# Use in High-Safety Applications

This product has been designed and manufactured on the assumption that it will be used in office, personal, domestic, regular industrial, and general-purpose applications. It has not been designed and manufactured for use in applications (simply called "high-safety applications" from here on) that directly involve danger to life and health when a high degree of safety is required, for example, in the control of nuclear reactions at nuclear power facilities, automatic flight control of aircraft, air traffic control, operation control in mass-transport systems, medical equipment for sustaining life, and missile firing control in weapons systems, and when provisionally the safety in question is not ensured.

The user should use this product with adopting measures for ensuring safety in such high-safety applications. PFU LIMITED assumes no liability whatsoever for damages arising from use of this product by the user in high-safety applications, and for any claims or compensation for damages by the user or a third party.

---

1. System Requirements

---

# For details about the system requirements, refer to "System Requirements" in the Basic Operation Guide of your ScanSnap model.

---

2. Cautions Regarding USB and Your Computer

---

- # Be sure to use the bundled USB cable for connecting ScanSnap to your computer.
- # Be sure to wait at least five seconds before re-inserting the USB interface cable. If the USB cable is re-inserted immediately after it is disconnected, ScanSnap may not function properly.

---

### 3. Cautions Concerning Installation

---

- # Log on as a user with Administrator privileges first, then install.
- # Profiles other than [Standard] will NOT be added to the "Profile" pop-up menu if ScanSnap Manager has already been installed. If you need to add other profiles, refer to the section on default settings in Help.

---

### 4. Cautions Concerning Uninstallation

---

- # Quit ScanSnap Manager before uninstallation.
- # If ScanSnap Manager is started up automatically when you are logged into Mac OS, delete [ScanSnap Manager] from [Login Items].  
To display [Login Items], select [System Preferences] -> [Users & Groups] -> [Current User].

---

### 5. Other Cautions

---

- # Only one ScanSnap can be connected at once. Exceptionally, you can use SV600 together with one of the following ScanSnap models: iX1500 / iX100 / iX500 / S1500 / S1500M / S1300i / S1300 / S1100i / S1100
- \* Before use, make sure that specification of your computer satisfies the system requirements for your ScanSnap models.
- # Do not perform the following during scanning or while the ScanSnap's lamp is stabilizing. The system may become unstable.
  - Inserting or disconnecting the USB cable connected to ScanSnap

- Turning ScanSnap on or off
- Uninstalling ScanSnap Manager
- Logout, reboot, shutdown

# If the computer enters power saving mode during scanning, communication with the ScanSnap may not be successful upon resuming from power saving. In that case, select [Energy Saver] from [System Preferences] and specify [Never] for [Computer sleep] and try again.

# Communication with the ScanSnap may not be successful when the computer resumes from power saving mode, or when you log out or switch the user. In that case, turn the ScanSnap off then back on, and try again.

---

## 6. License Agreement for Built-in Software

---

# ScanSnap Manager contains the following built-in software.

- Google APIs Client Library for Objective-C

License agreement: <http://www.apache.org/licenses/LICENSE-2.0>

- Google Data APIs Objective-C Client Library

License agreement: <http://www.apache.org/licenses/LICENSE-2.0>

---

## 7. Change from the previous version

---

# Changes from V7.0L20 to V7.0L30

- A modification has been made to support macOS Big Sur v11.0.
- A modification has been made to support ScanSnap Page Merger, a function to convert PDF files created from scanned documents into searchable PDF files, and the following cloud linkage applications.

[Cloud linkage applications]

- Scan to Dropbox
- Scan to Evernote (Document)
- Scan to Evernote (Note)
- Scan to Google Drive
- Scan to Salesforce Chatter
- Scan to SugarSync
