Image Scanner

RICOH N7100E Datasheet

☑ Scanner

Equipped with network features to make information sharing easier than ever

With the functionality of many devices, yet the simplicity of one, the N7100E network scanner contains the qualities organizations of all sizes desire to improve business processes. Scanning speeds are a consistent 25 ppm/50 ipm (A4 landscape 200/300 dpi) with a 50 sheet loading capacity.

Easy stand-alone network operation with a large display

Operators no longer need a computer to scan, save or send data using the N7100E. Digitizing or editing documents, storing scans to network directories, and sending data via email attachment can all be completed with simple operation of the large touch screen and on-screen keyboard. Without the computer add-on, operations remain simple and easy, so that minimal operator training is required and there is no need for computer maintenance.

Customize for secure group use

Administrators can customize the touch panel job menu and scan settings to suit the work of a specific user or registered user group. In this way, adminstrators can control what each operator can do and customize a single unit to function as a terminal, exclusive to each operator. Shared use always comes with its share of risks but N7100E provides numerous security measures to ensure complete data protection. Not only does the

scanner implement verification before scanning but it ensures automatic data encryption during processing and data deletion after scanning.

Fit all unique needs with ultimate customization functionalities

User applications can also be integrated into the scanner as add-in software using the exclusive SDK (for Windows). Added applications are displayed on the job menu.

Versatile range of use from SOHO to large enterprises

Whether at small office networks or large enterprises, N7100E easily satisfies the digitizing needs of networks using file or e-mail servers. Designed to be shared among multiple users, it also offers administration functions that allow administrators to individually or collectively set up and manage a vast network of units from a single console. The Admin Tool function allows administrators to adjust running environment settings one scanner at a time. And the Scanner Central Admin enables collective monitoring and managing of scanner usage, settings and much more for multiple units. Thanks to the open USB port, operators can connect keyboards and other USB devices such as ID card readers, so that the unit can function as a flexible terminal for any work environment.

RICOH N7100E

Network Interface		10BASE-T, 100BASE-TX, 1000BASE-T			
Network Protocols		TCP/IP (IPv4 / IPv6*15), DHCP (IPv4 / IPv6*15), SMTP,			
		SMB, LDAP, LDAPS, NTP, FTP, FTPS, HTTP, HTTPS			
Power Requirements		AC 100 to 240 V ±10 %			
Power Consumpti	on				
Operating Mode		38 W or less			
Energy-saving Mode		2 W or less*16			
Power Off Mode		0.3 W or less			
Operating Environ	ment				
Temperature		5 to 35 °C (41 to 95 °F)			
Relative Humidity		20 to 80% (non-condensing)			
Environmental Compliance		ENERGY STAR®, ROHS			
					Display
LCD		8.4 in. XGA (1,024 x 768 pixels) TFT color monitor			
Touch Screen		Analog resistive touch screen			
Keyboard		Software keyboard			
Dimensions*17		300 x 232 x 172 mm (11.8 x 9.1 x 6.8 in.)			
(Width x Depth x					
Height)					
Weight		6 kg (13 lb)			
Included Items		AC cable, AC adapter, LAN cable, Getting Started			
Options					
Carrier Sheets	PA03360-0013		Each package contains 5 carrier sheets		
Consumables					
Roller Set	PA03706-0001		Every 200,000 sheets or one year		
Cleaner F1	Cleaner F1 PA03950-0352		100 ml bottle for Roller cleaning		

1 pack (24 sheets) for Roller cleaning

1 pack (10 sheets) for use with Cleaner F1

*1 Scanning speeds may vary due to the system environment. For details, please visit our website at: https://www.pfu.ricoh.com/global/scanners/fi/. *2 Indicated speeds are from using JPEG compression. *3 Indicated speeds are from using IFF CCITT Group 4 compression. *4 Selectable maximum resolution may vary depending on the length of the scanned document. Carrier Sheet scanning supports scanning at resolutions of up to 300 dpi. *5 Use the printer driver for Windows 10 (64bit). *6 Scans folded documents of up to 297 x 432 mm (11.7 x 17 in.) with carrier sheet scanning. *7 Capable of scanning documents longer than 863 mm (34 in.) in length when scanning in 200 dpi or below. Some limitations may apply to the size of documents that can be scanned, depending on system environment, when scanning in high resolution (over 600 dpi). *8 Thicknesses of up to 127 to 209 g/m² (34 to 56 lb) can be scanned for A8 (52 x 74 mm / 2.1 x 2.9 in.) sizes. *9 Capable of scanning embossed cards, one at a time. *10 Maximum capacity depends on paper weight and may vary. *11 Capable of setting additional documents while scanning. *12 Numbers are calculated using scanning speeds and typical hours of scanner use, and are not meant to guarantee daily volume or unit durability. *13 Visit the fi Series website for details on N7100E compatible server types. https://www.pfu.ricoh.com/global/scanners/fi/n7100e/. *14 Authentication databases are locally stored and limited to one per scanner. User information is registered in databases from the User Editor application. *15 Visit the fi Series website for more information about supported protocols. *16 Power consumption varies depending on region. *17 Excludes the ADF paper chute and stacker.
