

## How to confirm that updates have been successfully installed

### 1. For ScandAll PRO Lite update

Select [Version information] from the ScandAll PRO Lite “Help” menu to bring up the “About ScandAll PRO Lite” window. If the installed software version reads “ScandAll PRO Lite V1.0 Update9”, then the installation was successful.

### 2. For ScandAll PRO SharePoint® Server update

Under “Add or Remove Programs” of the control panel, search for and select “Fujitsu ScandAll PRO – SharePoint® Server”. Then click [Click here for support information] which brings up the window shown below. Confirm that the installed version reads “1.0.8.0103”.

Note:

The following screen is from Windows Server® 2008 R2.
