Use in High-Safety Applications

 This product has been designed and manufactured on the assumption that it will be
used in office, personal, domestic, regular industrial, and general-purpose
applications. It has not been designed and manufactured for use in applications
(simply called "high-safety applications" from here on) that directly involve danger
to life and health when a high degree of safety is required, for example, in the
control of nuclear reactions at nuclear power facilities, automatic flight control of
aircraft, air traffic control, operation control in mass-transport systems, medical
equipment for sustaining life, and missile firing control in weapons systems, and
when provisionally the safety in question is not ensured.
 The user should use this product with adopting measures for ensuring safety in
such high-safety applications. PFU LIMITED assumes no liability whatsoever for
damages arising from use of this product by the user in high-safety applications,
and for any claims or compensation for damages by the user or a third party.

----
 1. Cautions Concerning Installation

For details about supported operating systems, refer to "System Requirements" in
   the Basic Operation Guide of your ScanSnap model.

Log on as a user with Administrator privileges first, then install.

Install ScanSnap Organizer with the latest ScanSnap Manager version installed.

----
 2. Cautions Concerning Uninstallation

Quit the ScanSnap Organizer application before uninstalling.

----
 3. License Agreement for Built-in Software

  # ScanSnap Organizer contains the following built-in software.

    - Google APIs Client Library for Objective-C

      License agreement: http://www.apache.org/licenses/LICENSE-2.0

----
  4. Updated Features

  # Modifications from V1.2L20 to V1.2L30

    Modified the following errors:

    - B&W images are occasionally displayed in reverse on the [Book Image Viewer]
    screen. In addition, the black and white colors may be reversed when a corrected
    B&W image is saved in the [Book Image Viewer] window.

    - B&W images are occasionally displayed in reverse on the [Remove Newspaper
    Background Color] window.

    - Files are not stored in Evernote on macOS Sierra.

  # Modifications from V1.2L10 to V1.2L20

    - Additional languages are available for converting files into searchable PDF.To
    add these languages, you need to install the OCR Pack that includes the language
    you want to use from Online Update first.

    - Modified the error where ScanSnap Sync option cannot connect to OneDrive.

    - The icon designs have been changed.

  # Modifications from V1.1L50 to V1.2L10

    - ScanSnap Sync has been added. ScanSnap Sync allows you to use the images
    scanned with ScanSnap anywhere at any time with a cloud service to automatically
    sync the data between ScanSnap Organizer and ScanSnap Connect Application in
    your mobile device.

    - Modified the program so that the save destination for the images scanned with
    ScanSnap Manager can be changed.

    - Modified the program so that any files added to a subfolder can be converted into
    PDF files automatically.

    - The linked application name [Scan to Google Docs(TM)] has been changed to
    [Scan to Google Drive].

- A new option has been added so that files can be saved to CardMinder.

Modifications from V1.1L40 to V1.1L50

- A new option has been added so that files can be saved to Photos.

- Page Merger is supported on PDF version 1.4.

Modifications from V1.1L32 to V1.1L40

- Modified the error that occurs when ScanSnap Organizer links with [Searchable PDF Converter] or [iPhoto].

- Modified the error where PDF file merging is not successful with [Merge Pages].

Modifications from V1.1L30,V1.1L31 to V1.1L32

- Modified to support Google's new authentication and uploading methods.

Modifications from V1.1L21 to V1.1L30

- A new feature has been added to remove the background color from the newspaper image scanned with the ScanSnap model which supports book scanning.

- A new feature has been added to correct horizontal skews of text, lines and graphics when the book image data is corrected in Book Image Viewer.

- A modification has been made so that point-retouched results can be applied to the original scanned image of "flat document" in Book Image Viewer.

- OS X Yosemite is now supported.

Modifications from V1.1L20 to V1.1L21

- Modified the error where the Help may not be displayed.

Modifications from V1.0L10 to V1.1L20

- A new option has been added to manage scanned images in a folder unit.

- A modification has been made so that files can be arranged in a list.

- A new option has been added to export scanned images to various applications.

- A modification has been made so that images merged by Page Merger can be overwritten.
