Use in High-Safety Applications

 This product has been designed and manufactured on the assumption that it will be used in office, personal, domestic, regular industrial, and general-purpose applications. It has not been designed and manufactured for use in applications (simply called "high-safety applications" from here on) that directly involve danger to life and health when a high degree of safety is required, for example, in the control of nuclear reactions at nuclear power facilities, automatic flight control of aircraft, air traffic control, operation control in mass-transport systems, medical equipment for sustaining life, and missile firing control in weapons systems, and when provisionally the safety in question is not ensured.
 The user should use this product with adopting measures for ensuring safety in such high-safety applications. PFU LIMITED assumes no liability whatsoever for damages arising from use of this product by the user in high-safety applications, and for any claims or compensation for damages by the user or a third party.

---

1. Cautions Concerning Installation

For details about supported operating systems, refer to "System Requirements" in the Operator's Guide or Basic Operation Guide of your ScanSnap model.

Log on as a user with Administrator privileges first, then install.

---

2. Cautions Concerning Uninstallation

Quit the CardMinder application before uninstalling.

----
 3. Other Cautions

 # For recognition of Chinese or Korean business cards, ScanSnap Manager
    must be installed.

 # The [Application] button on the toolbar does not appear right after installation.
    Add the button from [Customize Toolbar...].

----
 4. Change from the previous version

 # Changes from V5.1L10 to V5.1L20

    The main change is as follows.

    - Fixed the error where e-mail addresses with a domain name of ".com" which
    is followed by a string may not be partly recognized.

 # Changes from V5.0L13 to V5.1L10

    The main change is as follows.

    - A new function has been added to manage card data folder by folder.

    - A modification has been made so that the [Select Group] window appears
    even when Leads, Accounts, and Contacts are disabled during Salesforce
    CRM linkage.

 # Changes from V5.0L11 to V5.0L13

    The main change is as follows.

    - Modified the error where the message "Loading card image..." keeps
    appearing and duplex scanning may not end while you attempt to end it.

    - Modified the error where an error message appears or CardMinder does not
    link with Salesforce CRM correctly when you specify Salesforce CRM
    linkage.

 # Changes from V5.0L10 to V5.0L11

    The main change is as follows.

- Modified the error where the message [Unable to perform recognition.(94)] appears when you perform recognition and recognition fails.
