 36
- 1.5 System Requirements 41

1.1 Scanner Features

■ Basic Uses for Scanned Data

This easy-to-operate network image scanner is used to scan documents for further use:

1. Scanned data can be sent as an e-mail attachment.
2. Scanned data can be sent by fax.
3. Scanned data can be printed on a network printer.
4. Scanned data can be saved in a network folder.
5. Scanned data can be saved in a SharePoint folder.

■ Configure and Manage with Ease

Configuration and management of the scanner can be easily performed via the touch panel on the scanner or via the "Admin Tool" or the "Central Admin Console" installed on a computer.

When you use the scanner, login to the scanner as a user with the administrator right or regular user right.

For more details about the operation rights, refer to ["1.3 User Types and Operations" \(page 30\)](#).

Configuration and management of the scanner must be performed by an administrator.

- **Touch panel**
Scanner settings management can be implemented directly via the scanner's touch panel.

Setting mode

The administrator can operate the touch panel in the following setting modes.

- **Basic mode**
A setting mode for Administrators with basic knowledge of computers. Basic required scanner settings can be performed.
- **Advanced mode**
A setting mode for Administrators with advanced knowledge of networks and servers. Settings which are more advanced than those of Basic mode, such as authentication server, server environment, and advanced scanning settings, can be configured.

For details about the configuration of setting modes, refer to ["4.3.1 Configuring the Setting Mode" \(page 77\)](#).

In addition, using the Installation Wizard on the touch panel allows you to configure the minimum scanner settings required to operate the scanner. You can also use the Installation Wizard to restrict the configurable functions. For details about the configuration with the wizard, refer to "[4.3.2 Setting the System Settings with the Installation Wizard](#)" (page 78).

- **Admin Tool**

Application that connects to each scanner and configures the scanner settings. Scanner settings management and updates can be implemented via the network interface by using Admin Tool installed on a computer. The settings can be configured for one scanner at a time.
- **Central Admin Console**

Application that configures operation settings for multiple scanners, and monitors their operating status. Scanner settings management and updates can be implemented via the network interface by using Central Admin Console installed on a computer. The settings can be configured for multiple scanners at a time. This application is used for connecting with Central Admin Server, which manages multiple scanners at the same times. In this case, settings made with Central Admin Console are applied to scanners via a Central Admin Server. To use Central Admin Console, the scanner needs to be turned on. For details about Central Admin Console, refer to the Scanner Central Admin User's Guide.

■ Advanced Security Measures

The following security functions are provided for the scanner:

- Login authentication can restrict user access.
- Scanned data can be converted to password protected PDF files.
- Scanned data can be protected.

Since the scanner is intended to be shared by multiple users, data privacy is an important factor. The following security measures are used to protect the data against untoward access:

- Encryption
The scanned data is temporarily saved in the scanner while being e-mailed, faxed, printed, or saved in a folder.
The data is always saved in the disk in an encrypted form in case the disk contents are analyzed. Encrypted data will prevent the data from exposure.
- Scanned data deletion
After the scanned data has been e-mailed, faxed, printed or saved, the temporary data is deleted.
Check whether or not the scanned data has been e-mailed, faxed, printed, or saved properly in the user log. If you find any errors in the user log, try scanning again.
Even if an error interrupts this process, leaving some scanned data in the scanner, this will automatically be deleted at the next start up.
- Secure initialize
When initializing the data in the scanner, the free disk space is also overwritten with random data with no meaning. When the user data store is cleared from the scanner, the old cipher key is deleted and a new cipher key is generated.
This totally eliminates the possibility of access to any user data remaining in the free disk space.

Input pathways for files from an external memory media and for files from outside via a network are limited to a minimum by the scanner. Security patches will be provided as needed to protect the scanner against virus attacks. Taking these measures enables the scanner to be protected against virus infection.

1.2 Part Names and Functions

■ Front View

Part Name	Function
Extension	Can be pulled out and adjusted to the size of the document being scanned.
ADF paper chute	Holds the documents waiting to be scanned.
Side guides	Adjust to the width of the paper, to prevent skewing of the scanned pages.
Cover release catch	Pull to open the LCD cover.
Power button	Turns on scanner or brings up the [Login] window from standby mode or power off status. For details, refer to "Using the Power Button" (page 53) .
Scan button	Starts the scan process. For details, refer to "Using the Scan Button" (page 55) .
Touch panel	Shows menus. Operations can be performed by touching the displayed menu. For details, refer to "Using the Touch Panel" (page 56) .
LCD cover	Open by pulling the cover release catch towards you, and holding the LCD cover by the sides to replace consumable parts or clean inside the scanner.

Part Name	Function
Stacker	Pull out before scanning. Scanned documents are ejected on the stacker.
Stacker extension 1	Lift up towards you to adjust to the document length.
Stacker extension 2	Lift up towards you to adjust to the document length.

■ **Rear View**

Part Name	Function
Ventilation ports	Lets out the heated air from the inside of the scanner to the outside.
Security cable slot	Slot for commercially available security cable to prevent against theft. The following security cable is recommended: Cylindrical part: diameter 25 mm (max), length 50 mm (max) Type: Right angle (includes bent part if a straight cable is used)
Power connector	Connects the power cable to the scanner.
LAN connector	Connects the LAN cable to the scanner.
USB connector	Connects a USB device to the scanner.

■ Removable Parts

Part Name	Function
Pick roller	Helps to guide documents from the ADF paper chute to the stacker.
Brake roller	Helps to separate each sheet off documents loaded in the ADF paper chute.

1.3 User Types and Operations

When you use the scanner, login to the scanner as a user with the following operation right:

- **Regular user rights**
Operation rights given when you login to the scanner with a regular user account. For an account with regular user rights, an LDAP account, a local account, and a default account (guest account) can be used.
When you login to the scanner with these rights, you are a "regular user" of the scanner.
A regular user can scan documents and then send, print, or save the resulting data.
- **Administrator rights**
Operation rights given when you login to the scanner with an administrator account.
For an account with administrator rights, a default account (admin account) and a local account (administrator) can be used.
When you login to the scanner with these rights, you are an "administrator" of the scanner.
An administrator can set up and manage the scanner.
An administrator cannot scan documents (an administrator can perform a scan test only).

HINT

Local accounts can be edited in User Editor. For details, refer to ["Appendix F Editing Using User Editor" \(page 434\)](#).

Note that the method of login to the scanner varies depending on the user type as follows:

Operation rights	Login method		
	Touch panel	Admin Tool	Central Admin Console
Regular user rights	Yes	—	—
Administrator rights	Yes	Yes	Yes

Yes: Available —: Not available

The following table lists the operations available for the administrator and regular users.

1.3.1 Operations with Administrator Right

Item	Touch panel			Admin Tool	Central Admin Console
	Wizard	Basic mode	Advanced mode

Job Sequences (P.192)	—	—	—	Yes	Yes
Job Menus (P.202)	—	—	—	Yes	Yes
Job Groups (P.207)	—	—	—	Yes	Yes

Yes: Available —: Not available

- (*1): For the operations, refer to the Scanner Central Admin User's Guide.
- (*2): The [Date / Time] input field and [Get Time] button cannot be used.
- (*3): Certificates cannot be imported.
- (*4): Synchronization not possible.
- (*5): If you set [IPv6 Function] to [On] on the window that is displayed when [Network Advanced Settings] under [Network Settings] is selected, the menu that is displayed on the window is switched to the menu that supports the enabled IPv6 function.
- (*6): Contents of the SSL Certificate are not shown.
- (*7): [Address] and [Port Number] cannot be set.
- (*8): Printers, folders and SharePoint folders that can be accessed from the Central Admin Server can be set.
- (*9): This can be viewed on the Central Admin Console [Scanner Details] window. This cannot be viewed on the scanner settings edit window, which is displayed by pressing the [Edit Scanner Settings] button in the Central Admin Console [Scanner Settings] window.
- (*10): When using the touch panel, only the following operations can be performed:
Clearing the user data store, system settings reset, and secure initialize

- (*11): When using the touch panel, the following operations cannot be performed.
Update, add-in installation/uninstallation, and obtaining technical support information
- (*12): This can be operated from the Central Admin Console [Scanner Admin Operations] window.
This cannot be operated from the scanner settings edit window, which is displayed by pressing the [Edit Scanner Settings] button in the Central Admin Console [Scanner Settings] window.
- (*13): For Central Admin Console, selection whether to show the on-screen keyboard is not possible.

1.3.2 Regular User Operations

Item	Touch panel	Admin Tool	Central Admin Console
e-Mail (P.230)	Yes	—	—
Fax (P.244)	Yes	—	—
Print (P.252)	Yes	—	—
Save (P.262)	Yes	—	—
Scan to SharePoint (P.265)	Yes	—	—
Scan Settings (P.271)	Yes	—	—
Scan Viewer (P.313)	Yes	—	—
Maintenance			
Edit e-Mail Addresses (P.241)	Yes	—	—
Edit Fax Numbers (P.250)	Yes	—	—
Roller Cleaning (P.346)	Yes	—	—
Scan Test (P.363)	Yes	—	—
Administrator Login (P.72)	Yes	—	—
Change Password (P.341)	Yes	—	—
Consumable Alert (P.354)	Yes	—	—
Send Status (P.326)	Yes	—	—
Job (P.331)	Yes	—	—

Yes: Available —: Not available

1.4 Required Scanner Function Settings (Administrator)

Which scanner settings are required differs according to scanner functions to be used by the regular user.

The function buttons are displayed on the [Main Menu] window for the regular user, in accordance with the settings specified by the administrator.

Buttons are displayed in accordance with the settings specified by the administrator

The following shows the necessary settings for each function to be used.

Item	e-Mail	Fax	Print	Save	Scan to SharePoint
Admin Menu					
Select Mode (P.77)	A	A	A	A	A
Installation Wizard (P.78)	—	—	—	—	—

1.4 Required Scanner Function Settings (Administrator)

Item	e-Mail	Fax	Print	Save	Scan to SharePoint
Local Settings					
Import Scanner Settings (*1)	—	—	—	—	—

Job Groups (P.207)	A	A	A	A	A

N: Necessary A: Advisable —: Not required

- (*1): For the operations, refer to the Scanner Central Admin User's Guide.
- (*2): If you set [IPv6 Function] to [On] on the window that is displayed when [Network Advanced Settings] under [Network Settings] is selected, the menu that is displayed on the window is switched to the menu that supports the enabled IPv6 function.
- (*3): Set either an IPv4 address, an IPv6 address, or both.
- (*4): Required to link with a LDAP server.

1.5 System Requirements

1.5.1 Requirements for Admin Tool and User Editor

For use of Admin Tool and User Editor, the following requirements apply:

Software (English Versions)

- Operating system
 - Windows Vista (Service Pack 2 or later)
 - Windows 7 (Service Pack 1 or later)
 - Windows 8
 - Windows 8.1
 - Windows 10
 - Windows Server 2003 (Service Pack 2 or later) (supported by User Editor only)
 - Windows Server 2008 (Service Pack 2 or later)
 - Windows Server 2008 R2 (Service Pack 1 or later)
 - Windows Server 2012
 - Windows Server 2012 R2
 - Windows Server 2016
- .NET Framework
 - Admin Tool
 - .NET Framework 4.5
 - .NET Framework 4.6
 - User Editor
 - Which .NET Framework is used depends on the operating system.

Operating System	.NET Framework (*1)
Windows Vista Windows 7 Windows Server 2003 Windows Server 2008 Windows Server 2008 R2	.NET Framework 2.0 (Service Pack 2 or later) .NET Framework 3.0 (Service Pack 2 or later) .NET Framework 3.5 (Service Pack 1 or later)
Windows 8 Windows 8.1 Windows Server 2012 Windows Server 2012 R2	.NET Framework 4.5
Windows 10 Windows Server 2016	.NET Framework 4.6

- Web browser
 - Internet Explorer 7.0 or later (*2)

- (*1): If .NET Framework is not installed, the administrator will be notified. Download .NET Framework from the Microsoft Web site and install it into the computer. When installing .NET Framework, check that there is enough free disk space. Additional free disk space of at least 500 MB for .NET Framework 2.0 or at least 2 GB for .NET Framework 4.5 is required.
- (*2): For Admin Tool, confirm that the latest security patch has been applied. If the latest patch has not been applied, download operations (such as manual download) may not be possible. If download operations are not possible, clear the [Do not save encrypted pages to disk] check box on [Advanced] of [Internet Options] in Internet Explorer, and then try downloading again. If the Web browser is Internet Explorer 10 or later, configure [Compatibility View settings] so that the specified URL is displayed in compatibility view.

ATTENTION

Make sure that the language settings for the computer where Admin Tool and User Editor are installed are the same as the language settings for the scanner.

Hardware

- Computer that runs the supported software and meets the following conditions:
 - 32 MB or more of free memory space
 - 64 MB or more of free disk space
- XGA monitor or better
- LAN cable
- Pointing device (input device such as mouse)

1.5.2 Requirements for Related Servers

For servers that can be linked with the scanner, the following requirements apply. For the supported versions and editions of each operating system, refer to "[Abbreviations Used in This Manual](#)" (page 18).

Server	Operating System	Function
LDAP server (Active Directory)	Windows Server 2003 Windows Server 2008 Windows Server 2008 R2 Windows Server 2012 Windows Server 2012 R2 Windows Server 2016	Authentication
LDAP server (OpenLDAP)	OpenSolaris Solaris10 Red Hat Enterprise Linux SUSE Linux Enterprise Server	
SMTP Server (SMTP, Exchange)	Windows Server 2003 Windows Server 2008 Windows Server 2008 R2 Windows Server 2012 Windows Server 2012 R2 Windows Server 2016	e-Mail (SMTP Server)
File Server (Network Folder)	Windows Server 2003 Windows Server 2008 Windows Server 2008 R2 Windows Server 2012 Windows Server 2012 R2 Windows Server 2016	Save (Network Folder)
File Server (Samba)	OpenSolaris Solaris10 Red Hat Enterprise Linux SUSE Linux Enterprise Server	
FTP Server	Windows Server 2003 Windows Server 2008 Windows Server 2008 R2 Windows Server 2012 Windows Server 2012 R2 Windows Server 2016	Save (FTP Server Folder)

Server	Operating System	Function
SharePoint Server	Windows Server 2003 Windows Server 2008 Windows Server 2008 R2	Save (SharePoint Folder)
Print Server	Windows Server 2003 Windows Server 2008 Windows Server 2008 R2 Windows Server 2012 Windows Server 2012 R2 Windows Server 2016	Print (Network Printer) (*1)
Fax Server	Windows Server 2003 Windows Server 2008 Windows Server 2008 R2 Open Text RightFax Kofax Communication Server Internet FAX	Fax (Fax Server)
DNS Server	Windows Server 2003 Windows Server 2008 Windows Server 2008 R2 Windows Server 2012 Windows Server 2012 R2 Windows Server 2016	DNS DNSv6 (*2)
WINS Server	Windows Server 2003 Windows Server 2008 Windows Server 2008 R2 Windows Server 2012 Windows Server 2012 R2 Windows Server 2016	WINS
DHCP Server	Windows Server 2003 Windows Server 2008 Windows Server 2008 R2 Windows Server 2012 Windows Server 2012 R2 Windows Server 2016	DHCP DHCPv6 (*2)

Server	Operating System	Function
NTP Server	Windows Server 2003 Windows Server 2008 Windows Server 2008 R2 Windows Server 2012 Windows Server 2012 R2 Windows Server 2016 Red Hat Enterprise Linux	NTP
SNMP Server	Windows Server 2003 Windows Server 2008 Windows Server 2008 R2 Windows Server 2012 Windows Server 2012 R2 Windows Server 2016	SNMP

(*1): To use as network printer, Windows 8 compatible printer driver must be installed.

(*2): Windows Server 2003 is not supported.

LDAP Server

LDAP (Lightweight Directory Access Protocol) is a protocol for accessing a directory databases over a TCP/IP network. It can be used to administrate networked users e-mail addresses and operating environments.

When connected using encryption (SSL), this is called the "LDAPS Server".

The LDAP server can be used to perform the following:

- User authentication at various logins
- Finding or entering e-mail addresses in an address book

SMTP Server

SMTP (Simple Mail Transfer Protocol) is a protocol for sending e-mail.

The SMTP server can be used to perform the following:

- Sending the scanned data as an e-mail
- Sending the scanned data by fax

File Server

The file server shares the disk on a server with other computers on a network, and enables use of the disk from an external computer.

Using this file server enables scanned data to be saved to a network folder.

FTP Server

FTP (File Transfer Protocol) is a standard network protocol used for copying files between hosts on the network based on TCP/IP.

An FTP server which connects with SSL encryption is called an "FTPS Server".

Using this FTP server enables scanned data to be saved to an FTP server folder.

SharePoint Server

SharePoint is the collective name for the elements of a Web browser based document management platform provided by Microsoft.

Using a SharePoint server enables scanned data to be saved to a SharePoint folder.

Print Server

The print server refers to the computer or device used when multiple client computers use a printer on the network. It receives print requests from the client computers on the network and delivers them to the printer connected with the print server.

ATTENTION

- Windows 8 compatible printer drivers (32-bit) must be registered.
- Printer must be able to spool print jobs (to hard disk or memory). Contact your printer dealer if uncertain whether your printer has a spool function.
- Printers that allow the status of print errors to be easily checked (via an LCD control panel, or similar) are recommended.

Fax Server

The fax server refers to the computer equipped with a fax modem or a dedicated fax board connected with a telephone line. It is used for sending faxes.

This scanner supports the following fax servers:

- RightFax
- StoneFax (Kofax Communication Server)
- Internet FAX

This fax server can be used to send the scanned data by fax.

DNS server

The function of DNS servers is the translation (resolution) of humanly memorable host names and FQDN into the corresponding numeric IP addresses.

WINS Server

The WINS server handles name registration requests from WINS clients and registers their names and IP addresses with the server database. The WINS server responds to NetBIOS name queries submitted by clients and returns the IP address of the queried name if it is listed in the server database.

In addition, when a DNS name resolution fails, the query can be transferred to the WINS server.

DHCP Server

DHCP (Dynamic Host Configuration Protocol) is an auto-configuration protocol used for an IP network. Network administrator intervention is not required when the DHCP server is used because it assigns the IP addresses of scanners as well as computers automatically.

NTP Server

NTP (Network Time Protocol) is a protocol to synchronize the time of computers on the network with the correct time.

It is used when a client makes a time query through the network.

SNMP Server

SNMP (Simple Network Management Protocol) is a protocol for managing network.

This scanner supports the SNMP version of SNMP v1 only.

1.5.3 Port Number List

Function	From/To	Port Number	Protocol Number
Admin Tool Connection	Admin Tool ⇔ Scanner	80 (HTTP) (*)	6 (TCP)
		443 (HTTPS) (*)	6 (TCP)
Central Admin Server Connection	Central Admin Server ⇔ Scanner	80 (HTTP) (*)	6 (TCP)
		443 (HTTPS) (*)	6 (TCP)
	Scanner ⇔ Central Admin Server	20444 (HTTP/HTTPS) (*)	6 (TCP)
DHCP (Address Auto-configuration)	Scanner ⇔ DHCP server	67 (DHCP)	17 (UDP)
DNS (Domain Name System)	Scanner ⇔ DNS server	53 (DNS)	17 (UDP/TCP)
WINS (WINS Server)	Scanner ⇔ WINS server	1512 (WINS)	17 (UDP)
NTP (Synchronization)	Scanner ⇔ NTP server	123 (SNTP)	17 (UDP)
Proxy Connection	Scanner ⇔ Proxy server	Free	6 (TCP)
SNMP	SNMP client ⇔ Scanner	161 (SNMP)	17 (UDP)
	Scanner ⇔ SNMP client	162 (SNMP TRAP)	17 (UDP)
LDAP Search (Authentication/ e-Mail Address Search)	Scanner ⇔ LDAP server	389 (LDAP) (*)	6 (TCP)
		636 (LDAPS) (*)	6 (TCP)
		3268 (Active Directory Global Catalog) (*)	6 (TCP)
		3269 (Active Directory Global Catalog over SSL) (*)	6 (TCP)
Sending e-Mail	Scanner ⇔ SMTP server	25 (SMTP) (*)	6 (TCP)
		465 (SMTP over SSL) (*)	6 (TCP)
		587 (SMTP over STARTTLS) (*)	6 (TCP)
Sending Fax	Scanner ⇔ SMTP server	25 (SMTP) (*)	6 (TCP)
		465 (SMTP over SSL) (*)	6 (TCP)
		587 (SMTP over STARTTLS) (*)	6 (TCP)

Function	From/To	Port Number	Protocol Number
Print	Scanner ⇔ Print server	137,138,139,445 (SMB)	6 (TCP) 17 (UDP)
	Scanner ⇔ Network printer	9100 (Standard TCP/IP port monitor)	6 (TCP)
Scan to SharePoint	Scanner ⇔ SharePoint server	80 (HTTP) (*)	6 (TCP)
		443 (HTTPS) (*)	6 (TCP)
Saving to FTP	Scanner ⇔ FTPS server	20, 21 (FTP) (*)	6 (TCP)
	Scanner ⇔ FTPS server	989, 990 (FTPS) (*)	6 (TCP)
Saving to a Folder	Scanner ⇔ File server	137,138,139,445 (SMB)	6 (TCP) 17 (UDP)
Ping	Scanner ⇔ Another computer or server	None	1 (ICMP)
User Editor Connection	User Editor ⇔ Scanner	80 (HTTP) (*)	6 (TCP)
		443 (HTTPS) (*)	6 (TCP)

(*): Changing the port number is possible

Chapter 2

Basic Scanner Operations

- 2.1 Turning the Power On/Off 51
- 2.2 Using the Scanner Buttons 53
- 2.3 Using the Touch Panel 56
- 2.4 Using the On-Screen Keyboard 57

2.1 Turning the Power On/Off

2.1.1 Turning the Power On

Do not move or shake the scanner when it is turned on.
This may damage components in the scanner and cause data to be lost.

1. Press the power button.

⇒ After the scanner starts up, the [Login] window appears.
The Installation Wizard may be shown depending on the settings.

ATTENTION

After turning the power off, wait for at least 10 seconds before turning the power back on again.

2.1.2 Turning the Power Off

1. Press the [Shutdown] button on the [Login] window.

ATTENTION

To turn the scanner off, make sure to press the [Shutdown] button.

Do not force the scanner to turn off by holding down the power button for 4 seconds or longer.

It may cause the scanner to function abnormally.

⇒ A confirmation window appears.

2. Press the [OK] button.

⇒ The scanner power is turned off.

2.2 Using the Scanner Buttons

■ Using the Power Button

When the scanner is off or in standby mode, pressing the power button will start the scanner up and display the [Login] window.

When the scanner is on, pressing the power button will show a message.

(*1): The following operation will start up the scanner from standby mode.

- Touching the touch panel

Depending on the device, if a human interface device such as an external keyboard is connected to the scanner via USB, any key operations will also startup the scanner.

The window displayed after restarting varies according to the automatic settings in the following way:

- If automatic login is enabled, the operation window is displayed.
- If automatic login is disabled, the [Login] window is displayed.

- (*2):
- When the scanner power button is pressed while a window displaying the [Shutdown] button is shown, the "Please release the power button and select shutdown to turn the scanner off." message appears.
 - When the scanner power button is pressed while a window not displaying the [Shutdown] button is shown, the "Please release the power button. Can not shutdown scanner because the system is in operation." message appears.
- (*3): If [Turn off the display only] is set for [Standby Mode] on the administrator window, only the display turns off. The power button stays lit up.

ATTENTION

- When the scanner is running or in standby mode, do not hold down the power button for 4 seconds or longer, as it may cause the scanner to shutdown. If this happens, saved scanned data may become unusable.
If you hold down the power button for 4 seconds or longer and the scanner is shutdown, remove the AC cable to ensure that the power is completely off.
- After turning the power off, wait for at least 10 seconds before turning the power back on again. To shutdown the scanner correctly, press the [Shutdown] button on the window.

HINT

- If the scanner is left in standby mode until the time set for [Power-off after], the power of the scanner is automatically turned off. Note that if this occurs, it takes time to turn the scanner on again.
- The time to enter standby mode and to power off the scanner can be changed. For details, refer to ["4.6.3 Setting the Standby Mode" \(page 97\)](#).
- Automatic login without displaying the [Login] window is possible. For details about how to set automatic login, refer to ["4.6.1 Setting the Login Settings" \(page 92\)](#).
- If automatic login is set, login via the Admin Tool is possible while the main menu or job menu is displayed.

■ Using the Scan Button

When a button with  is displayed on the touch panel, the Scan button can be used.

 is displayed in the lower right of the regular user window.

When a button with  is displayed, the Scan button can be pressed to start the scan.

Buttons with  are as follows:

- [Scan]
- [Scan & Send]
- [Scan & Print]
- [Scan & Save]
- [Scan More]

One of those buttons on the touch panel can be pressed to start the scan.

2.3 Using the Touch Panel

When using the touch panel, buttons only need to be lightly pressed to select them.

For details about the touch panel, refer to the following:

- ["4.1.1 Administrator Windows via the Touch Panel" \(page 69\)](#)
- ["5.2 Using Touch Panel Windows: Regular User" \(page 224\)](#)

ATTENTION

- Do not use a pen or other hard objects on the touch panel.
The touch panel may be damaged.
- If the screen is dirty, this may cause the touch panel to malfunction. Clean the screen if it is visibly dirty.
For details about how to perform cleaning, refer to ["Cleaning the Touch Panel" \(page 345\)](#).

2.4 Using the On-Screen Keyboard

On the touch panel, the on-screen keyboard can be used to enter text in the input field on the window.

The on-screen keyboard can be used in the following ways.

■ Showing/Hiding the On-Screen Keyboard

To show/hide the on-screen keyboard, press the following button displayed on the touch panel.

Button	Description
	<p>This button is displayed when the input field for an item is selected and the on-screen keyboard is shown.</p> <p>The on-screen keyboard is displayed to enable entering characters.</p> 
	<p>This button is displayed when no input field is selected.</p> <p>In this state, the on-screen keyboard cannot be displayed.</p>

In the [Login] window, the on-screen keyboard is automatically displayed.

HINT

- You can use the [Keyboard Settings] window to set the on-screen keyboard not to be displayed.
For details, refer to ["4.4.5 Setting the Keyboard" \(page 85\)](#).
- For an Add-in, you can use the [Add-in Software] window to set the on-screen keyboard not to be displayed when running an Add-in.
When you display the on-screen keyboard when running an Add-in, you can change the display location of the button used for displaying the on-screen keyboard.
For details, refer to ["4.17.3 Maintaining Add-in Modules" \(page 179\)](#).

■ Using the On-Screen Keyboard

Key	Function
Tab	Switches focus to the input field.
Enter	Performs the following. <ul style="list-style-type: none">● Closes the on-screen keyboard if it is displayed.● Inserts a line feed when multiple lines are input in the input field.● Commits the input in the [Login] window.

HINT

When logged in via the touch panel, the administrator cannot select the menu items using the on-screen keyboard.

Select buttons in the menu on the touch panel.

■ Keyboard Layout

The on-screen keyboard is compliant with the QWERTY layout.

The keyboard layout of the on-screen keyboard can be switched by pressing a specific key. For details, refer to ["D.4 Changing the Functions on the On-Screen Keyboard" \(page 425\)](#).

Chapter 3

Software Installation

Admin

This chapter describes how to install the software required for scanner configuration and management as well as the pre-settings required for installation.

3.1 Setting Up Internet Explorer	60
3.2 Showing the Software Download Window.....	62
3.3 Installing the Admin Tool	64
3.4 Uninstalling the Admin Tool	66
3.5 Installing the Central Admin Console and Central Admin Server	67

3.1 Setting Up Internet Explorer

This section describes the Internet Explorer settings required for installing the Admin Tool.

ATTENTION

- The setup procedure may differ depending on the version of Internet Explorer.
- Configure the network settings to not use a proxy server.

HINT

- If any updates or service packs are available for Internet Explorer, make sure they are applied.
- For the system requirements for using the Admin Tool, "[1.5.1 Requirements for Admin Tool and User Editor](#)" (page 41).

■ Checking the Internet Explorer Cache Settings

Check the Internet Explorer cache settings.

1. **Select [Internet Options] from the [Tools] menu in Internet Explorer.**
 - ⇒ The [Internet Options] dialog box appears.
2. **On the [General] tab, press the [Settings] button for [Browsing history].**
 - ⇒ The [Temporary Internet Files and History Settings] dialog box appears.
3. **For [Check for newer versions of stored pages], select [Automatically].**
4. **For [Disk space to use], specify 63 MB or above.**
5. **Press the [OK] button.**

■ Setting Trusted Sites for Internet Explorer

Add the URL of a target scanner to a local intranet or add it as a trusted site for Internet Explorer.

If not set, connection to a scanner is blocked, and certification cannot be installed.

Adding the Scanner to a Local Intranet

1. **Select [Internet Options] from the [Tools] menu in Internet Explorer.**
 - ⇒ The [Internet Options] dialog box appears.
2. **On the [Security] tab, select [Local Intranet].**
3. **Press the [Sites] button.**
 - ⇒ The [Local Intranet] dialog box appears.
4. **Press the [Advanced] button.**
5. **Clear the [Require server verification (https:) for all sites in this zone] check box.**
6. **Enter the URL of the scanner in the [Add this website to the zone] field, and press the [Add] button.**

Example: `http://IP_address or scanner_name/`

Adding the Scanner as a Trusted Site

1. **Select [Internet Options] from the [Tools] menu in Internet Explorer.**
 - ⇒ The [Internet Options] dialog box appears.
2. **On the [Security] tab, select [Trusted sites].**
3. **Press the [Sites] button.**
 - ⇒ The [Trusted sites] dialog box appears.
4. **Clear the [Require server verification (https:) for all sites in this zone] check box.**
5. **Enter the URL of the scanner in the [Add this website to the zone] field, and press the [Add] button.**

Example: `http://IP_address or scanner_name/`

3.2 Showing the Software Download Window

To show the download window for installing the software, follow the procedure below.

1. Access the scanner from Internet Explorer by specifying the scanner name in a URL.

According to the settings described in "[4.9.1 Setting the Admin Connection](#)" (page 111), specify the URL in one of the following ways:

- SSL is [Off], no port number change
`http://scanner_name or IP_address/`
- SSL is [Off], port number change
`http://scanner_name or IP_address:port_number/`
For port_number, enter the changed port number.
- SSL is [On], no port number change
`https://scanner_name or IP_address/`
- SSL is [On], port number change
`https://scanner_name or IP_address:port_number/`
For port_number, enter the changed port number.

With SSL, a security alert is displayed when the scanner is connected. Even so, continue browsing.

⇒ The login window appears.

2. Enter the user name and password of the administrator.

The screenshot shows a light blue login window. In the top right corner, there are two buttons: "Getting Started" and "Operator's Guide". Below these, on the left side, are the labels "User Name" and "Password" above two white text input fields. In the bottom right corner, there is a "Login" button.

3. Press the [Login] button.

⇒ The download window appears.

3.3 Installing the Admin Tool

To download and install the Admin Tool on a computer, follow the procedure below.

1. **Access the scanner from Internet Explorer by using the scanner name in a URL to show the download window.**

For details about how to display the download window, refer to "[3.2 Showing the Software Download Window](#)" (page 62).

2. **Press the [Next] button for [Network Scanner Admin Tool].**

⇒ The Admin Tool download window appears.

3. **Press the [Download] button.**

ATTENTION

- Downloading is not possible while a scanner operation is in process.
- Do not close Internet Explorer or log out until the installation is complete.
- Installation fails if the length of any installation path (folder path plus installation file name) exceeds 259 characters. Select an installation folder that respects this limit.

HINT

If .NET Framework is not installed, access the Microsoft Web site before installing Admin Tool.

After installing .NET Framework, try again from [Step 1](#).

⇒ From here on after, follow the instructions on the window to proceed the operation.

When "Network Scanner Admin Tool has been successfully installed" is displayed, the installation is complete. Press the [Close] button.

⇒ After the installation is complete, log out from the scanner by pressing the [Logout] button on the download window and close Internet Explorer.

⇒ After installation, Admin Tool can be started.

For details about how to start Admin Tool, refer to "[4.2.2 Administrator Login: via the Admin Tool](#)" (page 74).

ATTENTION

- From the [Tools] menu in Internet Explorer, select [Internet Options], and note the following points below about the settings shown in the [Internet Options] dialog box.
 - In the [Accessibility] dialog box shown when the [Accessibility] button is pressed on the [General] tab, do not change the formatting and user style sheet settings. If these settings are changed, the displayed style of the Admin Tool may be corrupted.
 - In the [Language Preference] dialog box shown when the [Languages] button is pressed on the [General] tab, move the same language as for the scanner to the top. If a different language is specified, a problem may occur with the input or displays for Admin Tool.
 - On the [Security] tab, if [Security level for this zone] is set to [High], part of the Admin Tool window may not be correctly displayed.
In this case, on the [Security] tab, add the scanner to the trusted site zone and press the [Default Level] button. Or press the [Custom Level] button and set [Binary and script behaviors] to [Enable].
- When the font size is large, part of the dialog box may not be shown correctly. In this case, use a smaller font size.

3.4 Uninstalling the Admin Tool

This section uses Windows 7 as an example.

To uninstall Admin Tool, select [Control Panel] → [Programs] → [Programs and Features] on the computer where it is installed.

ATTENTION

Close Admin Tool before uninstalling.

If Admin Tool is uninstalled while still open, normal operation of the running Admin Tool is not guaranteed.

3.5 Installing the Central Admin Console and Central Admin Server

The Central Admin Console and Central Admin Server are necessary in order to enable management under central administration.

To install the Central Admin Console and Central Admin Server, go to the web page below and download the software.

<http://www.fujitsu.com/global/support/computing/peripheral/scanners/drivers/sca.html>

For details about the installation method, refer to the Scanner Central Admin User's Guide.

ATTENTION

To enable management with the Central Admin Console, the scanner and the Central Admin Server need to be connected by specifying settings in the following administrator windows.

- [Admin Connection] window
For details, refer to "[4.9.1 Setting the Admin Connection](#)" (page 111).
- [Scanner Central Admin Server] window
For details, refer to "[4.9.2 Setting a Central Admin Server](#)" (page 112).

Chapter 4

Administrator Operations (Touch Panel and Admin Tool)

Admin

This chapter provides an explanation of administrator operations (setting up and managing the scanner) via the scanner's touch panel, or via the network interface using the Admin Tool.

4.1 Windows	69
4.2 Administrator Login.....	72
4.3 Setting the System Settings.....	77
4.4 Configuring the System.....	80
4.5 Setting the Scan Options	88
4.6 Configuring the Login-Related Settings	92
4.7 Configuring the Network Settings	101
4.8 Checking the Network Status	109
4.9 Configuring the Network Admin Settings.....	111
4.10 Setting the Authentication Server	115
4.11 Configuring the e-Mail-Related Settings.....	126
4.12 Setting the Fax Server	130
4.13 Setting Folders for Saving Scanned Data.....	131
4.14 Setting the Network Printers.....	147
4.15 Viewing the Scanner Details	160
4.16 Managing the User Data Store and System Settings.....	167
4.17 Maintaining the System.....	175
4.18 Setting a Job Sequence.....	188
4.19 Messages	214

4.1 Windows

4.1.1 Administrator Windows via the Touch Panel

Selecting a menu displays the setting window for the menu in the right side of the window. Scrolling the area in the left side of the window displays all the menus.

Menu

- When the [Job Menu Settings] button is pressed
Pressing the [Job Menu Settings] button on the Tool Menu shows the window for setting jobs.

Job Settings Menus

Tool Menu

4.2 Administrator Login

HINT

- The default user name and password for the administrator are set as follows:
User name: admin
Password: password
- The scanner setup can be configured by one user.

4.2.1 Administrator Login: via the Touch Panel Touch Panel

■ When Automatic Login is Not Set

1. Enter the user name and password of the administrator.

The screenshot displays the login interface on a touch panel. At the top, there is a 'Login' header with a question mark icon. Below the header, there are two input fields: 'User Name' and 'Password'. At the bottom of the screen, there is a 'Shutdown' button with a power icon and a 'Login' button with a lock icon. A virtual keyboard is overlaid on the screen, showing keys for letters, numbers, and navigation.

HINT

If [Active Directory Global Catalog] is selected for the login LDAP server, the [UPN Suffix] input field is displayed.

A UPN suffix is not required when logging in as an administrator. Even if entered, it is ignored.

2. Press the [Login] button.

⇒ When authenticated, the administrator window is shown.

■ When Automatic Login is Set

When automatic login has been set, login to the administrator windows from the regular user window.

1. From the [Maintenance] window, press the [Administrator Login] button.

⇒ The [Administrator Login] window appears.

The image shows a dialog box titled "Administrator Login". The title bar is black with the text "Administrator Login" in white. On the right side of the title bar, there is a question mark icon and a keyboard icon. The main area of the dialog box is light gray and contains two text input fields. The first field is labeled "User Name" and the second is labeled "Password". At the bottom of the dialog box, there is a black bar with two buttons: "Cancel" on the left and "OK" on the right. The "OK" button is highlighted in blue.

2. Enter the user name and password of the administrator.

3. Press the [OK] button.

⇒ When authenticated, the administrator window is shown.

4.2.2 Administrator Login: via the Admin Tool AdminTool

Using the Admin Tool allows the administrator to set up the scanner from a computer via the network interface.

This section explains how to login using the Admin Tool.

When an administrator or user is already logged into a scanner, login via the Admin Tool is not possible.

However, if automatic login is set, login via the Admin Tool is possible while the main menu or job menu is displayed.

ATTENTION

- If the normal screen display does not appear (for example: an "X" mark appears), wait for a few minutes and try again. If the problem still occurs, contact your FUJITSU scanner dealer or an authorized FUJITSU scanner service provider.
- If a button is rapidly pressed many times in succession, a "Communication error" message may appear. In this case, wait for a few minutes and try again.

HINT

- For details about the system requirements to manage the scanner via a computer, refer to ["1.5.1 Requirements for Admin Tool and User Editor" \(page 41\)](#).
- If you do not perform any of the following operations for 20 minutes or more while the Admin Tool is being used, the session times out.
 - Button or tab operations on the menu
 - Button operations on each setting window (except selecting items or inputting values)Also, when [Secure initialize] is performed on the [System Settings File] window, the session does not time out until the process is complete, because the [Secure initialize] process takes longer than 20 minutes.
- The following are required for administrator login via the Admin Tool:
 - ["4.4.1 Setting the Scanner Name" \(page 80\)](#)
 - ["4.6.4 Changing the Admin Password" \(page 99\)](#)
 - ["4.7.1 Giving the Scanner an IP Address/DHCP" \(page 101\)](#)
 - ["4.7.2 Setting the DNS Server" \(page 103\)](#)
 - ["4.7.3 Setting the WINS Server" \(page 104\)](#)
 - ["4.9.1 Setting the Admin Connection" \(page 111\)](#)

1. Start the Admin Tool.

- Windows Vista/Windows 7/Windows Server 2008/Windows Server 2008 R2
Select the [Start] menu → [All Programs] → [Network Scanner] → [Network Scanner Admin Tool].
- Windows 8/Windows Server 2012
Right-click the Start screen, and select [All apps] on the app bar → [Network Scanner Admin Tool] under [Network Scanner].
- Windows 8.1/Windows Server 2012 R2
Select [↓] on the lower left of the Start screen, and click [Network Scanner Admin Tool] under [Network Scanner].
To display [↓], move the mouse cursor.
- Windows 10/Windows Server 2016
Select [Start] menu → [All apps] → [Network Scanner] → [Network Scanner Admin Tool].

⇒ The Admin Tool is started.

2. Specify the [Connect to] (of the scanner).

Enter the IP address, scanner name, or FQDN for the scanner to be setup or managed.

ATTENTION

- If the port number was changed in "[4.9.1 Setting the Admin Connection](#)" (page 111), enter the changed port number in [Port Number].
- When trying to connect with a port number other than the specified number, it takes up to 20 seconds before a connection error occurs.
- To use SSL, select the [Use HTTPS] check box.
- If the Admin Tool is started while there is insufficient free memory, an error may occur. Try again after ensuring that there is enough free memory.

- 3. Press the [Connect] button.**
⇒ The login window appears.
- 4. Enter a [User Name] and [Password].**

The screenshot shows a window titled "Network Scanner Admin Tool" with a menu bar containing "Exit", "Disconnect", "Scanner Settings", "Job Menu Settings", "Download Manual", "About...", and "Help". The main area is light blue and contains two text input fields: "User Name" and "Password". A "Login" button is located in the bottom right corner.

- 5. Press the [Login] button.**
⇒ When authenticated, the administrator window is shown.

4.3 Setting the System Settings

4.3.1 Configuring the Setting Mode Touch Panel AdminTool

Set the setting mode used for configuring or managing system settings.

For details about the setting modes, refer to "1.1 Scanner Features" (page 23).

For details about the operations available in each setting mode, refer to "1.3.1 Operations with Administrator Right" (page 31).

1. On the administrator window, select [Admin Menu], or press  or .

HINT

Press  when [Basic] is selected for the setting mode. Press  when [Advanced] is selected.

⇒ The [Admin Menu] window appears.

2. Select a setting mode.
3. Select the check boxes for functions that you want to make configurable.

4. Press the [OK] button.

⇒ The setting mode is set.

HINT

When you use the FAX function, enable the e-Mail function as well.

4.3.2 Setting the System Settings with the Installation Wizard Touch Panel

Using the Installation Wizard allows you to configure the minimum scanner settings required to operate the scanner.

The following items can be set.

- Scanner Name
- Region/Timezone
- Date/Time
- Login Settings
- Admin Password
- IP Address
- DNS Server
- Scanner Central Admin Server

1. On the administrator window, select [Admin Menu], or press  or .

HINT

Press  when [Basic] is selected for the setting mode. Press  when [Advanced] is selected.

⇒ The [Admin Menu] window appears.

2. Press the [Installation Wizard] button.

⇒ The [Installation Wizard] window appears.

3. Select the check boxes for items you want to configure with the Installation Wizard.

HINT

When the [Region / Timezone Date / Time] check box is selected, the window for setting the region/timezone and the window for setting the date/time will be displayed.

4. Press the [Start] button.

⇒ Windows for configuring the selected items appear sequentially in the Installation Wizard.

5. Follow the wizard to configure the settings.

For details about the procedure for configuring system settings, refer to the "Getting Started".

6. Press the [Finish] button.

⇒ The window for confirming the settings of the Installation Wizard appears.

7. Confirm the settings and press the [OK] button.

⇒ The Installation Wizard closes and the [Admin Menu] window appears.

HINT

For [Show the Installation Wizard at next start up?], you can set whether or not to show the Installation Wizard immediately after starting the scanner.

4.4 Configuring the System

4.4.1 Setting the Scanner Name Touch Panel AdminTool

Set a scanner name to provide a network alias for the scanner.

ATTENTION

Do not use a name already being used in the network.

Name duplication will cause a network connection error. In this case, try the following steps:

1. Disconnect the LAN cable.
2. Press the [Shutdown] button on the touch panel to turn the scanner off.
3. Press the power button to start the scanner with the LAN cable disconnected.
4. Enter a non-duplicated scanner name.
5. Reboot the scanner.
6. Re-connect the LAN cable to the scanner.

1. Select [Scanner Name] under [Local Settings].

⇒ The [Scanner Name] window appears.

Local Settings > Scanner Name

Admin Menu

Local Settings

Scanner Name

Language Selection

Region / Timezone

Date / Time

Keyboard Settings

Certificate Management

Scanner Settings

Multifeed Settings

Logout

Enter the scanner name.

Scanner Name

FI-N7100

Member of

Workgroup WORKGROUP

Domain

OK

2. Specify each item.

3. Press the [OK] button.

⇒ The restart confirmation window appears.

HINT

In the following cases, the authentication window appears.

- When specifying the scanner as a domain member
- When changing the name of a scanner that is a member of a domain

Check the authentication information required for specifying the scanner as a domain member with the network administrator, and enter the valid user name and password. User names may be up to 256 characters long.

Passwords may be up to 256 characters long. [User Name] and [Password] are case sensitive.

If the user name and password are valid, the restart confirmation window appears.

4. Press the [Now] button.

⇒ The scanner is restarted.

HINT

The connection with the scanner is lost if the scanner name is changed via the Admin Tool. To continue with other settings, wait a short time for the scanner to restart, then access the scanner via the Admin Tool again.

4.4.2 Setting the Language Touch Panel AdminTool

1. Select [Language Selection] under [Local Settings].

⇒ The [Language Selection] window appears.

HINT

You can select whether or not to display this window again at the next scanner startup. To display the window again, for "Show the "Language Selection" screen at next start up?", select [Yes]. To not display this window at next start up, select [No].

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

4.4.3 Setting the Region/Timezone Touch Panel AdminTool Central Admin Console

1. Select [Region / Timezone] under [Local Settings].

⇒ The [Region / Timezone] window appears.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

HINT

If daylight savings time is on, daylight savings time and standard time switch automatically.

4.4.4 Setting the Date/Time Touch Panel AdminTool Central Admin Console

1. Select [Date / Time] under [Local Settings].

⇒ The [Date / Time] window appears.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

4.4.5 Setting the Keyboard Touch Panel Admin Tool Central Admin Console

1. Select [Keyboard Settings] under [Local Settings].

⇒ The [Keyboard Settings] window appears.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

ATTENTION

If [No] is set for the on-screen keyboard display, you need to connect a hardware keyboard additionally to enter characters.

4.4.6 Managing Certificates

Certificates to be used for server authentication in SSL communication can be imported or deleted.

■ Importing a Certificate File Admin Tool Central Admin Console

X.509 certificate files (*.cer, *.crt) can be imported.
Up to 100 certificate files can be imported.

1. Select [Certificate Management] under [Local Settings].

⇒ The [Certificate Management] window appears.

(Example of the Administrator Windows via the Admin Tool)

2. Press the [Browse] button and specify a certificate file.

3. Press the [Import] button.

⇒ The certificate file is imported.

The imported file is saved in the Trusted Root Certificate Authority store.

ATTENTION

When a certificate file is distributed from the Central Admin Server, any previously imported certificates will be deleted, and replaced by the contents of the new file.

■ Deleting a Certificate File   

- 1. Select [Certificate Management] under [Local Settings].**
 - ⇒ The [Certificate Management] window appears.
- 2. Select a certificate file to be deleted, and press the [Delete] button.**
 - ⇒ The delete confirmation window appears.
- 3. Press the [Yes] button.**
 - ⇒ The certificate file is deleted.

4.5 Setting the Scan Options

4.5.1 Setting the Multifeed Detection Method

Touch Panel

Admin Tool

Central Admin Console

"Multifeed" is an error that occurs when two or more sheets are fed simultaneously into the ADF. The detection of the difference in length is also regarded as multifeed.

By default, multifeed detection monitors for paper overlaps in the central column (25 mm either side from the center of the document) of the document being scanned.

- Setting the multifeed detection zone

If stickies, slips, photos, or other paper ("attached paper" from here on) are attached on the documents, this section is considered to be an overlap causing unnecessary detection as multifeed. When scanning those documents, you can adjust the multifeed detection area to ignore a specific area with attachments such as photos and prevent mis-detections.

- Setting the intelligent multifeed detection

The "intelligent multifeed detection" allows the length and position of the attached paper to be memorized in the scanner so that the multifeed will not be detected from the next scan.

- Setting the function for scanning at a high altitude

Low atmospheric pressure at a high altitude may decrease the level of accuracy of the ultrasonic sensor to detect multifeeds.

The "high altitude mode" allows the scanner to be used at a high altitude of 2,000 m or more.

For document requirements for multifeed detection, refer to "[A.5 Multifeed Detection Conditions](#)" (page 406).

1. Select [Multifeed Settings] under [Scanner Settings].

⇒ The [Multifeed Settings] window appears.

2. Specify each item.

If [Middle] or [Top & Bottom] is selected, enter both "#1" (upper limit) and "#2" (lower limit).

- Middle

Multifeeds will be detected in the shaded (a) area between "#1" (upper limit) and "#2" (lower limit).

- Top & Bottom

Multifeeds will be detected from the top of the page to "#1" (upper limit), and from "#2" (lower limit) to the bottom of the page. (b)

3. Press the [OK] button.

⇒ The information entered is set.

4.5.2 Adjusting the Scan Starting Position (Offset/

Magnification) Touch Panel AdminTool

Usually, it is not necessary to make any setting changes.

Configure the following setting items.

- Offset settings
When the scanned output is found to be displaced relative to the actual documents being scanned, the scan offsets can be adjusted.
- Length magnification setting
If the scanned output is found to be vertically distorted (stretched or squashed) relative to the actual documents being scanned, the length magnification in the vertical scanning direction can be adjusted.

1. Select [Scanner Adjustment] under [Scanner Settings].

⇒ The [Scanner Adjustment] window appears.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

4.5.3 Setting General Scanner Settings Touch Panel AdminTool Central Admin Console

Usually, it is not necessary to make any setting changes.
Configure the general scanner settings for scanning.

1. Select [General Scanner Settings] under [Scanner Settings].

⇒ The [General Scanner Settings] window appears.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

4.6 Configuring the Login-Related Settings

4.6.1 Setting the Login Settings Touch Panel AdminTool Central Admin Console

Set the login settings.

- Authentication mode setting
Specify whether to use an LDAP server account or a local account saved on the scanner during the authentication process at login. If both accounts are used, you can set the search order for the authentication information.

HINT

If LDAP is included in the authentication mode, add an account in the LDAP server.
If local account is included in the authentication mode, add an account in User Editor.

- Automatic login settings
When the scanner is turned on or restarted, the system performs an automatic login without displaying the [Login] window.
For automatic login, the user name and password specified in the [Login Settings] window is used.
- Guest account validity
Set whether or not to enable login with the guest account.

1. Select [Login Settings] under [Login Settings].

⇒ The [Login Settings] window appears.

2. For [Authentication Mode], select an authentication mode.

HINT

When an alias is used for the administrator account, if a local account or LDAP user is set with the same alias account name, login will be processed for the administrator account. In this case, even if a password error occurs, login as a local account or LDAP user cannot be performed.

The priority of the authentication destinations for the login is as follows:

1. Alias account
2. Order specified by [Authentication Mode]

3. For [Auto Login], select whether or not to enable automatic login.

ATTENTION

- The automatic login setting is applied immediately after an administrator logout. To change the settings while the [Auto Login] is [ON], perform administrator login from the [Maintenance] window or perform the login via the Admin Tool.
- If Central Admin is enabled in a scanner for which automatic login is enabled, when the scanner is started or resumed from standby mode, preference is given to checking for available scanner settings, add-in installs and system settings in the Central Admin Server, over automatic login.

When scanner settings, Add-ins or system settings are available, they are installed in the scanner. If the number of scanners connecting to the Central Admin Server exceeds the maximum acceptable number, the installation is skipped, and automatic login is performed.

Updates will be applied to the scanner when a logout is performed from the [Administrator Login] window, when the scanner starts next time, or when the scanner resumes from standby mode.

4. When [Auto Login] is set to [On], enter a [User Name] and [Password].

The scanner follows the Active Directory user name format when authenticating the user login.

- For users registered in the LDAP server
 - When the [Server Type] of the LDAP server is [Active Directory] or [Active Directory Global Catalog]

User Name Format	Authentication Process
SAM Account Name Does not contain @	Authenticate the user login name (sAMAccountName). Example: user
User Principal Name Contains @	Authenticate the user login name (userPrincipalName). Example: user@example.com

HINT

When specifying a SAM account name with a domain name, describe "domain_name\SAM_account_name".

- When the [Server Type] of the LDAP server is [Other LDAP Server]

User Name Format	Authentication Process
uid	Authenticate the user login name (uid). Example: user
cn	Authenticate the user login name (cn). Example: user

- For users registered in a local account
Authenticate the specified user login name for a local account saved in the scanner.

HINT

If a UPN suffix is entered for a user name for automatic login, it is ignored. Even if entered, it is not used.

5. For [Guest Account], select whether or not logging in with the guest account is possible.
6. Press the [OK] button.
⇒ The information entered is set.

4.6.2 Setting the Login Settings (Details) Touch Panel AdminTool Central Admin Console

Set whether to use the factory default administrator account (admin) or a different account as the administrator account.

In addition, set whether to wait until the process of sending a scanned image is complete before the previously displayed menu appears, specify the number of retries and the interval between retries, and set whether to display the [Resend] button.

1. Select [Login Settings Details] under [Login Settings].

⇒ The [Login Settings Details] window appears.

The screenshot shows the 'Login Settings Details' configuration window. The left sidebar contains a menu with the following items: Login Settings, Login Settings, Login Settings Details (highlighted), Standby Mode, Admin Password, LAN Manager authentication level, Network Settings, IP Address, DNS Server, and WINS Server. The main content area is titled 'Login Settings > Login Settings Details' and contains the following fields and controls:

- Admin Account:** A dropdown menu showing 'admin (Factory Default)'.
- Admin User Name:** An empty text input field.
- Wait Job:** A toggle switch currently set to 'Yes'.
- Number of retries:** A numeric input field with the value '5' and a range of '(0 - 10)'.
- Retry interval (sec.):** A numeric input field with the value '30' and a range of '(10 - 300)'.
- Show [Resend]:** A toggle switch currently set to 'No'.

At the bottom of the window, there is a 'Logout' button on the left and an 'OK' button on the right.

2. Set [Admin Account] and [Admin User Name].

HINT

The password for [Alias] can be changed on the [Admin Password] window.

3. Set [Wait Job].

If you select [No], specify [Number of retries], [Retry interval], and [Show [Resend]].

ATTENTION

- If you select [No], when the process of sending is not complete, you cannot log out or turn the power off.
- If you select [Yes] for [Show [Resend]], when the send process remains in an error state, you cannot log out or turn the power off.

HINT

- If you select [Yes], the window indicating that the process is in progress appears until the process of sending a scanned image is complete. In this case, you can scan the next document as well as perform any other operations in the window after the process of sending is complete.
- If you select [No], you can scan the next document as well as perform any other operations in the window before the process of sending completes. The process of sending is temporarily saved and each process is performed in sequence.
- You can check the status of the send process in the [In progress] tab on the [Send Status] window, which is shown by pressing the [Send Status] button in the [Main Menu] window or the [Job Menu] window.
- If you select [Yes] for [Show [Resend]], the [Resend] button is displayed in the [In progress] tab on the [Send Status] window. Pressing the [Resend] button enables you to restart the send process that remains in an error state. For details, refer to "[5.12.2 Viewing Details on Send Operations That Are In Progress](#)" (page 327).

4. Press the [OK] button.

⇒ The information entered is set.

4.6.3 Setting the Standby Mode

Touch
Panel

AdminTool

Central Admin
Console

You can set the transition time for automatic logout, the standby mode, and power-off.

- For any window after regular user login, if no operations are performed for the specified period of time for [Logout after], the scanner automatically logs the user out.

HINT

- The scanner does not logout while the following operations are ongoing:
 - Scanning documents
 - e-Mailing a scan
 - Faxing a scan
 - Printing a scan
 - Saving a scan
 - Automatic login is enabled
- When automatic login is enabled, the main menu window appears (the job menu window appears if the job menu is selected for the initial post-login menu in the job groups tab) when the logout wait time has been exceeded.
- The time that is selected in [Logout after] never becomes invalid whether you enable the automatic login or not.

- [Standby Mode] is a function that automatically switches the scanner to standby mode if no operations are performed for a specified period of time on the [Login] window or any other window after a regular user logs in.

By using the [Turn off the display only] setting, standby mode can be changed. When the power button is pressed, the scanners start up from standby mode. The window displayed after restarting varies according to the automatic login settings in the following way:

- If automatic login is enabled, the operation window is displayed.
- If automatic login is disabled, the [Login] window is displayed.

For details about window transitions, refer to ["Using the Power Button" \(page 53\)](#).

When setting the time for [Standby after], the time until the scanner logs the user out must also be included.

- If no operations are performed for the specified period of time for [Power-off after] when the scanner power is left on, the scanner power is automatically turned off. The scanner enters standby mode first. If no further operations are performed in standby mode, the scanner power is automatically turned off. When setting the time for [Power-off after], the time until the scanner enters standby mode must also be included.

1. Select [Standby Mode] under [Login Settings].

⇒ The [Standby Mode] window appears.

**2. Specify each item.****3. Press the [OK] button.**

⇒ The information entered is set.

4.6.4 Changing the Admin Password Touch Panel AdminTool

ATTENTION

If a password is lost or forgotten, login is not possible.

Manage passwords carefully.

If the password has been lost or forgotten, the same action that is taken when repairing the scanner is needed. Therefore, contact your FUJITSU scanner dealer or an authorized FUJITSU scanner service provider.

1. Select [Admin Password] under [Login Settings].

⇒ The [Admin Password] window appears.

The screenshot shows the 'Admin Password' window in the AdminTool interface. The window title is 'Login Settings > Admin Password'. On the left, there is a navigation menu with the following items: 'Login Settings', 'Login Settings Details', 'Standby Mode', 'Admin Password' (highlighted in blue), 'LAN Manager authentication level', 'Network Settings', 'IP Address', 'DNS Server', and 'WINS Server'. At the bottom left of the menu is a 'Logout' button. The main content area of the window contains the following text and fields:

Change the administrator password.

Current Password

New Password

Confirm New Password

If the password is lost you will not be able to login.
 Keep a record of the new password in a safe location.

At the bottom right of the window is an 'OK' button.

2. Enter the current password and a new password.

3. Press the [OK] button.

⇒ The new admin password is set.

4.6.5 Setting the LAN Manager Authentication

Level Touch Panel AdminTool Central Admin Console

Set the LAN Manager authentication level for connecting the scanner to a server.

The LAN Manager authentication level setting is enabled in the following cases:

- The login LDAP server type is set to [Active Directory] or [Active Directory Global Catalog], and the scanner is connected to an Active Directory server for logging in to the scanner
- The scanner is connected to a file server for saving the scanned images in a network folder
- The scanner is connected to a print server for printing the scanned images

For details about the LAN Manager authentication level, refer to the manual of the related server.

ATTENTION

- Setting the LAN Manager authentication level according to the server side settings is recommended.
- Check the LAN Manager authentication level set on the server side with the server administrator before changing the level. If a level different from the level on the server side is set, logging in to the scanner, saving data in the network folder or printing data may be disabled.

1. Select [LAN Manager authentication level] under [Login Settings].

⇒ The [LAN Manager authentication level] window appears.

2. Set the LAN Manager authentication level.

3. Press the [OK] button.

⇒ The information entered is set.

4.7 Configuring the Network Settings

Configure the settings to connect the scanner to a network.

The procedure explained as an example in this section is the procedure for the IPv4 function.

Note that this scanner also supports the IPv6 function. By enabling the IPv6 function, you can configure an IPv6 environment for the scanner.

For details, refer to "[Appendix G IPv6 Settings](#)" (page 457).

4.7.1 Giving the Scanner an IP Address/DHCP Touch Panel AdminTool

An IP address/DHCP must be set in order to connect the scanner to a network.

1. Select [IP Address] under [Network Settings].

⇒ The [IP Address] window appears.

The screenshot displays the 'Network Settings > IP Address' configuration window. On the left is a sidebar menu with the following items: Network Settings, IP Address (highlighted), DNS Server, WINS Server, NTP Server, Proxy Server, SNMP Settings, Network Advanced Settings, Check Network Status, and Ping. The main content area is titled 'Enter IP addresses.' and includes a 'DHCP' dropdown menu currently set to 'On'. Below this are three input fields for 'IP Address', 'Subnet Mask', and 'Default Gateway', each with a dotted placeholder. At the bottom of the window, there is a 'Logout' button on the left and an 'OK' button on the right.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

HINT

- If the IP address is the same as one already in use, network communication problems will occur. In this case, try the following steps:
 1. Disconnect the LAN cable.
 2. Press the [Shutdown] button on the touch panel to turn the scanner off.
 3. Press the power button to start the scanner with the LAN cable disconnected.
 4. Enter a non-duplicated IP address.
 5. Re-connect the LAN cable to the scanner.
- The connection with the scanner is lost if the IP address is changed via the Admin Tool. To continue with other settings, close the Admin Tool and then access the scanner via the Admin Tool again. If you access the scanner with an IP address, use the new IP address.

4.7.2 Setting the DNS Server Touch Panel AdminTool Central Admin Console

A primary DNS and secondary DNS can be set.

1. Select [DNS Server] under [Network Settings].

⇒ The [DNS Server] window appears.

The screenshot shows the 'Network Settings > DNS Server' configuration window. The left sidebar contains the following menu items: Network Settings, IP Address, DNS Server (highlighted), WINS Server, NTP Server, Proxy Server, SNMP Settings, Network Advanced Settings, Check Network Status, and Ping. The main content area is titled 'Enter the DNS server settings.' and contains the following fields:

- Primary DNS: 0 . 0 . 0 . 0
- Secondary DNS: 0 . 0 . 0 . 0
- DNS Dynamic Update: Off
- DNS Suffix: (empty)
- FQDN: 10.10.10.10.localdomain

At the bottom of the window, there is a 'Logout' button on the left and an 'OK' button on the right.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

4.7.3 Setting the WINS Server Touch Panel AdminTool Central Admin Console

A primary WINS and secondary WINS can be set.

1. Select [WINS Server] under [Network Settings].

⇒ The [WINS Server] window appears.

Network Settings > WINS Server

Network Settings

IP Address

DNS Server

WINS Server

NTP Server

Proxy Server

SNMP Settings

Network Advanced Settings

Check Network Status

Ping

Logout

OK

Enter the WINS server settings.

Primary WINS 0 . 0 . 0 . 0

Secondary WINS 0 . 0 . 0 . 0

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

4.7.4 Setting the NTP Server Touch Panel Admin Tool Central Admin Console

Set the NTP server.

1. Select [NTP Server] under [Network Settings].

⇒ The [NTP Server] window appears.

2. Enter the NTP server IP address, host name, or FQDN in the [Address] input field.

3. Press the [Sync Time] button.

⇒ The result of the time synchronization for the specified NTP server is shown.
Make sure that the time synchronization has been performed correctly.

4. Press the [OK] button on the confirmation window.

5. Press the [OK] button.

⇒ The information entered is set.

HINT

- The system time is automatically synchronized every 6 hours to the specified NTP server.
- After the setting is changed, the time synchronization is performed immediately.
- For the touch panel, if you do not perform any operations over the specified period set for the logout wait time, the scanner logs out. For the Admin Tool, if you do not perform any operations for 20 minutes or more, the session times out.

4.7.5 Setting the Proxy Server Touch Panel AdminTool Central Admin Console

Set whether a proxy server is used when connecting to the FTP server or SharePoint server.

When a proxy server is used for update check, an HTTP proxy server should be set.

1. Select [Proxy Server] under [Network Settings].

⇒ The [Proxy Server] window appears.

The screenshot shows the 'Proxy Server' configuration window. The left sidebar contains a list of network settings: Network Settings, IP Address, DNS Server, WINS Server, NTP Server, Proxy Server (highlighted), SNMP Settings, Network Advanced Settings, Check Network Status, and Ping. The main area is titled 'Enter the proxy server settings.' and contains two sections: 'FTP Proxy Server' and 'HTTP Proxy Server'. Both sections have a toggle switch set to 'Off'. The 'FTP Proxy Server' section includes an 'Address' text box and a 'Port Number' text box with the value '8080'. The 'HTTP Proxy Server' section includes an 'Address' text box, a 'Port Number' text box with the value '8080', and an 'Exceptions' text box. A note below the exceptions box states: '*Do not use a proxy for addresses that start with:'. At the bottom right, there is an 'OK' button. At the bottom left, there is a 'Logout' button. The top right corner of the window has a help icon and a keyboard icon.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

4.7.6 Configuring the SNMP Settings Touch Panel AdminTool Central Admin Console

Set whether or not to obtain the MIB information or enable the trap notification.
For details about configuring the SNMP settings, refer to ["SNMP Settings" \(page 429\)](#).

1. Select [SNMP Settings] under [Network Settings].

⇒ The [SNMP Settings] window appears.

2. Specify each item.

3. To check whether trap notification is properly sent, press the [Test] button.

⇒ Trap notification is performed.

4. Press the [OK] button.

4.7.7 Configuring Network Advanced Settings Touch Panel AdminTool

Set the Link Speed/Duplex Mode and Wake On LAN.

Also set whether or not to use the IPv6 function. For details about the IPv6 function, refer to "[Appendix G IPv6 Settings](#)" (page 457).

1. Select [Network Advanced Settings] under [Network Settings].

⇒ The [Network Advanced Settings] window appears.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

HINT

The connection with the scanner is lost if the IPv6 function is changed via the Admin Tool. To continue with other settings, close the Admin Tool and then access the scanner via the Admin Tool again.

4.8 Checking the Network Status

4.8.1 Checking the Network Connection with a Ping Test Touch Panel AdminTool

Check the network connection using a ping test.

1. Select [Ping] under [Check Network Status].

⇒ The [Ping] window appears.

2. For [Address], enter the IP address, host name, or FQDN for the server to be used to check the network connection.

3. Press the [Ping] button.

⇒ A ping test is performed and the results are displayed.

For details about the result, refer to "[Checking Basic Network Operation with a Ping Test](#)" (page 371).

4.8.2 Checking the Network Operating Status Touch Panel AdminTool

The operating status of the network can be checked.

If the information is not shown, the network may not be operating normally. Refer to ["7.2 Network Connection Troubleshooting" \(page 371\)](#), and check the settings.

1. Select [Network Status] under [Check Network Status].

⇒ The [Network Status] window shows the status of the currently operating network connection.

HINT

- If connection to LDAP server is not possible, try the following steps:
 1. Disconnect the LAN cable.
 2. Press the [Shutdown] button on the touch panel to turn the scanner off.
 3. Press the power button to start the scanner with the LAN cable disconnected.
 4. Enter a non-duplicated IP address.
 5. Re-connect the LAN cable to the scanner.
- If the DHCP server cannot be reached when DHCP is set to [On], "169.254.X.X" is displayed for the IP address (X can be any number from 0 to 255).

4.9 Configuring the Network Admin Settings

4.9.1 Setting the Admin Connection Touch Panel AdminTool Central Admin Console

To use the Admin Tool or Central Admin Server for the scanner, perform the connection settings.

1. Select [Admin Connection] under [Network Admin].

⇒ The [Admin Connection] window appears.

The screenshot shows the 'Network Admin > Admin Connection' settings window. The left sidebar contains the following menu items: Network Admin, Admin Connection (selected), Scanner Central Admin Server, Scanner Central Admin Server Details, Authentication Server, Login LDAP Server, e-Mail LDAP Server, Schema, Customize LDAP Search, e-Mail, and SMTP Server. The main content area is titled 'Enter the settings for the remote administration connection.' and includes the following fields:

- SSL: A toggle switch set to 'Off'.
- Port Number (1 - 65535): A text input field containing '80'.
- SSL Certificate: A message stating 'This certificate has expired or is not yet valid.' Below this are fields for 'Issued by : -----' and 'Valid from --/--/---- to --/--/----'. A 'Regenerate' button is located to the right of these fields.

At the bottom of the window, there is a 'Logout' button on the left and an 'OK' button on the right.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

ATTENTION

The connection with the scanner is lost if the settings for the administration connection are changed via the Admin Tool. To continue with other settings, close the Admin Tool and then access the scanner via the Admin Tool again with the changed settings.

4.9.2 Setting a Central Admin Server Touch Panel AdminTool Central Admin Console

Set whether to manage the scanner under central administration.

When [Central Admin] is enabled, the scanner is registered in the Central Admin Server as a target for central administration.

1. Select [Scanner Central Admin Server] under [Network Admin].

⇒ The [Scanner Central Admin Server] window appears.

2. Specify each item.

Automatic updates are applied to the scanner system (including the security and installed options), system configuration, and Add-ins.

HINT

- If registration with the Central Admin Server is successful, the value for "This scanner's server-side status is:" changes from "Unregistered" to "Registered". Even when setting values are correct, if the network is disconnected or the Central Admin Server is in a suspended state, registration will fail. In either case, if [Central Admin] is [On], the process will be run again the next time the scanner is turned on or resumed from the standby mode.
- For details about the settings required to use SSL for communication between the Central Admin Server and scanner, refer to ["4.9.1 Setting the Admin Connection" \(page 111\)](#).
- When user roaming or job settings are enabled, if communication with the Central Admin Server is not possible, a confirmation message will appear at login. If the [OK] button is pressed, the settings saved in the scanner are used. Pressing the [Cancel] button returns to the login window.

- If "Update Scheduler" is enabled, the following operations occur:
 - Automatic updates start when the scanner is in a standby mode or when no user is logged in while it is turned on.
Updates are also performed on a specified date and time even with notifications from the Central Admin Server or in an environment in which Wake On LAN cannot be used.
 - When Wake On LAN is enabled, automatic updates start even if the power is off
 - When the setting for an automatic update from the Central Admin Server is distributed to the scanners, if the update is scheduled to start within ten minutes after the setting was distributed, the setting will not be applied.
To enable new system settings in an environment where update calls cannot be issued, scanners must be restarted or logged out. In order to prevent software updates from running at the same time, enable software update time-period restrictions. System settings can be updated even when software updates are restricted. For details, refer to the Scanner Central Admin User's Guide.
 - If the scheduled automatic update time is set in both the Central Admin Console and with the Admin Tool, the most recent settings will be enabled.

3. Press the [OK] button.

⇒ The information entered is set.

⇒ If [Central Admin] is enabled, the scanner information is sent to the Central Admin Server.

If the process is successful, [Scanner Central Admin Server Registration Status] changes to [Registered].

4.9.3 Setting a Central Admin Server (Details)

Set the scanner discovery to enable central administration.

1. Select [Scanner Central Admin Server Details] under [Network Admin].

⇒ The [Scanner Central Admin Server Details] window appears.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

4.10 Setting the Authentication Server

4.10.1 Setting the Login LDAP Server Touch Panel AdminTool Central Admin Console

If a login LDAP server is set, user authentication will be checked.

1. Select [Login LDAP Server] under [Authentication Server].

⇒ The [Login LDAP Server] window appears.

2. Specify each item.

- When [Off] is selected for [Server Type]:
The LDAP server is not used. Press the [OK] button to confirm the setting.
- When [Other LDAP Server] is selected for [Server Type]:
For [LDAP Server Access Authorization], enter an authorized user name and password when searching for users to be logged in to the LDAP server.
- When [Active Directory] or [Active Directory Global Catalog] is selected for [Server Type]:
For [LDAP Server Access Authorization], enter the authentication information for Active Directory.
- For details about the relation between character strings to be entered in [Search Base (DN)] and the target of the LDAP search, refer to "[LDAP Search Target](#)" (page 117).

3. To check the connection with the LDAP server, press the [Connect] button.

- ⇒ When the [Server Type] is [Active Directory] or [Active Directory Global Catalog], the [Authentication] window appears. Enter the authentication details for confirming access to the LDAP server, and press the [OK] button.

The image shows a screenshot of an 'Authentication' dialog box. The title bar at the top is dark and contains the text 'Authentication' on the left, a question mark icon in the center, and a close icon on the right. The main area of the dialog is light gray and contains two text input fields. The first field is labeled 'User Name' and the second is labeled 'Password'. At the bottom of the dialog, there is a dark bar containing two buttons: 'Cancel' on the left and 'OK' on the right.

- ⇒ When the [Server Type] is [Other LDAP Server], authentication is performed with the information that is entered in [LDAP Server Access Authorization].
- ⇒ When the authentication is completed and the connection is successful, the [Login LDAP Server] window appears.

4. Press the [OK] button.

- ⇒ The information entered is set.

■ LDAP Search Target

The search range and method for LDAP server searches are different according to the LDAP server connection or the search base (DN) settings ([Step 2 of "4.10.1 Setting the Login LDAP Server" \(page 115\)](#)).

The LDAP search targets in each setting are as follows:

- For connecting with LDAP server (when [Active Directory] or [Other LDAP Server] is selected in [Step 2](#))
The following shows an example (where the domain name is *example.com*) for [Search Base (DN)]. The italic text represents variable character strings.

Hereinafter, Active Directory is used as an example to describe search targets.

Example 1: When searching for (administrator, user A, user B)

CN=Users, DC=example, DC=com

Active Directory configuration is as follows:

Example 2: When searching for (user C, user D, user E)
OU=department, DC=example, DC=com
Active Directory configuration is as follows:

Example 3: When searching for (user C, user D)
OU=section A, OU=department, DC=example, DC=com
Active Directory configuration is as follows:

Example 4: When searching for all users
no [Search Base (DN)] setting, or DC=example, DC=com

- For connecting with the Global Catalog server (when [Active Directory Global Catalog] is selected in [Step 2](#))
 The following shows an example (where the parent domain name is *example.com*, and subdomain name is *sub.example.com*) for [Search Base (DN)]. The italic text represents variable character strings.

Example: When searching in whole domain
 no [Search Base (DN)] setting, or *DC=example, DC=com*
 Identical regular user login availability differs according to whether a *sAMAccountName* or *userPrincipalName* is used as the login name, as shown below.

Regular User	Login Name	Login Possible
	Top: <i>sAMAccountName</i> Bottom: <i>userPrincipalName</i>	
User A	<i>userA</i>	Yes
	<i>userA@example.com</i>	Yes
User H	<i>userH</i>	—
	<i>userH@sub.example.com</i>	Yes

Yes: Possible —: Not Possible

The SAM Account Name is the Active Directory user login name (sAMAccountName).

HINT

When specifying a SAM account name with a domain name, describe "*domain_name\SAM_account_name*".

The User Principal Name is the Active Directory user login name (userPrincipalName).

4.10.2 Setting the e-Mail LDAP Server Touch Panel Admin Tool Central Admin Console

If an e-mail LDAP server is set, the searches within the LDAP LIST on the [e-Mail Address Book] window can be performed.

1. Select [e-Mail LDAP Server] under [Authentication Server].

⇒ The [e-Mail LDAP Server] window appears.

2. Specify each item.

- When [Off] is selected for [Server Type]:
The LDAP server is not used. Press the [OK] button to confirm the setting.
- When [Other LDAP Server] is selected for [Server Type]:
For [LDAP Server Access Authorization], enter an authorized user name and password when searching for users to be logged in to the LDAP server.
- When [Active Directory] or [Active Directory Global Catalog] is selected for [Server Type]:
For [LDAP Server Access Authorization], enter the authentication information for Active Directory.
- For details about the relation between character strings to be entered in [Search Base (DN)] and the target of the LDAP search, refer to "[LDAP Search Target](#)" (page 117).

3. Press the [OK] button.

⇒ The information entered is set.

4.10.3 Setting the Schema

Touch Panel

Admin Tool

Central Admin Console

Associate the search item with the LDAP server schema for LDAP search in an e-Mail address book.

1. Select [Schema] under [Authentication Server].

⇒ The [Schema] window appears.

2. Associate the search items and schema.

3. Press the [OK] button.

⇒ The information entered is set.

ATTENTION

To use the e-mail LDAP server, use a login user account. If the login LDAP server and e-mail LDAP server are different, according to the domain configuration or login name format, it may not be possible to use the e-mail LDAP server. For details, refer to "[LDAP Search Target](#)" (page 117).

4.10.4 Setting the LDAP Search Parameters Touch Panel AdminTool Central Admin Console

Set the LDAP search parameters.

LDAP search parameters are search conditions specified for the (left and middle) buttons displayed on the LDAP List in the [e-Mail Address Book] window.

The buttons are, for example, the [First Name] and [Last Name] buttons on the following window.

By pressing a search condition button, the display order of the e-mail addresses registered in the e-mail address book can be changed according to the search condition specified for the button.

For details about the [e-Mail Address Book] window - [LDAP List] tab, refer to ["5.4.1 Selecting an e-Mail Target from the e-Mail Address Book"](#) (page 233).

1. Select [Customize LDAP Search] under [Authentication Server].

⇒ The [Customize LDAP Search] window appears.

HINT

The following shows the correspondence between the [Customize LDAP Search] window settings and the search condition buttons on the [e-Mail Address Book] window - [LDAP List] tab.

- Left Button

Determines the setting of the left button on the [LDAP List] tab.

- Middle Button

Determines the setting of the middle button on the [LDAP List] tab.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

4.11 Configuring the e-Mail-Related Settings

4.11.1 Setting the SMTP Server Touch Panel Admin Tool Central Admin Console

1. Select [SMTP Server] under [e-Mail].

⇒ The [SMTP Server] window appears.

The screenshot shows the 'e-Mail > SMTP Server' configuration window. The left sidebar contains a menu with the following items: e-Mail, SMTP Server (highlighted), SMTP Server Extension, Send e-Mail, File Names (e-Mail), Fax, Fax Server, Save, Network Folder, FTP Server Folder, and File Names. The main area is titled 'Enter the SMTP server settings.' and contains the following fields:

- Address:** A text input field.
- SSL:** A dropdown menu set to 'Off'.
- Port Number:** A text input field with the value '25' and a range '(1 - 65535)' below it.
- Monitor Connection Timeout:** A toggle switch set to 'Off' and a text input field with the value '30' and the unit 'sec' and range '(1-300)'.
- Split Mails:** A toggle switch set to 'Off'.
- Segment Size:** A text input field with the value '256' and the unit 'KB' and range '(64-10240)'.
- Maximum Attachment Size:** A text input field with the value '10' and the unit 'MB' and range '(1-20)'.
- Address Warning Limit:** A text input field with the value '100' and the range '(2-1000)'.

At the bottom of the window, there is a 'Logout' button on the left and an 'OK' button on the right.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

4.11.2 Setting the SMTP Server (Extension) Touch Panel AdminTool Central Admin Console

1. Select [SMTP Server Extension] under [e-Mail].

⇒ The [SMTP Server Extension] window appears.

The screenshot shows the 'e-Mail > SMTP Server Extension' configuration window. The left sidebar contains a menu with the following items: e-Mail, SMTP Server, SMTP Server Extension (highlighted), Send e-Mail, File Names (e-Mail), Fax, Fax Server, Save, Network Folder, FTP Server Folder, and File Names. The main content area is titled 'SMTP Server Extension' and contains the following settings:

- SMTP Authentication: Off (dropdown menu)
- Authentication Method: AUTH CRAM-MD5 AUTH LOGIN AUTH PLAIN
- Authorized User: Login User (dropdown menu)
- guest (text input)
- e-Mail Address:
- User Name:
- Password:

At the bottom of the window, there is a 'Logout' button on the left and an 'OK' button on the right.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

4.11.3 Configuring Settings for Sending e-Mail

Touch
Panel

AdminTool

Central Admin
Console

Configure the [Send e-Mail] window to send a scanned image by e-mail. Set the character encoding used when e-mails are sent.

1. Select [Send e-Mail] under [e-Mail].

⇒ The [Send e-Mail] window appears.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

4.11.4 Setting a File Name Format for When Attaching Scanned Data to

e-Mail Touch Panel Admin Tool Central Admin Console

Set a file name format for when attaching scanned data to an e-mail.

The file name specified here is displayed in the [File Name] input field on the [Send e-Mail] window as the default value.

1. Select [File Names (e-Mail)] under [e-Mail].

⇒ The [File Names (e-Mail)] window appears.

The screenshot shows the 'File Names (e-Mail)' configuration window. The title bar reads 'e-Mail > File Names (e-Mail)'. On the left is a navigation menu with 'File Names (e-Mail)' highlighted. The main content area is titled 'Specify the file name format used when attaching scan data to e-mails.' and contains an input field with the text '[Scanner Name]MMddyyyyhhmmss'. Below this is the 'File Name Format' section, which includes five items, each with a toggle switch: '1.Prefix' (Off), '2.Scanner Name' (On), '3.User Name' (Off), '4.Date' (On), and '5.Time' (On). At the bottom of this section are two dropdown menus: 'Date Format' (set to 'MMddyyyy') and 'Delimiter' (set to 'None'). The bottom of the window features a 'Logout' button on the left and an 'OK' button on the right.

2. Specify each item.

3. Check the file name format.

4. Press the [OK] button.

⇒ The information entered is set.

4.12 Setting the Fax Server Touch Panel AdminTool Central Admin Console

Set the fax server.

1. Select [Fax Server] under [Fax].

⇒ The [Fax Server] window appears.

2. Specify each item.

Enter the recipient e-mail address for [Recipient] and the sender e-mail address for [From].

For details about e-mail address settings values, refer to ["B.1 e-Mail Address Setting Values"](#) (page 409).

3. Press the [OK] button.

⇒ The information entered is set.

ATTENTION

To use Internet FAX, it may be required to enter information such as a password in the Body. To enhance the security, enable SSL in [SMTP Server] on the administrator window. Note that the FAX service needs to support SSL.

4.13 Setting Folders for Saving Scanned Data

The following folders can be set as the folders for saving scanned data:

- Network Folder
- FTP Server Folder
- SharePoint Folder

4.13.1 Setting the Network Folders

A list of network folders may be set as [Save] targets for scanned data.

Any accessible file server folder can be specified as a network folder.

Up to a combined total of 100 network folders and FTP server folders can be added.

For details about setting FTP server folders, refer to "[4.13.2 Setting the FTP Server Folders](#)" (page 137).

A network folder can be added in the following ways.

- Network Tree
 - Select a network folder from the network tree.
 - For details, refer to "[Registering a Network Folder \(Network Tree\)](#)" (page 132).
- Network Path
 - Set a network folder by directly entering the path alias for the file server folder.
 - For details, refer to "[Registering a Network Folder \(Network Path\)](#)" (page 134).

For details about setting a file name for scanned data to be saved in a network folder, refer to "[4.13.4 Setting a File Name Format for When Saving Scanned Data](#)" (page 145).

ATTENTION

Note the following when registering a network folder:

- The network folder is registered as a network path. If the network folder is shared and the length of the full path including the file name exceeds 259 characters, the saved data file cannot be viewed. Before registering a (Windows) network folder, check that the length of the full file path+name is not likely to exceed 259 characters.
- If the selected folder was created using a language foreign to that of the browsing operating system, the network folder may not register correctly.
The name of the network folder is not displayed correctly because it contains unrecognizable code.
- If the number of folders to be displayed is large, they may take a long time to appear.

■ Registering a Network Folder (Network Tree)

1. Select [Network Folder] under [Save].

⇒ The [Network Folder] window appears.

2. Press the [Add] button.

⇒ The window for selecting a network folder appears.

ATTENTION

Desired domains may not be shown in the domain list. In this case, directly enter the path alias for the file server, or wait for a few minutes and re-open the window for adding a network folder.

3. Select a domain

- ⇒ The network tree expands and the subordinate computer names are displayed. If an authentication window is displayed, enter a user name and password. If authentication is successful, the subordinate computer names are displayed.

4. Select a computer

- ⇒ The network tree expands and the subordinate network folder names are displayed. If an authentication window is displayed, enter a user name and password. If authentication is successful, the subordinate network folder names are displayed.

5. Select a network folder

The selected folder will be opened to show any sub-folders, which themselves may be selected in turn (up to seven levels deep, including the parent domain).

6. Press the [OK] button.

- ⇒ The selected network folder is added to the network folder list.

HINT

The default network folder alias will be the same as the alias selected from the network tree. For details on changing the network folder alias, refer to "[Renaming a Network Folder](#)" (page 135).

■ Registering a Network Folder (Network Path)

1. Select [Network Folder] under [Save].

⇒ The [Network Folder] window appears.

2. Press the [Add] button.

⇒ The window for selecting a network folder appears.

3. Press the [Network Path] button.

⇒ The window for adding a network folder appears.

4. Specify each item.

5. Press the [OK] button.

⇒ The network folder is added to the network folder list.

ATTENTION

Make sure you specify the domain name at the start of the path name of the network folder.

HINT

- The network folder alias will be the same as the alias specified in this window. For details on changing the network folder alias, refer to ["Renaming a Network Folder" \(page 135\)](#).
- The authentication window may appear.

■ Renaming a Network Folder

1. **Select [Network Folder] under [Save].**
 - ⇒ The [Network Folder] window appears.
2. **Select the network folder that is to be renamed.**
3. **Press the [Edit] button.**
 - ⇒ The window for editing the network folder appears.
4. **Enter a folder alias.**
5. **Press the [OK] button.**
 - ⇒ The network folder is renamed.

■ Removing a Network Folder

1. **Select [Network Folder] under [Save].**
 - ⇒ The [Network Folder] window appears.
2. **Select the network folder that is to be removed from the folder list.**
3. **Press the [Remove] button.**
 - ⇒ The window for removing a network folder appears.
4. **Confirm the details of the network folder that is to be removed are correct, and press the [Yes] button.**
 - ⇒ The selected network folder is removed from the network folders list.

■ Viewing the Network Folder Details

1. Select [Network Folder] under [Save].

⇒ The [Network Folder] window appears.

2. Select the desired network folder from the folder list.

3. Press the [Details] button.

⇒ The information for the selected network folder is displayed.

4.13.2 Setting the FTP Server Folders

Touch
Panel

AdminTool

Central Admin
Console

A list of FTP server folders may be set as [Save] targets for scanned data.

Up to a combined total of 100 FTP server folders and network folders can be added.

For details about setting network folders, refer to ["4.13.1 Setting the Network Folders" \(page 131\)](#).

For details about setting a file name for scanned data to be saved in an FTP server folder, refer to ["4.13.4 Setting a File Name Format for When Saving Scanned Data" \(page 145\)](#).

ATTENTION

Note the following when registering an FTP server folder:

- The FTP server folder is registered as a network path. If the FTP server folder is shared and the length of the full path including the file name exceeds 259 characters, the saved data file cannot be viewed. Before registering an FTP server folder, check that the length of the full file path+name is not likely to exceed 259 characters.
- If the selected folder was created using a language foreign to that of the browsing operating system, the FTP server folder may not register correctly.
The name of the FTP server folder is not displayed correctly because it contains unrecognizable code.
- For FTP path, user name, and password, alphanumeric characters and symbols with the exception of "\ / : ; * ? " < > | # & %" can be used.

■ Registering an FTP Server Folder

1. Select [FTP Server Folder] under [Save].

⇒ The [FTP Server Folder] window appears.

2. Press the [Add] button.

⇒ The window for setting an FTP server folder appears.

3. Specify each item.

The [Proxy] setting is only available when a proxy server has been set on the [Proxy Server] window. For details about proxy server settings, refer to "[4.7.5 Setting the Proxy Server](#)" (page 106).

4. Press the [OK] button.

⇒ User authentication may be required to access the FTP server. When the user name and password are valid, the [FTP Server Folder] window appears again and the FTP server folder is set.

■ Changing the FTP Server Folder Settings**1. Select [FTP Server Folder] under [Save].**

⇒ The [FTP Server Folder] window appears.

2. Select an FTP server folder to be changed.**3. Press the [Edit] button.**

⇒ The window for editing the FTP server folder appears.

4. Change the settings.**5. Press the [OK] button.**

⇒ The changed settings are applied.

■ Removing an FTP Server Folder**1. Select [FTP Server Folder] under [Save].**

⇒ The [FTP Server Folder] window appears.

2. Select an FTP server folder that is to be removed from the folder list.**3. Press the [Remove] button.**

⇒ The window for removing the FTP server folder appears.

4. Confirm the details of the FTP server folder that is to be removed are correct, and press the [Yes] button.

⇒ The selected FTP server folder is removed from the FTP server folder list.

■ Viewing the FTP Server Folder Details

1. **Select [FTP Server Folder] under [Save].**
⇒ The [FTP Server Folder] window appears.
2. **Select the desired FTP server folder from the folder list.**
3. **Press the [Details] button.**
⇒ The information for the selected FTP server folder is displayed.

The screenshot shows a software interface for configuring an FTP server folder. The window title is "FTP Server Folder > FTP Server Folder". On the left is a vertical menu with options: Save, Network Folder, FTP Server Folder (highlighted in blue), File Names (Save), SharePoint Folder, SharePoint Folder, File Names (Save), Print, Network Printer, Status Details, and System Status. At the bottom left is a "Logout" button. The main area is titled "FTP server folder details:" and contains the following fields and controls:

- Folder Alias: Text box containing "FTPFolder".
- FTP Path: Text box containing "192.168.1.100".
- Port Number (1 - 65535): Text box containing "21".
- User Name: Text box.
- Password: Text box.
- Authentication: Dropdown menu set to "Each Time".
- Protocol: Dropdown menu set to "FTP".
- Encryption: Dropdown menu set to "Explicit".
- Passive Mode: Toggle switch set to "On".
- Proxy * See the Proxy Server Menu: Toggle switch set to "Off".

At the bottom right is a blue "OK" button.

4.13.3 Setting the SharePoint Folders

Touch Panel

AdminTool

Central Admin Console

A list of SharePoint folders may be set as [Scan to SharePoint] targets for scanned data. For details about setting a file name for scanned data to be saved in a SharePoint folder, refer to "4.13.4 Setting a File Name Format for When Saving Scanned Data" (page 145).

■ Registering a SharePoint Folder

1. Select [SharePoint Folder] under [SharePoint Folder].

⇒ The [SharePoint Folder] window appears.

2. The [Scan to SharePoint] option determines whether users are allowed to save scanned data in SharePoint folders.

3. Press the [Add] button.

⇒ A list of the SharePoint sites appears.

**4. Specify a SharePoint server site URL in the [URL] field.**

You can also press the list button to select a URL from the recently specified URLs.

5. Press the [Connect] button.

⇒ A [Sign In] window appears.

Enter the user name, password, and domain name for signing in the SharePoint server, and then press the [OK] button.

- User names may be up to 256 characters long.
- Passwords may be up to 256 characters long. [User Name] and [Password] are case sensitive.
- Domain names may be up to 64 characters long.

⇒ If the sign in is successful, the available SharePoint server sites and folders are shown in the SharePoint site list area.

6. Select the folder that is to be a save target from the SharePoint site list, and press the [OK] button.

⇒ The [SharePoint Folder] window appears again and the specified folder is added to [Scan to SharePoint Folders].

ATTENTION

- To set a SharePoint folder from the Central Admin Server, install .NET Framework 3.0 Service Pack 1 or later into the Central Admin Server, and restart it.
- If .NET Framework 3.0 Service Pack 1 or later is not installed in the Central Admin Server, you cannot set a SharePoint folder from the Central Admin Server.
- For SharePoint 2010, when a full domain is used to indicate a server, sites with the same name as the actual site may appear under the actual site.

When this happens, change the SharePoint server settings as follows:

1. Open [Central Administration].
2. Under [Operations], select [Alternate Access Mappings].
3. Select [Edit Public URLs].
4. Change the URL shown in [Default] to a full domain.
5. Select [Save].

■ Renaming a SharePoint Folder (Display Name)

1. Select [SharePoint Folder] under [SharePoint Folder].

⇒ The [SharePoint Folder] window appears.

2. From the [Scan to SharePoint Folders] list, select the SharePoint folder that is to be renamed.

3. Press the [Edit] button.

⇒ The [Scan to SharePoint folder details] window appears.

4. Enter the name that is to be shown for the selected SharePoint folder.

5. Press the [OK] button.

⇒ The SharePoint folder is renamed.

■ Removing a SharePoint Folder

1. **Select [SharePoint Folder] under [SharePoint Folder].**
⇒ The [SharePoint Folder] window appears.
2. **From the [Scan to SharePoint Folders] list, select the folder that is to be removed.**
3. **Press the [Remove] button.**
⇒ A confirm removal window appears for the selected SharePoint folder.
4. **Check that the correct folder is being removed, then press the [Yes] button.**
⇒ The SharePoint folder is removed.

■ Viewing the SharePoint Folder Details

1. **Select [SharePoint Folder] under [SharePoint Folder].**
⇒ The [SharePoint Folder] window appears.
2. **Select the desired SharePoint folder from the [Scan to SharePoint Folders] list.**
3. **Press the [Details] button.**
⇒ The information for the selected SharePoint folder is displayed.

4.13.4 Setting a File Name Format for When Saving Scanned

Data Touch Panel AdminTool Central Admin Console

A file name format can be set to be used when scanned data is saved in a network folder, FTP server folder, or SharePoint folder.

The specified file name format is used for the default value in the [File Name] input field on the [Save] or [Scan to SharePoint] window for regular users.

1. Perform one of the following operations.

- For a network folder or an FTP server folder
Select [File Names (Save)] under [Save].
- For a SharePoint folder
Select [File Names (Save)] under [SharePoint Folder].

⇒ The [File Names (Save)] window appears.

The following description uses [Save] as an example.

Network Folder > File Names (Save)

Specify the file name format used when saving scan data.

[Scanner Name]MMddyymmss001

Sub-folder Name Format

1.Scanner Name Off 2.User Name Off 3.Date Off

File Name Format

1.Prefix Off

2.Scanner Name On 3.User Name Off 4.Date On

5.Time On 6.Seq. Number

Date Format: MMddyymm Delimiter: None

Logout OK

2. Specify each item.

HINT

The following explains the way in which sequence numbers are added.

- Sequence numbers start from 1. When there are files with file names containing sequence numbers, sequence numbers following the largest value will be used. For example, if the file name is "A", sequence numbers are set to be added in 3 digits, and "A001.pdf" and "A004.pdf" already exist, subsequent file names are assigned in the following order.
"A005.pdf", "A006.pdf", "A007.pdf", "A008.pdf"...
File names "A002.pdf" and "A003.pdf" are skipped.
- If the sequence number exceeds the setting in the [Seq. Number], subsequent file names are assigned using the next digit. For example, if the file name is "A", sequence numbers are set to be added in 3 digits, and "A001.pdf" to "A998.pdf" already exist, subsequent file names are assigned in the following order.
"A999.pdf", "A1000.pdf", "A1001.pdf", "A1002.pdf"...
- The maximum sequence number is "4294967295". If it is exceeded, the skipped minimum number is used for the sequence number. For example, if the file name is "A", sequence numbers are set to be added in 3 digits, and "A001.pdf", "A003.pdf", and "A4294967295.pdf" already exist, subsequent file names are assigned in the following order.
"A002.pdf", "A004.pdf", "A005.pdf", "A006.pdf"...
- When multiple sheets are scanned in one go, consecutive numbers may be added to the names of JPEG files, single page TIFF files, and single page PDF files. Numbers are added to the names of JPEG files, single page TIFF files, and single page PDF files (one image per file), but are not added to the names of multiple page PDF files or multiple page TIFF files (multiple images per file). For example, when multiple files are saved as a single page TIFF file, a single page PDF file, or a JPEG file, the numbers are added in consecutive order at the end of a file name as follows:
"abc-0001.tif" "abc-0001.pdf" "abc-0001.jpg"

3. Check the file name format.

4. Press the [OK] button.

⇒ The file name format is set.

4.14 Setting the Network Printers

Touch Panel

AdminTool

Central Admin Console

Set a printer connected to the network as a network printer.

You can set a network printer in one of the following ways:

- (a) Setting a network printer via a print server
- (b) Setting a network printer without a print server

(a) Setting a Network Printer via a Print Server

Set a network printer via print server. The setting procedure is as follows:

1. Check the printer driver.

For details, refer to ["Checking the Printer Drivers" \(page 150\)](#).

2. Set the printer properties.

For details, refer to ["Setting the Printer Properties \(via the Print Server\)" \(page 151\)](#).

3. Register the network printer.

Up to 100 network printers can be registered.

A network printer can be registered in the following ways.

- Network Tree
Select a network printer from the network tree.
For details, refer to ["Registering a Network Printer \(Network Tree\) \(via the Print Server\)" \(page 154\)](#).
- Network Path
Directly enter the network printer path name.
For details, refer to ["Registering a Network Printer \(Network Path\)" \(page 156\)](#).
For [Step 4](#), refer to (a).

ATTENTION

- Read the printer manual beforehand for information about setting a printer, adding a network printer, and other cautions.
- Make sure that there is enough space in the drive before printing.
- Do not set a virtual printer.
- If a printer connected to different print servers is to be registered as a network printer multiple times, the software version of the driver should be the same on each print server.
If the software version of the printer driver differs, printing errors may occur.
- If the shared name of the printer contains the vertical bar (|), it cannot be registered as a network printer.

(b) Setting a Network Printer without a Print Server

Set a network printer without a print server for direct printing.

ATTENTION

To install a printer driver on a scanner from a computer, you need to prepare a computer in advance, on which a network printer has been published.

You can set a network printer without a print server in one of the following ways:

- (b-1) Downloading a driver from a computer on which a network printer is published and using the driver
- (b-2) Registering a network printer and then selecting a driver for the network printer

The setting procedure is as follows:

(b-1) Downloading a Driver from a Computer on Which a Network Printer Is Published and Using the Driver

1. **Prepare a computer on which a printer is registered as a network printer.**
2. **Check the printer driver.**

For details, refer to ["Checking the Printer Drivers" \(page 150\)](#).

3. **Check the printer name or the IP address for the printer.**

For details, refer to ["Checking the Printer Name or the IP Address for the Printer \(for Direct Printing\)" \(page 153\)](#).

4. **Register a network printer without a print server.**

Directly enter each item of the settings for network printers.

Up to 100 network printers can be registered.

For details, refer to ["Registering a Network Printer \(Network Path\)" \(page 156\)](#). For [Step 4](#), refer to (b-1).

ATTENTION

- To register a network printer without a print server, the printer that you intend to register needs to be turned on.
- When you register a network printer without a print server, a driver is automatically installed in silent mode from a computer on which a printer is registered as a network printer.

(b-2) Registering a Network Printer and Then Selecting a Driver for the Network Printer

1. Register a network printer.

When you add a network printer without a print server by using the relevant driver for the network printer that is registered in [Printer List], you do not need to register a new network printer. Proceed to the next step.

HINT

To register a new network printer, refer to "[\(a\) Setting a Network Printer via a Print Server](#)" (page 147) or "[\(b-1\) Downloading a Driver from a Computer on Which a Network Printer Is Published and Using the Driver](#)" (page 148).

2. Check the printer name or the IP address for the printer.

For details, refer to "[Checking the Printer Name or the IP Address for the Printer \(for Direct Printing\)](#)" (page 153).

3. Check the driver name for the printer.

For details, refer to "[Checking the Driver Name for the Printer \(for Direct Printing\)](#)" (page 153).

4. Register a network printer without a print server.

Directly enter each item of the settings for network printers.

Up to 100 network printers can be registered.

For details, refer to "[Registering a Network Printer \(Network Path\)](#)" (page 156). For [Step 4](#), refer to (b-2).

ATTENTION

Do not delete the network printer settings that were used to set a network printer without a print server from the computer. If the settings are removed, the corresponding driver is also removed from the scanner, and it may cause an error in printing.

■ Checking the Printer Drivers

The driver installed on the print server must be compatible with Windows 8.

Use the following procedure to check whether the drivers installed on the print server are Windows 8 compatible drivers.

Note that a print server is a computer on which printers are registered as network printers.

1. Select [View Devices and Printers] on the control panel window on the print server.

⇒ The [Devices and Printers] window appears.

2. Right-click on a printer and select [Printer Properties].

⇒ Printer properties appear.

3. Press the [Additional Drivers] in the [Sharing] tab.

⇒ The [Additional Drivers] window appears.

4. Check that the installed status is [Yes] for processor [x86] with [Type 3 - User Mode] or [Type 4 - User Mode] selected as the type.

- When the [Installed] status is [Yes], the driver has been installed and the printer can be used as a network printer. Press the [Cancel] button.
- When the installed status is [No], select [x86] with [Type 3 - User Mode] or [Type 4 - User Mode] selected as the type and press the [OK] button.

⇒ The Windows 8 compatible driver is installed.

■ Setting the Printer Properties (via the Print Server)

Use the following procedures to set a printer.

1. **Select [View Devices and Printers] on the control panel window on the print server.**
 - ⇒ The [Devices and Printers] window appears.
2. **Right-click on a printer and select [Printer Properties].**
 - ⇒ Printer properties appear.
3. **Press the [Printing Defaults] button on the [Advanced] tab.**
 - ⇒ The printing defaults window is displayed.
4. **Change the settings for the printer.**

HINT

It is recommended that you add a printer to the print server for each configuration of the property settings. For example, when you use only one printer, you should add printers to the print server according to different purposes, such as color printing and black and white printing.

For a color printing example, the procedure for adding a printer is as follows.

1. Select [View Devices and Printers] on the control panel window on the print server.
 - ⇒ The [Devices and Printers] window appears.
2. Press the [Add Printer] button.
 - ⇒ The [Add Printer] wizard appears.
3. Follow the prompts on the window until [Use the driver that is currently installed] appears.
4. Select [Use the driver that is currently installed (recommended)] and press the [Next] button.

5. Follow the prompts on the window until [Printer Sharing] appears.

6. Specify the shared name.

Since the shared name is displayed on the windows of the scanner, it is recommended to name the printer with an alias that indicates the contents of the properties settings as follows.

- ⇒ Follow the prompts on the window after this step.
- ⇒ After adding a printer is complete, the printer is added in the [Devices and Printers] window.
- 7. Right-click on the added printer and select [Printer properties].
 - ⇒ Printer properties appear.
- 8. Press the [Printing Defaults] button on the [Advanced] tab.
 - ⇒ The printing defaults window is displayed.
- 9. Select the color mode in the printer settings window.

After this, if the printer set for color printing on the print server is added to the scanner printer list, the user can specify to use this printer already set for color printing.

For details about adding the printer to the scanner printer list, refer to "[Registering a Network Printer \(Network Tree\) \(via the Print Server\)](#)" (page 154) or "[Registering a Network Printer \(Network Path\)](#)" (page 156).

■ **Checking the Printer Name or the IP Address for the Printer (for Direct Printing)**

To check the printer name or the IP address for a network printer, refer to the printer settings on the print server on which the network printer is registered.

- 1. Select [View Devices and Printers] on the control panel window on the print server.**
⇒The [Devices and Printers] window appears.
- 2. Right-click on a printer and select [Printer Properties].**
⇒Printer properties appear.
- 3. Select the port for the network printer in the [Ports] tab, and press the [Configure Port].**
⇒The [Configure Standard TCP/IP Port Monitor] window appears.
- 4. Check the [Printer Name or IP Address] contents.**

■ **Checking the Driver Name for the Printer (for Direct Printing)**

To check the driver name for a network printer, refer to the printer settings on the print server on which the network printer is registered.

- 1. Select [View Devices and Printers] on the control panel window on the print server.**
⇒The [Devices and Printers] window appears.
- 2. Right-click on a printer and select [Printer Properties].**
⇒Printer properties appear.
- 3. Select the [Advanced] tab.**
- 4. Check the [Driver] contents**

■ Registering a Network Printer (Network Tree) (via the Print Server)

1. Select [Network Printer] under [Print].

⇒ The [Network Printer] window appears.

2. Press the [Add] button.

⇒ The window for selecting a network printer appears.

ATTENTION

Some domains may not be shown in the window for selecting a network printer. In this case, directly enter the network printer path name, or wait for a few minutes and re-open the window for selecting a network printer.

3. Select a domain

- ⇒ The network tree expands and the subordinate computer names are displayed. If an authentication window is displayed, enter a user name and password. If authentication is successful, the subordinate computer names are displayed.

4. Select a computer

- ⇒ The network tree expands and the subordinate network printer names are displayed. If an authentication window is displayed, enter a user name and password. If authentication is successful, the subordinate network printer names are displayed.

5. Select a network printer

The selected folder will be opened to show any sub-folders, which themselves may be selected in turn (up to seven levels deep, including the parent domain).

6. Press the [OK] button.

- ⇒ The window returns to the [Network Printer] window, and the registered network printer is added to the network printer list.

HINT

The default network printer alias will be the same as the alias selected from the network tree. For details on changing the network printer alias, refer to ["Changing the Network Printer Settings" \(page 158\)](#).

■ Registering a Network Printer (Network Path)

1. **Select [Network Printer] under [Print].**
⇒ The [Network Printer] window appears.
2. **Press the [Add] button.**
⇒ The window for selecting a network printer appears.
3. **Press the [Network Path] button.**
⇒ The window for adding a network printer appears.

The screenshot shows a software window titled "Print > Network Printer". On the left is a sidebar menu with items: Print, Network Printer (highlighted), Status Details, System Status, Usage Status, Installed Options, User Log, System Log, Data Management, User Data Store, and System Settings. The main content area is titled "Add a network printer." and contains the following fields:

- Printer Alias**: A text input field. A note below it says: "* If left blank, the share name or 'IP_' + IP address will be used as a printer alias."
- Network Path**: A text input field. An example below it says: "(eg: \\Domain\Computer\Printer)".
- Printer name or IP address for the network printer without print server**: A text input field.
- Driver name for the network printer without print server**: A dropdown menu.

At the bottom of the window are four buttons: "Logout", "Cancel", "Network Tree", and "OK".

4. **Specify each item according to the setting procedure of a network printer.**
 - (a) When registering a shared printer that is connected to a print server as a network printer
Enter a name in [Printer Alias] and a path in [Network Path].
 - (b) When registering a network printer without a print server
 - (b-1) Using the driver for the computer on which a network printer is published
Enter a name in [Printer Alias], a path in [Network Path], and a name or an IP address in [Printer name or IP address for the network printer without print server].
For details about how to check the printer name or the IP address for a printer, refer to "[Checking the Printer Name or the IP Address for the Printer \(for Direct Printing\)](#)" (page 153).

(b-2) Registering a network printer and then selecting a driver for the network printer

Enter a name in [Printer Alias] and [Printer name or IP address for the network printer without print server], and select a driver name in [Driver name for the network printer without print server].

For details about how to check the printer name or the IP address for a printer, refer to ["Checking the Printer Name or the IP Address for the Printer \(for Direct Printing\)" \(page 153\)](#).

For details about how to check the driver name for the printer, refer to ["Checking the Driver Name for the Printer \(for Direct Printing\)" \(page 153\)](#).

HINT

On the touch panel and Admin Tool, you can select the driver name from a list box. On Central Admin Console, since you need to enter the driver name directly, note the driver name in advance.

5. Press the [OK] button.

⇒ The window returns to the [Network Printer] window, and the registered network printer is added to the network printer list.

HINT

- The default network printer alias will be the same as the alias selected from the network tree. For details on changing the network printer alias later, refer to ["Changing the Network Printer Settings" \(page 158\)](#).
- The authentication window may appear.

■ Changing the Network Printer Settings

1. **Select [Network Printer] under [Print].**
⇒ The [Network Printer] window appears.
2. **Select the network printer with the settings that are to be changed.**
3. **Press the [Edit] button.**
⇒ The window for editing the network printer settings appears.
4. **Change the settings.**
5. **Press the [OK] button.**
⇒ The changed settings are applied.

■ Removing a Network Printer

1. **Select [Network Printer] under [Print].**
⇒ The [Network Printer] window appears.
2. **Select the network printer that is to be removed from the printer list.**
3. **Press the [Remove] button.**
⇒ The window for removing a network printer appears.
4. **Confirm the details of the network printer that is to be removed are correct, and press the [Yes] button.**
⇒ The selected network printer is removed from the network printers list.

ATTENTION

- If removing a network printer is attempted while the network is not connected, the process may be stopped while "Deleting" is displayed on the window. Before removing a network printer, check that the network is operating normally.
- If you remove a network printer associated with the printer that is also set as a network printer without a print server, the corresponding driver is removed from the scanner, and as a result the network printer without a print server may not be used.

■ Viewing the Network Printer Details

1. Select [Network Printer] under [Print].

⇒ The [Network Printer] window appears.

2. Select the desired network printer from the printer list.

3. Press the [Details] button.

⇒ The information for the selected network printer is displayed.

The screenshot shows a mobile application interface for configuring network printers. The top navigation bar is dark grey with a home icon, the text 'Print > Network Printer', a help icon, and a keyboard icon. A left sidebar menu contains the following items: 'Print', 'Network Printer' (highlighted in blue), 'Status Details', 'System Status', 'Usage Status', 'Installed Options', 'User Log', 'System Log', 'Data Management', 'User Data Store', and 'System Settings'. At the bottom of the sidebar is a 'Logout' button. The main content area is titled 'Printer details:' and contains four input fields: 'Printer Alias' with the value 'Fujitsu Printer Color', 'Network Path' (empty), 'Printer name or IP address for the network printer without print server' with the value '192.168.10.100', and 'Driver name for the network printer without print server' with a dropdown menu showing 'Fujitsu Printer Driver'. At the bottom right of the screen is a blue 'OK' button.

4.15 Viewing the Scanner Details

4.15.1 Viewing the System Status Touch Panel AdminTool Central Admin Console

1. Select [System Status] under [Status Details].

⇒ The system status information is displayed.

Check the scanner's system information.

Item	Status
System Version	44001 01.01.01.0045 541 01
Scanner Version	0133
Initial Use	10/14/2014
Cumulative On Time	00000000 hours

Logout

4.15.2 Viewing the Usage Status Touch Panel AdminTool

Information about the number of documents that have been scanned and the status of the scanner's consumable parts (roller set) can be viewed. For details about replacing consumable parts, refer to "6.5 Replacing Parts" (page 353).

■ Viewing the Status of Consumable Parts

1. Select [Usage Status] under [Status Details].

⇒ The [Usage Status] window appears.

■ Resetting the Usage Counter

After part replacement, the usage counter can be reset to return the part status to normal.

1. Select [Usage Status] under [Status Details].

⇒ The [Usage Status] window appears.

2. Press the [Clear] button for the part replaced.

⇒ The counter reset confirmation window appears.

3. Press the [OK] button.

⇒ The counter value is reset to "0", and the [Status] field turns green again.

4.15.3 Viewing the Status of Installed Options Touch Panel Admin Tool Central Admin Console

1. Select [Installed Options] under [Status Details].

⇒ The [Installed Options] window appears.

2. To switch the option to enable, select [On] under [Activation] and press the [OK] button.

⇒ Options set to [On] are enabled and can be used.

HINT

Depending on the option that has been installed, switching between enable and disable may not be possible for that option.

4.15.4 Managing the User Log

User log entries are saved in the scanner.

ATTENTION

- User logs may contain private information such as information on e-mail senders and fax numbers, so care should be taken when managing such data.
- If a log file error is detected during scanner operation, the log file will be cleared and the log entry "Error 81001004 Corrupted user log file was deleted." is recorded.

■ Viewing the User Log Details Touch Panel AdminTool

The user log summary is shown in date/time order. Even if the [Region / Timezone] or [Date / Time] settings are changed, the order of the log entries will not be changed.

1. Select [User Log] under [Status Details].

⇒ The [User Log] window appears.

(Example of the Administrator Windows via the Admin Tool)

2. Select the user log you wish to view and press the [Details] button.

⇒ The details of the selected log are displayed.

Pressing the [OK] button returns to the [User Log] window.

HINT

The [Date] format specified on the [Date / Time] window is used. For details, refer to ["4.4.4 Setting the Date/Time" \(page 84\)](#).

■ Downloading the User Logs in CSV Format AdminTool

User logs can be downloaded to a computer in CSV format.

The file is saved in the following format:

"Date","Time","User","Result","Code","Operation","Pages","Description"

The default file name is "OperationLog.csv".

1. Select [User Log] under [Status Details].

⇒ The [User Log] window appears.

2. Press the [Download] button.

⇒ The [File Download] dialog box appears.

3. Press the [Save] button.

HINT

Make sure there is enough free space on the disk where it is to be saved and press the [Save] button. If there is not enough free disk space, an incomplete file may be saved.

⇒ The [Save As] dialog box appears.

4. Enter a file name, and specify a folder for saving the file.

The file will contain CSV format data.

5. Press the [Save] button.

⇒ A file containing CSV format data is saved.

■ Clearing the User Logs Touch Panel AdminTool

1. Select [User Log] under [Status Details].

⇒ The [User Log] window appears.

2. Press the [Clear All] button.

⇒ The confirmation window appears.

3. Press the [Yes] button.

⇒ All the user operation logs are cleared.

4.15.5 Managing the System Log

System information logs (such as for startup, shutdown, and system errors) are saved in the scanner.

ATTENTION

- System logs may contain private information such as information on e-mail senders and fax numbers, so care should be taken when managing such data.
- If a log file error is detected during scanner operation, the log file will be cleared and the log entry "Error 81001003 Corrupted system log file was deleted." is recorded.

■ Viewing the System Log Details Touch Panel AdminTool

The system log summary is shown in date/time order. Even if the [Region / Timezone] or [Date / Time] settings are changed, the order of the log entries will not be changed.

1. Select [System Log] under [Status Details].

⇒ The [System Log] window appears.

(Example of the Administrator Windows via the Admin Tool)

2. Select the log you wish to view and press the [Details] button.

⇒ The details of the selected log are displayed.

Pressing the [OK] button returns to the [System Log] window.

HINT

- The [Date] format specified on the [Date / Time] window is used. For details, refer to "4.4.4 Setting the Date/Time" (page 84).
- The information of "Error" and "Warning" in [Type] will be sent to the e-mail address set in "4.17.6 Setting the Destination for Alert Notifications" (page 184).

■ Downloading the System Log in CSV Format AdminTool

When downloaded to a computer, the file will contain CSV format data.

The file is saved in the following form:

"Date","Time","Type","Message"

The default file name is "SystemLog.csv".

1. Select **[System Log]** under **[Status Details]**.

⇒ The [System Log] window appears.

2. Press the **[Download]** button.

⇒ The [File Download] dialog box appears.

3. Press the **[Save]** button.

HINT

Make sure there is enough free space on the disk where it is to be saved and press the [Save] button. If there is not enough free disk space, an incomplete file may be saved.

⇒ The [Save As] dialog box appears.

4. Enter a file name, and specify a folder for saving the file.

The file will contain CSV format data.

5. Press the **[Save]** button.

⇒ A file containing CSV format data is saved.

■ Clearing the System Log Touch Panel AdminTool

1. Select **[System Log]** under **[Status Details]**.

⇒ The [System Log] window appears.

2. Press the **[Clear All]** button.

⇒ The confirmation window appears.

3. Press the **[Yes]** button.

⇒ The system log is cleared.

4.16 Managing the User Data Store and System Settings

4.16.1 Maintaining the User Data Store

The scanner's user data store can be backed up, restored, and deleted.

The user data store contains the following information:

- "My List" e-Mail Address Books
- Scan Settings
- User Logs
- Fax Number List
- Name of the last network printer used
- Name of the last network folder used
- Name of the last FTP server folder used
- Name of the last SharePoint folder used
- Local Accounts

When a user name registered with the LDAP server is used for login to the scanner, the data is automatically registered on the scanner as user data (data for the same user name is collected as a single user's data).

The user data store may contain up to 1,000 users.

ATTENTION

- Once 1,000 user names have been used to login, new user logins are no longer possible until the entire user data store is cleared.
It is recommended that the user data store be backed up before it is cleared. Refer to ["Backing up the User Data Store" \(page 169\)](#) and ["Clearing the User Data Store" \(page 170\)](#) for details.
- If a current user name existed when the user data store was backed up, the current user data is overwritten when being restored. Addition of new users cannot cause the 1,000 user limit to be exceeded, or the user data store restoration will fail. If this happens, delete all user data once and then restore from a user data store backup.
- When the user data store is restored from a backup, the Fax Number List and local accounts are also reverted to their old state.
- User logs cannot be backed up or restored.

The following example illustrates how the number of users could exceed 1,000:

1. 100 users (A001 to A100) login.
2. The user data store is backed up (with 100 users: A001 to A100).
3. The user data store (containing users A001 to A100) is cleared.
4. 960 "new" users (A001 to A050 and B001 to B910) login.
5. The user data store (containing users A001 to A100) backed up in Step 2 is restored.

4.16 Managing the User Data Store and System Settings

⇒ Users A001 to A100 are to be restored, of whom 50 are already in the current user data store (users A001 to A050) and so will be overwritten. Users A051 to A100 are considered "new" users and thus need to be added to the user data store. However, 960 existing users + 50 new users = 1,010 users. As the number of users would exceed the 1,000 user limit, the data of the 50 users from A051 to A100 is not restored, and therefore the user data from A001 to A100 is not overwritten or restored.

The user data store contents are organized as follows:

ATTENTION

User data may contain private information such as information on e-mail senders and fax numbers, so care should be taken when managing such data.

■ Backing up the User Data Store AdminTool

As a precaution, the user data store should be backed up regularly. The default file name is "restored_data".

1. Select [User Data Store] under [Data Management].

⇒ The [User Data Store] window appears.

2. Press the [Backup] button.

⇒ The [File Download] dialog box appears.

3. Make sure there is enough free space on the disk where the file is to be saved and press the [Save] button.

HINT

If there is not enough free disk space, an incomplete file may be saved.

⇒ The [Save As] dialog box appears.

4. Enter a file name, and specify a folder for saving the file.

Use of a name that includes the scanner name and backup date is recommended.

5. Press the [Save] button.

⇒ A backup copy of the user data store is saved.

ATTENTION

Do not change the contents of data store backup files.

If changed, the file may be corrupted. Restoring from a corrupted file may cause the scanner to function abnormally.

■ Restoring the User Data Store AdminTool

The scanner's user data store can be restored from a backed-up user data store file.

ATTENTION

- Restoring user data overwrites all user information saved at the time of restoration, and returns all e-mail address books, fax number list, and scan settings to the time the backup was taken.
- During user data restoration, do not hold down the power button for 4 seconds or longer. It may cause the scanner to function abnormally.

1. Select [User Data Store] under [Data Management].

⇒ The [User Data Store] window appears.

2. Press the [Browse] button and select a user data store backup file.

3. Press the [Restore] button.

⇒ An "OK to overwrite?" confirmation message appears.

4. Press the [Yes] button.

⇒ After the user data store is restored, a restore completion message appears.

5. Press the [OK] button.

■ Clearing the User Data Store Touch Panel AdminTool

ATTENTION

- Clearing the user data store cannot be undone.
- Even if the user data store is cleared, the local accounts are not removed. To remove the local accounts, use the User Editor. For details about how to edit the local accounts, refer to ["F.7 Editing Local Accounts" \(page 450\)](#).

1. Select [User Data Store] under [Data Management].

⇒ The [User Data Store] window appears.

2. Press the [Clear] button.

⇒ The delete confirmation window appears.

3. Press the [Yes] button.

⇒ The user data store is cleared.

4.16.2 Maintaining the System Settings

The scanner's system settings set by the administrator can be saved in CSV format, backed up, restored, or returned to their factory default values.

The system settings refer to the information that is set by the administrator in each window. However, the system settings do not contain the information about the system updates, options and Add-ins that are installed by the administrator.

■ Downloading the System Settings in CSV Format AdminTool

System settings downloaded in CSV format may be viewed by using spreadsheet software.

CSV system settings files are of the following format:

"Function_name", "Option_name", "Value"

The default file name is "Configuration_download.csv".

1. Select [System Settings File] under [Data Management].

⇒ The [System Settings File] window appears.

2. Press the [Get CSV] button.

⇒ The [File Download] dialog box appears.

3. Make sure there is enough free space on the disk where the file is to be saved and press the [Save] button.

HINT

If there is not enough free disk space, an incomplete file may be saved.

⇒ The [Save As] dialog box appears.

4. Name the file and specify where it should be saved.

The file will contain CSV format data.

5. Press the [Save] button.

⇒ The system settings for the scanner are downloaded.

■ Backing up System Settings AdminTool

The administrator can back up the scanner system settings.

Backup files can later be used to restore system settings. Make backups periodically just in case.

The default file name is "SystemSettingsFile".

HINT

The backed up data can be used in [Import Scanner Settings] in the scanner settings edit window of the Central Admin Console. For the operations, refer to the Scanner Central Admin User's Guide.

1. Select [System Settings File] under [Data Management].

⇒ The [System Settings File] window appears.

2. Press the [Backup] button.

⇒ The [File Download] dialog box appears.

3. Make sure there is enough free space on the disk where the file is to be saved and press the [Save] button.**HINT**

If there is not enough free disk space, an incomplete file may be saved.

⇒ The [Save As] dialog box appears.

4. Name the file and specify where it should be saved.

It is recommended that you specify the file name based on the backup date and the scanner name so that you can identify this information easily.

5. Press the [Save] button.

⇒ The system settings are backed up.

ATTENTION

Do not change the contents of system settings backup files. If changed, the file may no longer be used as a backup. Trying to restore from a changed user data store backup file may cause the scanner to function abnormally.

■ Restoring the System Settings AdminTool

The backed-up system settings can be restored.

The system settings can be restored in the following ways.

- Return the system settings backup file to the same scanner
- Import the system settings backed up from another scanner to the current scanner

1. Select **[System Settings File]** under **[Data Management]**.

⇒ The **[System Settings File]** window appears.

2. Press the **[Browse]** button and select the backup file of the system settings to be restored.

3. Perform either of following operations:

- To return the system settings backup file to the same scanner, select **[Restore in the same scanner]**.
- To import the system settings backed up from another scanner to the current scanner, select **[Import from another scanner]**.

4. Press the **[Restore]** button.

⇒ A confirmation message appears.

5. Press the **[Yes]** button.

⇒ The system settings are restored. After the system settings are restored, the scanner is restarted.

ATTENTION

During system settings restoration, do not hold down the power button for 4 seconds or longer.

It may cause the scanner to function abnormally.

HINT

The network interface connection will be lost when the scanner is restarted to complete the restoration of the system settings. To continue with other settings, wait a short time for the scanner to restart, then access the scanner via the Admin Tool again.

If the backed up IP address and scanner name are different from the IP address and scanner name before restoration, check the settings on the scanner, and try reconnecting with the Admin Tool.

■ Resetting to Factory Defaults Touch Panel Admin Tool

The system settings, which are set by the administrator in each window, and the system logs can be reset to factory defaults.

1. Select [System Settings File] under [Data Management].

⇒ The [System Settings File] window appears.

2. Perform either of following operations:

- To reset system settings to factory defaults, press the [Reset] button for [Reset system settings to factory defaults and clear logs.].
- To reset system settings to factory defaults, clear the user data store and logs, and initialize the free space, press the [Secure initialize] button for [Reset system settings to factory defaults, clear the user data store and logs, and initialize the free space.].

⇒ A confirmation message appears.

3. Press the [Yes] button.

⇒ If the [Reset] button is pressed, the system settings are reset to factory defaults, and Add-ins and logs are cleared.

If the [Secure initialize] button is pressed, the system settings, user data store, Add-ins, and logs are reset, and the free space is initialized.

⇒ After factory default settings have been restored, the scanner is restarted.

ATTENTION

- During factory defaults reset, do not hold down the power button for 4 seconds or longer. It may cause the scanner to function abnormally.
- The [Secure initialize] process takes about 30 minutes. Note that you cannot cancel the initialization during the process.

HINT

After the factory default settings are restored, the scanner name, IP address, and other settings will need to be set again, as described in "[4.4 Configuring the System](#)" (page 80) and after.

4.17 Maintaining the System

4.17.1 Updating the Scanner's System Software AdminTool

The scanner system, security system, and installed options can be updated as follows. Download the update file on a computer from the following web page:

<http://www.fujitsu.com/global/support/products/computing/peripheral/scanners/fi/software/>

1. Select [System Update] under [Maintenance].

⇒ The [System Update] window appears.

2. Press the [Browse] button and select a system update file.

3. Press the [Upload] button.

⇒ The [Current System Version] and [New System Version] values are displayed.

HINT

When you update installed options or the system including these options, the following window appears:

4. Press the [OK] button.

- ⇒ The system update process is started.
- After the system has been updated, the scanner is restarted.

ATTENTION

- Wait for the system to restart.
- During system update, do not hold down the power button for 4 seconds or longer. It may cause the scanner to function abnormally.

HINT

The connection with the scanner is lost if the scanner's system software is updated via the Admin Tool. To continue with other settings, wait a short time for the scanner to restart, then access the scanner via the Admin Tool again.

■ Checking for Updates at Scanner Startup

You can set the function for automatically checking for updates each time the scanner is started.

1. **Select [System Update] under [Maintenance].**

⇒ The [System Update] window appears.

2. **Select the [Check for updates at scanner startup.] check box.**

HINT

Checking for new updates is also performed when the scanner enters standby mode.

■ Requesting e-Mail Notification When a New Update is Available

The administrator can set to receive an e-mail notification if a new update is released.

1. **Select [System Update] under [Maintenance].**

⇒ The [System Update] window appears.

2. **Select the [Check for updates at scanner startup.] check box.**

3. **Select the [Request e-mail notification when a new update is released] check box.**

⇒ When a new update is released, an e-mail entitled "Event notification from Network Scanner *Scanner_Name*" is sent to the e-mail address that is set in the [Alert Notification] window. For details about the e-mail address settings for alert notification, refer to "[4.17.6 Setting the Destination for Alert Notifications](#)" (page 184).

4.17.3 Maintaining Add-in Modules

An "Add-in" is an application created by using the SDK (development kit). In the [Add-in Software] window, the following operations are available:

- Installing an Add-in module
- Uninstalling an Add-in module
- Viewing the Add-in status
- Uploading an Add-in settings file
- Setting whether to show the keyboard icon when running an Add-in

■ Installing an Add-in Module AdminTool

Up to six Add-in modules can be installed.

1. Select [Add-in Software] under [Maintenance].

⇒ The [Add-in Software] window appears.

2. Press the [Install] button.

⇒ The window for specifying an Add-in appears.

3. Press the [Browse] button for [Specify an Add-in to be installed.] and specify an Add-in installation file.

4. Press the [Install] button.

⇒ The Add-in module is installed, and the Add-in name is displayed in the list.

■ Uninstalling an Add-in Module AdminTool

1. Select [Add-in Software] under [Maintenance].

⇒ The [Add-in Software] window appears.

2. Perform either of following operations:

- To uninstall one Add-in module, select the Add-in module from the list and press the [Uninstall] button.
- To uninstall all Add-in modules listed, press the [Uninstall All] button.

⇒ A confirmation message appears.

3. Press the [Yes] button.

⇒ The Add-in module is uninstalled, and the Add-in name is removed from the list.

■ Viewing the Add-in Status Touch Panel AdminTool

If an Add-in module has been installed, its information can be viewed.

1. Select [Add-in Software] under [Maintenance].

⇒ The [Add-in Software] window appears.

■ Uploading an Add-in Settings File

1. **Select [Add-in Software] under [Maintenance].**
 - ⇒ The [Add-in Software] window appears.
2. **Press the [Install] button.**
 - ⇒ The window for specifying an Add-in appears.
3. **Press the [Browse] button for [Specify an Add-in settings file.] and specify the Add-in settings file to be uploaded.**
4. **Press the [Upload] button.**
 - ⇒ The specified Add-in settings file is saved in the folder that is used for managing the scanner Add-in modules.

■ Setting Whether to Show the Keyboard Icon When Running an Add-in

The keyboard icon is shown in the top right corner of the touch panel. You can set whether to show these icons on the window when running an Add-in.

1. **Select [Add-in Software] under [Maintenance].**
 - ⇒ The [Add-in Software] window appears.
2. **When multiple Add-ins are installed, select the target Add-in from the list.**
3. **For [Show On-Screen Keyboard], select whether or not to show the on-screen keyboard when running an Add-in.**
4. **Press the [Set] button.**
 - ⇒ This setting is reflected in the Add-in list.

4.17.4 Setting the Information Output Level Touch Panel AdminTool

1. Select [Technical Support] under [Maintenance].

⇒ The [Technical Support] window appears.

2. Set the desired information output level.

Set the level requested by your FUJITSU scanner dealer or an authorized FUJITSU scanner service provider.

3. Press the [OK] button.

⇒ The information entered is set.

ATTENTION

- If the [Information Output Level] is set to [2: Detail], the output data may contain private user information such as e-mail addresses, so care should be taken when managing such data.
 - Information that is appropriate for the selected level is applied to technical support information after [Information Output Level] is changed.
- Obtain technical support information after an error of which you want to find out the cause occurs. For details about how to obtain technical support information, refer to "[4.17.5 Obtaining Technical Support](#)" (page 183).

4.17.5 Obtaining Technical Support AdminTool

If any problems occur when setting up or using the scanner, technical support information can be collected to help determine the cause of the problem.

When the scanner is sent for repair, the information collected should also be sent to your FUJITSU scanner dealer.

1. Select [Technical Support] under [Maintenance].

⇒ The [Technical Support] window appears.

2. Press the [Download] button.

⇒ The [File Download] dialog box appears.

3. Press the [Save] button.

HINT

Make sure there is enough free space on the disk where it is to be saved and press the [Save] button. If there is not enough free disk space, an incomplete file may be saved.

⇒ The [Save As] dialog box appears.

4. Name the file and specify where it should be saved.

5. Press the [Save] button.

⇒ The technical information is downloaded.

4.17.6 Setting the Destination for Alert

Notifications Touch Panel Admin Tool Central Admin Console

An alert notification can be sent by e-mail whenever a scanner alert situation occurs. This section describes how to specify an e-mail address as the destination for alert notification. When the destination for alert notification is set, an alert notification message is sent to the registered e-mail address entitled "Network Scanner (XXXX) Error" if an error occurs on the scanner.

The SMTP server needs to be set in advance so that alert notification can be used. For details about how to specify SMTP server settings, refer to ["4.11.1 Setting the SMTP Server" \(page 126\)](#).

The e-mail address set in this section is also used as the destination for the new update release notification when update check is performed. For details about update check, refer to ["4.17.2 Checking for New Updates" \(page 177\)](#).

1. Select [Alert Notification] under [Maintenance].

⇒ The [Alert Notification] window appears.

2. Enter recipient and sender e-mail addresses.

For details about e-mail address settings values, refer to ["B.1 e-Mail Address Setting Values" \(page 409\)](#).

3. To confirm that the entered e-mail address is valid, press the [Test] button.

Check that the test mail successfully arrives at the expected e-mail address.

4. To perform SMTP authentication, for [SMTP Server Authentication], specify the user authentication information to be used for sending e-mail.

ATTENTION

To perform the SMTP authentication, enable SMTP authentication and configure the required settings for the authentication in the [SMTP Server] window. For details, refer to ["4.11.1 Setting the SMTP Server" \(page 126\)](#).

5. Press the [OK] button.
⇒ The information entered is set.

4.17.7 Getting a Screenshot on the Touch Panel

The image of the window displayed on the touch panel can be received via the network and saved in BMP or JPEG format.

1. **Access the scanner from Internet Explorer by specifying the scanner name in a URL to display the download window.**

For details about how to display the download window, refer to "[3.2 Showing the Software Download Window](#)" (page 62).

2. **Press the [Next] button for [Screenshot].**

⇒ A window is displayed for getting a screenshot of the current screen on the touch panel.

3. **Press the [Get Screenshot] button.**

⇒ A screenshot of the current window on the touch panel is acquired and displayed.

The screenshot shows a web interface for capturing a screenshot. At the top, there is a 'Get Screenshot' button, radio buttons for 'BMP' and 'JPEG' (with 'JPEG' selected), and buttons for 'Save', 'Back', and 'Logout'. Below this is a 'Date / Time' field showing '0221 071120', a 'Connect to...' field, and buttons for 'Restart' and 'Power Off'. A 'Comment' field is also present. The interface has a dark header with 'Login' and a help icon. The main area contains 'User Name' and 'Password' input fields. At the bottom, there is a 'Shutdown' button with a power icon and a 'Login' button with a key icon.

4. **Select a file format (BMP or JPEG) of the image of the screenshot to be saved.**

5. When you refer to a date/time, the scanner as the connection destination, or a comment to define a file name for the file to be saved, enter a proper string for the file name in the relevant input field.

Alphanumeric characters, and symbols with the exception of "\ / : ; * ? " < > | # & %" can be used.

To use characters of a different language for a file name, enter them into the [Save As] dialog box.

HINT

If you enter [Date / Time], [Connect to], and [Comment], file names are created in the following order.

- Comment
- Connect to
- Date / Time

- The default values are as follows:
Date / Time: Date/time that the screenshot was taken
Connect to: Scanner name
Comment: (blank)
- The default file name when a screen is saved is one of the following:
 - *Comment_Connect to_Date/Time.bmp*
 - *Comment_Connect to_Date/Time.jpg*
 If nothing is entered for Comment, it becomes "NSScreenShot".
 - *NSScreenshot_Connect to_Date/Time.bmp*
 - *NSScreenshot_Connect to_Date/Time.jpg*

6. Press the [Save] button.

⇒ The [File Download] dialog box appears.

7. Press the [Save] button.

⇒ The [Save As] dialog box appears.

8. Enter a file name, and specify a folder for saving the file.

9. Press the [Save] button.

⇒ The screenshot is saved in a specified file format.

HINT

Press the [Power Off] button to turn the scanner off.

Press the [Restart] button to restart the scanner.

The scanner cannot be turned off or restarted when a regular user or administrator is logged into the connected scanner. If login was performed with automatic login, the scanner can be turned off or restarted while the [Main Menu] or [Job Menu] window is shown.

4.18 Setting a Job Sequence

After the job sequence, job menu, and job group settings are performed on the job settings menus, a regular user can use each assigned job menu at login, and process a job.

1. Setting a job sequence

A job sequence is a single operation that pulls together several user operations (e-Mail/Fax/Print/Save) according to the settings on the [Scan Settings] window. For example, the operation of sending scanned data by e-mail and then saving it in a folder can be set as a single job sequence.

2. Job Menu Settings

A job menu is a menu arrangement of the job sequences set by the user. For example, you can assign a job sequence that sends scanned data by e-mail and then saves it in a folder as a button, and set it on a [Job Menu].

3. Job Group Settings

A job group is a group of users assigned with the same job menu. You can set a job menu to be shared by users who belong to the same job group. Set a job menu as a default job group to be used by users who do not belong to any job groups.

For example, job menu A is assigned to group A, and job menu D is assigned to the default group. User C is included in group A, therefore can use job menu A. Users not included in a job group are able to use job menu D.

4.18.1 Job Setting Quick User Guide

The procedure for an administrator to set up job is shown below.

Setting a job sequence

Jobs List

View, add to, or edit the Jobs List.

Job Details

Set the scan options, message screen, and operations after scanning for a selected job.

For details, refer to ["4.18.2 Setting a Job Sequence"](#) (page 192).

Setting a job menu

Job Menus List

View, add to, or edit the Job Menus List.

Job Menu Layout

Set the job button for the selected job menu.

For details, refer to ["4.18.3 Setting a Job Menu"](#) (page 202).

Setting a job group

Job Groups List

View, add to, or edit the Job Groups List.

Settings For Selected Group(s)

Set the assigned job menus, initial post-login menu, and job group members for the selected job group.

For details, refer to ["4.18.4 Setting a Job Group"](#) (page 207).

Processing a job

- By setting [On] for [Job Mode] on the [Scanner Central Admin Server] window, which is displayed by selecting [Scanner Central Admin Server] under [Network Admin], and releasing job mode settings on the [Job Mode Settings] window of Central Admin Console, the job mode settings set on the job mode edit window, which is displayed by pressing the [Job Mode Settings] button, are executed.
- By setting [Off] for [Job Mode] on the [Scanner Central Admin Server] window, which is displayed by selecting [Scanner Central Admin Server] under [Network Admin], the jobs set on the job settings menus in the Admin Tool are executed.

For details, refer to ["5.14 Processing a Job" \(page 331\)](#).

4.18.2 Setting a Job Sequence Admin Tool Central Admin Console

Set the scan options and job item (e-Mail/Fax/Print/Save) to be processed together as a job sequence.

Up to 1,000 job sequences can be set.

HINT

For details about displaying the window for setting a job sequence via Central Admin Console, refer to the Scanner Central Admin User's Guide.

■ Adding a Job Sequence

This section describes how to add a job sequence.

1. Press the **[Job Menu Settings]** button on the **Tool Menu**.
2. Press the **[Job Sequences]** tab.
 - ⇒ The **[Jobs List]** window appears.

Job Name	Comment	Last Modified
----------	---------	---------------

3. Press the **[New]** button.
 - ⇒ The **[Job Details]** window appears.
4. Set **[Job Name]** and **[Comment]**.

5. Press  to the left of [Common Settings], and set the operations for when a job is processed.

ATTENTION

The layout of the message displayed in the message screen settings, and the actual [Message Screen] layout on the scanner may differ. Check the message layout on the scanner, and set the message.

HINT

Press the [Name Format] button to specify a [Common File Name] on the [File Names (Common)] window.
[Sub-folder Name Format] is enabled only when scanned data is saved to a folder. For details about setting values, refer to ["4.13.4 Setting a File Name Format for When Saving Scanned Data"](#) (page 145).

6. Press  to the left of [Scan Settings].

For details about [Separation] in [Save], refer to "Splitting an Output File" (page 201). For other settings, refer to "5.9 Setting the Scan Options" (page 271).

The screenshot shows the 'Scan Settings' dialog box with the following sections and options:

- Save:**
 - File Format:** PDF, PDF/A, TIFF, JPEG
 - Separation Mode:** Multiple pages, Single page
 - Separation:**
 - Separation Mode: None
 - Number of pages: 1 Page
 - Patch code: Remove separator
 - File Name: Separator, Document Counter, Separator and Document Counter
 - Searchable PDF: No, Yes
 - OCR Highlighted Text Recognition: No
 - Edit OCR Highlighted Text: No, Yes
 - Text Recognition Language: English
 - Text Recognition for Pages: First Page, Pages... to
 - PDF Password:** Off, On
 - Compression:** 4, High (1) - Medium (4) - Low (7), No, Yes
- Basic:**
 - Paper Source:** Feeder (Single Side), Feeder (Both Sides)
 - Paper Size:** Automatic, Custom...
 - Width: 2 inch (2.000 to 8.500), 50.8 mm (50.8 to 215.9)
 - Length: 2 inch (2.000 to 125.000), 50.8 mm (50.8 to 3175.0)
 - Document Feed Direction:** Face-down, Face-up
 - Carrier Sheet:** Off, A3, B4 (JIS), Double Letter
 - Image Mode:** Automatic, Color, Grayscale, Black & White
 - Sensitivity:** 0 (-7 to 7) (Black & White/Grayscale-Color)
 - Resolution:** 200dpi, 200 dpi (50 to 600)
 - Thresholding:** Sensitivity: 0 (-50 to 50), Thresholding (background): 0 (-50 to 50)
 - Control Image Tone:** Automatic, Brightness: 128 (1 to 255), Contrast: 128 (1 to 255), Shadow: 10 (0 to 254), Highlight: 230 (1 to 255), Gamma: 1.6 (0.1 to 10.0)
 - Cleanup:**
 - Sharpness: None
 - Color Cleanup: Level: 1
 - Cleanliness: 0 (-5 to 5)
 - Character Thickness: 0 (-5 to 5)
 - Character Augmentation: 0 (0 to 5)
 - Noise Removal: 0 (0 to 20)
 - Background Pattern Removal: On (Standard)
 - White Level Follower: Off
 - Vertical Streaks Reduction:** Off, On
 - Dropout Color:** Green
 - sRGB Output:** Off, On
- Image Correction:**
 - Blank Page Skip:** Yes, No, Sensitivity: 0 (-5 to 5)
 - Rotation:** Auto
 - Edge Correction:**
 - Edge Filler: No, Yes
 - Fill Color: White, Black
 - Filled Area:
 - Top: 0.051 inch (0 to 0.394), 1.3 mm (0 to 10.0)
 - Bottom: 0.051 inch (0 to 0.394), 1.3 mm (0 to 10.0)
 - Left: 0.051 inch (0 to 0.394), 1.3 mm (0 to 10.0)
 - Right: 0.051 inch (0 to 0.394), 1.3 mm (0 to 10.0)
- Paper Feeding:**
 - Multifeed Setup:** Do not detect, Length, Ultrasonic, Both
- Batch:**
 - Index Output:** No, Yes
 - Barcode Detection:**
 - Type: EAN8, EAN13, Code 3 of 9, Code 128, ITF, UPC-A, Codabar

7. Set a job item.

The screenshot shows a window titled "Job Items" with a dropdown menu set to "1" and two buttons: "Delete This Item" and "Insert New Item".

HINT

Up to ten items can be set.

8. If [e-Mail] is selected for the job item in [Step 7](#), perform settings related to sending e-mail.

For details about setting values, refer to ["5.4 Sending the Scanned Data by e-Mail" \(page 230\)](#).

The screenshot shows the "e-Mail Settings" window. It includes fields for To, Cc, Bcc, File Name, From, Request Return Receipt, Subject, and Body. The "From" field has radio buttons for "e-Mail address of user" (selected) and "Fixed e-mail address". The "Request Return Receipt" field has radio buttons for "Yes" and "No" (selected). The "SMTP Authentication" section includes fields for "User Name" and "Password".

HINT

- Press the [Browse] button to set a different e-mail address from the [LDAP List] window. To filter the LDAP List, refer to ["Filtering the LDAP List" \(page 200\)](#) for more details.
- Press the [Name Format] button to specify a file name on the [File Names (e-Mail)] window. For details about setting values, refer to ["4.11.4 Setting a File Name Format for When Attaching Scanned Data to e-Mail" \(page 129\)](#).

9. If [Fax] is selected for the job item in [Step 7](#), perform settings related to sending a fax.

For details about setting values, refer to ["5.5 Sending the Scanned Data by Fax"](#) (page 244).

HINT

Press the [Browse] button to set a different e-mail address from the [LDAP List] window. To filter the LDAP List, refer to ["Filtering the LDAP List"](#) (page 200) for more details.

10. If [Print] is selected for the job item in [Step 7](#), perform settings related to printing.

For details about setting values, refer to ["5.6 Printing the Scanned Data"](#) (page 252).

HINT

Press the [Browse] button to set the network printer from the [Printer List] window.

11. If [Save] is selected for the job item in [Step 7](#), perform settings related to saving.

For details about setting values other than those for a [Save process results file], refer to ["5.7 Saving the Scanned Data to a Network Folder"](#) (page 262).

Process results files are formatted as follows:

- Process results files are in an XML format.

- Process results files use the UTF-8 character set.
- Process results files contain the following output:

Item	Value
ResultFileVersion	V1.0
ScannerName	Scanner name
User	User
Date	Save completion date
Time	Save completion time
Result	Save process results
ResultCode	Result code
ResultDescription	Result details
Pages	Number of saved pages
SheetCount_Job	Number of sheets to be scanned, set by the job
SheetCount_User	Number of sheets to be scanned, set by the user
SheetCount_Scan	Actual number of scanned sheets
FileName	Saved file name(s) (Multiple files)
Path	Saved file path name

HINT

- Press the [Browse] button to set the network folder from the [Folder List] window.
- Press the [Name Format] button to specify a file name from the [File Names (Save)] window. For details about setting values, refer to "[4.13.4 Setting a File Name Format for When Saving Scanned Data](#)" (page 145).

12. Press the [OK] button.

⇒ A job sequence is added to the [Jobs List] window.

■ Cloning a Job Sequence

This section describes how to clone a job sequence.

1. **Press the [Job Menu Settings] button on the Tool Menu.**
2. **Press the [Job Sequences] tab.**
 - ⇒ The [Jobs List] window appears.
3. **Select the job sequence to be cloned.**
4. **Press the [Clone] button.**
 - ⇒ The [Job Details] window appears.
5. **Clone the detailed job sequence settings.**
6. **Press the [OK] button.**
 - ⇒ A job sequence is added to the [Jobs List] window.

■ Editing a Job Sequence

This section describes how to edit a job sequence.

1. **Press the [Job Menu Settings] button on the Tool Menu.**
2. **Press the [Job Sequences] tab.**
 - ⇒ The [Jobs List] window appears.
3. **Select the job sequence to be edited.**
4. **Press the [Edit] button.**
 - ⇒ The [Job Details] window appears.
5. **Edit the detailed job sequence settings.**
6. **Press the [OK] button.**
 - ⇒ The settings of the job sequence are changed.

■ Deleting a Job Sequence

This section describes how to delete a job sequence.

1. **Press the [Job Menu Settings] button on the Tool Menu.**
2. **Press the [Job Sequences] tab.**
 - ⇒ The [Jobs List] window appears.
3. **Select the job sequence to be deleted.**
4. **Press the [Delete] button.**
 - ⇒ The confirmation window appears.
5. **Press the [OK] button.**
 - ⇒ The job sequence is deleted.

■ Filtering Job Sequences

This section describes how to filter job sequences.

1. **Press the [Job Menu Settings] button on the Tool Menu.**
2. **Press the [Job Sequences] tab.**
 - ⇒ The [Jobs List] window appears.
3. **Enter [Job Name] and [Comment].**
4. **Select the [Find] button.**
 - ⇒ The filtered results appear.

■ Filtering the LDAP List

This section describes how to filter the LDAP List on the [LDAP List] window.

The screenshot shows the 'LDAP List' window. At the top, there is a 'User Name' dropdown menu set to 'FirstName LastName'. Below it is a 'Search Base' text field containing 'LDAP://'. Under 'Filter Conditions', there is a 'Search Position' dropdown menu set to 'Head (abc...)'. Below that are two text input fields: 'User Name' and 'e-Mail Address', with a 'Find' button to the right. There are four checkboxes: 'First Name', 'Last Name', 'Common Name', and 'Display Name'. At the bottom, there is a table with two columns: 'User Name' and 'e-Mail Address'. The table is currently empty. At the very bottom of the window are 'OK' and 'Cancel' buttons.

1. Specify each item on the [LDAP List] window.

2. Select the [Find] button.

⇒ The filtered results appear.

HINT

If the [Find] button is selected, an authentication window appears.

Enter a [User Name] and [Password], and then press the [OK] button.

User names may be up to 129 characters long.

Passwords may be up to 256 characters long. [User Name] and [Password] are case sensitive.

■ Splitting an Output File

An output file can be split in the following ways for a job sequence:

- Specifying a number of pages
- Using a patch code sheet

This function allows you to split a file in a specified unit of pages without stopping a scan when scanning more than one document. A file is split in a specified unit of pages, and consequently the scanned images are separated into each scanned document (unit of pages that is split).

This function can only be set for a job sequence. To set this function, select [Separation] in [Save] in [Scan Settings].

- Specifying a number of pages

To specify a number of pages, select [Number of pages] for [Separation Mode].

Using this setting splits a file in pages determined by the number of pages you specify.

When the last split file is output, if the number of pages that is output is less than the number of pages you specify, the output file contains the last output pages.

Additional scanned pages are not recognized as an additional batch and instead of this, all pages including additional pages are recognized as a batch, then split.

- Using patch codes

To set patch codes, select [Patch Code] for [Separation Mode].

Using this setting, and scanning documents with patch code sheets inserted into the points where documents are to be separated, a file is split and output in the specified unit of pages.

You can configure the setting for naming split output files.

Separator string, document counter, and page counter (for a single page) with delimiters (hyphens "-") are appended to the existing file naming rule.

Examples of file names are as follows:

- Separator

Examples: File naming rule (user name with a sequence number), no separator string specified, PDF

Guest0001-SEPARATOR0001.pdf

Guest0001-SEPARATOR0002.pdf

- Document Counter

Examples: File naming rule (user name without a sequence number), JPG (Since the files are single-page files, a sequence number for the page counter is appended.)

Guest-0001-00001.jpg

Guest-0001-00002.jpg

Guest-0001-00003.jpg

Guest-0002-00001.jpg

Guest-0002-00002.jpg

- Separator and Document Counter

Examples: File naming rule (user name with a sequence number), separator string (scanner) specified, PDF

Guest0001-scanner-0001.pdf

Guest0001-scanner-0002.pdf

4.18.3 Setting a Job Menu Admin Tool Central Admin Console

Assign the job sequence set in "4.18.2 Setting a Job Sequence" (page 192) to a job button, and job buttons on a job menu.

Up to 100 job menus can be set.

HINT

For details about displaying the window for setting a job sequence via Central Admin Console, refer to the Scanner Central Admin User's Guide.

■ Adding a Job Menu

This section describes how to add a job menu.

1. Press the [Job Menu Settings] button on the Tool Menu.
2. Press the [Job Menus] tab.
 - ⇒ The [Job Menus List] window appears.

3. Press the [New] button.
4. Enter a job menu name in [Job Menu Name].

5. Select the line corresponding to the job button position (1) to (6), and select the [Edit] button.

⇒ The [Job Button Settings] window appears.

6. Specify each item.
7. Press the [OK] button.
- ⇒ A job button is set on the [Job Menu Layout] area.
8. Repeat **Step 5** through **Step 7** as required for the number of job buttons.

HINT

- Up to six job buttons can be set.
- To delete a job button, select the job button that you want to delete and press the [Delete] button.

9. Change the position of the job buttons assigned on the job menu as necessary.

Select the job button to move, and then select either  or  to move it. The relationship between the order of job buttons on the [Job Menu Layout] area and the arrangement of buttons on the [Job Menu] is shown below.

10. For [Message Screen], set whether to show [Message Screen] on the [Job Menu] window.

11. For [Scan Viewer], set whether to show [Scan Viewer] on the [Job Menu] window.

12. Press the [Register] button.

⇒ A job menu is added to the [Job Menus List] window.

■ Cloning a Job Menu

This section describes how to clone a job menu.

- 1. Press the [Job Menu Settings] button on the Tool Menu.**
- 2. Press the [Job Menus] tab.**
 - ⇒ The [Job Menus List] window appears.
- 3. Select the job menu to view.**
 - ⇒ The job menu settings are displayed on the [Job Menu Layout] area.
- 4. Change the job menu name shown in [Job Menu Name] to the job menu name to be added.**
- 5. Clone the detailed job menu settings.**
 - For the procedure, refer to [Step 5](#) through [Step 11](#) in "Adding a Job Menu" (page [202](#)).
- 6. Press the [Register] button.**
 - ⇒ A job menu is added to the [Job Menus List] window.

■ Editing a Job Menu

This section describes how to edit a job menu.

- 1. Press the [Job Menu Settings] button on the Tool Menu.**
- 2. Press the [Job Menus] tab.**
 - ⇒ The [Job Menus List] window appears.
- 3. Select the job menu to be edited.**
 - ⇒ The job menu settings are displayed on the [Job Menu Layout] area.
- 4. Edit the detailed job menu settings.**
 - For the procedure, refer to [Step 5](#) through [Step 11](#) in "Adding a Job Menu" (page [202](#)).
- 5. Press the [Register] button.**
 - ⇒ The details of the job menu are changed.

■ Deleting a Job Menu

This section describes how to delete a job menu.

- 1. Press the [Job Menu Settings] button on the Tool Menu.**
- 2. Press the [Job Menus] tab.**
 - ⇒ The [Job Menus List] window appears.
- 3. Select the job menu to be deleted.**
- 4. Press the [Delete] button.**
 - ⇒ The confirmation window appears.
- 5. Press the [Register] button.**
 - ⇒ The job menu is deleted.

■ Viewing the Detailed Settings for a Job Menu

This section describes how to view the detailed settings for a job menu.

- 1. Press the [Job Menu Settings] button on the Tool Menu.**
- 2. Press the [Job Menus] tab.**
 - ⇒ The [Job Menus List] window appears.
- 3. Select the job menu to view.**
 - ⇒ The details for the selected job menu appear in the [Job Menu Layout] area.

4.18.4 Setting a Job Group AdminTool Central Admin Console

Assign the job menu set in "4.18.3 Setting a Job Menu" (page 202) to a job group. Users included in a job group can use the job menus assigned to the group. Users included in multiple job groups can use the multiple job menus assigned to those groups. Up to 100 job groups can be set.

HINT

For details about displaying the window for setting a job sequence via Central Admin Console, refer to the Scanner Central Admin User's Guide.

■ Adding a Job Group

This section describes how to add a job group.

1. Press the [Job Menu Settings] button on the Tool Menu.
2. Press the [Job Groups] tab.

⇒ The [Job Groups List] window appears.

3. Press the [New] button.
4. Enter the job group name for [Job Group Name].

5. Press the [Select] button.

⇒ The [Select Job Menu] window appears.

6. Select a job menu.

7. Press the [OK] button.

⇒ A job menu is set on the [Settings For Selected Group(s)] area.

8. For [Modes Available To User], set whether or not to display the Multi-Function Menu.

9. Press the [Edit] button.

⇒ The [Group Member Settings] window appears.

10. For [Member Name Format], select the member name format.

11. Enter the LDAP server and character string to be used for LDAP searches in the [Search Base] field.

- 12. In the [Member Name] list of [Member Search], select the check box of a user name, Active Directory group, or local account to be added to a job group.**

HINT

To filter the LDAP List, refer to "[Filtering the LDAP List](#)" (page 213) for more details.

- 13. Press the [<<<] button.**

⇒ The user, Active Directory group, or local account is added to the [Group Membership List].

HINT

- Up to 1,000 members can be added as job group members.
- To delete a member added to the [Group Membership List], select the check box in the [Member Name] list, and then press the [>>>] button.

- 14. Press the [OK] button.**

⇒ The number of members registered as job group members is shown in [Number of Members] on the [Settings For Selected Group(s)] window.

- 15. Specify the members to be included in the job group in [Group Member Settings].**

HINT

If the [Include all LDAP users as members] check box is selected, all LDAP users are included regardless of the selection of LDAP users in [Group Membership List].

- 16. Press the [Register] button.**

⇒ A job group is added to the [Job Groups List] window.

■ Cloning a Job Group

This section describes how to clone a job group.

- 1. Press the [Job Menu Settings] button on the Tool Menu.**
- 2. Press the [Job Groups] tab.**
 - ⇒ The [Job Groups List] window appears.
- 3. Select the job group to be cloned.**
 - ⇒ The job group settings are displayed on the [Settings For Selected Group(s)] area.
- 4. Change the job group name shown in [Job Group Name] to the job group name to be added.**
- 5. Clone the detailed job group settings.**
 - For the procedure, refer to [Step 5](#) through [Step 15](#) in "Adding a Job Group" (page [207](#)).
- 6. Press the [Register] button.**
 - ⇒ A job group is added to the [Job Groups List] window.

■ Editing a Job Group

This section describes how to edit a job group.

- 1. Press the [Job Menu Settings] button on the Tool Menu.**
- 2. Press the [Job Groups] tab.**
 - ⇒ The [Job Groups List] window appears.
- 3. Select the check box for the job group to be edited.**
 - ⇒ The job group settings are displayed on the [Settings For Selected Group(s)] area.
- 4. Change the detailed job group settings.**
 - For the procedure, refer to [Step 5](#) through [Step 15](#) in "Adding a Job Group" (page [207](#)).
- 5. Press the [Register] button.**
 - ⇒ The details of the job group are changed.

■ Deleting a Job Group

This section describes how to delete a job group.

- 1. Press the [Job Menu Settings] button on the Tool Menu.**
- 2. Press the [Job Groups] tab.**
 - ⇒ The [Job Groups List] window appears.
- 3. Select the job group to be deleted.**
- 4. Press the [Delete] button.**
 - ⇒ The confirmation window appears.
- 5. Press the [Register] button.**
 - ⇒ The job group is deleted.

■ Viewing the Detailed Settings for a Job Group

This section describes how to view the detailed settings for a job group.

- 1. Press the [Job Menu Settings] button on the Tool Menu.**
- 2. Press the [Job Groups] tab.**
 - ⇒ The [Job Groups List] window appears.
- 3. Select the job group to view.**
 - ⇒ The details for the selected job group appear in the [Settings For Selected Group(s)] area.

■ Assigning Job Menus to Users Not Included in a Job Group

Users who are not included in any job group automatically belong to a Default Group. This section describes how to assign job menus to those users.

1. Press the [Job Menu Settings] button on the Tool Menu.
2. Press the [Job Groups] tab.
 - ⇒ The [Job Groups List] window appears.

3. Select the default job group.
4. Press the [Select] button.
 - ⇒ The [Select Job Menu] window appears.
5. Select a job menu.
6. Press the [OK] button.
 - ⇒ A job menu is set on the [Settings For Selected Group(s)] area.
7. For [Modes Available To User], set whether or not to display the Multi-Function Menu.
8. Press the [Register] button.
 - ⇒ A job menu is assigned to users who are not included in a job group.

■ Filtering the LDAP List

This section describes how to filter the LDAP List on the [Group Member Settings] window.

1. For [Filter Conditions] of the LDAP List, specify each item.
2. Select the [Find] button.

⇒ The filtered results appear.

HINT

- If the login LDAP server type is [Active Directory] or [Active Directory Global Catalog], when the [Find] button is pressed, a confirmation window appears. Enter a [User Name] and [Password], and then press the [OK] button. User names may be up to 129 characters long. Passwords may be up to 256 characters long. [User Name] and [Password] are case sensitive.
- If the number of filtered results on the [LDAP List] window, or the number of registered job group members is large (1,000 at maximum), it may take tens of seconds until the [Group Member Settings] window appears. This can be resolved by performing the following:
 - Add filter conditions
 - Reduce the [Maximum Results] specified on the [e-Mail LDAP Server] window
 - Divide job groups
 - Specify an Active Directory group

4.19 Messages AdminTool

The following shows an example of the window that appears to display a message for the administrator.

The following lists the meanings of icons shown on message windows.

Icon	Details
	Indicates a warning message. This icon is displayed also for improper input values. Read the message and press the [OK] button.
	Indicates an error message. Read the message and press the [OK] button.
	Indicates an information message. No action required. <ul style="list-style-type: none"> ● When the [OK] button is shown on the window, check the message contents, and then press the [OK] button to close the message window. ● When the [OK] button is not shown on the window, the message window closes automatically.
	Indicates an inquiry message. Confirm the message details, and press a relevant button.

4.19.1 Administrator Window Messages

For details about messages and system logs, other than those shown in the table below, refer to Help.

Window	Message	Action
Admin Tool	Connection error	For details about the action to be taken, refer to " 7.2.3 Failure to Access the Scanner Using Internet Explorer, the Admin Tool, the Central Admin Server, or the User Editor " (page 383).
	You cannot connect to this device using the current version of Admin Tool. Install the latest version, and try again.	Install the latest version of Admin Tool from the scanner, and try again.

Chapter 5

Regular User Operations

User

This scanner is used to scan documents which then can be sent by e-mail or fax, printed via a network scanner, or saved to a folder.

To perform the operations described in this chapter, the scanner must first be set up by the administrator.

For details about scanner setup, refer to "[Chapter 4 Administrator Operations \(Touch Panel and Admin Tool\)](#)" (page 68).

5.1 Loading Documents.....	217
5.2 Using Touch Panel Windows: Regular User	224
5.3 Logging in: Regular User Mode.....	227
5.4 Sending the Scanned Data by e-Mail	230
5.5 Sending the Scanned Data by Fax	244
5.6 Printing the Scanned Data	252
5.7 Saving the Scanned Data to a Network Folder.....	262
5.8 Saving the Scanned Data to a SharePoint Folder.....	265
5.9 Setting the Scan Options	271
5.10 Enabling/Disabling the Scan Viewer	313
5.11 Editing the Scanned Data in the Scan Viewer.....	316
5.12 Viewing the Send Status	326
5.13 Maintenance	329
5.14 Processing a Job	331
5.15 Changing a User Password.....	341

5.1 Loading Documents

This section describes how to load documents onto the scanner.

5.1.1 How to Load Documents

1. Check the number of document sheets.

For document sheet limits, refer to ["A.3 Maximum Document Loading Capacity" \(page 404\)](#).

2. When loading multiple document sheets, fan the document stack.

1. Lightly grip the ends of the document stack in both hands, and fan two or three times.

2. Rotate the documents 90 degrees, and fan again.

3. Align the edges of the document sheets to be loaded, and slightly skew the leading edge of the document.

ATTENTION

Scanning the document sheets whose edges are not aligned might cause paper jams or damage to the document.

3. Pull up the extension to hold the documents, and pull out the stacker.

Pull out the stacker and lift up Stacker extension 1 and Stacker extension 2 towards you.

HINT

The stacker holds the document sheets after they have been scanned. It can be pulled out and adjusted to the size of the document being scanned.

4. Load the documents into the ADF paper chute.

Load the document front side down, with the top of the document entering the scanner first (when multiple document sheets are loaded, the last page is on the top).

ATTENTION

The ADF paper chute needs to be put all the way back to be used. Documents cannot be fed if it is folded.

HINT

If [Face-up] is selected for [Document Feed Direction] on the [Paper] window, load the document front side up, with the bottom of the document entering the scanner first. When you run [Scan More], additional pages will follow on from the last page of the current scanned image.

For details about how to load the document, refer to ["5.9.3 Setting Paper" \(page 284\)](#).

5. Adjust the side guides to the width of the documents.

Move the side guides so that they touch both sides of the documents.

If there is any space between the side guides and the edges of documents, the scanned data may be skewed.

5.1.2 Loading Documents Using a Carrier Sheet

With an optional Carrier Sheet, you can scan documents larger than A4 size, such as A3, Double Letter, and B4. To do this, you fold the document in half and scan both sides continuously in duplex mode, one side at a time. The scanned images will be merged and saved as one image page.

When scanning a document larger than A4 size, change the settings as follows:

ATTENTION

When using a Carrier Sheet, set the output size for the scanned document. For details, refer to ["5.9.5 Configuring Settings for a Carrier Sheet"](#) (page 286).

HINT

- You can merge both front and back side images of a document smaller than A4 size to output a single double-page image.
- For details about purchasing a Carrier Sheet, refer to ["6.5.4 Purchasing a Carrier Sheet"](#) (page 362).

1. Fold the sheet to be scanned in half so that its front side faces outwards.

Fold the sheet tightly and smooth out the crease. Otherwise, the sheet may be skewed during scanning.

2. Open the Carrier Sheet and insert the document.

Align the fold with the right edge of the Carrier Sheet so that the document fits into the Carrier Sheet at the upper corner.

HINT

- When placing the Carrier Sheet with the printed black and white pattern to be at the top, the front of the Carrier Sheet has the thick vertical line at the right side.
- If [Face-up] is selected for [Document Feed Direction] on the [Paper] window, align the fold side with the right edge of the Carrier Sheet so that the document fits into the Carrier Sheet at the lower corner.

3. With the Carrier Sheet face-down, place the black and white pattern section downward, and load it in the ADF paper chute.

After loading the Carrier Sheet, align the side guides with the Carrier Sheet.

ATTENTION

The ADF paper chute needs to be put all the way back to be used. Documents cannot be fed if it is folded.

4. Start the scan.

⇒ The front and back side images are merged into a double-page spread image.

**ATTENTION**

- There may be a gap between the front and back side images, or a line may appear on the output scan image.
If a thick document is scanned with the Carrier Sheet, scanned images on the both right and left sides may be skewed to a trapezoidal shape.
These problems may be improved in the following ways.
 - Fold the document neatly
 - Align the edge of the document with the edge of the Carrier Sheet
 - Scan the Carrier Sheet with the front side facing the paper chute or vice versa
- The folded part of the document may be mis-detected, causing the seam of the facing pages be unintentionally trimmed on the scanned image. In this case, the folded edge of the document should be placed 1 mm away from the edge of the Carrier Sheet.

5.2 Using Touch Panel Windows: Regular User

5.2.1 [Main Menu] Window

The types of buttons displayed on the menu differ, for example, according to the settings of the linked server.

When e-Mail, Fax, Print, Save, and Scan to SharePoint are set, the following window is displayed.

5.2.2 [Job Menu] Window

The types of buttons displayed on the menu differs according to the job settings. In the following example, six jobs are set.

When a regular user belongs to multiple job groups, a menu and buttons to switch the [Job Menu] window appear as shown below.

5.2.3 Regular User Settings Overview

Regular users can configure the following setting items as long as these items have been enabled by the administrator.

- **Login Setting**
Set the scanner to automatically login without displaying the [Login] window, when the scanner power is switched on or restarted.
Also, set whether or not to enable login with the guest account.
To change these settings, contact the administrator.
- **Initial Post-Login Menu**
Set whether to display the [Main Menu] or [Job Menu] window.
Switch between the [Main Menu] and [Job Menu] windows, or display only the [Job Menu] window.
- **User Roaming Data**
User settings can be shared between multiple scanners, by allowing user data to be managed on the Central Admin Server.
A regular user can login on different scanners while retaining their user data.
The following user data can be used in roaming mode.
 - "My List" e-mail address book
 - Scan settings
 - Name of the last network printer used(*)
 - Name of the last network folder used(*)
 - SharePoint folder(*)

(*): If different network printers, network folders or SharePoint folders are set for scanners, the status of the selection is disabled.
- **Job Roaming Info**
User job settings can be shared between multiple scanners, by allowing job settings to be managed on the Central Admin Server.
A regular user can login on different scanners while retaining their preferred [Job Menu] window.

HINT

When Roaming Mode or Job Mode is [On] on the [Scanner Central Admin Server] window, which is displayed by selecting the [Scanner Central Admin Server] window in [Network Admin], if communication with the Central Admin Server is not possible at login, a confirmation message will appear.

If the [OK] button is pressed, the settings saved in the scanner are used. Pressing the [Cancel] button returns to the [Login] window.

For details about the [Scanner Central Admin Server] window, refer to ["4.9.2 Setting a Central Admin Server" \(page 112\)](#).

5.3 Logging in: Regular User Mode

Do not move or shake the scanner when it is turned on. This may damage components in the scanner and cause data to be lost.

HINT

- The default user name and password for a regular user (guest account) are set as follows:
User name: guest
Password: guest
However, these cannot be used if the login setting for a guest account is disabled.
- Only one administrator or regular user can log in to the scanner at a time. Multiple persons cannot log in at the same time.

Depending on the authentication mode and the specified user name, the following authentication process is performed for login authentication.

- For users registered in the LDAP server
Specify a user name from the user information registered with the LDAP server.
 - When the [Server Type] of the LDAP server is [Active Directory] or [Active Directory Global Catalog]

User Name Format	Authentication Process
SAM Account Name Does not contain @	Authenticate the user login name (sAMAccountName). Example: user
User Principal Name Contains @	Authenticate the user login name (userPrincipalName). Example: user@example.com

HINT

When specifying a SAM account name with a domain name, describe "*domain_name\SAM_account_name*".

- When the [Server Type] of the LDAP server is [Other LDAP Server]

User Name Format	Authentication Process
uid	Authenticate the user login name (uid). Example: user
cn	Authenticate the user login name (cn). Example: user

- For users registered in a local account
Specify a user name from the user information of the local account.
Authentication is performed with a specified user login name for a local account saved in a scanner.

Note that the authenticated user information is also used when saving scans to a network folder.

When the scanner is turned on or restarted, automatic login without displaying the [Login] window is possible.

Login is not possible if the Active Directory account option is "User must change password at next logon". Contact an administrator to change a password, and then try logging in.

HINT

- When using a scanner without using an LDAP server or registering a local account, login with the guest account.
- For details about the LDAP server, refer to ["LDAP Server" \(page 45\)](#).
- For details about automatic login or enabling login with the guest account, refer to ["4.6.1 Setting the Login Settings" \(page 92\)](#).
- When [Other LDAP Server] is selected for [Server Type], you cannot skip entering a password in the [Login] window. Always enter the password.

1. Press the power button.

⇒ The [Login] window appears.

2. Enter a user name and password.

The screenshot shows a login window titled 'Login' with a help icon (question mark) in the top right corner. Below the title bar are two input fields: 'User Name' and 'Password'. At the bottom of the window, there is a 'Shutdown' button with a power icon on the left and a 'Login' button with a lock icon on the right. A virtual keyboard is overlaid on the bottom half of the window, showing keys for letters, numbers, and navigation.

HINT

If [Active Directory Global Catalog] is selected for the login LDAP server, the [UPN Suffix] input field is displayed.

- User names including a UPN suffix may be up to 64 characters long. The entered UPN suffix is remembered and used again at the next login.
- If a UPN suffix is entered, "@" and the UPN suffix will be appended to the user name. For example, if the user name is "user" and the entered UPN suffix is "example.com", it is authenticated as "user@example.com". In this case, this is the "User Principal Name".
- Do not enter a UPN suffix when it is not required.
- A UPN suffix is not required when logging in with a guest account. Even if entered, it is ignored.

3. Press the [Login] button.

⇒ If the user name and password are valid, the [Main Menu] window appears.

5.4 Sending the Scanned Data by e-Mail

ATTENTION

If an LDAP server is set, register the user e-mail address with the LDAP server. If a local account is set, register the user e-mail address.
If the user e-mail address is not registered, e-mails cannot be sent.

1. On the [Main Menu] window, press the [e-Mail] button.

⇒ The [Send e-Mail] window appears.

HINT

The scan information can be changed by pressing  of [Scan Settings]. For details, refer to ["5.9 Setting the Scan Options" \(page 271\)](#).

2. Enter e-mail addresses, distribution list names, or groups in [To], [Cc], and [Bcc] fields.

For more details about distribution list settings, refer to ["5.4.2 Adding an e-Mail Target to the e-Mail Address Book" \(page 237\)](#).

HINT

- e-Mail addresses can be selected from the e-mail address book by pressing . For details, refer to ["5.4.1 Selecting an e-Mail Target from the e-Mail Address Book" \(page 233\)](#).
If the e-mail address book cannot be used, contact the administrator.
- Groups can be edited using User Editor. Distribution lists can also be edited. For details, refer to ["Appendix F Editing Using User Editor" \(page 434\)](#).

3. Enter an e-mail address in the [From] field.

This field can be entered if logged in with the guest account, that has no set e-mail address.

For details about e-mail address settings values, refer to ["B.1 e-Mail Address Setting Values" \(page 409\)](#).

HINT

[From] e-mail addresses can be selected from the e-mail address book by pressing . For details, refer to ["5.4.1 Selecting an e-Mail Target from the e-Mail Address Book" \(page 233\)](#).

If the e-mail address book cannot be used, contact the administrator.

4. Specify the rest of the items.

HINT

- [Request Return Receipt] and [Send a copy to my e-mail address] are displayed when [Request Return Receipt] and [Bcc Sender for e-Mail] are [On] in [Send e-Mail] on the administrator window. For more details, refer to ["4.11.3 Configuring Settings for Sending e-Mail" \(page 128\)](#).

- The [Clear the authentication settings] button is displayed when [SMTP Authentication] is enabled in [SMTP Server Extension] on the administrator window. For more details, refer to ["4.11.2 Setting the SMTP Server \(Extension\)" \(page 127\)](#).

Pressing this button enables you to clear the authentication information that you have set.

5. Press the [Scan] button.

When [Scan Viewer] is [Off], this will be a [Scan & Send] button.

⇒ Scanning starts.

When [Off] is set for [Scan Viewer], the display for the scan settings and the scanning status (preview) can be switched during the scan.

The maximum number of pages that can be scanned is 999.

When the blank page skip function is enabled, the number of scanned pages excluding skipped blank pages is shown.

Additional pages can be scanned in place of skipped blank pages, until the maximum number of scanned pages is reached.

⇒ When the scanning has completed, the [Scan Viewer] window appears.

HINT

Scanned data can be checked on the [Scan Viewer] window. The scanned data can be edited on the scan viewer details window which is displayed after a scanned image is selected. For more details, refer to "[5.10 Enabling/Disabling the Scan Viewer](#)" (page 313).

6. Check and edit the scanned data.

Scanned data can be checked on the [Scan Viewer] window. The scanned data can be edited on the scan viewer details window which is displayed after a scanned image is selected. For more details, refer to "[5.11 Editing the Scanned Data in the Scan Viewer](#)" (page 316).

7. On the [Scan Viewer] window, press the [Send] button.

HINT

If the [SMTP Authentication] window appears, enter authentication information needed to access the SMTP server, and press the [OK] button.

⇒ The scanned data in the specified file format is sent as an e-mail attachment.

If [Split Mails] is set to [On], split e-mails will be sent.

If the number of e-mail recipients exceeds the specified maximum number, a warning message appears.

⇒ The [Main Menu] window is shown again.

HINT

- The following items are set by the administrator in advance.
 - The maximum number of e-mail addresses to be specified in the [To] field
 - Whether to split an e-mail to be sent, and the maximum size of a split e-mail
 - The maximum size of an attached file

To change these settings, contact the administrator. For more details, refer to "[4.11.1 Setting the SMTP Server](#)" (page 126).

- For photographs and graphics, their file sizes can be decreased by increasing the compression rate. For details, refer to "[5.9.10 Compression](#)" (page 295).
- If the file format is JPEG, single page TIFF, single page PDF, or single page PDF/A, the number of files that are attached to an e-mail will be the same number of pages that you scanned.
- If the e-mail fails to be sent, an error message e-mail with the following title is sent from the scanner to the [From] address.
Network Scanner (XXXX) Error

5.4.1 Selecting an e-Mail Target from the e-Mail Address Book

The following explains how to use an e-mail address book to specify destinations when sending an e-mail, instead of directly entering e-mail addresses with a keyboard.

The details to select e-mail addresses from an e-mail address book are described in [Step 2](#) and [Step 3](#) of "5.4 Sending the Scanned Data by e-Mail" (page 230).

● Type of the e-Mail Address Book

There are two types of e-mail address books, My List and LDAP List.

● My List

This is an e-mail address book that can be created by the user.

HINT

My List can also be edited using User Editor. For details, refer to ["Appendix F Editing Using User Editor"](#) (page 434).

● LDAP List

This is an e-mail address book which uses all the data saved on the LDAP server. The LDAP List cannot be edited.

The LDAP List cannot be used in the following cases, therefore the [LDAP List] tab is not shown on the window.

- If an LDAP server is not used
- If logged in with the guest account
- If logged in with a local account

● e-Mail Targets that Can Be Selected from the e-Mail Address Book

When sending an e-mail, the following e-mail targets can be selected and entered from the e-mail address book.

e-Mail Target	Icon Shown in the e-Mail Address Book	My List	LDAP List
Group		Yes	— (*)
Distribution List		Yes	— (*)
e-Mail Address		Yes	Yes

Yes: Available —: Unavailable

(*): Not shown in the LDAP List

The following explains how to select an e-mail address using the LDAP List.

1. On the [Send e-Mail] window, press  in the e-mail address field.
⇒ The [e-Mail Address Book] window appears.
2. Select the [LDAP List] tab.
⇒ The [e-Mail Address Book] window for the LDAP List appears.
3. Press a search parameter button (either the left, middle, or [e-Mail Address] button) to select a search item.

**HINT**

The administrator can customize and specify the search parameters and button names allocated to the left and middle buttons.

For details about customizing the search parameters and the button names, refer to "[4.10.4 Setting the LDAP Search Parameters](#)" (page 124).

4. In the [Search Target] field, enter a part of or entire e-mail address to be searched for.

HINT

For My List, the search string and the search results from the previous search can be

cleared by pressing  button.

5. Press  in [Search Position].
⇒ The [Search Position] window appears.

6. Select a search position setting.

⇒ The window returns to the [e-Mail Address Book] LDAP List. The selected position is displayed in [Search Position].

7. Press .

⇒ The search results are displayed on the right side. Five results are displayed at a time.

HINT

- The number of search results to be displayed can be set by the administrator. For details, refer to "4.10.2 Setting the e-Mail LDAP Server" (page 122).
- Therefore, search results differ according to the list selected.

Search String	My List	LDAP List
Case	Insensitive	Insensitive
Diacritical/Accent marks	Sensitive	Insensitive

For My List search, the following also applies.

- All currently displayed levels and their subordinates are searched.
- For groups that are shown in a search result, even if a group is selected,  is disabled and the contacts in the group cannot be viewed.

8. Select the desired e-mail target from the search results and press .

⇒ The selected e-mail address is added to [Selected e-Mail Addresses].

To add multiple e-mail addresses, repeat this step.

HINT

Selecting an e-mail address and pressing  can be used to add the e-mail address to My List.

9. Press the [OK] button.

⇒ The e-mail address is added to the field in the [Send e-Mail] window.

5.4.2 Adding an e-Mail Target to the e-Mail Address Book

The following explains how to add an e-mail address or a distribution list to your My List in the e-mail address book. e-Mail addresses or distribution lists cannot be added to the LDAP List.

The maximum number of e-mail targets that can be saved in the e-mail address book is as follows.

- Total of 5,000 e-mail targets which include groups, distribution lists and/or e-mail addresses
- Total of 10,000 e-mail addresses

1. Open the [e-Mail Address Book] window in either of the following ways.

- On the [Send e-Mail] window, press  in the e-mail address field.
- On the [Main Menu] or [Job Menu] window, press the [Maintenance] button, then on the [Maintenance] window, press the [Edit e-Mail Address] button.

2. Select the [My List] tab.

The screenshot shows the 'e-Mail Address Book' window with the 'My List' tab selected. The window contains a search bar with a magnifying glass icon, a search position dropdown menu set to 'Head (abc...)', and a list of addresses. The 'e-Mail Address' column header is highlighted in green. A button labeled 'Edit e-Mail Address Book' with a plus sign is visible. On the right side, there are three navigation buttons: an up arrow, a down arrow, and a refresh/circular arrow button. At the bottom, there are 'Cancel' and 'OK' buttons.

3. Press the [Edit e-Mail Address Book] button.

⇒ The [Edit e-Mail Address Book] window appears.

**4. Press .**

To add an e-mail address or distribution list to a group, display the target group and press the button.

⇒ The [Add e-Mail Address] window appears.

5. Enter the information of the e-mail address to be added.

- For e-mail addresses

On the [e-Mail Address] tab, enter the e-mail address, first name, and last name to be added.

For details about e-mail address settings values, refer to "[B.1 e-Mail Address Setting Values](#)" (page 409).

The screenshot shows a dialog box titled "Add e-Mail Address". It has two tabs: "e-Mail Address" (which is selected) and "Distribution List". The dialog contains three text input fields: "First Name", "Last Name", and "e-Mail Address". At the bottom of the dialog, there are two buttons: "Cancel" and "OK".

- For distribution lists
On the [Distribution List] tab, enter the list name and e-mail addresses to be added to the distribution list.
For details about e-mail address settings values, refer to ["B.1 e-Mail Address Setting Values"](#) (page 409).

HINT

e-Mail addresses can be selected from the e-mail address book, which can be accessed

by pressing . For details, refer to ["5.4.1 Selecting an e-Mail Target from the e-Mail Address Book"](#) (page 233).

If the e-mail address book cannot be used, contact the administrator.

The screenshot shows a dialog box titled "Add e-Mail Address". It has two tabs: "e-Mail Address" and "Distribution List". The "Distribution List" tab is active. Inside the dialog, there is a text input field for "List Name" and a larger text input field for "e-Mail Addresses" with a list icon on its right side. At the bottom, there are "Cancel" and "OK" buttons.

6. Press the [OK] button.

⇒ The e-mail addresses and distribution lists are added to your My List.

HINT

My List can also be edited using User Editor. For details, refer to ["Appendix F Editing Using User Editor"](#) (page 434).

5.4.3 Editing an e-Mail Target in the e-Mail Address Book

The following explains how to edit My List in the e-mail address book. LDAP List cannot be edited.

1. Perform the steps from **Step 1** to **Step 3** in "[5.4.2 Adding an e-Mail Target to the e-Mail Address Book](#)" (page 237) to show the [e-Mail Address Book] window.
2. Select the e-mail address or distribution list to be edited.
3. Press .
⇒ The [Edit e-Mail Address] window appears.
4. Edit the information.
 - For e-mail addresses
Enter the e-mail address, first name, and last name to be added.
For details about e-mail address settings values, refer to "[B.1 e-Mail Address Setting Values](#)" (page 409).

Edit e-Mail Address

e-Mail Address

First Name
fujitsu

Last Name
taro

e-Mail Address
user@example.com

Cancel OK

- For distribution lists
Enter the list name and e-mail addresses to be added to the distribution list.
For details about e-mail address settings values, refer to ["B.1 e-Mail Address Setting Values"](#) (page 409).

HINT

e-Mail addresses can be selected from the e-mail address book, which can be accessed

by pressing . For details, refer to ["5.4.1 Selecting an e-Mail Target from the e-Mail Address Book"](#) (page 233).

If the e-mail address book cannot be used, contact the administrator.

5. Press the [OK] button.

⇒ The edited e-mail address is saved in your My List address book.

HINT

My List can also be edited using User Editor. For details, refer to ["Appendix F Editing Using User Editor"](#) (page 434).

5.4.4 Deleting an e-Mail Target from the e-Mail Address Book

The following explains how to delete an e-mail address or a distribution list from your My List. e-Mail targets cannot be deleted from the LDAP List.

1. Perform the steps from **Step 1 to Step 3** in "[5.4.2 Adding an e-Mail Target to the e-Mail Address Book](#)" (page 237) to show the [e-Mail Address Book] window.
2. Select the e-mail address or distribution list to be deleted.
3. Press .
 - ⇒ The [Delete e-Mail Address] window appears.
 - The following is an example window which is shown when an e-mail address is selected to be deleted.
4. Check that the correct e-mail target has been set for deletion and press the [OK] button.

⇒ The e-mail target is deleted from the e-mail address book.

HINT

My List can also be edited using User Editor. For details, refer to "[Appendix F Editing Using User Editor](#)" (page 434).

5.5 Sending the Scanned Data by Fax

1. On the [Main Menu] window, press the [Fax] button.

⇒ The [Send Fax] window appears.

HINT

The scan information can be changed by pressing  of [Scan Settings]. For details, refer to ["5.9 Setting the Scan Options"](#) (page 271).

2. Enter a fax number into the [Recipient Fax No.] field.

HINT

Fax numbers can be selected from the fax number list by pressing . For details, refer to ["5.5.1 Selecting a Fax Number from the Fax Number List"](#) (page 246).

3. Enter the e-mail address that is used to notify the result of fax sent or the sender's e-mail address in [Notification To (Sender's e-Mail Address)].

If nothing is specified for [From] in the pane that is displayed when [Fax Server] is selected under [Fax] on the administrator window, enter an e-mail address.

For details about e-mail address settings values, refer to ["B.1 e-Mail Address Setting Values"](#) (page 409).

4. Specify the rest of the items.

HINT

The [Clear the authentication settings] button is displayed when [SMTP Authentication] is enabled in [SMTP Server Extension] on the administrator window. For more details, refer to "[4.11.2 Setting the SMTP Server \(Extension\)](#)" (page 127).

Pressing this button enables you to clear the authentication information that you have set.

5. Press the [Scan & Send] button.

When [Scan Viewer] is [On], this will be the [Scan] button.

⇒ Scanning starts.

⇒ The scanned data is sent by fax immediately after the scanning is completed, and the touch panel screen returns to the [Main Menu] window.

HINT

If the [SMTP Authentication] window appears, enter authentication information needed to access the SMTP server and press the [OK] button.

HINT

- When [Scan Viewer] is [On], the [Scan Viewer] window appears once scanning is complete.

The maximum number of pages that can be scanned is 999.

When the blank page skip function is enabled, the number of scanned pages excluding skipped blank pages is shown.

Additional pages can be scanned in place of skipped blank pages, until the maximum number of scanned pages is reached.

Scanned data can be checked on the [Scan Viewer] window. The scanned data can be edited on the scan viewer details window which is displayed after a scanned image is selected. For more details, refer to "[5.11 Editing the Scanned Data in the Scan Viewer](#)" (page 316).

For more details about displaying the [Scan Viewer] window, refer to "[5.10 Enabling/Disabling the Scan Viewer](#)" (page 313).

- If data fails to be sent to the fax server, an error notification e-mail with the following title is sent from the scanner to the e-mail address of the user who has logged in.
Network Scanner (XXXX) Error

5.5.1 Selecting a Fax Number from the Fax Number List

When sending a fax, instead of directly entering a fax number with keyboard, fax numbers may be selected from a fax number list.

To enter a fax number using the fax number list, refer to [Step 2](#) of "5.5 Sending the Scanned Data by Fax" (page 244).

1. On the [Send Fax] window, press  on the right side of the recipient fax No. field.

⇒ The [Fax Number List] window appears.

2. Press a search parameter button (either the [Recipient] or [Fax No.] button) to select a search item.
3. In [Search Target], enter a search string.

4. Press  in [Search Position].

⇒ The [Search Position] window appears.

5. Select a search position setting.

⇒ The window returns to the [Fax Number List]. The search method that you selected is set in [Search Position].

6. Press .

⇒ Five results are displayed at a time.

7. Select a destination for sending the fax from the search results.

8. Press the [OK] button.

⇒ The fax number is added to the field in the [Send Fax] window. Only one fax number can be entered at a time.

5.5.2 Adding a Contact to the Fax Number List

This section describes how to add a contact to the fax number list.

A maximum of 1,000 fax numbers can be saved in the fax number list. You cannot add any more fax numbers if the list already contains 1,000 fax numbers.

HINT

Fax contact numbers added to the list are accessible to all users.

1. Open the [Fax Number List] window in either of the following ways.

- On the [Send Fax] window, press  on the right side of the recipient fax No. field.
- On the [Main Menu] or [Job Menu] window, press the [Maintenance] button, then on the [Maintenance] window, press the [Edit Fax Numbers] button.

2. Press .

⇒ The [Add Fax Number] window appears.

3. Enter the fax contact details.

The screenshot shows a dialog box titled "Add Fax Number". The title bar is dark grey and contains the text "Add Fax Number" on the left, a question mark icon in a circle in the middle, and a keyboard icon on the right. The main area of the dialog is light grey and contains two text input fields. The first field is labeled "Recipient" and the second is labeled "Fax No.". At the bottom of the dialog, there is a dark grey bar with a "Cancel" button on the left and an "OK" button on the right.

4. Press the [OK] button.

⇒ The contact is added to the fax number list.

5.5.3 Editing the Fax Number List

Edited fax contact numbers are accessible to all users.

1. Open the [Fax Number List] window in either of the following ways.

- On the [Send Fax] window, press  on the right side of the recipient fax No. field.
- On the [Main Menu] or [Job Menu] window, press the [Maintenance] button, then on the [Maintenance] window, press the [Edit Fax Numbers] button.

2. Select a fax number to be edited.

3. Press .

⇒ The [Edit Fax Number] window appears.

4. Edit the information.

The screenshot shows a dialog box titled "Edit Fax Number". It has a dark header bar with a question mark icon and a keyboard icon. The main area is light gray and contains two text input fields. The first field is labeled "Recipient" and contains the text "abc". The second field is labeled "Fax No." and contains the text "123456789". At the bottom of the dialog, there are two buttons: "Cancel" on the left and "OK" on the right.

5. Press the [OK] button.

⇒ The edited fax number list contact is saved.

5.5.4 Deleting a Contact from the Fax Number List

Fax contact numbers deleted from the list are no longer accessible to any user.

1. Open the [Fax Number List] window in either of the following ways.

- On the [Send Fax] window, press  on the right side of the recipient fax No. field.
- On the [Main Menu] or [Job Menu] window, press the [Maintenance] button, then on the [Maintenance] window, press the [Edit Fax Numbers] button.

2. Select the fax contact that is to be deleted.

3. Press .

⇒ The [Delete Fax Number] confirmation window appears.

4. Check that the correct fax contact has been set for deletion and press the [OK] button.

Delete Fax Number

OK to delete the following data?

Recipient	abc
Fax No.	123456789

Cancel OK

⇒ The contact is deleted from the fax number list.

5.6 Printing the Scanned Data

1. On the [Main Menu] window, press the [Print] button.

⇒ The [Print] window appears.

HINT

The scan information can be changed by pressing  of [Scan Settings]. For details, refer to "5.9 Setting the Scan Options" (page 271).

2. To change the printer, press .

⇒ The [Printer List] window appears.

3. Select a target printer and press the [OK] button.

HINT

- Only printers which were added in the list by the administrator can be selected. To change the printers in the list, contact the administrator.
For more details about adding printers, refer to ["4.14 Setting the Network Printers" \(page 147\)](#).
- If the [Clear the authentication settings] button is enabled, you can clear the authentication information that you have set for the selected network printer.

⇒ This returns you to the [Print] window.

HINT

- If the [Print Server Authentication] window appears, enter authentication information needed to access the network printer and press the [OK] button.
- If you select [On] for [Show the authentication screen] and then press the [OK] button, the authentication window for the selected network printer appears. You can change the authentication information on this window.
- On the scanner, printing rights for the printer server are checked before printing can be performed. When printing rights are being checked, data may be spooled temporarily.

4. Enter a number in [No. of Copies] field.

5. Make any required print setting changes.

The scaling, positioning, and print mode settings can be changed.
For details, refer to the following.

["5.6.1 Scaling" \(page 255\)](#)

["5.6.2 Positioning" \(page 259\)](#)

["5.6.3 Print Side" \(page 261\)](#)

To return the print settings to the factory settings, press the [Default] button.

6. Specify the rest of the items.**7. Press the [Scan] button.**

When [Scan Viewer] is [Off], this will be a [Scan & Print] button.

⇒ The scanning starts.

When [Scan Viewer] is [Off], the scan settings and scanning status (preview) can be switched and shown during a scan.

When [Scan Viewer] is [On], the [Scan Viewer] window appears.

The maximum number of pages that can be scanned is 100.

When the blank page skip function is enabled, the number of scanned pages excluding skipped blank pages is shown.

Additional pages can be scanned in place of skipped blank pages, until the maximum number of scanned pages is reached.

⇒ When the scanning has completed, the [Scan Viewer] window appears.

HINT

- If the [Scan & Send] button is pressed when [Scan Viewer] is [Off], the scanned data is printed immediately after the scanning is complete, and the touch panel screen returns to the [Main Menu]. For details, refer to "[5.10 Enabling/Disabling the Scan Viewer](#)" (page 313).
- On the scanner, printing rights for the printer server are checked before printing can be performed. When printing rights are being checked, data may be spooled temporarily.

8. Check and edit the scanned data.

Scanned data can be checked on the [Scan Viewer] window. The scanned data can be edited on the scan viewer details window which is displayed after a scanned image is selected.

For more details, refer to "[5.11 Editing the Scanned Data in the Scan Viewer](#)" (page 316).

9. On the [Scan Viewer] window, press the [Print] button.

⇒ The scanned data is sent to the print server and printed.

The document name for the scanned data to be printed is the name of the scanner.

ATTENTION

The user log shows the result of the process until the scanned data has been sent to the print server. The network printer printing result is not included. For more details about the user log, refer to "[5.12.1 Viewing Details on Send Operations That Were Completed \(User Log\)](#)" (page 326).

HINT

If the printing fails, an error notification e-mail with the following title is sent from the scanner to the e-mail address of the user that logged in with the LDAP server authentication.

Network Scanner (XXXX) Error

5.6.1 Scaling

Set whether to print the scanned data according to the printing paper size. The setting selected here will be used every time the user prints a document.

1. On the [Print] window, press the [Scaling] button.

⇒ The [Scaling] window appears.

2. Select the print scale of the scanned data.

Printing results will vary as shown below, depending on the positioning setting. For more details on the positioning setting, refer to ["5.6.2 Positioning" \(page 259\)](#).

- Shrink to Fit

The image is reduced so that the entire image fits into the area available for printing (area inside the dotted line). Further enlargement is not possible.

- If the positioning setting is [Center], the control point for printing is the center point of the area available for printing.
- If the positioning setting is [Top Left], the control point for printing is the top left corner of the area available for printing.

Print Sheet	Scanned Data	Positioning	Result
<p>Small</p> 	<p>Large</p> 	Center	
		Top Left	
<p>Large</p> 	<p>Small</p> 	Center	
		Top Left	
<p>Same</p> 	<p>Same</p> 	Center	
		Top Left	

- 100%
The image is printed at full scale, regardless of the paper size.
 - If the positioning setting is [Center], the control point for printing is the center point of the print sheet.
 - If the positioning setting is [Top Left], the control point for printing is the top left corner of the print sheet.

Print Sheet	Scanned Data	Positioning	Result
Small 	Large 	Center	
		Top Left	
Large 	Small 	Center	
		Top Left	

Print Sheet	Scanned Data	Positioning	Result
Same 	Same 	Center	
		Top Left	

⇒ This returns you to the [Print] window. The selected scaling setting is displayed to the right of the [Scaling] button.

ATTENTION
 For more details about edge filling, refer to ["5.9.17 Filling the Edge of Scanned Image \(Edge Correction\)"](#) (page 305).

5.6.2 Positioning

Set the print position of the scanned data.
 The setting selected here will be used every time the user prints a document.

1. On the [Print] window, press the [Positioning] button.

⇒ The [Positioning] window appears.

2. Select the print positioning of the data.

Printing results will vary as shown below, depending on the scaling setting. For more details on the scaling setting, refer to "5.6.1 Scaling" (page 255).

Button	Scaling	Control Point
Center	Shrink to Fit	Uses the center point of the area available for printing as a control point. 

Button	Scaling	Control Point
Center	100%	<p>Uses the center point of the sheet as a control point.</p> 
Top Left	Shrink to Fit	<p>Uses the top left corner of the area available for printing as a control point.</p> 
	100%	<p>Uses the top left corner of the print sheet as a control point.</p> 

⇒ This returns you to the [Print] window. The selected positioning setting is displayed to the right of the [Positioning] button.

5.6.3 Print Side

Set whether to print on one side (simplex mode) or both sides (duplex mode).

1. On the [Print] window, press the [Print Side] button.

⇒ The [Print Side] window appears.

2. Select a print mode.

⇒ This returns you to the [Print] window. The selected mode is displayed to the right of the [Print Side] button.

5.7 Saving the Scanned Data to a Network Folder

Save the scanned data to a network folder or an FTP server folder.

1. On the [Main Menu] window, press the [Save] button.

⇒ The [Save] window appears.

HINT

The scan information can be changed by pressing  of [Scan Settings]. For details, refer to "5.9 Setting the Scan Options" (page 271).

2. Press .

Save

Save in

Save as
A sequence number will be appended to the file name.

FI-N71000207 185835

Overwrite old files?
No

Cancel Scan Settings  Default Scan Viewer On  Scan 

⇒ The [Folder List] window appears.

3. Select a folder for saving the scanned data.

HINT

- You can select a folder from the list of folders that are added by the administrator in advance. To change the folders in the list, contact the administrator.
For more details about adding network folders, refer to ["4.13.1 Setting the Network Folders" \(page 131\)](#).
For more details about adding FTP server folders, refer to ["4.13.2 Setting the FTP Server Folders" \(page 137\)](#).
- If the [Clear the authentication settings] button is enabled, you can clear the authentication information that you have set for the selected network folder.

4. Press the [OK] button.

⇒ This returns you to the [Save] window.

HINT

- If the [File Server Authentication] window appears, enter authentication information needed to access the file server and press the [OK] button.
- If you select [On] for [Show the authentication screen] and then press the [OK] button, the authentication window for the selected network folder appears. You can change the authentication information on this window.

5. In the [Save as] field, enter a file name for the scanned data to be saved.

6. Select whether or not to overwrite an existing file with the same name.

Whether or not the file was successfully saved can be checked in the user log.

For more details about accessing the user log, refer to ["5.12.1 Viewing Details on Send Operations That Were Completed \(User Log\)" \(page 326\)](#).

7. Specify the rest of the items.

8. Press the [Scan] button.

When [Scan Viewer] is [Off], this will be a [Scan & Save] button.

⇒ Scanning starts.

When [Scan Viewer] is [Off], the scan settings and scanning status (preview) can be switched and shown during a scan.

When [Scan Viewer] is [On], the [Scan Viewer] window appears.

The maximum number of pages that can be scanned is 999.

When the blank page skip function is enabled, the number of scanned pages excluding skipped blank pages is shown.

Additional pages can be scanned in place of skipped blank pages, until the maximum number of scanned pages is reached.

⇒ When the scanning has completed, the [Scan Viewer] window appears.

HINT

If the [Scan & Save] button is pressed when [Scan Viewer] is [Off], the scanned data is saved immediately after the scanning is complete, and the touch panel screen returns to the [Main Menu]. For details, refer to "[5.10 Enabling/Disabling the Scan Viewer](#)" (page 313).

9. Check and edit the scanned data.

Scanned data can be checked on the [Scan Viewer] window. The scanned data can be edited on the scan viewer details window which is displayed after a scanned image is selected.

For more details, refer to "[5.11 Editing the Scanned Data in the Scan Viewer](#)" (page 316).

10. On the [Scan Viewer] window, press the [Save] button.

⇒ A file in the specified file format is saved in the selected folder.

⇒ The [Main Menu] window is shown again.

HINT

If saving to the folder fails, an error notification e-mail with the following title is sent from the scanner to the e-mail address of the user that logged in with the LDAP server authentication.

Network Scanner (XXXX) Error

5.8 Saving the Scanned Data to a SharePoint Folder

1. On the [Main Menu] window, press the [Scan to SharePoint] button.

⇒ The [Scan to SharePoint] window appears.

HINT

The scan information can be changed by pressing  of [Scan Settings]. For details, refer to "5.9 Setting the Scan Options" (page 271).

2. Press  for the [Save in] field.

⇒ The [Folder List] window appears.

3. Select a SharePoint folder and press the [OK] button.

HINT

- You can select a SharePoint folder from the list of SharePoint folders that are added by the administrator in advance. To change the folders in the list, contact the administrator. For more details about adding SharePoint folders, refer to ["4.13.3 Setting the SharePoint Folders" \(page 141\)](#).
- If the [Clear the authentication settings] button is enabled, you can clear the authentication information that you have set for the selected SharePoint folder.

HINT

- If the [Sign In] window appears, enter authentication information needed to access the SharePoint server and press the [OK] button.
- If you select [On] for [Show the authentication screen] and then press the [OK] button, the authentication window for the selected SharePoint folder appears. You can change the authentication information on this window.

⇒ The [Scan to SharePoint] window is shown again.

4. In the [Save as] field, enter a file name for the scanned data to be saved.

5. Select whether or not to overwrite an existing file with the same name.

Whether or not the file was successfully saved can be checked in the user log.

For more details about accessing the user log, refer to ["5.12.1 Viewing Details on Send Operations That Were Completed \(User Log\)" \(page 326\)](#).

6. Press .

⇒ The [Document Splitting] window appears.

Configure the settings to split a file of scanned data into multiple files when the file size exceeds the maximum file limit.

7. In the [Max. File Size] field, enter the maximum file size at which a file is to be split into multiple files, and press the [OK] button.

Document Splitting

Scan data larger than 45MB needs to be split into multiple files for saving. Specify the size of the split files.

Max. File Size: 1-45

Approx. Page Limits

 Color Mode	Pages
RGB Color	105
Grayscale	125
Black & White	1799

Cancel OK

⇒ The [Scan to SharePoint] window is shown again.

8. Press  of the [Content Type] field.

⇒ The [Content Type] window appears.

9. Select a content type used to manage the scanned data on the SharePoint server, and press the [OK] button.

- ⇒ The selected content type is set.
According to the selected content type, a list of properties defined on the SharePoint server is shown in the [Scan to SharePoint] window.

10. Set properties in either of the following ways.

- Enter properties directly in the input fields that correspond to the properties to be edited.
- Press  for a property to be edited, and set the property in the [Edit Properties] window.

**11. Specify the rest of the items.****12. Press the [Scan] button.**

When [Scan Viewer] is [Off], this will be a [Scan & Save] button.

⇒ Scanning starts.

When [Scan Viewer] is [Off], the scan settings and scanning status (preview) can be switched and shown during a scan.

When [Scan Viewer] is [On], the [Scan Viewer] window appears.

The maximum number of pages that can be scanned is 999.

When the blank page skip function is enabled, the number of scanned pages excluding skipped blank pages is shown.

Additional pages can be scanned in place of skipped blank pages, until the maximum number of scanned pages is reached.

⇒ When the scanning has completed, the [Scan Viewer] window appears.

HINT

If the [Scan & Save] button is pressed when [Scan Viewer] is [Off], the scanned data is saved immediately after the scanning is complete, and the touch panel screen returns to the [Main Menu]. For details, refer to "[5.10 Enabling/Disabling the Scan Viewer](#)" (page 313).

13. Check and edit the scanned data.

Scanned data can be checked on the [Scan Viewer] window. The scanned data can be edited on the scan viewer details window which is displayed after a scanned image is selected.

For more details, refer to ["5.11 Editing the Scanned Data in the Scan Viewer"](#) (page 316).

14. On the [Scan Viewer] window, press the [Save] button.

HINT

- When a file is overwritten, the properties of the existing file are replaced by those of the new file.
- When multiple files are saved in TIFF or JPEG format, identical properties are set to all the files.
- If required items other than [Single line of text] or [Multiple lines of text] are set for the properties of the specified folder content types, files saved in the SharePoint folder will be checked out. To change the checkout status, enter values for the required items via Internet Explorer, and then check in the files.

⇒ A file in the specified file format is saved in the selected SharePoint folder.

⇒ The [Main Menu] window is shown again.

5.9 Setting the Scan Options

The scan settings window appears by pressing the [Scan Settings]  in the following windows.

- [Send e-Mail] window
- [Send Fax] window
- [Print] window
- [Save] window
- [Scan to SharePoint] window

The following types of scan settings are available.

- **Default**
The recommended values are set automatically by applying the default.
- **Custom**
The user can change the default settings and customize any scanning preferences as needed.
From each menu, make individual settings.

Function settings (for e-Mail, Fax, Print, Save, Scan to SharePoint) are saved for each user, and will be used each time that user logs in.

For details, refer to ["5.9.2 Setting Image Mode" \(page 283\)](#).

HINT

When the scan settings window is opened from the [Print] window, the [Save] menu is grayed out.

5.9.1 Relational Changes among Scan Setting Items

Changing one scan setting item affects other scan setting items.
The following table shows how the setting items are affected by each other.

■ Basic

Item	Settings which become invalid when an item in the Item column is set	Conditions which make an item in the Item column invalid
Image Mode		
Automatic	<ul style="list-style-type: none"> ● Paper Size, [8.5 × 17 in.] ● Paper Size, [8.5 × 34 in.] ● Paper Size, [8.5 × 125 in.] ● Paper Size, [Custom] a value more than 14 in. ● File Format, [JPEG] 	<ul style="list-style-type: none"> ● Processing type, [Fax], and Fax Service, [Type 1] or [Type 2] (for the scan settings on the [Send Fax] window)
Black & White	<ul style="list-style-type: none"> ● Image Mode, [Sensitivity] ● File Format, [JPEG] ● Text Recognition, [OCR Highlighted Text Recognition] ● Text Recognition, [Edit OCR Highlighted Text] ● Compression, Compression rate ● Compression, [High Compression for Color PDF] ● Control Image Tone ● Cleanup ● sRGB Output (when setting a job sequence) 	—

Item	Settings which become invalid when an item in the Item column is set	Conditions which make an item in the Item column invalid
Image Mode (continued)		
Grayscale	<ul style="list-style-type: none"> ● Image Mode, [Sensitivity] ● Text Recognition, [OCR Highlighted Text Recognition] ● Text Recognition, [Edit OCR Highlighted Text] ● Compression, [High Compression for Color PDF] ● Thresholding Cleanup (Black & White) ● sRGB Output (when setting a job sequence) 	<ul style="list-style-type: none"> ● Processing type, [Fax], and Fax Service, [Type 1] or [Type 2] (for the scan settings on the [Send Fax] window)
Color	<ul style="list-style-type: none"> ● Image Mode, [Sensitivity] ● Thresholding ● Cleanup (Black & White) ● Dropout Color 	<ul style="list-style-type: none"> ● Processing type, [Fax], and Fax Service, [Type 1] or [Type 2] (for the scan settings on the [Send Fax] window)

5.9.2 Setting Image Mode

To set an image mode (type) for the scanned document, follow the steps below. You can set whether the document is scanned in "color", "grayscale" or "black & white".

1. Select [Image Mode] under [Basic] on the scan settings window.

⇒ The [Image Mode] window appears.

2. Select the type of image to be output.

3. If [Automatic] is selected in Step 2, specify [Sensitivity].

4. Press the [OK] button.

⇒ The information entered is set.

5.9.3 Setting Paper

You can set the paper scanning side, the feed direction to load paper in the scanner, and the paper size.

1. **Select [Paper] under [Basic] on the scan settings window.**
⇒ The [Paper] window appears.
2. **Select the paper scanning side, the feed direction to load paper in the scanner and the paper size.**

3. **When [Custom] is selected in Step 2, specify [Unit] and the paper size for the displayed setting items.**
4. **Press the [OK] button.**
⇒ The information entered is set.

HINT

When [Custom] is selected, any paper size can be specified for the scanned data.

5.9.4 Resolution

Changing the resolution level affects the scanned data in the following ways.

Item	High resolution	Low resolution
Scan speed	Slow	Fast
Scan quality	High	Low
File size	Large	Small

1. **Select [Resolution] under [Basic] on the scan settings window.**
⇒ The [Resolution] window appears.
2. **Select a resolution level.**

3. **Press the [OK] button.**
⇒ The information entered is set.

5.9.5 Configuring Settings for a Carrier Sheet

To set whether or not to use a Carrier Sheet, follow the steps below.
When using a Carrier Sheet, set the size of the scanned document to be output.

1. **Select [Carrier Sheet] under [Basic] on the scan settings window.**
⇒ The [Carrier Sheet] window appears.
2. **If a Carrier Sheet is to be used, select the output size for the scanned image.**

3. **Press the [OK] button.**
⇒ The information entered is set.

5.9.6 File Format

To set a file format for the scanned data, follow the steps below.
Some scan settings cannot be used for certain file formats.

Option	PDF (*1)	PDF/A (*1)	JPEG	TIFF (*1)
Text Recognition	Yes	Yes	—	—
PDF Password	Yes	—	—	—
Compression	Yes (*2)	Yes (*2)	Yes	Yes (*2)

Yes: Available —: Unavailable

(*1): Files can be output in single-page or multi-page format.

(*2): Available only when the [Color Mode] is [Auto], [Grayscale], or [Color].

Compression also differs for certain file formats as follows:

Image Mode	Document	File Format		
		PDF, PDF/A	JPEG	TIFF
Automatic	Color	JPEG or high compression for color PDF	JPEG	JPEG
	Grayscale	JPEG	JPEG	JPEG
	Black & White	MMR	—	MMR
Color	Color Grayscale Black & White	JPEG or high compression for color PDF	JPEG	JPEG
Grayscale	Color Grayscale Black & White	JPEG	JPEG	JPEG
Black & White	Color Grayscale Black & White	MMR	—	MMR

—: Unavailable

HINT

When PDF format is selected, select whether or not to use [High Compression for Color PDF] mode. When [High Compression for Color PDF] is selected, characters and backgrounds are separated and only backgrounds are compressed. Therefore, the file size of a character based document can be reduced without the quality of the characters being decreased.

However, note the following:

- Photographs or pictures are recognized as background and compressed at a high rate, causing degradation in the scanned image.
- Thus, this mode is not appropriate for scanning photographs or other graphical materials.
- The contrast of the image may become higher.

1. Select [File Format] under [Save] on the scan settings window.

⇒ The [File Format] window appears.

2. Select a file format.**3. Press the [OK] button.**

⇒ The information entered is set.

5.9.7 Setting a PDF Password

When the file format is [PDF], PDF files can be locked with a user-specified password.

ATTENTION

The password will need to be entered every time the password-protected PDF file is opened. Do not forget or lose this password.

1. **Select [PDF Password] under [Save] on the scan settings window.**
⇒ The [PDF Password] window appears.
2. **Select [PDF Password] under [Save] on the scan settings window.**

3. **Press the [OK] button.**
⇒ The information entered is set.

5.9.8 Searchable PDF

When the file format is [PDF] or [PDF/A], the scanned data can be converted to a searchable PDF by automatically recognizing character strings contained in the document to be scanned.

ATTENTION

Conversion to searchable PDF may take extra time.

1. Select [Text Recognition] under [Save] on the scan settings window.

⇒ The [Text Recognition] window appears.

2. For [Searchable PDF], select [Yes].

3. For [Text Recognition Language], select a language used when text is to be recognized in the document.

4. Under [Text Recognition for Pages], specify the pages to be output in searchable PDF.

5. Press the [OK] button.

⇒ The information entered is set.

5.9.9 Setting a Keyword for the PDF

When the file format is [PDF] or [PDF/A], a character string such as the title of a black and white document can be set as a PDF file keyword and can be used when searching the PDF file.

Mark a character string to be set as a keyword with a water-based highlight pen so that the character string is completely covered. When you perform a scan, the marked character strings are recognized and set as keywords for the PDF file.

Hereinafter, a line drawn with a water-based highlight pen is referred to as a "marked section", and a water-based highlight pen as a "highlight pen".

Marked sections should be highlighted on a black and white document in the following way.

- Any regular highlight pen can be used.
- The recommended colors and thickness of marked sections are as follows:

Pink	Yellow	Blue	Green
ScanSnap	ScanSnap	ScanSnap	ScanSnap

- Draw a straight line over a single line of characters.
- The supported size of a marked section is as follows:
 Minimum size: Height 3 mm (0.1 in.), Width 10 mm (0.4 in.)
 Maximum size: Height 20 mm (0.8 in.), Width 150 mm (5.9 in.)
- Sections marked by a pale color may not be recognized.
- Use only a single color within a page.
- Draw a marker line in a way that the desired character string is completely covered.

The color of an entire marked section should be even in thickness.

Good Example	Bad Example 1 (The characters are not completely covered)	Bad Example 2 (The color is not even)
		

- Up to 10 sections can be marked in a page.

ATTENTION

- In the following documents, highlighted character strings cannot be set as a keyword:
 - Catalogs, pamphlets, and other color documents
 - Documents including sections marked in two or more colors
 - Documents containing colors other than for marking (pens other than highlight pens are used or the document is stained)
 - Documents containing a large number of marked sections in a page
- When any of the following conditions apply, the highlighted character strings may not be able to be set as a keyword:
 - The size of a marked section is out of the supported range
 - Marking lines are not drawn in an ordinary way (such as when a line is slanted)
 - Multiple marked sections are located close to each other
 - The color of the highlight pen is too pale or the color has faded

- When applying markings on two or more character strings, the marked sections must be separated from each other by at least 5 mm (0.2 in.). If marked sections are too close to each other, multiple sections may be recognized as a single section.
- In the following case, other characters close to marked sections may be set as a keyword:
 - When a marking is drawn over another line (upper or lower)
- In the following cases, characters not highlighted by a marked section may be set as a keyword:
 - Catalogs, pamphlets, and other color documents
 - Documents containing colored characters, figures, pictures, tables, lines, or other elements
 - Documents containing marked areas other than those containing character strings to be set as keywords
 - Tainted documents
 - Documents containing sections framed by a highlight pen

HINT

- If setting a keyword is not successful, improving image scanning quality may help.
- Keywords for PDF files can be checked from the Adobe Acrobat document properties menu.

To automatically set a keyword for a PDF file, change the settings as shown below.

ATTENTION

- Conversion to searchable PDF may take extra time.
- If the same character string is marked at multiple locations of a document, the same keyword is added to the PDF file multiple times.
- The total number of characters for keywords is limited up to 255 characters, including delimiters between keywords.
- When keywords are viewed in Adobe Acrobat and Adobe Reader, the appended quotation marks (") may be found at the beginning and end of keywords.

1. Select [Text Recognition] under [Save] on the scan settings window.

⇒ The [Text Recognition] window appears.

2. For [OCR Highlighted Text Recognition], select [First marked section only] or [All marked sections].

Save > Text Recognition

Specify Searchable PDF and OCR Highlighted Text Recognition.

Searchable PDF No

OCR Highlighted Text Recognition

Edit OCR Highlighted Text No

Text Recognition Language

Text Recognition for Pages

First Page Last Page

1 ≤ First Page ≤ Last Page ≤ 999

Cancel Default OK

HINT

For details of automatic color mode selection, refer to ["5.9.2 Setting Image Mode"](#) (page 283).

3. Select whether or not to enable editing of character strings in marked sections at [Edit OCR Highlighted Text].

When sending a file asynchronously as an administrator, you cannot edit the character strings in marked sections.

HINT

When sending as an e-mail attachment, faxing, printing, or saving scanned data, the [Scan Viewer] window appears, and then a window for editing the character strings in marked sections appears, allowing the keyword strings to be edited.

4. For [Text Recognition Language], select a language used when text is to be recognized in the document.

5. For [Text Recognition for Pages], specify the range of pages for text recognition.

6. Press the [OK] button.

⇒ The information entered is set.

5.9.10 Compression

When [Automatic], [Grayscale], or [Color] is selected in ["5.9.2 Setting Image Mode" \(page 283\)](#), the compression rate for scanned data can be set.

For photographs and graphics, their file sizes can be decreased by increasing the compression rate.

Changing the compression rate affects the scanned data in the following ways.

	High compression	Low compression
Quality	Low	High
File size	Small	Large

1. Select [Compression] under [Save] on the scan settings window.

⇒ The [Compression] window appears.

2. Select a compression rate.

Lowering the compression rate makes the file size larger, and increases the quality of the scanned data.

When PDF format is selected in ["5.9.6 File Format" \(page 287\)](#), [High Compression for Color PDF] can be used.

3. Press the [OK] button.

⇒ The information entered is set.

HINT

The following tables show the estimated file sizes for when the single side of one color page is scanned.

Actual paper size: A4 size (general catalog)

File format: PDF

Scanner paper size setting: A4

- Estimated file size (byte) for [RGB Color]

Resolution	Compression Rate							
	1	2	3	4	5	6	7	High Compression for Color PDF
50 dpi	18.8K	24.8K	30.1K	41.5K	52.4K	80K	108K	35.7K
150 dpi	101K	114K	139K	190K	253K	389K	538K	84K
200 dpi	167K	180K	245K	336K	427K	679K	945K	117K
300 dpi	339K	416K	580K	805K	1.04M	1.69M	2.36M	138K
600 dpi	1.68M	1.97M	2.42M	3.68M	5.09M	9.06M	12.3M	176K

- Estimated file size (byte) for [Grayscale]

Resolution	Compression Rate							
	1	2	3	4	5	6	7	High Compression for Color PDF
50 dpi	19.5K	23K	27.9K	37.2K	45.9K	65.2K	79.3K	—
150 dpi	85.3K	100K	122K	164K	206K	297K	368K	—
200 dpi	140K	171K	209K	285K	359K	524K	642K	—
300 dpi	305K	418K	513K	717K	899K	1.28M	1.55M	—
600 dpi	1.41M	1.68M	2.09M	3.08M	4.09M	6.21M	7.21M	—

- Estimated file size (byte) for [Black & White]

Resolution	Compression rate cannot be selected
50 dpi	7.48K
150 dpi	16.3K
200 dpi	25.5K
300 dpi	57.1K
600 dpi	262K

5.9.11 Thresholding

The sensitivity for outputting scanned data in black and white can be set. Clear scanned image output can be obtained from documents with dark background.

1. Select [Thresholding] under [Image Correction] on the scan settings window.

⇒ The [Thresholding] window appears.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

5.9.12 Controlling the image quality of scanned data (Control Image Tone)

To control the image quality of scanned images, follow the steps below.

Scanned data can be adjusted to be standard, soft (opaque), sharp (clear), or bright tone.

The following color tone items can be controlled manually when [Custom] is selected:

- **Brightness**
Controls the brightness of the entire tone range uniformly.
- **Contrast**
Sharpens or softens the image contrast.
- **Shadow**
Darkens light text in the document.
- **Highlight**
Controls the background brightness of white-background documents.
- **Gamma**
Controls the brightness of the medium-tone range.

1. Select [Control Image Tone] under [Image Correction] on the scan settings window.

⇒ The [Control Image Tone] window appears.

2. Control the color tone of scanned data.

3. When [Custom] is selected in Step 2, specify [Brightness], [Contrast], [Shadow], [Highlight], and [Gamma] for the displayed setting items.

4. Press the [OK] button.

⇒ The information entered is set.

5.9.13 Optimizing Scanned Data (Cleanup)

Scanned data can be optimized by image processing.
Setting items differ depending on the image mode.

■ In [Color] or [Grayscale] mode

The following items can be set.

- Sharpness
Emphasize the outlines of text or lines, and reduce moire (recurrent patterns).
- Color Cleanup
Clean the background of image to suppress the color or density unevenness.
- White Level Follower
Control the threshold value so that the background will be recognized to be white.

1. Select [Cleanup] under [Image Correction] on the scan settings window.

⇒ The [Cleanup] window appears.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

■ In [Black & White] mode

The following items can be set.

- Character Thickness
Modify the font or line weight.
- Character Augmentation
Perform character augmentation.
- Noise Removal
Remove noise (dot-shaped unwanted data in the background).
- Background Pattern Removal
Remove characters or patterns printed in the background.
- White Level Follower
Control the threshold value so that the background will be recognized to be white.

1. Select [Cleanup (Black & White)] under [Image Correction] on the scan settings window.

⇒ The [Cleanup (Black & White)] window appears.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

5.9.14 Reducing Vertical Streaks

This section describes how to specify whether or not to reduce vertical streaks on the scanned data, which were caused by dirt inside the scanner.

1. **Select [Vertical Streaks Reduction] under [Image Correction] on the scan settings window.**

⇒ The [Vertical Streaks Reduction] window appears.

2. **Specify whether or not to reduce vertical streaks on the scanned data.**

3. **Press the [OK] button.**

⇒ The information entered is set.

ATTENTION

If vertical streaks are still outstanding even after this option is enabled, open the LCD cover on the scanner, and wipe off the glasses inside. For details, refer to "6.3 Cleaning Inside the Scanner" (page 346).

5.9.15 Removing Colors from Scanned Images (Dropout Color)

The colors red, green and blue (primary colors) can be deleted during scanning. For example, if a document with black characters and a green border is scanned, only the black characters will appear on the scanned image.

When using the dropout color setting, you can set whether to remove color details and select color details to be removed.

ATTENTION

Dark colors (low brightness colors) may not be removed.

1. **Select [Dropout Color] under [Image Correction] on the scan settings window.**
 - ⇒ The [Dropout Color] window appears.
2. **If color details are to be removed, select a color to be used as the dropout color.**

3. **Press the [OK] button.**
 - ⇒ The information entered is set.

5.9.16 Page Orientation

Scanned data is automatically rotated to the correct orientation.

1. **Select [Rotation] under [Page] on the scan settings window.**
⇒ The [Rotation] window appears.
2. **Select the rotation angle and the flip type for the scanned data.**

In duplex mode, the flip type can be selected when the page rotation angle is set. The following table shows the flip types and the resulting scanned data.

Flip Type	Scanned Data
<p data-bbox="288 365 405 394">Vertical</p> 	<p data-bbox="493 365 1398 521">Select this setting when scanning a document with opposing left and right pages (facing pages with long side as the middle crease). The scanned data is output with the same orientation as the original document.</p> <div data-bbox="493 539 1406 925"> <p data-bbox="493 898 667 925">Feed direction</p> </div>
<p data-bbox="288 958 440 987">Horizontal</p> 	<p data-bbox="493 958 1398 1205">Select this setting when scanning a document with opposing top and bottom pages (facing pages with the short side as the middle crease). The front side of the document is output with the same orientation as the original data, whereas the data on the reverse side is rotated 180 degrees.</p> <div data-bbox="493 1223 1406 1664"> <p data-bbox="493 1581 667 1608">Feed direction</p> <p data-bbox="1265 1641 1406 1664">Rotated 180</p> </div>

3. Press the [OK] button.

⇒ The information entered is set.

HINT
 If scanned data is incorrectly rotated, you can modify the orientation of the scanned data in the scan viewer details window.
 For details, refer to "5.11 Editing the Scanned Data in the Scan Viewer" (page 316).

5.9.17 Filling the Edge of Scanned Image (Edge Correction)

This section describes how to use the Edge Correction function to improve the appearance of the entire scanned image by filling the unwanted outside area with a specified color.

Specify whether to fill the edge of the scanned image, and specify the color and the area to be filled.

The following table shows the areas of documents to be scanned when the edge is filled or not filled.

Edge Filler	Scanned area of a document
Off	<p data-bbox="512 658 719 685">Original document</p> 
On	

1. Select **[Edge Correction]** under **[Page]** on the scan settings window.
⇒ The [Edge Correction] window appears.
2. Specify whether or not to use the edge filler function, and when it is used, specify the color and area to be filled in.

3. Press the **[OK]** button.
⇒ The information entered is set.

ATTENTION

When image rotation is enabled, the edge is filled with a color after the rotation. This section uses an example where [Auto] or [90°(CCW)] is selected on the [Rotation] window.

5.9.18 Skipping Blank Pages from the Scanned Data

The scan process can be set to skip any blank pages in the scanned data. For example, when a stack of documents containing both two-sided and one-sided documents is scanned in duplex scan mode, this feature removes only the reverse side (i.e. blank page) of one-sided documents from the scanned data.

1. **Select [Blank Page Skip] under [Page] on the scan settings window.**
⇒ The [Blank Page Skip] window appears.
2. **Specify whether to detect and delete blank pages, and specify [Sensitivity] for detecting blank pages.**

3. **Press the [OK] button.**
⇒ The information entered is set.

5.9.19 Detecting Multifeeds

The scanner can be set to detect multifeeds and stop the scan with an error message. Multifeeds are to be detected by layer and length.

The following explains how to set whether or not multifeeds are to be detected and set up multifeed detection method.

For multifeed requirements, refer to ["A.5 Multifeed Detection Conditions"](#) (page 406).

1. Select [Multifeed Detection] under [Paper Feeding] on the scan settings window.

⇒ The [Multifeed Detection] window appears.

2. Specify whether to delete multifeeds, and select which detection method is to be used.

3. Press the [OK] button.

⇒ The information entered is set.

5.9.20 Outputting Index Information

Index information refers to a file in which the scanned results were output.

Specify whether to output the index information.

This option reads an on-document barcode and outputs the results to the index information file.

One barcode can be detected per page. To make multiple barcodes on one page to be detected at once, use SDK (developer tool) to create an add-in application.

For details about barcode types that can be used and detection conditions, refer to "[D.5 Barcode Types and Detection Conditions](#)" (page 427).

1. Select [Index Output] under [Batch] on the scan settings window.

⇒ The [Index Output] window appears.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

■ Index Information File Format

File Name

The name of an index information file is created as follows:

FileName.ImageModeExtension.index.xml

Example: When a scanned file name is "a.pdf"

a.pdf.index.xml

File Format

This section uses the default output items as an example.

```
<?xml version = "1.0" encoding = "utf-8"?>
<root>
<page>
<item name = "Stream No." value = "Stream No." />
<item name = "Document No." value = "Document No." />
<item name = "Total pages in current document" value = "Total number of pages in
the document" />
<item name = "Page Number in Document" value = "Page number in the document" />
<item name = "Page number" value = "Page number" />
<item name = "Actual page number" value = "Actual page number" />
<item name = "Date&Time" value = "Date and time" />
<item name = "Scanner name" value="Scanner name" />
<item name = "User name" value="User name" />
<item name = "Full Path" value = "File name (full path)" />
<item name = "File name" value = "File name" />
<item name = "Device name" value="Device name" />
<item name = "Barcode" value = "Barcode recognition result" />
<item name = "Barcode type" value = "Barcode type" />
</page>
.
.
</root>
```

- UTF-8 (8-bit UCS Transformation Format) is used for output.
- Page-based information is delimited by the "page" element. Each item information in the page is delimited by the "item" element. The "name" attribute of the "item" element contains the XML item name of the corresponding item. The "value" attribute stores the value of the corresponding item.

Output Items and Order

The following items are output in a predetermined order.

Item Name	Description	XML Item Name
Stream No.	Stream number Stream number that outputs an image is output. "1" is always output.	Stream No.
Document No.	Document number	Document No.
Total number of pages in the document	Total number of pages in the document is output.	Total pages in current document
Page number in the document	Page number in the document is output. However, "1" is always output for a single page type file.	Page Number in Document
Page number	Page number that is counted from the first page	Page number
Actual page number	The output page numbers include pages that are skipped due to the blank page skip. When you run [Scan More], page numbering starts from "1" rather than continues from the last page number of the previous file. The last page is not included in "Actual page number" when it is skipped because all blank pages are discarded and [Scan More] is pressed.	Actual page number
Date and time	The date and time when a scan was performed The output format is as follows: yyyy/mm/dd HH:mm:ss	Date&Time
Scanner name	Name of the scanner that was used for scanning (which is set in [Scanner Name] under [Local Settings])	Scanner name
User name	Name of user that performed a scan	User name
File name (full path)	File name (full path)	Full Path
File name	File name	File name

Item Name	Description	XML Item Name
Device name	Device name of the scanner that was used for scanning (N7100 is output as the device name)	Device name
Barcode recognition result	Text recognized from a barcode. The first 128 bytes for a one-dimensional barcode.	Barcode
Barcode type	Recognized barcode type	Barcode type

When sending an e-mail with [Scan Viewer] set to [On]

When sending an e-mail with [Scan Viewer] set to [Off]

On the [Send e-Mail] window, press the [Scan] button.

On the [Send e-Mail] window, press the [Scan & Send] button.

Scanning starts.

The scanned data is shown on the [Scan Viewer] window.

View and edit the scanned data on the scan viewer details window.

When sending an e-mail with [Scan Viewer] set to [On]

When sending an e-mail with [Scan Viewer] set to [Off]

When assisted scan starts, a document is scanned again and the previous image is replaced with the newly edited image.

Press the [Send] button on the [Scan Viewer] window.

The scanned data is sent as an e-mail attachment.

ATTENTION
Even if [Scan Viewer] is set to [Off], the [Scan Viewer] window appears under the following circumstances.

- Scan operation did not properly finish.
- Scan operation was canceled by pressing the [Cancel] button in the [Scanning] window.

5.11 Editing the Scanned Data in the Scan Viewer

Scanned data can be checked on the [Scan Viewer] window. The scanned data can be edited on the scan viewer details window which is displayed after a scanned image is selected.

When a file is split, a separator is displayed at the split point in the Scan Viewer.

- When a file is not split

- When a file is split (when a separator is displayed)

5.11.1 Switching the Page Order of the Scanned Data

When a document with two or more pages is scanned, the page order of the scanned data shown on the [Scan Viewer] window can be switched between descending and ascending orders.

HINT

When a scanned data file is split (when a separator is displayed), the page order of the scanned data cannot be switched.

1. Press  in the [Scan Viewer] window to switch the page order to a descending order.
2. Press  when the pages are in a descending order to put the pages back into the original (ascending) order.

5.11.2 Viewing the Scanned Data

The scanned data can be viewed one by one on the scan viewer details window.

1. Select scanned data on the [Scan Viewer] window.

⇒ The scan viewer details window appears.

2. Touch the scanned data again.

⇒ Buttons for viewing and editing are shown on the scan viewer details window.

3. Press     to show the page you want to check.

■ Changing the Display Size of Scanned Data

The display size of the scanned data shown on the scan viewer details window can be changed to the same magnification or to fit the preview window.

HINT

Editing on the touch panel can also be done by using fingers. Place two fingers on the scanned data, and pinch out (zoom in) and pinch in (zoom out).

1. Display a page to be checked.
2. Press    to change the display.

5.11.3 Editing Scanned Data on the Scan Viewer Details Window

The scanned data can be edited one by one on the scan viewer details window.

■ Rotating Scanned Data

The scanned data displayed on the scan viewer details window can be rotated by 90 degrees.

The rotated scanned data is sent by e-mail or fax and is printed or saved to the network folder as it is.

HINT

- The scanned data is edited once a page is rotated.
- Editing on the touch panel can also be done by using fingers on the touch panel. Put two fingers on the scanned data and turn your fingers (clockwise/counterclockwise).

1. Display a page to be rotated.
2. Press   to rotate.

■ Deleting Scanned Data

A specific page can be deleted from the scanned data shown on the scan viewer details window.

The scanned data from which a specific page was deleted is sent by e-mail or fax and is printed or saved to the network folder as it is.

1. Display a page to be deleted.

2. Press .

⇒ A message that confirms the deletion appears.

3. Press the [OK] button.

⇒ The page is deleted.

5.11.4 Editing Scanned Data on the [Assisted Scan] Window

Assisted scan is a function that assists an adjustment of scanned data to get the best image.

Adjustments can be made by processing the new scanned data on the [Assisted Scan] window to get the best result.

When assisted scan is used, only one document at a time can be scanned even if more than one document is loaded in the ADF paper chute.

HINT

- The scanned data is edited once an adjustment is made on the [Assisted Scan] window.
- If the carrier sheet setting is set to any other setting besides [Off], assisted scan cannot start.
- When a file is split, assisted scan cannot be used for the image of a patch code sheet.
- When a patch code sheet is scanned with assisted scan, it is scanned as a normal document, not a separator.

1. Display a page to be edited on the scan viewer details window.

2. Press .

3. Load the documents with the images that you want to adjust into the ADF paper chute, and press the [OK] button.

⇒ Scanning starts.

⇒ After scanning is complete, the [Assisted Scan] window appears.

4. Select a sample that is closest to the best image from the sample images.

⇒ A selected sample image is displayed as [Current].

The sample images are updated based on the [Current] image.

The adjustment level of the sample images can be changed by adjusting [Step size].

When the blank page skip function is enabled, the label appears on image and you can check whether it is blank page or not.

The item which can be adjusted varies depending on the image mode. When the image mode is [Black & White], the [Foreground] tab and the [Background] appear.

⇒ Repeat until you get the best image.

5. Press the [OK] button when the most suitable image appears.

⇒ The image is replaced, and the window returns to the scan viewer details window.

■ Changing the Display Size of Scanned Data

The scanned data shown for [Original] and [Current] on the [Assisted Scan] window can be zoomed in and out or can be fitted in the preview window.

1. Press      to change the display size.

■ Resetting a Processed Image

The processed image shown on the [Assisted Scan] window can be re-set to the original image.

1. Press  to reset the processed image to the original image.

■ Undoing and Redoing a Process

An adjustment made to the scanned data shown on the [Assisted Scan] window can be undone or redone.

1. Press   to change the scanned data to the previous state or redo a process.

■ Rotating Scanned Data

The scanned data shown on the [Assisted Scan] window can be rotated by 90 degrees.

1. Press   to rotate the scanned data.

■ Changing the Image Mode of Scanned Data

When the image mode is [Automatic], the image mode of the scanned data shown on the [Assisted Scan] window can be changed.

If this process is performed, the image returns to the original scanned data.

1. Press    to change the image mode.

5.11.5 Editing a Separator

When a separator is displayed in the Scan Viewer, the name of the file that is to be split can be edited.

1. Press  to edit the separator that you want.

⇒ The [Edit Separator String] window appears.

Edit Separator String ? 

Save as
[Action File Name] is the name of the file set for each action

Document Counter

Separator String

Cancel OK

2. Change the string in the Separator String.
3. Press the [OK] button.

⇒ The separator string is changed.

5.11.6 Deleting a Separator

When a separator is displayed in the Scan Viewer window, the separator can be deleted.

1. Press  to delete the separator that you want.

⇒ A window for confirming the deletion appears.

2. Press the [OK] button.

⇒ The separator is deleted.

5.11.7 Scanning an Additional Page

On the [Scan Viewer] window, an additional page can be scanned.

1. Load the documents into the ADF paper chute.
2. On the [Scan Viewer] window, press the [Scan More] button.

⇒ Scanning starts.

The scanning status (preview) and scan settings can be switched and shown during a scan.

The page numbers of additional pages will follow on from the last page of the current scanned data.

For [Print], up to 100 pages can be scanned. For other than [Print], up to 999 pages can be scanned.

When the blank page skip function is enabled, the number of scanned pages excluding skipped blank pages is shown.

Additional pages can be scanned in place of skipped blank pages, until the maximum number of scanned pages is reached.

⇒ When the scan has completed, the [Scan Viewer] window opens and shows any additionally scanned pages.

HINT

When file splitting is set, additional scanned pages are not recognized as an additional batch and instead of this, all pages including additional pages are recognized as a batch, then split. Example: When file splitting is set to two pages each and additional three pages are scanned after three pages are scanned

5.11.8 Editing Marked Characters to Be Set as Keywords

When character strings in marked sections are scanned to be set as keywords for the PDF file, the recognized text from the marked sections can be edited.

HINT

For more details about setting whether or not to edit character strings in marked sections, refer to "[5.9.9 Setting a Keyword for the PDF](#)" (page 291).

- 1. On the [Scan Viewer] window, press the button appropriate for your desired operation, such as the [Send] and [Save] buttons.**
 - ⇒ The window where you can edit character strings in marked sections appears.
- 2. Edit the characters shown on the window.**
- 3. Press the [OK] button.**
 - ⇒ The edited characters are set as a keyword for the PDF file.

5.12 Viewing the Send Status

5.12.1 Viewing Details on Send Operations That Were Completed (User Log)

The send status is shown for the current user.

The send status is listed in the order of date/time.

Even if the [Region/Timezone] or [Date/Time] settings are changed, the order of the log entries will not be changed.

1. Press the [Send Status] button on the [Main Menu] window or the [Job Menu] window.

HINT

The [Send Status] button on the [Job Menu] window can be shown by pressing .

⇒ The [Send Status] window appears.

2. Press the [Completed] tab.

3. Select the send status you wish to view.

⇒ The details of the selected log are displayed.

Pressing the [OK] button returns to the original window.

5.12.2 Viewing Details on Send Operations That Are In Progress

When the send status (job action) is in a waiting state or being retried, the condition of the send status can be viewed.

The list of the send status is shown in order of priority.

The send status that is in a waiting state or being retried can also be cancelled, and if the send status is in an error state, you can retry the job action.

Even if the settings are changed on the [Region/ Timezone] window or the [Date/Time] window, the display order is not changed.

1. Press the [Send Status] button on the [Main Menu] window or the [Job Menu] window.

HINT

The [Send Status] button on the [Job Menu] window can be shown by pressing .

⇒ The [Send Status] window appears.

2. Press the [In progress] tab.

HINT

The [In progress] tab on the [Send Status] window is available if you select [No] for [Wait Job] in [Login Settings Details] on the administrator window.

3. When you want to cancel a send status that is in progress, select the send status which you want to cancel, and press the [Stopped] button.

⇒ The send status which you select is cancelled and the list is updated.

- 4. If the send status is in an error state, check the details of the error and deal with the error.
Select the job action to be retried, and press the [Resend] button.**

HINT

The [Resend] button is displayed when [Yes] is set for [Show [Resend]] in [Login Settings Details] on the administrator window. For more details, refer to "[4.6.2 Setting the Login Settings \(Details\)](#)" (page 95).

⇒ The job action which you selected is retried and the list is updated.

5.13 Maintenance

The following maintenance operations are possible:

- Editing the e-mail address book
- Editing the fax number list
- Roller cleaning
- Scan test
- Administrator login (when [Auto Login] is set to [On] on the [Login Settings] window)
- Changing password (when logged in with a local account)

1. On the [Main Menu] or [Job Menu] window, press the [Maintenance] button.

HINT

The [Maintenance] button on the [Job Menu] window can be shown by pressing .

⇒ The [Maintenance] window appears.

2. Perform maintenance operation by pressing the following buttons:

- [Edit e-Mail Addresses] button
The [e-Mail Address Book] window appears. e-Mail addresses can be added, edited, or deleted.
For details, refer to the following.
["5.4.2 Adding an e-Mail Target to the e-Mail Address Book" \(page 237\)](#)
["5.4.3 Editing an e-Mail Target in the e-Mail Address Book" \(page 241\)](#)
["5.4.4 Deleting an e-Mail Target from the e-Mail Address Book" \(page 243\)](#)

- [Roller Cleaning] button
The [Roller Cleaning] window appears. You can check the way the feed rollers and eject rollers should be rotated.
For details, refer to "[Feed roller \(×2\) and eject roller \(×2\)](#)" (page 349).
- [Edit Fax Numbers] button
The [Fax Number List] window appears. Fax numbers can be added, edited, or deleted.
For details, refer to the following.
["5.5.2 Adding a Contact to the Fax Number List"](#) (page 248)
["5.5.3 Editing the Fax Number List"](#) (page 250)
["5.5.4 Deleting a Contact from the Fax Number List"](#) (page 251)
- [Scan Test] button
A scan test is performed. Scanned data can be checked on the [Scan Viewer] window.
Perform a scan test to check that the scanner scans normally.
For details, refer to "[6.6 Performing a Scan Test](#)" (page 363).
- [Administrator Login] button
Shown when automatic login is enabled in the administrator settings.
Shows the [Administrator Login] window, on which administrator login can be performed.
For details, refer to "[4.2.1 Administrator Login: via the Touch Panel](#)" (page 72).
- [Change Password] button
Shown when logged in as a local account user.
Shows the [Change Password] window, on which the password of the currently logged in user can be changed.
For details, refer to "[5.15 Changing a User Password](#)" (page 341).

5.14 Processing a Job

This section uses an example where buttons from [Job1] to [Job6] have been set.

1. On the [Job Menu] window, press a Job button.

HINT

When the scanner account belongs to multiple job groups, the [Job Menu] windows can be switched by using the job menu switch buttons on the [Job Menu List] window, which appears when a list button is pressed.

⇒ The Message Screen appears.

HINT

- If either the title or message is not set in [Message Screen] on the [Job Details] window, even when [Message Screen] is set to [On], the [Message Screen] will not be shown. For details, refer to [Step 5 in "4.18.2 Setting a Job Sequence" \(page 192\)](#).
- If [Off] is selected for [Message Screen], scanning is started without showing the [Message Screen], and the job is processed. For details, refer to ["5.14.1 Enabling/Disabling the Message Screen" \(page 333\)](#).
- When [Message Screen] is disabled, whether or not the [Message Screen] is shown depends on the settings configured by the administrator.

2. Press the [Scan] button on the [Message Screen].

⇒ Scanning starts.

When the scanning has completed, the [Scan Viewer] window appears.

HINT

- When [Off] is set, the [Scan Viewer] window is not shown.
- When a file name can be changed, the [File Name] window is shown before a scan. For details about the operation, refer to ["5.14.2 Changing a File Name \(for Save/e-Mail Attachment\)" \(page 335\)](#).
- When the scan count is enabled to be changed in the job sequence settings, the [Scan Count] window is shown before a scan. For details about the operation, refer to ["5.14.3 Checking the Number of Sheets to Be Scanned" \(page 336\)](#).

3. Check and edit the scanned data.

Scanned data can be checked on the [Scan Viewer] window. The scanned data can be edited on the scan viewer details window which is displayed after a scanned image is selected.

For more details, refer to ["5.11 Editing the Scanned Data in the Scan Viewer" \(page 316\)](#).

4. Press the [OK] button on the [Scan Viewer] window.

⇒ The data is processed according to the specified job.

While the job is being processed, the process is shown in real time on the [Job Progress] window.

HINT

- To view the job report, press the [Job Report] button on the [Job Progress] window. This will show the job report.
- To view detailed information on the job report, select a function name on the [Job

Report] window or press . This will show the job report details.

⇒ If the job sequence is processed successfully, the touch panel screen returns to the [Job Menu].

If an error occurs during the job process, the [OK] button appears on the [Job Progress] or [Job Report] window. Pressing the [OK] button returns to the [Job Menu].

5.14.1 Enabling/Disabling the Message Screen

You can select whether to show the [Message Screen] for checking the contents of a job.

ATTENTION

When [Message Screen] is disabled, it is not possible to select whether or not to show the [Message Screen].

This section uses an example where buttons from [Job1] to [Job6] have been set.

1. Press the toggle button for [Message Screen] in the [Job Menu] window.

⇒ Pressing this button displays or does not display the [Message Screen] window.

Operations vary according to whether the [Message Screen] is set to [On] or [Off].

- If a job sequence is processed when [Message Screen] is set to [On], the [Message Screen] will be shown.

**HINT**

After checking the message, press the [Scan] button to start the scan. If any further job setup steps are required, press the [OK] button that appears instead.

- If a job sequence is processed when [Message Screen] is set to [Off], the job will be processed without showing the [Message Screen].

5.14.2 Changing a File Name (for Save/e-Mail Attachment)

When a job is processed, file names to be used when saving or attaching scanned data to an e-mail can be changed.

HINT

It is not possible to change a file name when the [File Name] window is set not to be shown.

1. On the [Job Menu] window, press a Job button.
2. On the [File Name] window, enter a file name for the scanned data to be saved or sent by e-mail.

The screenshot shows a dialog box titled "File Name". The main area contains the instruction "Enter the file name to be used for the scan data." and a text input field labeled "File Name". The bottom bar has a "Cancel" button on the left and a "Scan" button on the right.

HINT

- When sequence numbers are set to be appended to file names or file splitting is enabled, a sequence number is appended to the end of the default file name. The guidance message, "Document counter/seperator string will be appended to the file name." or "A sequence number will be appended to the file name." is shown on the window.
- A sequence number will not be appended to a file name that has been edited.
- After entering the file name, press the [Scan] button to start the scan. If any further job setup steps are required, press the [OK] button that appears instead.

5.14.3 Checking the Number of Sheets to Be Scanned

When a job is processed, the expected number of sheets to be scanned can be specified, so that the actual number of scanned sheets can be checked after a scan.

HINT

If either of the following settings is selected for the job sequence setting, the [Scan Count] window is not shown.

- The [Scan Count] is not to be checked
- The [Scan Count] is to be checked, but the [Scan Count] window is set not to appear (The [Allow per-Job adjustment] check box in the [Check the Scan Count] on the [Job Details] window is not selected)

1. On the [Job Menu] window, press a Job button.
2. On the [Scan Count] window, enter the number of sheets that are to be scanned.

Scan Count

Enter the number of sheets that are to be scanned.

Expected Count: sheets (1-999)

Cancel Scan

3. Press the [Scan] button.

⇒ Scanning starts.

HINT

When the [Scan Viewer] window is shown after a scan, you can check whether the number of scanned sheets is the same as that set in the [Scan Count] window at the area shown below.

Even if pages are deleted on the scan viewer details window or blank pages are deleted, the number of scanned sheets is not changed.

After scanning has completed, the following confirmation window is shown if the number of scanned sheets is set to be checked. Contact the administrator to change the setting of whether or not to check the scan count. For details, refer to ["4.18.2 Setting a Job Sequence" \(page 192\)](#).

**HINT**

When the [Scan More] button is shown, press the button to add more pages.

To continue, press the [OK] button.

To cancel the process and delete the scanned data, press the [Cancel] button.

5.14.4 Splitting a File Using Patch Codes

The separation function with patch code sheets is supported for a job sequence. This function allows you to split a file in a specified unit of pages without stopping a scan when scanning more than one document. A file is split in a specified unit of pages, and consequently the scanned images are separated into each scanned document (unit of pages that is split).

Notes for using patch codes to split a file are as follows:

1. Prepare for scanning.

- Prepare patch code sheets.
Two types of PDF files, A4 size and Letter size, are available for patch code sheets.
Print as many PDF files as you need from the [Patch Code] folder within the [Network Scanner] folder that is created when Admin Tool is installed.
To view the where PDF files are stored on Windows 7:
Select [Start] menu → [All programs] → [Network Scanner] → [Patch Code] → [A4] or [Letter].
- Set a job sequence for splitting a file using patch codes.
Select [Patch Code] for [Separation Mode] under [Save] on the scan settings window for the job sequence.
If you do not save the image of the patch code sheet, select the [Remove separator] check box.

2. Scan documents.

Load documents with patch code sheets inserted into the points where documents are to be separated.

- #### 3. After the scan is complete, check whether the scanned data file is split at the correct points.

ATTENTION

- When printing a patch code sheet, pay attention to the following:
 - Use blank white paper.
 - Print it at 100%. If you print it in a reduced size, the printed sheet is not recognized correctly.
 - Do not use the toner saving function. When the printing is light, it is not recognized correctly.
 - Do not use thin paper. When bleed-through occurs, the printed sheet is recognized as a sheet that is printed on both sides.
- When you copy the printed patch code sheet with a copier, configure the copying setting so that the copied sheet has the same size and printing density.
- Using the same patch code sheet repeatedly may decrease the recognition accuracy due to accumulated dirt on the sheet. If the sheet is not recognized correctly or gets smudged, print a new patch code sheet and use it.

5.15 Changing a User Password

A user password can be changed when logged in as a user registered in a local account.

1. On the [Maintenance] window, press the [Change Password] button.

⇒ The [Change Password] window appears.

The screenshot shows a dialog box titled "Change Password". The dialog has a dark header bar with the title "Change Password" on the left, a question mark icon in a circle, and a keyboard icon on the right. The main area is light gray and contains three text input fields stacked vertically. The first field is labeled "Current Password", the second is labeled "New Password", and the third is labeled "Confirm New Password". At the bottom of the dialog, there is a dark bar with two buttons: "Cancel" on the left and "OK" on the right.

2. Enter the current password and a new password.

3. Press the [OK] button.

⇒ The user password is changed.

Chapter 6

Scanner Care

Admin

User

This chapter describes how to clean the scanner and replace parts in order to maintain the scanner in optimum scanning condition.

Do not use any aerosol sprays or alcohol-based sprays to clean the scanner. Dust blown up by strong air from the spray may enter the inside of the scanner. This may cause the scanner to fail or malfunction.

Sparks, caused by static electricity, generated when blowing off dust and dirt from the outside of the scanner may cause a fire.

The glass inside the ADF can become hot when the scanner is used. Before cleaning the inside of the scanner or replacing any parts, turn off the power, unplug the power cable from the AC outlet, and wait for at least 15 minutes.

Clean the feed rollers and eject rollers when the power is on.

Before replacing any parts, turn off the power, unplug the power cable from the AC outlet, and wait for at least 15 minutes.

6.1 Cleaning Supplies and Parts to Clean	343
6.2 Cleaning the Exterior of the Scanner	345
6.3 Cleaning Inside the Scanner	346
6.4 Cleaning a Carrier Sheet	352
6.5 Replacing Parts	353
6.6 Performing a Scan Test	363
6.7 Calibrating the Touch Panel	366

6.1 Cleaning Supplies and Parts to Clean

■ Cleaning Supplies

Cleaning Supplies	Part No.	Remarks
Cleaner F1 	PA03950-0352	1 bottle (100 ml) Used to lightly moisten the cloths before wiping parts clean. When a large amount of the cleaner is used, it may take some time until it is dry. Use an appropriate amount to moisten the cloths. Also, wipe off Cleaner F1 well from the part with a dry cloth.
Cleaning Paper 	CA99501-0012	1 pack (10 sheets) Used with Cleaner F1.
Cleaning Wipe 	PA03950-0419	1 pack (24 sheets) Pre-moistened with Cleaner F1, Cleaning Wipes are used instead of moistened cloths.
Soft, dry cloth	Any commercially available lint-free product	

Contact your FUJITSU scanner dealer or an authorized FUJITSU scanner service provider to obtain these products. For more details, refer to the following web page:
<http://www.fujitsu.com/global/about/resources/shop/computing/peripheral/scanners/>

■ Which Parts and When

Part to Clean	Cleaning Frequency
Brake roller	Clean after every 1,000 sheets are scanned.
Feed roller	
Eject roller	
Pick roller	
Idler roller	
Glass	
Ultrasonic sensor	

ATTENTION

Cleaning frequency may be increased depending on the condition of documents. When the following types of documents are scanned, the scanner parts need to be cleaned more frequently than indicated above.

- Coated paper
- Documents with large areas of printing
- Specially treated paper such as carbonless paper
- Paper containing large amounts of calcium carbonate filler
- Documents written in pencil
- Documents with insufficiently fused toner

6.2 Cleaning the Exterior of the Scanner

■ Cleaning the Scanner Body

The scanner exterior (other than the touch panel), the ADF paper chute, and the stacker must be cleaned using a dry cloth or a cloth slightly moistened with Cleaner F1 or a mild detergent. Cleaning Wipes can also be used.

ATTENTION

- Do not use paint thinner or other organic solvents. The shape or color may be changed.
- Make sure that water does not get inside the scanner when cleaning.
- When a large amount of Cleaner F1 or a mild detergent is used, it may take some time until it is dry. Use a small amount to moisten the cloths. Also, wipe off Cleaner F1 well from the part with a dry cloth.

■ Cleaning the Touch Panel

To prevent the touch panel screen from becoming dirty, it should be regularly cleaned with a soft, dry cloth.

Take care when cleaning the touch panel. It can be easily damaged, and should never be scratched or banged with hard objects.

ATTENTION

Do not wipe the touch panel with a damp cloth.

Dust on the panel surface may become stuck between the panel and frame, causing the touch panel to malfunction.

6.3 Cleaning Inside the Scanner

Clean the interior of the scanner with a cloth slightly moistened with Cleaner F1 or the Cleaning Wipe.

Scanning repeatedly may cause dust and paper dust to accumulate inside the scanner resulting in a scanning error.

As a guideline, the inside of the scanner should be cleaned every 1,000 sheets scanned. However, this criteria varies according to the type of documents scanned. For example, it may be necessary to clean the scanner more frequently when documents with insufficiently fused toner are scanned.

The glass scanner windows inside the ADF can become hot when the scanner is used.

Turn off the scanner, unplug the power cable, and wait for at least 15 minutes before cleaning.

ATTENTION

- Do not use water or mild detergent to clean the inside of the scanner.
- When a large amount of the cleaner is used, it may take some time until it is dry. Use a small amount to moisten the cloths. Also, wipe off Cleaner F1 well from the part with a dry cloth.

1. Turn off the scanner power and wait for at least 15 minutes.

For details, refer to ["2.1 Turning the Power On/Off" \(page 51\)](#).

2. Unplug the power cable from the AC outlet.

3. Pull the cover release catch toward you and open the LCD cover.

Be careful that the LCD cover does not shut on your fingers.

4. Clean the following parts with a soft cloth slightly moistened with Cleaner F1 or with the Cleaning Wipe.

● Brake roller (×2)

Remove the brake rollers from the scanner to clean.

For details on how to remove the brake rollers, refer to "[6.5.3 Replacing the Roller Set](#)" (page 355).

Gently wipe the dirt and dust off from along the slots on the surface of the brake rollers. Take care not to damage the soft rubber.

- Ultrasonic sensor (×2)
Clean lightly with a soft cloth to wipe their surfaces clean. If you have trouble wiping them with the cloth, use a cotton swab.

ATTENTION

Be careful when cleaning not to catch the cloth or the Cleaning Wipe in the document detection sensor.

- Idler roller (×4)
Gently rotate the idler rollers by hand as you wipe them clean. Take care not to damage the soft rubber. The idler rollers should be cleaned carefully and thoroughly, as dirty idler rollers can adversely affect the paper pickup performance.
- Glass (×2)
Clean lightly with a soft cloth to wipe their surfaces clean.

HINT

If the glass is dirty, a vertical line may appear on the scanned image.

- Pick roller (×2)
Gently wipe the dirt and dust off from along the slots on the surface of the roller as you rotate it manually. Take care not to damage the soft rubber. The pick roller should be cleaned carefully and thoroughly, as a dirty pick roller can adversely affect the paper pickup performance.
- Feed roller (×2) and eject roller (×2)
When cleaning, turn on the power and let the feed rollers and eject rollers rotate.
 - 1 Connect the power cable, and turn on the scanner.
For details, refer to ["2.1 Turning the Power On/Off" \(page 51\)](#).

ATTENTION

The scanner needs to be on only when cleaning the feed rollers and eject rollers.

- 2 On the [Main Menu] or [Job Menu] window, press the [Maintenance] button.

HINT

The [Maintenance] button on the [Job Menu] window can be shown by pressing .

⇒ The [Maintenance] window appears.

- 3 Press the [Roller Cleaning] button.

⇒ The [Roller Cleaning] window appears.

- 4 Open the LCD cover.
- 5 Lightly press a soft cloth slightly moistened with Cleaner F1 or the Cleaning Wipe against the surface of the rollers.

- 6 Press the [Cleaning] button on the [Roller Cleaning] window.
When the button is pressed, the feed rollers and eject rollers rotate slightly. Pressing the button continuously rotates the feed rollers and eject rollers for a fixed amount every few seconds.
Gently clean the rollers as you rotate them. Take care not to damage the soft rubber.
Stop pressing the button to stop the rollers rotating.
The pick rollers should be cleaned carefully and thoroughly, as black residue on the rollers can adversely affect the paper pickup performance.

HINT

- Pressing the [Cleaning] button seven times rotates the feed rollers and eject rollers approximately one complete revolution.
- When Help is shown, close it before pressing the [Cleaning] button.

- 7 When you have finished cleaning the rollers, press the [OK] button, and close the [Roller Cleaning] window.

ATTENTION

When cleaning the feed rollers or eject rollers, be careful not to touch the rollers with your fingers while they are rotating.

5. Close the LCD cover.

⇒ You should hear a click.

ATTENTION

- Be careful that the LCD cover does not shut on your fingers.
- Confirm that the LCD cover is completely closed. If the cover is not completely closed, document jams and feeding errors may occur.
- When closing the LCD cover, do not slam it shut by pushing the touch panel as this may damage it.

6.4 Cleaning a Carrier Sheet

Use a soft dry cloth, a cloth slightly moistened with Cleaner F1 or a mild detergent, or the Cleaning Wipe to clean a Carrier Sheet.

Lightly wipe off the dirt and dust from the surface and interior of a Carrier Sheet.

As the Carrier Sheet is repeatedly used, dirt and dust may collect on the surface of or inside the Carrier Sheet.

To prevent scanning malfunction, the carrier sheet should be regularly cleaned.

ATTENTION

- Be careful not to leave any crease on the Carrier Sheet.
- Do not use paint thinner or other organic solvents. The shape or color may be changed.
- Do not rub too hard, as the Carrier Sheet may become scratched or deformed.
- After cleaning the interior of the Carrier Sheet, wait until it has completely dried before closing it.
- As a guideline, it is recommended to replace the Carrier Sheet every 500 scans.
For details about purchasing a Carrier Sheet, refer to ["6.5.4 Purchasing a Carrier Sheet"](#) (page 362).

6.5 Replacing Parts

6.5.1 Part Numbers and Replacement Cycle

The following table specifies the replacement part numbers and the standard replacement cycles.

Part Name	Part No.	Replacement Cycle
Roller Set ● Brake Roller  ● Pick Roller 	PA03706-0001	After every 200,000 sheets scanned or once a year

These replacement cycles are rough guidelines for when using 80 g/m² (20 lb) A4/Letter woodfree or wood containing paper. They may vary according to the type of documents scanned, scanner usage, and cleaning frequency.

ATTENTION

- When the consumable alert status is orange or red, contact your scanner administrator to replace the necessary part.
- Use only the PFU parts specified. Do not use consumable parts made by other manufacturers.

For more details about how to check the consumable alert status, refer to "6.5.2 Checking the Consumable Alert Status" (page 354).

To obtain these parts, contact your FUJITSU dealer or an authorized FUJITSU scanner service provider. For more details, refer to the following web page:

<http://www.fujitsu.com/global/about/resources/shop/computing/peripheral/scanners/>

6.5.2 Checking the Consumable Alert Status

1. On the [Main Menu] or [Job Menu] window, press the [Consumable Alert] button.

HINT

The [Consumables Alert] button on the [Job Menu] window can be shown by pressing

⇒ The [Consumable Alert] window appears.

2. Check which part needs to be replaced and press the [OK] button.

Parts whose [Usage Counter] value is bigger than the [Replace at] value should be replaced.

The value of [Usage Counter] is the exact number of scanned sheets.

For details on how to check the status of consumable parts on the administrator window, refer to ["4.15.2 Viewing the Usage Status" \(page 161\)](#).

Consumable Alert			
Part	Usage Counter	Replace At	Current Status
Brake roller 	0	200,000	
Pick roller 	0	200,000	

OK

3. Replace the part.

Refer to the following:

- Replacing the Roller Set.
["6.5.3 Replacing the Roller Set" \(page 355\)](#)

6.5.3 Replacing the Roller Set

The Roller Set is made up of the brake roller and the pick roller. The procedure for replacing each roller is as follows.

1. Turn off the scanner power and wait for at least 15 minutes.

For details, refer to ["2.1 Turning the Power On/Off" \(page 51\)](#).

2. Unplug the power cable from the AC outlet.

3. Remove any documents from the ADF paper chute.

4. Pull the cover release catch toward you, place your hands at both sides of the LCD cover, and open the LCD cover.

Be careful that the LCD cover does not shut on your fingers.

5. Replace the brake roller.

1. Open the cover of the brake roller.

Hold both ends of the cover of the brake roller, and open it in the direction of the arrow.

2. Remove the shaft.
Lift the right side of the roller first, then pull out the shaft from the slot on the left.

3. Remove the brake roller from its shaft.

4. Attach a new brake roller on the shaft.
Insert the protrusion on the shaft into the slot.

5. Install the brake roller with the shaft on the scanner.
Fit the left end of the shaft in the slot, then install the rest of the shaft in place.

6. Close the cover of the brake roller.

ATTENTION

Make sure that the shaft is attached properly. If it is not correctly attached, document jams and other feeding errors may occur.

6. Replace the pick roller.

1. Open the sheet guide.

Slide the side guides all the way, and pull the sheet guide open from the dip.

2. Rotate the lock release tab on the shaft in the direction of the arrow.

3. Remove the pick roller.

Slightly lift the Lock release tab of the shaft (by approximately 5 mm), slide the shaft to the direction of the arrow below, and lift it up all the way.

ATTENTION

Be careful not to touch the gear near the lock release tab on the shaft as it contains grease.

4. Install a new pick roller on the scanner.
Insert the left end of the shaft into the slot of the scanner, and lower the other end gradually.

5. Rotate the lock release tab on the shaft in the direction of the arrow.

ATTENTION

Make sure that the pick roller is installed properly. Otherwise, paper jams or other feeding errors may occur.

6. Close the sheet guide.
Make sure that both ends of the sheet guide are locked firmly.

7. Close the LCD cover.

⇒ You should hear a click.

Be careful that the LCD cover does not shut on your fingers.

8. Connect the power cable, and turn on the scanner.

For details, refer to ["2.1 Turning the Power On/Off" \(page 51\)](#).

9. Reset the Roller Set usage counter.

The usage counter is reset by an administrator.

For details, refer to ["Resetting the Usage Counter" \(page 161\)](#).

6.5.4 Purchasing a Carrier Sheet

As a guideline, it is recommended to replace the Carrier Sheet every 500 scans. However, replace the carrier sheet when it becomes scratched or dirty.

The part name and the part number of a separately sold Carrier Sheet are as follows:

Part Name	Part No.	No. of Items
Carrier Sheet 	PA03360-0013	5

To obtain a Carrier Sheet, contact your FUJITSU dealer or an authorized FUJITSU scanner service provider. For more details, refer to the following web page:

<http://www.fujitsu.com/global/about/resources/shop/computing/peripheral/scanners/>

6.6 Performing a Scan Test

After scanner cleaning or replacement of consumable parts, perform a scan test.

■ Regular User

1. On the [Main Menu] or [Job Menu] window, press the [Maintenance] button.

HINT

The [Maintenance] button on the [Job Menu] window can be shown by pressing .

⇒ The [Maintenance] window appears.

2. Press the [Scan Test] button.

⇒ The [Scan Test] window appears.

3. Load the document into the ADF paper chute for the scan test.

4. Press the [Scan] button.

⇒ The scan test starts.

⇒ When the scan test has completed, the [Scan Viewer] window appears.

If the scanner fails to scan correctly, an error message is displayed. Deal with errors as required.

5. Check the scanned data.

For more details about [Scan Viewer], refer to the following:

["5.11 Editing the Scanned Data in the Scan Viewer" \(page 316\)](#)

6. Press the [OK] button.

⇒ The [Maintenance] window is shown again.

■ Administrator

1. On the administrator window, select **[Scan Test]** under **[Device Test]**.
⇒ The **[Scan Test]** window appears.
2. Press the **[Start]** button.
3. Load the document into the **ADF paper chute** for the scan test.
4. Press the **[Scan]** button.

- ⇒ The scan test starts.
- ⇒ When the scan test has completed, the **[Scan Viewer]** window appears.
If the scanner fails to scan correctly, an error message is displayed. Deal with errors as required.
5. **Check the scanned data.**
For more details about **[Scan Viewer]**, refer to the following:
["5.11 Editing the Scanned Data in the Scan Viewer" \(page 316\)](#)
 6. **Press the [OK] button.**
⇒ This returns you to the **[Admin Menu]** window.

6.7 Calibrating the Touch Panel Touch Panel

This should be done when the touch panel responses seem out of alignment with the positions of objects on the screen.

1. On the administrator window, select [Calibrate Screen] under [Device Test].

⇒ The [Calibrate Screen] window appears.

2. Press the [Start] button.

⇒ A red "+" (adjustment mark) appears.

3. Touch the "+" with your fingertip.

After being touched, the "+" will move to the next calibration position. Each time it stops, touch it again.

Please touch the point in the screen.
[Esc]:Cancel [Arrow Keys]:Move point

⇒ Follow the instructions in the displayed window.

ATTENTION

The [Calibrate Screen] process takes about 40 seconds.

Chapter 7

Troubleshooting

Admin

User

This chapter provides information on dealing with scanner operation problems such as paper jams, points to check before contacting your FUJITSU scanner dealer, and help on how to check scanner labels.

7.1 Removing Jammed Documents.....	368
7.2 Network Connection Troubleshooting.....	371
7.3 Other Troubleshooting	386
7.4 Points to Check before Contacting Your FUJITSU Scanner Dealer.....	395
7.5 Checking the Scanner Labels	398
7.6 Pre-Maintenance Preparations	399

7.1 Removing Jammed Documents

If a document jam occurs, follow the procedure below to remove the jammed documents.

- Do not forcibly pull out jammed documents. Make sure to open the LCD cover before removing the documents.
- Take care not to snag sharp-edged parts when removing jammed documents. Such parts may cause injury.
- When removing jammed documents, take care with dangling objects such as neckties, necklaces and hair, as they may easily become entangled in the scanner.
- The surfaces of the glass can become hot when the scanner is used. Take care not burn your hands.

1. Remove all documents from the ADF paper chute.
2. Pull the cover release catch toward you, place your hands at both sides of the LCD cover, and open the LCD cover.

Be careful that the LCD cover does not shut on your fingers.

3. Remove the jammed document.

ATTENTION

- Objects such as staples and paper clips can cause document jams.
- Take care not to damage the glass or the sheet guides when removing stapled or paper-clipped documents.

4. Holding both sides of the LCD cover, close the LCD cover.

ATTENTION

- Be careful that the LCD cover does not shut on your fingers.
- Confirm that the LCD cover is completely closed. If not completely closed, document jams and feeding errors may occur.
- When closing the LCD cover, do not slam it shut by pushing the touch panel as this may damage it.

⇒ You should hear a click.

HINT

- Although no error message is displayed, document pages may remain in the ADF even after scanning is completed or canceled. Follow the procedure from [Step 1](#) to [Step 4](#) to remove any such pages from the ADF.
- If document pages become blocked while scanning, check the scanned data. Document pages which could not be scanned correctly may be shown in the [Scan Viewer] window. In this case, delete all pages not correctly scanned using  in the scan viewer details window. For more details about the scan viewer details window, refer to "[5.11.3 Editing Scanned Data on the Scan Viewer Details Window](#)" (page 319).

If document jams or multifeed errors occur frequently, try the following procedures.

1. **Align the edges of the document sheets.**
2. **Fan the documents.**

1. Lightly grip the ends of the document stack in both hands, and fan two or three times.

2. Rotate the documents 90 degrees, and fan again.

3. Align the edges of the document sheets to be loaded, and slightly skew the leading edge of the document.

ATTENTION

Scanning the document sheets whose edges are not aligned might cause paper jams or damage to the document.

3. Load the documents into the ADF paper chute, as shown in the following diagram.

7.2 Network Connection Troubleshooting

If a network connection is not possible, first check the scanner status and system settings. The following section provides information about general troubles that may occur when connecting to a network.

If the cause of the problem is unknown or the problem persists, check the items in ["7.4 Points to Check before Contacting Your FUJITSU Scanner Dealer"](#) (page 395) and contact your FUJITSU scanner dealer or an authorized FUJITSU scanner service provider.

7.2.1 Basic Network Operation Tests

After the network has been setup, perform the following network operation tests on the administrator window.

- Checking basic network operation with a Ping test
- Checking the network operating status
- Checking the NTP server settings by synchronizing the system time (if using an NTP server)
- Checking the mail server by sending a test mail (if scanned data is to be sent as an e-mail, by fax, or when requesting alert notifications by e-mail)

■ Checking Basic Network Operation with a Ping Test

Check the network connection status of the following computers and servers associated with the network.

For details about the checking procedure, refer to ["4.8.1 Checking the Network Connection with a Ping Test"](#) (page 109).

- Computer with Admin Tool installed
- Computer with Central Admin Console installed
- Computer with Central Admin Server software installed
- Computer with User Editor installed
- DNS server
- WINS server
- NTP server
- LDAP server
- SMTP server
- File server
- FTP server
- Print server
- SharePoint server
- Domain controller
- Proxy server
- SNMP server

ATTENTION

Depending on the server setting, there may be no response from a Ping test.

When checking the network connection status by a Ping test, the following results are possible.

Follow each action described below.

The four lines below are shown as a response from the ping test.

IPv4 address:

Reply from (destination IPv4 address): bytes=32 time<(time)ms

TTL=(TTL value)

IPv6 address:

Reply from (destination IPv6 address): time<(time)ms

■ Example of a response

IPv4 address:

Reply from XXX.XXX.XXX.XXX: bytes=32 time<1ms TTL=128

IPv6 address:

Reply from XXXX:XXXX:XXXX:XXXX:XXXX:XXXX:XXXX:XXXX: time<1ms

Reply from XXXX:XXXX:XXXX:XXXX:XXXX:XXXX:XXXX:XXXX: time<1ms

Reply from XXXX:XXXX:XXXX:XXXX:XXXX:XXXX:XXXX:XXXX: time<1ms

Reply from XXXX:XXXX:XXXX:XXXX:XXXX:XXXX:XXXX:XXXX: time<1ms

■ Details

The response from the ping destination address is normal.

"Ping statistics" shows

"Lost = 4 (100% loss)".

■ Details

- There is no response from the Ping target.
- There may be problems in the hardware transmission path. For example, the LAN cable may have become disconnected during the ping test.

■ Action

- The specified Ping target might not be correct. Check that the Ping target IP address, host name or FQDN is correct.
If an IP address that does not exist is specified, the following applies:
 - For an IPv4 address:
If the IP address that you specified belongs to the same segment as the scanner, the value is shown as "Lost = 0 (0% loss)".
If the IP address that you specified belongs to a different segment from the scanner, the value is shown as "Lost = 4 (100% loss)".
 - For an IPv6 address:
The value is shown as "Lost = 4 (100% loss)".
- The network transmission mode may differ from the connection target. In ["4.7.7 Configuring Network Advanced Settings" \(P.108\)](#), change [Link Speed/Duplex Mode] from "Auto-Negotiation" to a fixed mode.
- If the Ping target is correct and the network transmission method is appropriate, refer to ["Failure to Connect to a Server Using Its IP Address" \(P.377\)](#) for further solutions.
- Check the status of the LAN cable or replace the LAN cable and try again.
- If a HUB device is used for connection, change the connection port of the LAN cable and try again.

"Ping statistics" shows "Lost = N (1 to 99% loss)".

■ Details

- Communication with the Ping target is not stable.
- There may be problems in the hardware transmission path. For example, the LAN cable may have become disconnected during the ping test.

■ Action

- Check the status of the LAN cable or replace the LAN cable and try again.
- When connected to a HUB, change the port to which the LAN cable is connected and try again.
- The network transmission mode may differ from the connection target. In ["4.7.7 Configuring Network Advanced Settings" \(P.108\)](#), change [Link Speed/Duplex Mode] from "Auto-Negotiation" to a fixed mode.

"Ping request could not find host xxxxxxxx. Please check the name and try again."

■ Details

The name-resolution or address-resolution for the device specified as the Ping target may have failed.

■ Action

- Check that the Ping target host name or FQDN is correct.
- Check that the DNS server or WINS server settings are correct.
- If the Ping target host name or FQDN is correct, refer to ["Failure to Connect to a Server Using Its Host Name or FQDN" \(P.379\)](#) for further solutions.

■ Checking the Network Operating Status

Check the network status on the [Network Status] window.

For details about the checking procedure, refer to ["4.8.2 Checking the Network Operating Status" \(page 110\)](#) or ["G.3.5 Checking the Network Operating Status" \(page 468\)](#).

Follow each action described below.

The information shown is all valid.

■ **Action**

None

Network connection is working properly.

■ **Action**

None

The information shown is valid, but the network connection does not work normally for the ping test.

■ **Action**

In ["4.7.7 Configuring Network Advanced Settings" \(P.108\)](#), change [Link Speed/Duplex Mode] from "Auto-Negotiation" to a fixed mode.

If the problem persists, refer to ["Failure to Connect to a Server Using Its IP Address" \(P.377\)](#) for further solutions.

■ Checking the NTP Server Settings by Synchronizing the System Time

On the [NTP Server] window, press the [Sync Time] button to check if the system time can be synchronized.

After pressing the [Sync Time] button, follow each action described below according to the message that is shown.

The messages and their corresponding actions are as follows.

System time has been successfully synchronized.

■ Action

None

System time synchronization failed.

■ Action

Try the following:

- Check the specified NTP server IP address, host name, or FQDN for mistakes, and correct them.
- Communication between the scanner and the NTP server is not possible due to a problem with the network route. Check the network settings.
- The NTP server may be busy. Wait a short time before trying again to synchronize the system time. If that does not work, the specified server may not be an NTP server, so try a different NTP server.
- It attempted to acquire the date and time from a higher level NTP server, but failed. Try a different NTP server or have the network administrator investigate.
- Check that the time is correct. If the time is incorrect, adjust the date/time, and try again.
- Refer to "[4.4.4 Setting the Date/Time](#)" (P.84), adjust the date/time, and try again.

■ Checking the Mail Server by Sending a Test Mail

On the [Alert Notification] window, press the [Test] button to check if an e-mail can be sent to the specified destination.

After pressing the [Test] button, follow each action described below according to the message that is shown.

The messages and their corresponding actions are as follows.

Sending...

■ Action

If no error message appears and the [Sending] indicator disappears, the test mail was sent successfully to the mail server.

Check that the alert notification e-mail has arrived at the specified destination. If the alert notification e-mail has not arrived at the expected destination, check that the part of the e-mail address before the "@" has been entered correctly.

Test e-mail could not be sent.

■ Action

- Check that the computer connected to the e-mail server is running properly.
- Check if an e-mail can be sent to the address from other computers in the network.
- Ping the SMTP server to check that it and its network connection are working properly.
- If the SMTP server does not respond to the ping test, check whether the system network is operating normally by pinging a computer other than the SMTP server.
 - If it is only the scanner's network connection that does not work, refer to ["Failure to Connect to a Server Using Its IP Address" \(P.377\)](#) for further solutions.
 - If the problem seems to be with the SMTP server's network connection, request the network administrator to check that the SMTP server and its network connection are functioning normally.
- Check that the same port number has been correctly set for the scanner to SMTP server connection in ["4.11.1 Setting the SMTP Server" \(page 126\)](#).

7.2.2 Other Network Connection Troubleshooting

There are many reasons why a network connection may not be possible.

The following section provides information about general troubles that may occur when connecting to a network.

If the cause of the problem is unknown or the problem persists, check the items in ["7.4 Points to Check before Contacting Your FUJITSU Scanner Dealer" \(page 395\)](#) and contact your FUJITSU scanner dealer or an authorized FUJITSU scanner service provider.

■ Failure to Connect to a Server Using Its IP Address

If a server cannot be connected to by using its IP address, and does not respond to a ping test, try the following steps:

Connection error between a server and the scanner, or problem with the LAN cable.

■ Action

Check that the LAN cable has been attached to both the scanner and server correctly.

If the server is connected using a LAN cable (straight type), Auto MDI/MDI-X (automatic selection) is not supported. A LAN cable (crossover type), switch, or router is required between the scanner and server.

If this is not the case, the LAN cable may be faulty. Find a LAN cable that functions normally and try again.

The settings you have configured on the [IP Address] window, or the [IPv4 Address] window/[IPv6 Address] window when the IPv6 function is enabled, are invalid.

■ Action

Refer to ["4.7.1 Giving the Scanner an IP Address/DHCP" \(P.101\)](#) or refer to ["G.3.1 Giving the Scanner an IPv4 Address" \(P.463\)](#)/["G.3.2 Giving the Scanner an IPv6 Address" \(P.464\)](#) if the IPv6 function is enabled and then check the settings that you have configured such as the IP address and the subnet mask (subnet prefix length for an IPv6 address) are configured correctly.

When DHCP is used, the DHCP server does not operate normally, or there is a problem with the DHCP server settings.

■ Action

If you use DHCP, refer to ["4.8.2 Checking the Network Operating Status" \(P.110\)](#) or ["G.3.5 Checking the Network Operating Status" \(P.468\)](#) and check that the IP address, subnet mask (subnet prefix length for an IPv6 address), and default gateway for the scanner are all set correctly.

If these settings are not correct, the DHCP server may not operate normally, or the DHCP server may not assign valid IP addresses because of restricted number of leases or MAC address validation.

Check the DHCP server connection status and the details of the server settings.

Another host or communication device is connected using the same IP address as the scanner.

■ Action

If the same IP address has already been used by another host or communication device, then even if the other device has been given a different IP address, the server may not recognize the scanner's "duplicate" IP address until it is rebooted. Restart the server.

If a duplicate IP address connection from another host or communication device exists on a LAN, it will be unusable.

If a duplicate IP address connection from another host or communication device exists, pull out its LAN cable and restart the server.

Access is denied due to the establishment of a firewall between the server and the scanner.

■ Action

If a firewall has been established between the server and the scanner, check that it has not been set to deny access to the network.

The network [Link Speed/Duplex Mode] for the scanner and server are different, or "Auto-Negotiation" is not supported by the server.

■ Action

In the Network Advanced Settings for the scanner (described in "[4.7.7 Configuring Network Advanced Settings](#)" (P.108)), [Link Speed/Duplex Mode] is set to the default "Auto-Negotiation". If "Auto-Negotiation" does not operate correctly, change [Link Speed/Duplex Mode] to a fixed mode on the scanner and server, and try again.

■ Failure to Connect to a Server Using Its Host Name or FQDN

If a server cannot be connected to by using its host name or FQDN, and does not respond to a ping test, try the following steps:

Same as in "Failure to Connect to a Server Using Its IP Address" (P.377).

■ Action

Check if a network connection is possible by trying the same solution for "Failure to Connect to a Server Using Its IP Address" (P.377).

The scanner's DNS server or WINS server settings are invalid.

■ Action

Check that the DNS and WINS server settings are correct.

The DNS server or WINS server is not functioning normally, or there is an error with the DNS or WINS server network connection.

■ Action

Ping the DNS and WINS servers to check they are functioning normally.
If the DNS or WINS server is not functioning, request the network administrator to check its status.

■ Failure to Add the Scanner as a Domain Member, or Failure to Login to a Domain

When the scanner is specified as a domain member, an authorization error occurs and the scanner cannot be added.

■ Action

- When specifying the scanner as a domain member, perform authentication as a user with domain administrator rights, or as a user with the rights to add a computer to the domain. If you do not know the user name or the password, contact the system administrator of the domain.
- Check that the LAN Manager authentication level is set to the same level as the server in the domain.

After a user with administrator rights registers a scanner to a domain, authentication is attempted by a domain user without administrator rights in order to change the scanner name, but login fails.

■ Action

When registering a scanner to a domain with administrator rights, be sure to perform authentication as a user with administrator rights again the next time.

■ Failure to Add a Network Printer

If adding a network printer to/from the scanner is not possible, try the following steps. Also, read the printer manual beforehand that provides information about how to set printer settings and how to add a network printer.

The Windows 8 printer driver has not been installed on the print server.

■ Action

Install the Windows 8 printer driver on the print server.

Check that the Windows 8 printer driver has been correctly installed on the print server. For more details, refer to ["4.14 Setting the Network Printers" \(page 147\)](#).

Network printer shared name has been changed.

■ Action

Check the shared name on the print server.

The specified network printer path is invalid.

■ Action

Check that the specified network printer path is correct.

The network printer shared name contains the vertical bar (|).

■ Action

Create a network printer on the print server with a shared name that does not contain the vertical bar (|), and register the network printer again.

The LAN Manager authentication level is not set to the same level as the server for the network printer.

■ Action

Set the LAN Manager authentication level to the same level as the server for the network printer.

■ Failure to Print on a Network Printer

If printing on a network printer which has been set in the scanner is not possible, try the following steps. Also, read the printer manual beforehand that provides information about how to set printer settings and how to add a network printer.

Same as in "[Failure to Connect to a Server Using Its IP Address](#)" (P.377).

■ Action

Check if a network connection is possible by trying the same solution for "[Failure to Connect to a Server Using Its IP Address](#)" (P.377).

Printer is not usable, due to an out of paper error, paper jam, or similar problem.

■ Action

Check whether or not the printer is ready for printing, deal with the cause of the error, and try again.

Not authorized to print on network printer.

■ Action

Contact the administrator to check if printing is allowed on the network printer.

Printing is impossible due to a printer or spooler error.

■ Action

Try the following:

- Check that printing is possible from the print server application.
- Check that the print server spooling is operating normally.

■ Failure to Add a Network Folder

If adding a network folder from the scanner is not possible, try the following steps.

Network folder shared name has been changed.

■ Action

Check the shared name on the server side.

The specified network folder path is invalid.

■ Action

Check that the specified network folder path is correct.

The LAN Manager authentication level is not set to the same level as the server for the network folder.

■ **Action**

Set the LAN Manager authentication level to the same level as the server for the network folder.

■ **Failure to Save to a Network Folder**

When scanned data is saved to an FTP server folder or a network folder, the [Network is busy. Try again later.] message appears and saving is not possible.

■ **Action**

The network folder may be temporarily unavailable. Wait for a while (approximately three minutes) and try again.

This error may also occur if an open port number of the FTP server is momentarily lost. Wait for a while (approximately three minutes) and try again, or change the FTP setting to passive mode.

When an FTP proxy is used for saving a large amount of data to an FTP server folder, an error occurs and saving is not possible.

■ **Action**

When DeleGate is used for the proxy server, if the data forwarding time takes longer than ten minutes, an error may occur in the saving process. In this case, saving may be made possible by adding "TIMEOUT io=0" to the DeleGate settings.

When saving data via FTP/FTPS is attempted repeatedly, the "Error: network folder access was refused." message may appear.

■ **Action**

This error may occur in the case of FTP server open port exhaustion. Wait a while (approximately three minutes) and try again.

7.2.3 Failure to Access the Scanner Using Internet Explorer, the Admin Tool, the Central Admin Server, or the User Editor

If access is not possible when attempting to connect to the scanner using Internet Explorer, the Admin Tool, or the Central Admin Server, or the User Editor, try the following steps:

Same as in "Failure to Connect to a Server Using Its IP Address" (P.377).

■ **Action**

Check if a network connection is possible by trying the same solution for "Failure to Connect to a Server Using Its IP Address" (P.377).

The DNS server or WINS server is not functioning normally, or the scanner name has not been registered in the DNS or WINS server.

■ **Action**

Check the connectivity of the specified IP address.

If it is possible to connect the scanner using the Admin Tool with a specified IP address, specify the scanner's IP address in the DNS or WINS server.

In the administrator settings of the scanner, check the DNS or WINS server settings for Internet Explorer and the Admin Tool.

A misconfigured firewall between the scanner and the computer with Internet Explorer, the Admin Tool, or User Editor installed is denying the computer access to the scanner via HTTP/HTTPS protocols.

■ **Action**

If there is a firewall between the computer installed with Internet Explorer, the Admin Tool, or the User Editor and the scanner, check that its settings are not preventing access.

The URL of the target scanner is not registered as a trusted site.

■ **Action**

Set the scanner URL as a trusted site for Internet Explorer.

1. In Internet Explorer, select the [Tools] menu → [Internet Options].
2. On the [Security] tab, select [Trusted sites] and click the [Sites] button.
3. Enter the URL of the scanner in the [Add this website to the zone] field, and click the [Add] button.

In Internet Explorer, the security level for the target zone is set to [High] on the [Security] tab in the [Tools] menu - [Internet Options]. For [Custom Level], [Prompt] or [Disable] is set for [Active scripting] under [Scripting] in the [Settings] area.

■ **Action**

When connecting using the scanner name, the connection will be an intranet connection. If the URL includes an IP address, the scanner will be connected using the Internet Zone. Try the following settings for the corresponding zone.

1. In Internet Explorer, select the [Tools] menu → [Internet Options].
2. Enable active scripting in either of the following ways.
 - On the [Security] tab, click the [Default level] button to set [Security level for this zone] to [Medium].
 - On the [Security] tab, click the [Custom level] button to set to [Enable] for [Active scripting] under [Scripting] in the [Settings] area.
3. If connecting via the Internet zone, on the [Privacy] tab, set the level to below [Medium High].
4. Delete temporary internet files.
For details about setting values, refer to Help for Internet Explorer.

The scanner is in standby mode.

■ **Action**

Press the power button to start the scanner.

A proxy server is being used.

■ **Action**

Set the proxy server to not be used.

1. In Internet Explorer, select the [Tools] menu → [Internet Options].
2. Press the [LAN settings] button on the [Connections] tab.
3. Clear the [Use a proxy server for your LAN (These settings will not apply to dial-up or VPN connection).] check box.

There is an error with the connection protocol setting.

■ **Action**

Check if SSL is enabled on the [Admin Connection] window.

For details, refer to "[4.9.1 Setting the Admin Connection](#)" (page 111).

There is an error with the port number setting.

■ **Action**

Check the specified port number on the [Admin Connection] window.

For details, refer to "[4.9.1 Setting the Admin Connection](#)" (page 111).

In Internet Explorer, [Tools] menu - [Internet Options] - [Advanced] tab, the [Use SSL 3.0] check box under [Security] in the [Settings] area is not selected.

■ **Action**

1. In Internet Explorer, select the [Tools] menu → [Internet Options].
2. On the [Advanced] tab, select the [Use SSL 3.0] check box under [Security] in the [Settings] section.

7.3 Other Troubleshooting

This section describes problems that may occur during scanning and gives information on how to deal with them. Before requesting repair, check the following list of common problems.

If the problem still cannot be solved after consulting the troubleshooting suggestions, check the points in ["7.4 Points to Check before Contacting Your FUJITSU Scanner Dealer" \(page 395\)](#) and then contact your FUJITSU scanner dealer or an authorized FUJITSU scanner service provider.

The possible problems are as follows:

Problem List

- **Scanner cannot be turned on**
 - [" Scanner cannot be turned on." \(page 387\)](#)
- **Scanner does not start up**
 - [" The "The last attempt to restart ..." message is shown on the window and the scanner does not start up." \(page 387\)](#)
 - [" Scanner does not resume from standby mode." \(page 387\)](#)
 - [" A "Scanner initialization has failed." message appears and the scanner does not start up." \(page 388\)](#)
- **I want to reset the scanner to factory defaults**
 - [" I want to reset the scanner settings to their defaults." \(page 388\)](#)
 - [" I forgot the administrator login password." \(page 388\)](#)
- **Data cannot be scanned properly**
 - [" Scanning does not start." \(page 388\)](#)
 - [" Even after pressing the Scan button, scanning does not start." \(page 389\)](#)
 - [" Multifeed errors occur frequently." \(page 389\)](#)
 - [" Document is not fed into the scanner \(pick error occurs frequently or document feed stops halfway\)." \(page 390\)](#)
 - [" When scanning with a Carrier Sheet, the \[Paper jam has occurred. Remove the documents from the ADF and try again.\] message appears and an error occurs." \(page 391\)](#)
- **Scanned data is inappropriate**
 - [" Scanned data is elongated." \(page 391\)](#)
 - [" Shadow on the leading edge of the scanned data." \(page 391\)](#)
 - [" Vertical line on the scanned data." \(page 391\)](#)
 - [" Scanned data appears skewed or distorted." \(page 392\)](#)
 - [" Quality of scanned data is poor." \(page 392\)](#)
 - [" Scanned data is partially cut off." \(page 392\)](#)
 - [" Scanned data is skewed." \(page 392\)](#)
- **Cannot login**
 - [" Cannot login with administrator password." \(page 393\)](#)
 - [" The \[Login\] window is not displayed when connecting via the network." \(page 393\)](#)
- **Operation does not work**
 - [" Input field entry entered via the on-screen keyboard does not appear on the window." \(page 393\)](#)
 - [" Saving is not possible after pressing \[Save\] on the \[File Download\] dialog box." \(page 393\)](#)

- " The status window with the message "Printing scan data on xxx"remains or is slow." (page 394)
- " An error occurs when installing an Admin Tool." (page 394)
- " When a fax is sent, the screen freezes on the scanning window." (page 394)

■ Scanner Cannot Be Turned On

Scanner cannot be turned on.

■ Check item

Has the power button been pressed?

■ Action

Press the power button.

■ Check item

Are the AC cable and AC adapter properly connected to the scanner?

■ Action

- Connect the AC cable and the AC adapter.
- Disconnect the AC cable from the scanner to turn off the scanner, and connect the AC cable again. After turning the power off, wait for at least 10 seconds before turning the power back on again.

If the problem persists even after taking the above mentioned actions, contact your FUJITSU scanner dealer or an authorized FUJITSU scanner service provider.

■ Scanner Does Not Start Up

The "The last attempt to restart ..." message is shown on the window and the scanner does not start up.

■ Check item

After turning the scanner on, was the power turned off immediately?

■ Action

- Press the power button.
- Disconnect the AC cable from the scanner to turn off the scanner, and connect the AC cable again. After turning the power off, wait for at least 10 seconds before turning the power back on again.

If the problem persists even after taking the above mentioned actions, contact your FUJITSU scanner dealer or an authorized FUJITSU scanner service provider.

Scanner does not resume from standby mode.

■ Check item

After turning the scanner off, was the power turned back on again immediately?

■ Action

Press the power button.

A "Scanner initialization has failed." message appears and the scanner does not start up.

■ **Check item**

Is the status the same after the scanner is turned off and then turned back on again?

■ **Action**

Disconnect the AC cable from the scanner to turn off the scanner, and connect the AC cable again. After turning the power off, wait for at least 10 seconds before turning the power back on again.

If the problem persists even after taking the above mentioned actions, contact your FUJITSU scanner dealer or an authorized FUJITSU scanner service provider.

■ **I Want to Reset the Scanner to Factory Defaults**

I want to reset the scanner settings to their defaults.

■ **Action**

Refer to "[Resetting to Factory Defaults](#)" (page 174), and reset the scanner.

I forgot the administrator login password.

■ **Action**

Contact your FUJITSU scanner dealer or an authorized FUJITSU scanner service provider.

■ **Data Cannot Be Scanned Properly**

Scanning does not start.

■ **Check item**

Has the document been loaded correctly into the ADF paper chute?

■ **Action**

Reload the documents into the ADF paper chute.

■ **Check item**

Is the LCD cover completely closed?

■ **Action**

Close the LCD cover completely.

■ Check item

Does the same problem occur after turning the scanner power off and back on again, and re-logging in?

■ Action

Disconnect the AC cable from the scanner to turn off the scanner, and connect the AC cable again. After turning the power off, wait for at least 10 seconds before turning the power back on again.

If the problem persists even after taking the above mentioned actions, contact your FUJITSU scanner dealer or an authorized FUJITSU scanner service provider.

Even after pressing the Scan button, scanning does not start.
■ Check item

Is the  button displayed on the touch panel?

■ Action

The Scan button can only be used on the following windows:

- [Send e-Mail] window
- [Send Fax] window
- [Print] window
- [Save] window
- [Scan Viewer] window
- [Scan Test] window
- [Message Screen]
- [Scan Count] window
- Confirmation window showing the number of scanned sheets
- [File Name] window

Multifeed errors occur frequently.
■ Check item

Do the documents satisfy the conditions given in "A.2 Paper Quality" (P.402)?

■ Action

Use documents which satisfy the conditions described in "A.2 Paper Quality" (P.402).

■ Check item

Has the document been loaded correctly into the ADF paper chute?

■ Action

Riffle and realign the document stack, then load it back into the ADF paper chute.

■ Check item

Is the document stack more than 5 mm thick?

■ Action

Remove sheets from the stack to reduce it to a thickness of 5 mm or less.

■ Check item**Is the brake roller or the pick roller dirty?****■ Action**

Clean the brake roller and the pick roller.

For more details, refer to "[6.3 Cleaning Inside the Scanner](#)" (P.346).

■ Check item**Is the brake roller or the pick roller worn out?****■ Action**

Replace the brake roller or the pick roller.

For more details, refer to "[6.5 Replacing Parts](#)" (P.353).

■ Check item**Is the scanner used at 2,000 m or higher altitudes?****■ Action**

Enable the [High Altitude Mode] in the [Multifeed Settings] window in the administrator settings.

For more details, refer to "[4.5.1 Setting the Multifeed Detection Method](#)" (page 88).

Document is not fed into the scanner (pick error occurs frequently or document feed stops halfway).

■ Check item**Do the documents satisfy the conditions given in "[A.2 Paper Quality](#)" (P.402)?****■ Action**Use documents which satisfy the conditions described in "[A.2 Paper Quality](#)" (P.402).

■ Check item**Is the brake roller or the pick roller dirty?****■ Action**

Clean the brake roller and the pick roller.

For more details, refer to "[6.3 Cleaning Inside the Scanner](#)" (P.346).

■ Check item**Is the brake roller or the pick roller worn out?****■ Action**

Replace the brake roller or the pick roller.

For more details, refer to "[6.5 Replacing Parts](#)" (P.353).

■ Check item**Is there any foreign matter in the document feed path?****■ Action**

Clean the document feed path.

When scanning with a Carrier Sheet, the [Paper jam has occurred. Remove the documents from the ADF and try again.] message appears and an error occurs.

■ **Check item**

When an error occurs while scanning with a Carrier Sheet, after the [Scanning with the carrier sheet failed. Make sure the document is fully inserted into the top of the carrier sheet and the folded edge is on the side marked with the thick line, then try again.] message appears, the [Paper jam has occurred. Remove the documents from the ADF and try again.] message appears, and scanning fails.

■ **Action**

Follow the instructions in the messages, and try again.

■ **Scanned Data Is Inappropriate**

Scanned data is elongated.

■ **Check item**

Are the feed rollers dirty?

■ **Action**

Clean the feed rollers.

For more details, refer to "[6.3 Cleaning Inside the Scanner](#)" (P.346).

Shadow on the leading edge of the scanned data.

■ **Check item**

Are the feed rollers dirty?

■ **Action**

Clean the feed rollers.

For more details, refer to "[6.3 Cleaning Inside the Scanner](#)" (P.346).

Vertical line on the scanned data.

■ **Check item**

Is the glass dirty?

■ **Action**

Follow the steps in "[Chapter 6 Scanner Care](#)" (P.342) to clean the glass.

Scanned data appears skewed or distorted.

- **Check item**
Has the document been loaded correctly?
- **Action**
Load the document correctly.

Quality of scanned data is poor.

- **Check item**
Is the glass dirty?
- **Action**
Clean the glass.

Scanned data is partially cut off.

- **Check item**
Depending on the paper color of the document, scanned data may be partially cut off because the paper boundary is not recognized correctly.
- **Action**
Before scanning, set the paper size to a standard one.

-
- **Check item**
Is the document loaded correctly?
 - **Action**
Load the document correctly.

Scanned data is skewed.

- **Check item**
Are the side guides aligned with the document width?
- **Action**
Align the side guides with the document width.
The brake roller or pick roller may also cause this problem. Refer to "Check item" and "Action" for "[Document is not fed into the scanner \(pick error occurs frequently or document feed stops halfway\).](#)" (page 390).

■ Cannot Login

Cannot login with administrator password.

■ Check item

Was the Caps Lock on when the password was entered?

■ Action

Turn off the Caps Lock and try logging in again.

If the password has been lost or forgotten, contact your FUJITSU scanner dealer or an authorized FUJITSU scanner service provider.

The [Login] window is not displayed when connecting via the network.

■ Check item

Are the SSL settings correct?

■ Action

Close the window, correct the settings, and try connecting again.

■ Check item

Was the [Yes] button selected on the [Security Warning] dialog box when connecting with HTTPS?

■ Action

Close the window and try connecting again. Select the [Yes] button on the [Security Warning] dialog box when connecting.

■ Operation Does Not Work

Input field entry entered via the on-screen keyboard does not appear on the window.

■ Check item

Has the input field been selected?

■ Action

- Select the input field and try again.
- Press the [Cancel] button and try again.
- To use the touch panel, touch the input field directly and try again.

Saving is not possible after pressing [Save] on the [File Download] dialog box.

■ Check item

Does the length of the [Save As] folder path (folder path plus file name) exceed 259 characters?

■ Action

Change the [Save As] folder to shorten the path length.

The status window with the message "Printing scan data on xxx"remains or is slow.**■ Check item**

Is there enough free space in the drive on which the spool folder for the print server exists?

■ Action

Make sure that there is enough space in the drive.

An error occurs when installing an Admin Tool.**■ Check item**

Is the language of the Admin Tool already installed different from that of the operating system?

■ Action

Uninstall the existing Admin Tool. Then, install the Admin Tool of the same language as that of the operating system.

When a fax is sent, the screen freezes on the scanning window.**■ Check item**

Was the Scan button pressed repeatedly during scanning?

Do not press the Scan button before scanning is completed.

■ Action

Disconnect the AC cable from the scanner to turn off the scanner, and connect the AC cable again. After turning the power off, wait for at least 10 seconds before turning the power back on again.

If the problem persists even after taking the above mentioned actions, contact your FUJITSU scanner dealer or an authorized FUJITSU scanner service provider.

7.4 Points to Check before Contacting Your FUJITSU Scanner Dealer

Before contacting your FUJITSU scanner dealer or an authorized FUJITSU scanner service provider, check the following points.

7.4.1 General Details

Info	Findings
Model	FUJITSU Image Scanner N7100
Serial No.	Example: ***** For details, refer to "7.5 Checking the Scanner Labels" (page 398) .
Production date	Year Month Example: 2015-05 (May, 2015) For details, refer to "7.5 Checking the Scanner Labels" (page 398) .
Date of purchase	Year Month Day
System version	
Symptoms	
Frequency of trouble	
Total throughput	

7.4.2 Error Status

■ Problem When Connecting to the Scanner via Computer

Info	Findings
OS (Windows)	
Internet Explorer version	
Admin Tool version	
Displayed error message	

■ Document Feed Trouble

Info	Findings
Paper type	
Main purpose of use	
Last cleaned on	Year Month Day
Consumables last replaced on	Year Month Day
Error message details	

■ **Sending an Original Document and Scanned Data**

Info	Findings
Can both the original document and scanned data be sent by fax or e-mail?	Circle one: Available Unavailable

7.5 Checking the Scanner Labels

The following diagrams show where the labels are located on the scanner. The labels are on the back of the scanner.

The following are the label examples.

- Label A
Example: Contains various scanner information.

- Label B
Example: Indicates the various standards that the scanner conforms to.

7.6 Pre-Maintenance Preparations

Before sending the scanner for maintenance, the user data store and system settings should be backed up.

- ["Backing up the User Data Store" \(page 169\) in "4.16.1 Maintaining the User Data Store" \(page 167\)](#)
- ["4.16.2 Maintaining the System Settings" \(page 171\)](#)

After backing them up, refer to the following and delete the user data store and system settings.

If the hard disk (SSD) is replaced, all settings will revert to their factory default values.

- ["Clearing the User Data Store" \(page 170\) in "4.16.1 Maintaining the User Data Store" \(page 167\)](#)
- ["Resetting to Factory Defaults" \(page 174\) in "4.16.2 Maintaining the System Settings" \(page 171\)](#)

ATTENTION

User data may contain private information such as information on e-mail senders and fax numbers, so care should be taken when managing such data.

Appendix A

Paper Specifications

Admin

User

This appendix describes the paper size and quality requirements for ensuring that the ADF operates correctly when scanning documents.

A.1 Paper Size	401
A.2 Paper Quality	402
A.3 Maximum Document Loading Capacity	404
A.4 Area not to be Perforated or Affixed with Other Papers	405
A.5 Multifeed Detection Conditions.....	406
A.6 Conditions for Using a Carrier Sheet	407

A.1 Paper Size

The following paper sizes can be scanned with this scanner:

Width: 50.8 to 216 mm (2 to 8.5 in.)

Length: 50.8 to 355.6 mm (2 to 14 in.)(*)

(*): The maximum length of a document that can be scanned is 3,048 mm (120 in.).

When you scan a document longer than 863 mm (34 in.), set the resolution to 200 dpi or less.

A.2 Paper Quality

Paper Type

The following paper types are recommended for use with the ADF:

- Woodfree paper
- Wood containing paper
- PPC paper (recycled paper)
- Plastic card

When documents of a paper type other than those listed above are scanned, perform the test-scan with a same paper type first to check if the document can be scanned without problem.

Paper Weight

The following paper weights can be used with the ADF:

- 40 to 209 g/m² (11 to 56 lb)
- For A8 size, 127 to 209 g/m² (34 to 56 lb)
- For plastic cards (long edge feed only), 0.76 mm (0.029 in.) or less (including embossed cards)

Precautions

The following documents may not be scanned successfully:

- Documents of non-uniform thickness (such as, envelopes and documents with attachments)
- Wrinkled or curled documents (See the following hint)
- Folded or torn documents
- Tracing paper
- Coated paper
- Carbon paper
- Photosensitive paper
- Perforated or punched documents
- Documents that are not square or rectangular
- Exceptionally thin documents (less than 40 g/m²)
- Photographs (photographic paper)

Do not attempt to scan the following types of documents:

- Paper-clipped or stapled documents
- Documents on which the ink is still wet
- Documents smaller than A8 size
- Documents wider than 216 mm (8.5 in.)
- Documents other than paper documents and plastic card documents: such as fabric, foil, and OHP film made documents.
- Valuable documents that must not be damaged or dirty

ATTENTION

- Carbonless paper contains chemical substances that may damage the brake rollers or other rollers (such as the pick roller) when documents are fed. Pay attention to the following:
 - Cleaning
 - If paper jams occur frequently, clean the brake rollers and pick roller. For details about cleaning, refer to ["Chapter 6 Scanner Care"](#) (page 342).
 - Replacing parts
 - The service life of the brake rollers and pick roller may be shortened when compared to scanning only wood containing paper documents.
- When wood containing paper documents are scanned, the life of the brake rollers and pick roller may be shortened compared with the case where woodfree paper documents are scanned.
- When glossy paper documents, such as photographs, are scanned, the surface of the documents may be damaged.
- When scanning plastic cards, be aware of the following:
 - Use plastic cards that meet the specifications below.
 - Plastic cards that comply with the ISO7810 ID-1 type
 - Size: 85.6 × 53.98 mm
 - Thickness: 0.76 mm or less
 - Material: polyvinyl chloride (PVC) or polyvinyl chloride acetate (PVCA)
 - Before scanning, check that the plastic cards can be fed through the scanner.
 - Plastic cards that are hard and not easy to bend may not be fed smoothly.
 - If the surface of the card is dirty with grease, such as fingerprints, wipe off before scanning.
 - When you scan shiny plastic cards, the image may be partially lighter or darker than the original. Example: a gold credit card
 - When you scan embossed cards, face the embossed side down and load them in a landscape orientation.
 - Scanning thick documents such as a plastic card incorrectly detects it as a multifeed error. To avoid this, disable the intelligent multifeed detection mode or the multifeed detection.

HINT

- When scanning semi-transparent documents, set the scan [Brightness] to a lighter level to avoid image bleed through.
- Clean the rollers as frequently as possible when you scan documents written in pencil, because pencil traces may smudge other documents. Unclean rollers may also cause a paper feed error.
 - For details about cleaning, refer to ["Chapter 6 Scanner Care"](#) (page 342).
- When scanning documents with the ADF, the leading edges of all the documents must be aligned. The curling of the leading edge must be within the following tolerances:

A.3 Maximum Document Loading Capacity

The maximum number of sheets that can be loaded into the ADF paper chute is determined by the size and weight of document papers.

The following graph shows the maximum document loading capacity of ADF according to paper size and weight.

Unit	Standard paper weights								
lb	11	14	17	20	22	24	28	34	56
g/m ²	40	52.3	64	75	81.4	90	104.5	127	209

A.4 Area not to be Perforated or Affixed with Other Papers

ADF feeding errors may occur while scanning if the document has any (punched) holes, or if any other papers are attached in the area shown in the following figure.

A.5 Multifeed Detection Conditions

There are three multifeed detection modes: document layer, document length, and both document layer and length.

The following conditions must be satisfied in each of these detection modes.

Detection by Layer

- Set sheets of the same weight in the ADF paper chute for a series of scans.
- Paper weight: 40 to 209 g/m² (11 to 56 lb)
- Punched holes are not allowed anywhere in the shaded column located in the middle of the document with a width of 25 mm (0.98 in.) on either side within the column. (*)
- Do not glue any other paper anywhere in the shaded column located in the middle of the document with a width of 25 mm (0.98 in.) on either side within the column. (*)

(*): Refer to ["A.4 Area not to be Perforated or Affixed with Other Papers"](#) (page 405).

Detection by Length

- Set sheets of the same length in the ADF paper chute for a series of scans.
- Document length deviation: 1% or less
- Punched holes are not allowed anywhere in the shaded column located in the middle of the document with a width of 25 mm (0.98 in.) on either side within the column. (*)

(*): Refer to ["A.4 Area not to be Perforated or Affixed with Other Papers"](#) (page 405).

Detection by both Layer and Length

- Set sheets of the same weight and length in the ADF paper chute for a series of scans.
- Paper weight: 40 to 209 g/m² (11 to 56 lb)
- Document length deviation: 1% or less
- Punched holes are not allowed anywhere in the shaded column located in the middle of the document with a width of 25 mm (0.98 in.) on either side within the column. (*)
- Do not glue any other paper anywhere in the shaded column located in the middle of the document with a width of 25 mm (0.98 in.) on either side within the column. (*)

(*): Refer to ["A.4 Area not to be Perforated or Affixed with Other Papers"](#) (page 405).

ATTENTION

- Multifeed detection by layer will always mis-detect thick paper as a multifeed error. To avoid this, disable the intelligent multifeed detection mode or the multifeed detection.
- Multifeed detection rate may decrease depending on the document condition.
- Multifeed may not be detected for the top and bottom 30 mm of a document.

A.6 Conditions for Using a Carrier Sheet

A.6.1 Paper Size

The following paper sizes can be scanned with this scanner:

- A3 (297 × 420 mm)(*)
- B4 (JIS) (257 × 364 mm)(*)
- Double Letter (279.4 × 431.8 mm/11 × 17 in.)(*)

(*): The above paper sizes must be folded in half to be scanned.

A.6.2 Paper Quality

Paper Type

The following paper types are recommended for use with the ADF:
Standard office paper

Paper Weight

The following paper weights can be used with the ADF:

- Up to 209 g/m² (56 lb)
- Up to 104.5g/m² (28 lb) when folded in half

Precautions

Take note of the following:

- Up to ten carrier sheets can be loaded at once.
- Do not write on, color, stain, or cut the end with a black and white pattern because the carrier sheet will not be recognized properly.
- Do not place the carrier sheet upside down. Otherwise, a paper jam may occur and damage the carrier sheet and the document inside.
- Do not leave your document inside the carrier sheet for a long time. Otherwise, the ink on the document may be transferred onto the carrier sheet.
- To avoid deformation, do not use or leave the carrier sheet in high temperature places such as under direct sunlight or near a heating apparatus for a long time.
- Do not fold or pull the carrier sheet by force.
- Do not use a damaged carrier sheet because it may damage or cause the scanner to malfunction.
- To avoid deformation, keep the carrier sheet on a flat surface without any weight on it.
- Be careful not to cut your finger on the edge of the carrier sheet.
- If paper jams occur frequently, feed about 50 sheets of PPC paper (recycled paper) before scanning with the carrier sheet.
The PPC paper (recycled paper) can either be blank or printed.
- Paper jams may occur when multiple small size documents, such as photographs and postcards, are placed inside the carrier sheet to be scanned at once. It is recommended that you scan such documents one at a time.

Appendix B

Management Settings and Limits

This appendix describes e-mail address setting values and the limits for the setting items.

B.1 e-Mail Address Setting Values	409
B.2 Limits for Setting Items.....	410

B.1 e-Mail Address Setting Values

e-Mail addresses may be up to 256 characters long.

One of the following e-mail address formats must be used:

- *XXXXXXXX@IP_address*
- *XXXXXXXX@Host_name*
- *XXXXXXXX@Domain_name*

<i>XXXXXXXX</i>	<p>Comprised of alphanumeric and the following symbols: ! # \$ % & ' * + - / = ? ^ _ ` { } ~ .</p> <p>However, periods (.) cannot be used in the following cases:</p> <ul style="list-style-type: none"> ● Using periods (.) as an initial character ● Using periods (.) as a last element ● Using periods (.) consecutively
<i>IP_address</i>	<p>Comprised of numbers separated by periods (.).</p> <p>IP addresses within the following ranges may be used: 1.0.0.1 to 126.255.255.254 128.0.0.1 to 191.255.255.254 192.0.0.1 to 223.255.255.254</p> <p>Note that an IPv6 address cannot be specified.</p>
<i>Host_name</i>	<p>Comprised of alphanumeric and hyphens (-) only. The initial character may not be a hyphen.</p>
<i>Domain_name</i>	<p>Comprised of alphanumeric and hyphens (-) only, and separated by periods (.).</p> <p>Each name element may be up to 63 characters long, and only alphabetic characters may be used for the last element.</p>

B.2 Limits for Setting Items

Item		Limit
e-Mail	Destination e-mail addresses	30 (For each: To, Cc, Bcc)
	Segment size	64 to 10,240 KB (Up to the size of one split e-mail)
	Maximum attachment size	1 to 20 MB
	Address warning limit	2 to 1,000
	e-Mail addresses registered to an e-mail address book	<ul style="list-style-type: none"> ● e-Mail addresses only 10,000 ● e-Mail addresses, groups and distribution lists Total of 5,000
	e-Mail addresses registered to a distribution List	100
Fax	Fax numbers registered to a fax number list	1,000
	Fax destinations	One per transmission
Save	Registered folders	100 (Total of network folders and FTP folders)
	Viewable folders and tree items	10,000 (Total of domains, computers and network folders)
Print	Registered printers	100
	Viewable printers and tree items	10,000 (Total of domains, computers and network printers)
Scan to SharePoint	Registered SharePoint folders	100

	Item	Limit
Job Management	Registered jobs	1,000 (Up to 10 actions can be registered per job)
	Registered job menus	100
	Registered job groups	100
	Registered job group members	1,000 (Total of users and LDAP groups)
	LDAP group availability range	Users within the 5th level
User Management	Registered user profiles	1,000
	Local users	100
Central Management	Managed scanners	1,000
Log Management	User logs	1,000
	System logs	1,000
Device Maintenance	Error Notification destination e-mail addresses	5
	Registered Add-ins	6 (Total of six items, including Add-ins and other function items, can be displayed on the [Main Menu] window)
	Imported licenses	100
	Destination of trap notifications for SNMP settings	Maximum 5

Appendix C

Compatibility and Connectivity

This appendix describes the compatibility and connectivity of the resources/programs for the scanner.

C.1 Compatibility	413
C.2 Connectivity	417

C.1 Compatibility

C.1.1 Add-in Performance

Add-in performance compatibility is as follows.

In the chart below, ".NET Framework" is described as ".NET".

For details about each Add-in, refer to the SDK reference guide.

Add-in Performance Compatibility		Location for Installing		
		N7100 7.0.0 or later .NET 4.5	N1800 SDK 6.0.0 to 6.1.0 .NET 3.5	fi-6010N SDK 4.0.0 to 6.1.0 .NET 2.x
N7100 SDK 7.0.0 or later	SDK Add-in (WPF)	Yes	—	—
	Web-SDK Add-in	Yes	Yes	—
	SDK Add-in (Windows Form)	Yes	Yes	Yes
N1800 SDK 6.0.0 to 6.1.0	SDK Add-in (WPF)	—	—	—
	Web-SDK Add-in	Yes	Yes	—
	SDK Add-in (Windows Form)	Yes	Yes	Yes
fi-6010N SDK 4.0.0 to 6.1.0	SDK Add-in (WPF)	—	—	—
	Web-SDK Add-in	—	—	—
	SDK Add-in (Windows Form)	Yes	Yes	Yes

Yes: Compatible —: Incompatible

C.1.2 Using System Settings in Other Scanners

The following table shows whether the backed-up system settings can be restored to other scanners or not.

Backing Up & Restoring the Data (Model, System Version)			Restore to			
			N7100	N1800		fi-6010N
			First version or later	01.02.01 or later	First version or any other version earlier than 01.02.01	First version or later
Back up from	N7100	First version or later	Yes	—	—	—
	N1800	01.02.01 or later	Yes (*)	Yes	—	—
		First version or any other version earlier than 01.02.01	Yes (*)	Yes	Yes	—
	fi-6010N	First version or later	Yes (*)	Yes	Yes	Yes

Yes: Restorable —: Not Restorable

(*): The default values are used for [Scan Settings] in the job menu settings.

C.1.3 Using User Data in Other Scanners

The following table shows whether backed-up user data can be restored to other scanners or not.

Backing Up & Restoring the Data (Model)		Restore to		
		N7100	N1800	fi-6010N
Back up from	N7100	Yes	—	—
	N1800	Yes	Yes	—
	fi-6010N	Yes	Yes	Yes

Yes: Restorable —: Not Restorable

C.1.4 Sharing User Data

The following table shows whether user data is sharable or not when sharing user data is enabled on the Central Admin Server.

Sharing (Model)		Share with		
		N7100	N1800	fi-6010N
Sources	N7100	Yes	—	—
	N1800	Yes (*)	Yes	—
	fi-6010N	Yes (*)	Yes	Yes

Yes: Sharable —: Not Sharable

(*): The default values for each scanner are used in [Scan Settings]. Information other than [Scan Settings] can be shared.

C.1.5 Sharing Job Settings

The following table shows whether the job menu settings are sharable or not when sharing job settings are enabled on the Central Admin Server.

Sharing (Model)		Share with		
		N7100	N1800	fi-6010N
Sources	N7100	Yes	—	—
	N1800	Yes (*)	Yes	—
	fi-6010N	Yes (*)	Yes	Yes

Yes: Sharable —: Not Sharable

(*): The default values for each scanner are used in [Scan Settings]. Information other than [Scan Settings] can be shared.

C.1.6 Distribution from the Central Admin Console Server

The following table shows whether the items below can be distributed from the Central Admin Console Server.

Distribution from the Central Admin Console Server			Connect to		
			N7100	N1800	fi-6010N
Sources	4.6 or later (*)	System Update	Yes	Yes	Yes
		Add-in	Yes	Yes	Yes
		System Settings	Yes	Yes	Yes
		Job Settings	Yes	Yes	Yes
	3.0 to 4.5 (*)	System Update	—	Yes	Yes
		Add-in	—	Yes	Yes
		System Settings	—	Yes	Yes
		Job Settings	—	Yes	Yes
	2.0 to 2.6 (*)	System Update	—	—	Yes
		Add-in	—	—	Yes
		System Settings	—	—	Yes
		Job Settings	—	—	Yes

Yes: Can be distributed —: Cannot be distributed

(*): Version of the Central Admin Server

C.2 Connectivity

C.2.1 Connectivity with the Admin Tool

Connectivity with the Admin Tool is as follows.

Connectivity (Model, Version)			Connect to		
			N7100	N1800	fi-6010N
Sources	N7100	03.01	Yes	Yes	Yes
	N1800	02.02 to 02.04	—	Yes	Yes
	fi-6010N	02.01 to 02.02	—	—	Yes

Yes: Connectable —: Not Connectable

C.2.2 Connectivity with the User Editor (AddressBookEditor)

Connectivity with the User Editor (AddressBookEditor) is as follows.

Connectivity (Model, Version)			Connect to		
			N7100	N1800	fi-6010N
Sources	N7100	03.01	Yes	Yes	Yes
	N1800	01.01 to 02.01	—	Yes	Yes
	fi-6010N (*)	01.01 to 02.02	—	—	Yes

Yes: Connectable —: Not Connectable

(*): AddressBookEditor

C.2.3 Connectivity with the Central Admin Server

Connectivity with the Central Admin Server is as follows.

Connectivity with the Central Admin Server		Connect to		
		N7100	N1800	fi-6010N
Sources	4.6 or later (*)	Yes	Yes	Yes
	3.0 to 4.5 (*)	—	Yes	Yes
	2.0 to 2.6 (*)	—	—	Yes

Yes: Connectable —: Not Connectable

(*): Version of the Central Admin Server

C.2.4 Root Certification Authority List

SSL (Secure Socket Layer) encrypted communication may be used by the scanner for user authentication and save operations to the FTP server or a SharePoint folder. With SSL, trust certificates are exchanged to authenticate the communication opponents. The following root certificate authorities are pre-registered in the scanner. Also, root certificates may be imported. For details about importing certificates, refer to ["4.4.6 Managing Certificates" \(page 86\)](#).

Issuer	Valid until... (YYYY/MM/DD)
Baltimore CyberTrust Root	2025/05/12
Class 3 Public Primary Certification Authority	2028/08/01
Equifax Secure Certificate Authority	2018/08/22
Microsoft Root Authority	2020/12/31
GeoTrust Global CA	2022/05/22
Microsoft Root Certificate Authority	2021/05/09
Microsoft Root Certificate Authority 2010	2035/06/23
Microsoft Root Certificate Authority 2011	2036/03/22
Thawte Timestamping CA	2020/12/31
VeriSign Class 3 Public Primary Certification Authority - G5	2036/07/16

ATTENTION

If the root certificate authority validation period expires, SSL connection is not possible.

C.2.5 SMTP Server Settings for Using Webmail

When using Webmail to send e-mail, specify the SMTP settings according to the Webmail as follows.

Webmail	Server Address(*)	Port Number	SSL	SMTP Authentication	Authentication Mode
Gmail	smtp.gmail.com	587	STARTTLS on	Select	AUTH LOGIN, AUTH PLAIN
Yahoo! Mail	smtp.mail.yahoo.com	465	SSL on	Auto	AUTH LOGIN, AUTH PLAIN
AOL Mail	smtp.aol.com	587	STARTTLS on	Auto	AUTH LOGIN, AUTH PLAIN
Windows Live Hotmail	smtp.live.com	587	STARTTLS on	Select	AUTH LOGIN, AUTH PLAIN

(*): Change ".com" according to your country's domain.

For details about how to specify SMTP server settings, refer to ["4.11.1 Setting the SMTP Server" \(page 126\)](#).

Appendix D

Scanner Specifications

Admin

User

This appendix gives specifications for the scanner.

D.1 Installation Specifications	421
D.2 Basic Scanner Specifications	422
D.3 Software Function List.....	423
D.4 Changing the Functions on the On-Screen Keyboard.....	425
D.5 Barcode Types and Detection Conditions	427

D.1 Installation Specifications

Item		Specification
Dimensions (W × D × H)		300 × 232 × 172 mm (11.81 × 9.14 × 6.77 in.) (This does not include the ADF paper chute or other parts that stick out)
Weight		6.0 kg
LCD		8.4-in. XGA TFT LCD monitor
Touch panel		Analog resistive touch panel
Keyboard		On-screen keyboard
Interface	Network	LAN (1000BASE-T/100BASE-TX/10BASE-T) ×1
	USB	USB 2.0 ×2 (For keyboard and mouse)
Input power	Voltage	100 to 240 V ±10%
	Frequency	50/60 Hz
Power consumption (AC)	Operating	38 W or less
	Energy-saving mode	Power consumption value is different depending on the "PART NO." that is printed on the label (*). PA03706-Bxx1/Bxx3: 2.0 W or less PA03706-Bxx5: 8.8 W or less
	Power off	0.5 W or less
Operating environment	Temperature	Operating: 5 to 35 °C, Non-operating: -20 to 60 °C
	Humidity	Operating: 20 to 80%, Non-operating: 8 to 95%
Heating value	Operating	33 Kcal/Hr or less
	Energy-saving mode	Heating value is different depending on the "PART NO." that is printed on the label (*). PA03706-Bxx1/Bxx3: 1.72 Kcal/Hr or less PA03706-Bxx5: 7.57 Kcal/Hr or less
	Power off	0.43 Kcal/Hr or less

(*): For details about the labels, refer to ["7.5 Checking the Scanner Labels"](#) (page 398).

HINT

The scanner is equipped with a LAN card that supports Wake On LAN. The power is not turned on automatically by the Wake On LAN function after the power goes off abnormally, such as in the event of a blackout.

D.2 Basic Scanner Specifications

Item		Specification	Remarks
Scanner type		ADF (Automatic Document Feeder)	
Image sensor		Color CIS × 2	One for the front side, and the other for the back side
Light source		RGB 3-color LED	
Scannable document size	Minimum	50.8 × 50.8 mm (2 × 2 in.)	(*1)
	Maximum	216 × 355.6 mm (8.5 × 14 in.)	
Paper weight		0.049 to 0.257 mm (40 to 209 g/m ² , 11 to 56 lb, 34.4 to 180 kg/ream) For A8 size, 0.157 to 0.257 mm (127 to 209 g/m ² , 34 to 56 lb, 110 to 180 kg/ream)	For plastic cards (long edge feed only), 0.76 mm (0.029 in.) or less (including embossed cards)
Scan speed (A4/Letter, Portrait) (*2)	Black & white	Simplex: 25 sheets/min., Duplex: 50 pages/min.	200/300 dpi
	Grayscale		
	Color		
ADF paper chute capacity		50 sheets (Letter/A4, 80 g/m ² (20 lb))	Total document thickness of 5 mm or less
Optical resolution		600 dpi	
Output resolution		150 dpi, 200 dpi, 300 dpi, 600 dpi	
Image processing	Automatic function	Paper size auto detection (crop), deskew (edge/contents), blank page skip, black & white/grayscale/color auto detection, dropout color, control image tone, cleanup, text emphasis, de-screen, background pattern removal, background leveling, crop with tab, multi image, auto binarization, image direction correction, OCR, marker OCR	

(*1): a page length of up to 3,175 mm (125 in.) is allowed for document scanning. When you scan a document longer than 863mm (34 in.), set the resolution to 200 dpi or less.

(*2): The maximum hardware limitation. Actual scanning time includes software processing time such as data transfer time.

D.3 Software Function List

Item			Specification
System	Authentication	User type	Available
		Server	Active Directory, OpenLDAP
		Serverless	Available
		Authentication mode	LAN Manager, Kerberos (Local account is also available)
Network	Protocol		IPv4, TCP, UDP, ICMP, DNS, DHCP, WINS, NTP, SNMP
			IPv6, ICMPv6, DNSv6, DHCPv6, WSD, LLMNR, Neighbor Discovery, Router Discovery/Advertisement
			LDAP, HTTP, SMTP, FTP, NetBIOS
			SSL (LDAPS, HTTPS, FTPS)
Office function	e-Mail	e-Mail server	Windows IIS, Exchange server
		File splitting	Available
		Split file designation	Available
		e-Mail broadcasting	Available
		Delivery confirmation	Available
		Address book	For each user
	Save	Saved to	Shared folder, FTP server folder, SharePoint folder
		Shared folder	CIFS
		FTP server folder	FTP, FTPS
		SharePoint folder	HTTP, HTTPS
	Fax	Fax server	RightFax, StoneFax, Internet FAX
Print	Print server	Available	
Operational function	Job (simplified customization)		Available
	SDK Add-in (WPF)		Available
	WEB-SDK Add-in		Available
	SDK Add-in (Windows Form)		Available
Operability	Preview ([Scan Viewer] window)		Thumbnail/page view switching
	Finger operations (only for the scan viewer details window)		Tap, zoom-in, zoom-out, rotation

Item		Specification
Operation management	Setting method	Touch panel, remote
	Remote management	Available (Central Admin Console)
	Integrated management	Available (Central Admin Console)

D.4 Changing the Functions on the On-Screen Keyboard

The scanner supports the on-screen keyboard that enables entering characters on the touch panel.

For details on how to show/hide the on-screen keyboard, refer to ["2.4 Using the On-Screen Keyboard" \(page 57\)](#).

D.4.1 Switching the Keyboard Layout

There are two types of keyboard layouts on the on-screen keyboard: alphabetic layout and numeric and symbols layout.

The keyboard layout can be switched in the following ways.

Keyboard Layout	Operation
Numeric and symbols layout	Press  . ⇒ Becomes  .
Alphabetic layout	Press  . ⇒ Becomes  .
Switching the upper/lower case	<ul style="list-style-type: none"> ● Switching upper/lower cases after entering a character Press . ⇒ Becomes . ● Entering characters continuously without switching upper/lower cases Press  twice (tap it twice). ⇒ Becomes  (with alphabetic layout).

Keyboard Layout	Operation
Switching the symbols that are displayed	<ul style="list-style-type: none">Each time you press  / , the symbols that are displayed are switched.

D.5 Barcode Types and Detection Conditions

This section describes the barcode types that can be used and the detection conditions. Barcodes that do not meet the detection conditions may not be recognized correctly.

■ One-dimensional Barcodes

Code	Character Set	Number of Digits
UPC	Numbers	12 (UPC-A only. Includes check digits)
EAN/JAN	Numbers	8 or 13 (Includes check digits)
CODE39 Full ASCII	Full ASCII	1 to 32 (Excludes start/stop codes)
CODE128/ EAN128	Full ASCII	1 to 32 (Excludes check characters)
Codabar (NW7)	4 types of start/stop characters, numbers, 6 types of symbols	1 to 32 (Excludes start/stop codes)
ITF	Numbers	2 to 32 (Always an even number)

■ Detection Conditions for One-dimensional Barcodes

Item	Conditions
Barcode height	10 to 30 mm/0.39 to 1.18 in.
Barcode width (length)	300 mm/11.18 in. or less
Barcode margin	5 mm/0.20 in. or more of the barcode margin (The ITF left and right edges should be 5 mm/0.20 in. or more, or at least 6 times of the narrow element width, whichever wider.)
Barcode color	Black
Barcode background color	White
Resolution	200 to 600 dpi
Barcode angle	Horizontal, vertical

Item	Conditions
Narrow element width/module width	<ul style="list-style-type: none"> ● UPC-A/EAN/JAN 300 dpi or more: 0.264 mm/0.010 in. or wider Less than 300 dpi: 0.30 mm/0.012 in. or wider ● CODE39/CODE128/EAN128/Codabar (NW7) 300 dpi or more: 0.20 mm/0.008 in. or wider Less than 300 dpi: 0.30 mm/0.012 in. or wider ● ITF 300 dpi or more: 0.254 mm/0.010 in. or wider Less than 300 dpi: 0.30 mm/0.012 in. or wider
Wide element width	<p>14 mm/0.55 in. or less (For UPC-A/EAN/JAN/CODE128/EAN128, this is the widest element width (corresponds to 4 modules).)</p>
Inter-character gap	<ul style="list-style-type: none"> ● UPC-A/EAN/JAN/CODE128/EAN128/ITF No inter-character gap exists. ● CODE39/Codabar (NW7) (Equal to or wider than the narrow element width, and equal to or less than 1.52 mm/0.06 in. or 3 times of the narrow element width, whichever wider)

ATTENTION

- Skewed barcodes may not be recognized correctly.
- Using the same sheet repeatedly may decrease the recognition accuracy due to accumulated dirt on the sheets. If the sheet is not recognized correctly or gets smudged, replace it with a new sheet.
- If recognition of control codes fails, it may cause the following results:
 - Control codes are recognized as numerical characters.
 - Not only the control codes but part of other characters are not recognized and ignored.
- When control code [NUL] is included in a barcode, it is replaced with " " (space).
- When documents to be scanned are skewed or printed barcodes are not in a good condition, barcodes on the document may not be recognized correctly.
- If more than one barcode exists in the recognition area, it becomes unknown which one will be effective.
- If more than one barcode exists in the recognition area, it becomes unknown that which one will be recognized first.
- Barcodes may be recognized even when the barcode is not black or its background color is not white. To make color barcodes recognizable, you first need to configure the settings for scanning colored documents and check that recognition works properly.

HINT

- The recommended image resolution is 200 to 600 dpi.
- When barcodes are used and the scan speed slows down, reducing the number of barcode types to be selected may improve the scan speed.

Appendix E

SNMP Settings

Admin

User

This appendix describes the SNMP settings.

The SNMP settings are used to acquire SNMP information from the SNMP manager and to send SNMP trap notification to the SNMP manager.

E.1 Corresponding MIB	430
E.2 MIB Information	431
E.3 SNMP Trap Notification.....	433

E.1 Corresponding MIB

The corresponding MIB is as follows:

- PC MIB
 - .iso.org.internet.mgmt.mib-2
 - system(1)
 - interfaces(2)
 - ip(4)
 - icmp(5)
 - tcp(6)
 - udp(7)
- PFU net scanner MIB
 - PFU-unique

E.2 MIB Information

This section describes MIB information obtained from the MIB notification.

■ ScannerInfo

Key Name	Key Value Description	Corresponding MIB/OID
ModelName	Scanner model N7100 (fixed)	modelName 1.3.6.1.4.1.18886.1.2.2.1
SerialNo	Scanner serial No. Example: A6RCA12345	serialNo 1.3.6.1.4.1.18886.1.2.2.2
OperatingStatus	Scanner power status 1: Power Off 2: Power On	operatingStatus 1.3.6.1.4.1.18886.1.2.2.4
AdfTotalThroughput	ADF total throughput	adfTotalThroughput 1.3.6.1.4.1.18886.1.2.2.6
FirmwareVersion	Scanner firmware version Example: 0B08	firmwareVersion 1.3.6.1.4.1.18886.1.2.2.8
ErrorStatus	Scanner error status 0: No error has occurred 1: An error has occurred	errorStatus 1.3.6.1.4.1.18886.1.2.2.5
Vendor	Vendor name fujitsu (fixed)	Vendor 1.3.6.1.4.1.18886.1.2.2.9

■ BrakeRoller

Key Name	Key Value Description	Corresponding MIB/OID
Status	Brake roller status 1: No replacement required 2: To be replaced soon 3: Replacement time has passed	componentInfoStatus 1.3.6.1.4.1.18886.1.2.2.3.1.1.4.1
Descr	Status description 1: BRAKE ROLLER Normal 2: BRAKE ROLLER Replace soon 3: BRAKE ROLLER Replace now	componentInfoDescr 1.3.6.1.4.1.18886.1.2.2.3.1.1.7.1

■ PickRoller

Key Name	Key Value Description	Corresponding MIB/OID
Status	Pick roller status 1: No replacement required 2: To be replaced soon 3: Replacement time has passed	componentInfoStatus 1.3.6.1.4.1.18886.1.2.2.3.1.1.4.2
Descr	Status description 1: PICK ROLLER Normal 2: PICK ROLLER Replace soon 3: PICK ROLLER Replace now	componentInfoDescr 1.3.6.1.4.1.18886.1.2.2.3.1.1.7.2

■ TrapEvent

When no error has occurred, the TrapEvent section does not exist.

Key Name	Key Value Description	Corresponding MIB/OID
Status	Hardware error status 3: Error	componentInfoStatus 1.3.6.1.4.1.18886.1.2.2.3.1.1.4.3
Datetime	Date/time of occurrence of a hardware error Example: 2015/04/10 12:45:29	componentInfoDatetime 1.3.6.1.4.1.18886.1.2.2.3.1.1.5.3
DetailCode	Hardware error detail code Example: 8F060001	componentInfoDetailCode 1.3.6.1.4.1.18886.1.2.2.3.1.1.6.3
Descr	A character string indicating hardware error information (containing up to 91 characters) Example: Scanner parts replacement notification was detected. [044400, 00:EEPROM error]	componentInfoDetailDescr 1.3.6.1.4.1.18886.1.2.2.3.1.1.7.3

E.3 SNMP Trap Notification

The SNMP trap OID is as follows:

1.3.6.1.4.1.18886.1.2.1

The SNMP trap format is as follows:

Occurrence_date/ time,Source,IP_address,Model,Serial_No.,Event_type,Message_code,Message

Occurrence_date/time:	Date/time of message notification (Format: MM.DD.YYYY hh:mm:ss AM or PM)
Source:	Name of the computer that sent the message
IP_address:	IP address of the computer that sent the message
Model:	Model name of the scanner where message notification occurred
Serial_No.:	Serial No. of the scanner where message notification occurred (10 digits)
Event_type:	Message type(*1)
Message_code:	Message code(*2)(*3)
Message:	Message description(*2)(*4)

(*1): The event types are as follows:

Information: For information

Error: For error

Warning: For warning

Test: For test

(*2): For details about the message code and messages, refer to the Scanner Central Admin User's Guide.

(*3): For test send, "0F090000" is shown.

(*4): For test send, "This is a test message from Network Scanner" is shown.

Appendix F

Editing Using User Editor

Admin

User

This appendix describes how to edit e-mail address books and local accounts using User Editor.

A regular user can contact the administrator for details about the settings of User Editor.

F.1 What is User Editor?.....	435
F.2 Pre-settings	436
F.3 Windows of User Editor	438
F.4 Starting/Exiting User Editor.....	440
F.5 Viewing the e-Mail Address Book/Local Accounts.....	441
F.6 Editing an e-Mail Target in the e-Mail Address Book	444
F.7 Editing Local Accounts	450
F.8 Discarding the Edited e-Mail Address Book or Local Accounts	452
F.9 Saving the e-Mail Address Book/Local Account	453
F.10 User Editor Information Shown in User Log	455
F.11 User Editor Information Shown in System Log	456

F.1 What is User Editor?

User Editor is an application that is used for editing a scanner e-mail address book (My List) or local accounts.

A scanner e-mail address book or local accounts can be edited from a computer by connecting the computer with User Editor installed to a scanner via the network interface. User Editor facilitates operations such as outputting an e-mail address book or local accounts in a file (CSV format), and importing and saving a number of e-mail addresses in a file to a scanner.

- **Editing an e-mail address book**
A regular user can edit an e-mail address book (My List) and create a group in the e-mail address book by using User Editor, so that the e-mail addresses can be grouped by purpose and managed in a group.
- **Editing local accounts**
An administrator can create local accounts and save them in the scanner by using User Editor. Local accounts can be used for authenticating to the scanner.

F.2 Pre-settings

For the system requirements for using User Editor, refer to "[1.5.1 Requirements for Admin Tool and User Editor](#)" (page 41).

For the port numbers, refer to "[1.5.3 Port Number List](#)" (page 48).

F.2.1 Installing User Editor

To edit an e-mail address book or a local account of a scanner via the network interface, install User Editor in a computer.

1. Display the download window according to "[3.2 Showing the Software Download Window](#)" (page 62).

⇒ The download window appears.

2. Press the [Next] button for the [Network Scanner User Editor].

⇒ The [Download Network Scanner User Editor.] window appears.

3. Press the [Download] button.

ATTENTION

- Downloading is not possible while a scanner operation is in process.
- Installation fails if the length of any installation path (folder path plus installation file name) exceeds 258 characters. Select an installation folder that respects this limit.

HINT

If .NET Framework is not installed, a confirmation window for .NET Framework installation appears.

Press the [Yes] button to install .NET Framework, and then try again from [Step 1](#).

⇒ From here on after, follow the instructions on the window to proceed the operation.

When "Installation complete" is displayed, the installation is complete. Press the [Close] button.

⇒ After installation, User Editor can be started.

For details about how to start User Editor, refer to "[F.4 Starting/Exiting User Editor](#)" (page 440).

F.2.2 Uninstalling User Editor

This section uses Windows 7 as an example.

Uninstall User Editor from [Control Panel] → [Programs] → [Programs and Features] in the computer in which it is installed.

ATTENTION

Close the User Editor before uninstalling.

If User Editor is uninstalled while still open, normal operation of the open User Editor is not guaranteed.

F.3 Windows of User Editor

The User Editor window contains the [Address Book] tab and [Local Account] tab. The following shows the details of each tab.

- [Address Book] tab
This tab page is used for editing the e-mail targets in the e-mail address book.

- [Local Account] tab
This tab page is used for editing the local accounts saved in the scanner.

F.4 Starting/Exiting User Editor

■ Starting User Editor

1. Start User Editor.

- Windows Vista/Windows 7/Windows Server 2003/Windows Server 2008/Windows Server 2008 R2
Select the [Start] menu → [All Programs] → [Network Scanner] → [Network Scanner User Editor].
 - Windows 8/Windows Server 2012
Right-click on the Start screen, and select [All apps] → [Network Scanner] → [Network Scanner User Editor].
 - Windows 8.1/Windows Server 2012 R2
Select [↓] at the lower left of the Start screen → [Network Scanner] → [Network Scanner User Editor].
To display [↓], move the mouse cursor.
 - Windows 10/Windows Server 2016
Select [Start] menu → [All apps] → [Network Scanner] → [Network Scanner User Editor].
- ⇒ The [Network Scanner User Editor] window appears.

■ Exiting User Editor

1. Select the [File] menu → [Exit].

⇒ The exit confirmation window appears.

2. Press the [OK] button.

⇒ User Editor closes.

F.5 Viewing the e-Mail Address Book/Local Accounts

Load and view e-mail address books or local accounts.

■ Loading from a Scanner

Load e-mail address books or local accounts from a scanner in the following ways.

1. **Select the [Address Book] tab to load e-mail address books.
Select the [Local Account] tab to load local accounts.**

2. **Perform either of following operations:**

- Select the [File] menu → [Load from Scanner].
 - Press the [Load from Scanner] button on the toolbar.
- ⇒ The [Load from Scanner] dialog box appears.

3. **Enter the information to connect to the scanner.**

- Enter the scanner IP address, host name, or FQDN for [Connect to].
 - To enter an IP address, use the "xxx.xxx.xxx.xxx" format, where xxx is a value from 0 to 255.
 - For a host name or FQDN, up to 255 characters can be entered.
- For [Port Number], enter the number of the port to be used for communication with the scanner, within the range of 1 to 65535. The default value is "80".
Select the [Use HTTPS] check box to use HTTPS for communication from the scanner.
- For [User Name], enter the name of the user to login to the scanner.
- For [Password], enter the password for the user to login to the scanner.

HINT

Connect to the scanner as a user who can log in to it.

- To edit an e-mail address book, login as a regular user.
- To edit local accounts, login as an administrator (admin) or an administrator of a local account created with User Editor. For a new local account, login as an administrator (admin).

4. **Select the [Open] button.**

⇒ e-Mail address books or local accounts appear.

■ Loading from a File

Load e-mail address books or local accounts from a file in the following ways.

1. **Select the [Address Book] tab to load e-mail address books.**
Select the [Local Account] tab to load local accounts.

2. **Perform either of following operations:**

- Select the [File] menu → [Load from File].
 - Press the [Load from File] button on the toolbar.
- ⇒ The dialog box for opening a file appears.

3. **Select the file and press the [Load] button.**

⇒ e-Mail address books or local accounts appear.

■ File Format of e-Mail Address Book Loaded from a File

This section describes the file format available for an e-mail address book that can be loaded from a file.

With User Editor, an e-mail address book in CSV format can be edited.

- UNICODE (UTF-8) is used for the file character set.
- Describe in CSV format as follows:
"User Name","Group Name","Distribution List Name","First Name","Last Name","E-mail Address"

The values for each item are as follows.

Item	Value and Format
User Name	Specify the name of the user.
Group Name	Specify the name of the group. (*) Prepend "\" at the beginning of the group name. (Example: \group01) To set the levels of the groups, delimit them with "\". (Example: \group01\group02) ";" and "@" are replaced with "_".
Distribution List Name	Specify the name of the distribution list. (*) Multiple e-mail addresses must be separated using semi-colons (;). ";" and "@" are replaced with "_".
First Name	Specify the first name. (*)
Last Name	Specify the last name. (*)
E-mail Address	For details about e-mail address settings values, refer to " B.1 e-Mail Address Setting Values " (page 409). A distribution list can contain up to 100 e-mail addresses.

- (*): Up to 64 characters can be specified.
Spaces at the start and end of a name are omitted if specified.

■ File Format of Local Accounts Loaded from a File

This section describes the file format available for local accounts that can be loaded from a file.

With User Editor, local accounts in CSV format can be edited.

- UNICODE (UTF-8) is used for the file character set.
- Describe in CSV format as follows:
"User Name","Password","E-mail Address","Comment","Enabled/
Disabled","Account Type"

The values for each item are as follows.

Item	Value and Format
User Name	Specify the name of the user.
Password	Specify the password.
Comment	Specify the comment on the account.
E-mail Address	For details about e-mail address settings values, refer to "B.1 e-Mail Address Setting Values" (page 409) .
Enabled/Disabled	Specify whether the local account is enabled or disabled. "0": Indicates that the local account is disabled. "1": Indicates that the local account is enabled.
Account Type	Specify whether or not the local account has administrator right. "0": Indicates a regular user who do not have administrator right. "1": Indicates a user who has administrator right.

F.6 Editing an e-Mail Target in the e-Mail Address Book

This section describes how to edit e-mail targets in the e-mail address book. An e-mail address book can contain up to 5,000 groups, distribution lists, and e-mail addresses.

F.6.1 Setting a Group

Set groups in the e-mail address book.

A group can contain multiple distribution lists and e-mail addresses, which allows e-mail destinations to be sorted according to the respective purposes. Sub-groups can be created under a group.

By specifying a group as an e-mail destination, an e-mail can be sent to all distribution lists and e-mail addresses registered in the group at the same time.

Up to five levels can be set for groups.

■ Adding a Group

1. Select the [Address Book] tab.
2. In the group list, select a group to which the new group is to be added.
3. Open the [Add Group] dialog box in either of the following ways.
 - Select the [Address Book] menu → [Add Group].
 - Press the [Add Group] button.

4. Enter a [Group Name].

This can be up to 64 characters long. The following symbols cannot be used:

\ ; @

5. Press the [OK] button.
 - ⇒ The new group is added.

■ Changing the Group Name

1. Select the [Address Book] tab.
2. In the group list, select the group name to be changed.
3. Open the [Edit Group] dialog box in either of the following ways.
 - Select the [Address Book] menu → [Properties].
 - Press the [Properties] button on the toolbar.
4. Enter a [Group Name].
5. Press the [OK] button.
 - ⇒ The group name is changed.

■ Deleting a Group

ATTENTION

Note that deleting a group also deletes the sub-groups and e-mail addresses belonging to the group.

1. Select the [Address Book] tab.
2. In the group list, select a group to be deleted.
3. Perform either of following operations:
 - Select the [Address Book] menu → [Delete].
 - Press the [Delete] button on the toolbar.
 - ⇒ The delete confirmation window appears.
4. Press the [OK] button.
 - ⇒ The group is deleted.

F.6.2 Setting a Distribution List

Set distribution lists in the e-mail address book.

Multiple e-mail addresses can be registered in a distribution list.

By specifying a distribution list as an e-mail destination, an e-mail can be sent to all the e-mail addresses registered in the list at the same time.

■ Adding a Distribution List

1. Select the [Address Book] tab.
2. Select a group to which the new distribution list is to be added.
3. Open the [Add Distribution List] dialog box in either of the following ways.
 - Select the [Address Book] menu → [Add Distribution List].
 - Press the [Add Distribution List] button on the toolbar.
4. Enter the information of the distribution list to be added.

Enter the [Distribution List Name] and [Mail Addresses] to be contained in the distribution list.

Up to 64 characters can be specified for [Distribution List Name]. The following symbols cannot be used:

; @

For details about e-mail address settings values, refer to "[B.1 e-Mail Address Setting Values](#)" (page 409).

A distribution list can contain up to 100 e-mail addresses. Multiple e-mail addresses must be separated using semi-colons (";").

5. Press the [OK] button.
 - ⇒ The distribution list is added.

■ Editing a Distribution List

1. Select the **[Address Book]** tab.
2. Select the distribution list to be edited.
3. Open the **[Edit Address]** dialog box in either of the following ways.
 - Select the **[Address Book]** menu → **[Properties]**.
 - Press the **[Properties]** button on the toolbar.
4. Edit the information.
5. Press the **[OK]** button.
 - ⇒ The details of the distribution list are changed.

■ Deleting a Distribution List

1. Select the **[Address Book]** tab.
2. Select the distribution list to be deleted.
3. Perform either of following operations:
 - Select the **[Address Book]** menu → **[Delete]**.
 - Press the **[Delete]** button on the toolbar.
 - ⇒ The delete confirmation window appears.
4. Press the **[OK]** button.
 - ⇒ The distribution list is deleted.

F.6.3 Setting an e-Mail Address

Set an e-mail address in the e-mail address book.

■ Adding an e-Mail Address

1. Select the [Address Book] tab.
2. Select a group to which the new address is to be added.
3. Open the [Add Address] dialog box in either of the following ways.
 - Select the [Address Book] menu → [Add Address].
 - Press the [Add Address] button on the toolbar.

4. Enter the information of the e-mail address to be added.

Up to 64 characters can be specified for [First Name] and [Last Name]. [First Name] and [Last Name] can be skipped.

For details about e-mail address settings values, refer to "[B.1 e-Mail Address Setting Values](#)" (page 409).

The image shows a screenshot of a dialog box titled "Add Address". The dialog box has a title bar with the text "Add Address" and a close button (X). Inside the dialog, there are four input fields: "Insertion Point" (containing a backslash character), "First Name", "Last Name", and "E-mail Address". At the bottom of the dialog, there are two buttons: "OK" and "Cancel".

5. Press the [OK] button.

⇒ The e-mail address is added.

■ Editing an e-Mail Address

1. Select the **[Address Book]** tab.
2. Select the e-mail address to be edited.
3. Open the **[Edit Address]** dialog box in either of the following ways.
 - Select the **[Address Book]** menu → **[Properties]**.
 - Press the **[Properties]** button on the toolbar.
4. Edit the information.
5. Press the **[OK]** button.
 - ⇒ The information of the e-mail address is changed.

■ Deleting an e-Mail Address

1. Select the **[Address Book]** tab.
2. Select the e-mail address to be deleted.
3. Perform either of following operations:
 - Select the **[Address Book]** menu → **[Delete]**.
 - Press the **[Delete]** button on the toolbar.
 - ⇒ The delete confirmation window appears.
4. Press the **[OK]** button.
 - ⇒ The e-mail target is deleted from the e-mail address book.

F.7 Editing Local Accounts

This section describes how to edit the local accounts saved in the scanner. Up to 100 local accounts can be added.

F.7.1 Adding a Local Account

1. Select the [Local Account] tab.
2. Open the [Add Account] dialog box in either of the following ways.
 - Select the [Local Account] menu → [Add Account].
 - Press the [Add Account] button on the toolbar.
3. Enter the information of the local account to be added.

- Up to 64 characters can be specified for [User Name], [Password], and [Confirm Password]. Passwords are case sensitive.
- For details about e-mail address settings values, refer to ["B.1 e-Mail Address Setting Values"](#) (page 409).
- For [Comment], enter a comment on the account. Up to 256 characters can be entered. [Comment] is case sensitive.
- For [Enabled/Disabled], select whether or not to enable the account. When [Disabled] is selected, the user cannot login.
- For [Account Type], select [Regular User] for a regular user or select [Administrator] for the administrator.

ATTENTION

- The following user names cannot be used:
guest, admin, fi-maintenance, fi-maintenance-ad
- Spaces at the start and end of a user name are omitted if specified.
- White space characters can be used in a password and comment.

4. Press the [OK] button.
 - ⇒ The local account is added.

F.7.2 Editing a Local Account

1. **Select the [Local Account] tab.**
2. **Select a local account to be edited.**
3. **Open the [Edit Account] dialog box in either of the following ways.**
 - Select the [Local Account] menu → [Properties].
 - Press the [Properties] button on the toolbar.
4. **Edit the information.**
5. **Press the [OK] button.**
 - ⇒ The information of the local account is changed.

F.7.3 Deleting a Local Account

1. **Select the [Local Account] tab.**
2. **Select a local account to be deleted.**
3. **Perform either of following operations:**
 - Select the [Local Account] menu → [Delete].
 - Press the [Delete] button on the toolbar.
 - ⇒ The delete confirmation window appears.
4. **Press the [OK] button.**
 - ⇒ The local account is deleted.

F.8 Discarding the Edited e-Mail Address Book or Local Accounts

Discard the edited information of the e-mail address book or local accounts and restore it to its original state.

- 1. Select the [Address Book] tab to discard the edited information of the e-mail address book.
Select the [Local Account] tab to discard the edited information of the local account.**
- 2. Select the [File] menu → [Discard].**
⇒ A discard confirmation dialog box appears.
- 3. Press the [OK] button.**
⇒ The edited information is discarded and the e-mail address book or local account is restored to its original state.

F.9 Saving the e-Mail Address Book/Local Account

Save the edited e-mail address book or local account to the scanner.

■ Saving the Edited Information to the Scanner

Save the edited e-mail address book or local account to the scanner.

By saving the e-mail address book to the scanner, My List is updated with the changes.

1. **Select the [Address Book] tab to save e-mail address books.
Select the [Local Account] tab to save local accounts.**
2. **Perform either of following operations:**
 - Select the [File] menu → [Save to Scanner].
 - Press the [Save to Scanner] button on the toolbar.

⇒ The [Save to Scanner] dialog box appears.
3. **Enter the information to connect to the scanner.**

- Enter the scanner IP address, host name, or FQDN for [Connect to].
 - To enter an IP address, use the "xxx.xxx.xxx.xxx" format, where xxx is a value from 0 to 255.
 - For a host name or FQDN, up to 255 characters can be entered.
- For [Port Number], enter the number of the port to be used for communication with the scanner, within the range of 1 to 65535. The default value is "80".
Select the [Use HTTPS] check box to use HTTPS for communication from the scanner.
- For [User Name], enter the name of the user to login to the scanner.
- For [Password], enter the password for the user to login to the scanner.

HINT

Connect to the scanner as a user who can log in to it.

- To edit an e-mail address book, login as a regular user.
- To edit local accounts, login as an administrator.

4. **Press the [Save] button.**

⇒ e-Mail address books or local accounts are saved in the scanner.

■ Saving the Edited Information to a File

Save the edited e-mail address book or local accounts to a file in CSV format.

- 1. Select the [Address Book] tab to save e-mail address books.
Select the [Local Account] tab to save local accounts.**
- 2. Perform either of following operations:**
 - Select the [File] menu → [Save to File].
 - Press the [Save to File] button on the toolbar.⇒ The dialog box for saving a file appears.
- 3. Specify the directory and name of the file, and press the [Save] button.**
⇒ e-Mail address books or local accounts are saved in CSV format.

F.10 User Editor Information Shown in User Log

In the administrator or regular user [User Log] window, user logs of User Editor can be viewed.

The user log items for User Editor are shown as follows:

Log Item	Info Options	Description
Operation	Remote	The User Editor loaded an e-mail address book. Or, the User Editor updated an e-mail address book.
Pages	0	This item is always shown as 0.

For checking other items and detailed information on user logs, refer to the following:

- When the administrator checks the information on the [User Log] window
["Viewing the User Log Details" \(page 163\)](#)
- When a regular user checks the information on the [User Log] window
["5.12.1 Viewing Details on Send Operations That Were Completed \(User Log\)" \(page 326\)](#)

F.11 User Editor Information Shown in System Log

In the administrator [System Log] window, system logs of User Editor can be viewed. The system log items for User Editor are shown as follows:

Log Item	Info Options	Description
Type	Information	The User Editor loaded local account information. Or, the User Editor updated local account information.

For checking other items and detailed information on system logs, refer to ["Viewing the System Log Details"](#) (page 165).

Appendix G

IPv6 Settings

Admin **User**

This appendix refers to the specifications for the IPv6 settings.

- G.1 Overview of IPv6 Support for the Scanner 458**
- G.2 Configuring IPv6 Settings for the Scanner 459**
- G.3 Configuring IPv6 Communication Environment 463**
- G.4 Using the Settings of the IPv6 Function for the Scanner in Other Scanners 469**

G.1 Overview of IPv6 Support for the Scanner

This section describes the way the scanner supports IPv6 when the system update (ns001 01.07.01.xxxx or later) is applied to the scanner.

For details about the IPv6 support for setting items, refer to ["G.2.2 Linked Server" \(page 460\)](#).

■ Software that is Updated to Support IPv6

- System Software

An IPv6 function is added to the scanner (the function is disabled by default).

By enabling the IPv6 function, menu items for configuring the IPv6 function are displayed on the administrator window. In addition, server connection via IPv6 becomes possible in regular user mode.

If the IPv6 function is disabled, the window remains the same as it usually does.

- Admin Tool

Admin Tool is updated to support IPv6 and is able to connect the computer to N7100 with an IPv6 address. Connection with an IPv4 address is still possible as always.

■ Software that is not Updated to Support IPv6

- User Editor

An IPv6 address is not supported.

Connect the computer to the scanner with an IPv4 address on the IPv4 network environment or IPv4/IPv6 dual-stack network environment.

- Central Admin Server/Central Admin Console

An IPv6 address is not supported.

Connect the computer to the scanner with an IPv4 address on an IPv4 network environment or an IPv4/IPv6 dual-stack network environment.

G.2 Configuring IPv6 Settings for the Scanner

G.2.1 Installing the IPv6 Function

Install the IPv6 function in the following procedure:

■ Checking the System Version

1. **An administrator checks that the system version of the scanner is "ns001 01.07.01.xxxx" or later via the Admin Tool or the touch panel.**

If the system version is old (lower than "ns001 01.07.01.xxxx"), update the system via the Admin Tool.

For details about how to check the system version, refer to ["4.15.1 Viewing the System Status" \(page 160\)](#).

For details about how to update the scanner, refer to ["4.17.1 Updating the Scanner's System Software" \(page 175\)](#).

■ Enabling the IPv6 Function

1. **An administrator logs in to the scanner via the Admin Tool or the touch panel.**

For details, refer to ["4.2 Administrator Login" \(page 72\)](#).

2. **When using the touch panel, select [Advanced] for the setting mode on the [Admin Menu] window.**

For details, refer to ["4.3.1 Configuring the Setting Mode" \(page 77\)](#).

3. **On the [Network Advanced Settings] window under [Network Settings], set the IPv6 function to [On].**

For details, refer to ["4.7.7 Configuring Network Advanced Settings" \(page 108\)](#).

■ Configuring an IPv6 Communication Environment

1. **An administrator logs in to the scanner via the Admin Tool or the touch panel.**

For details, refer to ["4.2 Administrator Login" \(page 72\)](#).

2. **Configure the network settings.**

3. **After you have configured all items, press the [Logout] button.**

■ Using the Office Functions via IPv6

1. A regular user logs in to the scanner via the touch panel.

For details, refer to ["5.3 Logging in: Regular User Mode" \(page 227\)](#).

2. Specify a server that is configured for the IPv6 communication environment and perform a scan.

G.2.2 Linked Server

The following table shows whether or not the IPv6 address can be used for setting linked servers and for accessing the scanner when the IPv6 function is enabled.

Item		IPv4 Address	IPv6 Address	Remarks
Administrator settings	IPv4 Address	Yes	Not supported	The [IP Address] window is switched to the [IPv4 Address] window.
	IPv6 Address	Not supported	Yes	The [IPv6 Address] window is added.
	DNS Server (IPv4)	Yes	Not supported	The [DNS Server] window is switched to the [DNS Server (IPv4)] window.
	DNS Server (IPv6)	Not supported	Yes	The [DNS Server (IPv6)] window is added.
	NTP Server	Yes	—	
	Proxy Server	Yes	Yes	
	SNMP Settings	Yes	—	
	Ping	Yes	Yes	
	Network Status	Yes	Yes	The information related to IPv6 is added.
	Scanner Central Admin Server	Yes	—	
	Login LDAP Server	Yes	Yes	
	e-Mail LDAP Server	Yes	Yes	
SMTP Server	Yes	Yes		

Item		IPv4 Address	IPv6 Address	Remarks
Administrator settings	FAX Server	Yes	Yes	The full domain name that corresponds to IPv6 can be specified subsequent to @ in the e-mail address for the FAX server. Note that an IPv6 address cannot be specified subsequent to @ in the e-mail address.
	Network Folder	Yes	Yes	An IPv6 address can be specified if it is entered directly.
	FTP Server Folder	Yes	Yes	An IPv6 address can be specified in the path of the FTP server folder.
	SharePoint Folder	Yes	Yes	An IPv6 address can be specified in the URL.
	Network Printer	Yes	Yes	An IPv6 address can be specified if it is entered directly.
	Alert Notification	Yes	Yes	The full domain name that corresponds to IPv6 can be specified subsequent to @ in the e-mail address. Note that an IPv6 address cannot be specified subsequent to @ in the e-mail address.
Admin Tool	Login window	Yes	Yes	
User Editor	Login window	Yes	—	
Internet Explorer	Login window that is used to connect the computer to N7100	Yes	Yes	

Yes: Can be used. —: Cannot be used.

G.2.3 Port Number List

Function	From/To	Port Number	Protocol Number
DHCP (Address Auto-configuration)	Scanner ⇌ DHCP server	546 (DHCPv6)	17 (UDP)
Ping	Scanner ⇌ Another computer or server	None	58 (IPv6-ICMP)

G.3 Configuring IPv6 Communication Environment

If you set [IPv6 Function] to [On] on the window that is displayed when [Network Advanced Settings] under [Network Settings] is selected, the menu that is displayed on the window is switched to the menu that supports the enabled IPv6 function so that the settings related to IPv6 can be specified.

This section describes the windows with the setting items that are changed when the IPv6 function is enabled.

- ["G.3.1 Giving the Scanner an IPv4 Address" \(page 463\)](#)
- ["G.3.2 Giving the Scanner an IPv6 Address" \(page 464\)](#)
- ["G.3.3 Setting the DNS Server \(IPv4\)" \(page 466\)](#)
- ["G.3.4 Setting the DNS Server \(IPv6\)" \(page 467\)](#)
- ["G.3.5 Checking the Network Operating Status" \(page 468\)](#)

G.3.1 Giving the Scanner an IPv4 Address Touch Panel Admin Tool

An IPv4 address must be set in order to connect the scanner to a network.

1. Select [IPv4 Address] under [Network Settings].

⇒ The [IPv4 Address] window appears.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

HINT

- If the IP address is the same as one already in use, network communication problems will occur. In this case, try the following steps:
 1. Disconnect the LAN cable.
 2. Press the [Shutdown] button on the touch panel to turn the scanner off.
 3. Press the power button to start the scanner with the LAN cable disconnected.
 4. Enter a non-duplicated IP address.
 5. Re-connect the LAN cable to the scanner.
- The connection with the scanner is lost if the IP address is changed via the Admin Tool. To continue with other settings, close the Admin Tool and then access the scanner via the Admin Tool again. If you access the scanner with an IP address, use the new IP address.

G.3.2 Giving the Scanner an IPv6 Address Touch Panel Admin Tool

An IPv6 address must be set in order to connect the scanner to a network.

1. Select [IPv6 Address] under [Network Settings].

⇒ The [IPv6 Address] window appears.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

HINT

- If the IP address is the same as one already in use, network communication problems will occur. In this case, try the following steps:
 1. Disconnect the LAN cable.
 2. Press the [Shutdown] button on the touch panel to turn the scanner off.
 3. Press the power button to start the scanner with the LAN cable disconnected.
 4. Enter a non-duplicated IP address.
 5. Re-connect the LAN cable to the scanner.
- The connection with the scanner is lost if the IP address is changed via the Admin Tool. To continue with other settings, close the Admin Tool and then access the scanner via the Admin Tool again. If you access the scanner with an IP address, use the new IP address.
- The information that is distributed when [Auto] is selected for the IPv6 address configuration method, or when [Manual] is selected for the IPv6 configuration method and [On] is selected for the RA reception is as follows:
 - DHCP
 - IP Address
 - DNS
 - DNS Suffix
 - RA
 - Subnet prefix length
 - Default Gateway

G.3.3 Setting the DNS Server (IPv4) Touch Panel AdminTool Central Admin Console

A primary DNS and secondary DNS can be set.

1. Select [DNS Server (IPv4)] under [Network Settings].

⇒ The [DNS Server (IPv4)] window appears.

The screenshot shows the 'DNS Server (IPv4)' configuration window. The left sidebar lists various network settings, with 'DNS Server (IPv4)' selected. The main area contains the following fields:

- Primary DNS: 0 . 0 . 0 . 0
- Secondary DNS: 0 . 0 . 0 . 0
- DNS Dynamic Update: Off
- DNS Suffix: (empty text box)
- FQDN: (empty text box)
- Priority Setting: IPv4 (dropdown menu)

At the bottom right, there is a blue 'OK' button. At the bottom left, there is a 'Logout' button.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

G.3.4 Setting the DNS Server (IPv6) Touch Panel AdminTool Central Admin Console

A primary DNS and secondary DNS can be set.

1. Select [DNS Server (IPv6)] under [Network Settings].

⇒ The [DNS Server (IPv6)] window appears.

The screenshot shows the 'DNS Server (IPv6)' configuration window. The left sidebar contains a list of network settings, with 'DNS Server (IPv6)' selected. The main area contains the following fields and controls:

- Primary DNS:** An empty text input field.
- Secondary DNS:** An empty text input field.
- DNS Dynamic Update:** A toggle switch set to 'Off'.
- DNS Suffix:** An empty text input field.
- FQDN:** A text input field containing the value '10.10.100.100:100:100:100:100:100'.
- Priority Setting:** A dropdown menu currently set to 'IPv4'.

At the bottom right of the window is a blue 'OK' button. At the bottom left is a 'Logout' button. The top of the window shows the breadcrumb 'Network Settings > DNS Server (IPv6)' and a help icon.

2. Specify each item.

3. Press the [OK] button.

⇒ The information entered is set.

G.3.5 Checking the Network Operating Status Touch Panel AdminTool

The operating status of the network can be checked.

If the information is not shown, the network may not be operating normally. Refer to "7.2 Network Connection Troubleshooting" (page 371), and check the settings.

1. Select [Network Status] under [Check Network Status].

⇒ The [Network Status] window shows the status of the currently operating network connection.

HINT

- If connection to LDAP server is not possible, try the following steps:
 1. Disconnect the LAN cable.
 2. Press the [Shutdown] button on the touch panel to turn the scanner off.
 3. Press the power button to start the scanner with the LAN cable disconnected.
 4. Enter a non-duplicated IP address.
 5. Re-connect the LAN cable to the scanner.
- Depending on the IP address configuration method, the network settings that are displayed when connection to the DHCP server is not possible vary as follows:
 - When [DHCP] is selected for the IPv4 address configuration method, "169.254.X.X" is displayed for the IPv4 address (X can be any number from 0 to 255).
 - When [Auto] is selected for the IPv6 address configuration method, or when [Manual] is selected for the IPv6 configuration method and [On] is selected for the RA reception, nothing is displayed in [Value] for the IPv6 address (DHCPv6). When there is no RA, nothing is displayed in [Value] for the IPv6 address (RA).

G.4 Using the Settings of the IPv6 Function for the Scanner in Other Scanners

G.4.1 Distributing System Settings from the Central Admin Server

The following table shows the status of each setting item when system settings are distributed from the Central Admin Server to N7100 that is updated to support IPv6 (01.07.01 or later).

	N7100 Updated to Support IPv6
IPv6 Function	—
DNS Server (IPv4)	Yes
DNS Server (IPv6)	—
Other Setting Items	Yes(*)

Yes: Applied —: Not applied

(*): An IPv6 address can not be specified directly. Configure the settings with a host name or FQDN.

G.4.2 Backing-up and Restoring System Settings

The following tables show whether or not backed-up system settings of N7100 that is updated to support IPv6 (01.07.01 or later) and backed-up system settings of N7100 that is not updated to support IPv6 (lower than 01.07.01) are restored to other scanners.

Backed-up Data	N7100 Updated to Support IPv6: IPv6 Function Enabled		
	N7100 Updated to Support IPv6		N7100 Not Updated to Support IPv6
	IPv6 Function Enabled	IPv6 Function Disabled	
IPv6 Function	Enabled	Enabled	—
IP Address (IPv4)	Yes	Yes	—
IP Address (IPv6)	Yes	Yes	—
DNS Server (IPv4)	Yes	Yes	—
DNS Server (IPv6)	Yes	Yes	—
Other Setting Items	Yes	Yes	—

Yes: Restorable —: Not Restorable

Backed-up Data	N7100 Updated to Support IPv6: IPv6 Function Disabled		
	N7100 Updated to Support IPv6		N7100 Not Updated to Support IPv6
	IPv6 Function Enabled	IPv6 Function Disabled	
IPv6 Function	Disabled	Disabled	—
IP Address (IPv4)	Yes	Yes	Yes
IP Address (IPv6)	Yes(*)	Yes(*)	—
DNS Server (IPv4)	Yes	Yes	Yes
DNS Server (IPv6)	Yes(*)	Yes(*)	—
Other Setting Items	Yes	Yes	Yes

Yes: Restorable —: Not Restorable

(*): Since the settings in which the IPv6 function is disabled are restored, IPv6 information is not restored.

G.4 Using the Settings of the IPv6 Function for the Scanner in Other Scanners

Backed-up Data	N7100 Not Updated to Support IPv6		
Restored to	N7100 Updated to Support IPv6		N7100 Not Updated to Support IPv6
	IPv6 Function Enabled	IPv6 Function Disabled	
IPv6 Function	Disabled	Disabled	—
IP Address (IPv4)	Yes	Yes	Yes
IP Address (IPv6)	—	—	—
DNS Server (IPv4)	Yes	Yes	Yes
DNS Server (IPv6)	—	—	—
Other Setting Items	Yes	Yes	Yes

Yes: Restorable —: Not Restorable

Glossary

ADF (Automatic Document Feeder)

A unit that allows the user to scan a number of pages consecutively. Documents are transported from the ADF paper chute past the scanning area to the stacker. Actual scanning is performed by the CCD sensors inside of this unit.

Brake roller

A roller that separates each sheet of documents loaded in the ADF paper chute.

Brightness

The brightness level of a scanned image.

Carrier Sheet

A Carrier Sheet is a plastic sheet specifically used for loading non-standard documents onto the scanner.

Document Sensor

Paper feeding errors such as multifeed and paper jam are detected by monitoring the passing of documents.

Duplex scan mode

A scan mode where both sides of each document sheet are scanned. See also "Simplex scan mode".

Eject roller

Rollers that feed documents in the ADF to the stacker.

Feed roller

Rollers that feed documents through the ADF.

Gamma

A unit which indicates the changes in the brightness of an image. It is expressed as a function of the electric input power to devices (e.g. scanner, display) and the brightness of the image. If the gamma rate is larger than 1, the brightness of an image increases and vice versa. Normally, the gamma rate is set to 1 when reproducing the same brightness as the original.

Idler roller

Rollers that feed documents through the ADF.

Interface

The connection that allows communication from the computer to the scanner.

Landscape orientation

A document with its long side horizontal and its short side vertical.

MMR

ITU-T (CCITT) T.6 compression.

A compression method used when the image mode is set to [Black & White] on the scan settings window.

Moire

Recurrent patterns on scanned images that can occur when documents that have regular alternation in shading such as a document with a lattice pattern are scanned.

Multifeed detection

A scanner function which detects accidental feeding of multiple sheets into the ADF.

Noise

Isolated white (black) dots appearing on black (white) areas of an image.

Paper jam

A warning that appears when a document sheet is jammed in the document feed path, or document feeding is interrupted by a slipping sheet.

Pick roller

A set of rollers which guide documents from the ADF paper chute to the stacker.

Portrait orientation

A document with its long side vertical and its short side horizontal.

Simplex scan mode

A scan mode where only one side of each document sheet is scanned. See also "Duplex scan mode".

Threshold

The value which is used to determine whether a certain color is black or white. Threshold value must be configured in order to scan images with grayscale gradation. Each pixel is converted into black or white according to the specified value.

Ultrasonic sensor

A type of sensor that uses ultrasonic sound waves, in this case to detect document multifeeds by recognizing differences in how the sound penetrates single versus multiple sheets.

About Maintenance

Contact your FUJITSU scanner dealer or an authorized FUJITSU scanner service provider for repairs to this product.

For more details, refer to the following web page:

<http://imagescanner.fujitsu.com/warranty.html>

ATTENTION

For safety reasons, never attempt repairs by yourself.
